Having been on the treaties for 27 days already, we would still be on them tomorrow, that would mean we would have been on the treaties 37 or 38 days before reaching a vote on this second treaty.

So I hope that Senators will accept what I have said in the spirit in which I say it. I do not speak in criticism of anyone. I understand how strongly the opponents feel about the treaty.

But there has to come a time when we close the debate on this treaty and go on to other things. It seems to me it is only reasonable on the part of the leadership to ask those Senators who oppose the treaty if they would please get together during the afternoon, or tomorrow morning, and see if they cannot give the leadership an agreement so that that agreement can be announced and Senators can proceed to take the time off that was originally laid out by the joint leadership.

I want to bend over backwards. I want to be fair. I want to be reasonable. But I think that in return all the Members of the Senate are being discommoded when they cannot be given a definite time now, after 27 days of debate, on which we can reach a final vote.

The Senate itself is being discommoded We have other legislation. There are deadlines that have to be reached in connection with some of the legislation.

I would hope and I implore and beseech the opponents to continue in their efforts.

I want to thank Senator LAXALT. He has made efforts, very sincere efforts, he and others, to arrive at a time certain.

So I would just simply urge him to continue to try today and tomorrow, because, if we can reach an agreement tomorrow, then the Senate can resort to the alternative of reconvening on April 3. It will not be too late to do it tomorrow. But I will have to get the resolution up today because the House is waiting on it. The House is ready to adjourn.

Before calling up the resolution, I would be glad to yield to the distinguished minority leader.

Mr. BAKER. Mr. President, nothing, I suppose, in the nature of the leadership is more sacrosanct than the right of the majority leadership to set schedules for the Senate. However, as the majority leader knows I am really concerned about the possibility that we might abbreviate the Easter recess—not because it will discommode me. It will do that. But I am perfectly prepared to be here at whatever time and all the time the Senate is in session. I am concerned because of the fact that the people on this side of the aisle—and I am sure those on the other side of the aisle—have come to depend on the published schedule and have made their plans and representations in reliance on it.

I hope very much that the majority leader will consider any other alternative and other facts that could lead us to a reconciliation and a resolution of this problem without abbreviating the recess.

I urge that the opponents of the treaty and the proponents of the treaty and the distinguished majority leader try to arrive at some solution to this dilemma. Otherwise, I think it will cause an enormous hardship on Members of the Senate on both sides of the aisle. I urge that we try to find a solution to it.

I do believe, Mr. President, that we should go ahead with the full recess. I must respectfully disagree with the majority leader in that respect. While we are on the same side with reference to the ratification of these treaties, I find that we do not agree on this particular item.

I urge that we try to find a way out of this dilemma, to remove the possibility that the recess will be abbreviated.

Mr. ROBERT C. BYRD. I thank the distinguished minority leader. I appreciate everything he has said. I realize that to bobtail the recess would discommode Senators on both sides of the aisle. I know that no Senator needs me to say that our first responsibility, I think, is to attend to the business of the Senate. I think the Senate would be severely criticized if, after spending 28 days on the treaties, it proceeds to take 10 days off, knowing that when we get back, we have no agreement as to a final vote and that we have no way of knowing how long the debate is going to continue, with important legislation backed up, committees being hampered in their operations, with other legislative matters scheduled far down the road, and keeping in mind that it is hoped that the Senate can close down a scant month before the election in November.

So I think the Senate would be severely criticized—and it would be justifiable criticism—if the leadership took off 10 days, without an agreement as to a final vote.

I am very sorry, Mr. President. If Senators want to blame anybody, I will take my share of the blame. But I have diligently sought to get an agreement. I hope

the opponents will rise to this occasion and help the leadership to get an agreement, so that not only they but also their colleagues will not be discommoded.

I cannot—as majority leader, I simply cannot—say that we are going to go out until April 3, unless we get an agreement, and I will not say that. I just cannot see that as my responsibility. I have to have an agreement, or we will have to call the Senate back next Wednesday. That discommodes me, too, but I see no alternative.

I am perfectly willing to continue to work today and tomorrow, in the effort to get an agreement. But I think it is about time that we agreed on a target date for a final vote. I do not believe that is unreasonable at all, after all the time we have spent on these treaties. I think the American people want to see us get this issue behind us one way or the other.

If the opponents win, that is fine with me. But let us have a showdown; let us have a vote. If the proponents win, that is fine with me. I happen to be a proponent. I think the American people are entitled to have their business consummated in the Senate, and I do not think they want to see the Senate stay on and on and drone on and on with respect to these treaties.

I have had my say.

Mr. LAXALT. Mr. President, will the Senator yield?

Mr. ROBERT C. BYRD. I yield.

Mr. LAXALT. Mr. President, I would like nothing better, representing the opposition, than to be able to comply with the majority leader's request. But I have consulted with several of my colleagues during the course of the last couple of days, and I simply am not prepared to enter into any firm time agreement at this time.

The fact is that, upon evaluation of the entire subject matter, we have had extensive debate here, but there are vital areas in connection with the canal treaty that we really have not touched. We really have not dug in detail into the administration aspects in connection with the Commission. We certainly have not dug into the economic aspects in connection with the payment schedule.

Above all that, our problem is a mechanical one. If I could offer the majority leader a time agreement today, I would, because, as I have indicated to him, I want the debate to be expedited; I want this matter to be concluded. I think all the colleagues in opposition share that view. But at this point, from the standpoint of pure mechanics, we are not prepared to do that.

The fact is that we presently have in the works, among opposition Senators, major amendments to the canal treaty, some in the nature of a substitute, which are going to take some time to prepare. They would like the period during the recess to do that. When that is done, we will sit down and evaluate how much time is going to be required to process those amendments adequately.

My own view, I say to the majority leader, is that, in all probability, upon returning here from the recess, we can conclude this matter by April 14 or so—perhaps before. But I cannot, in this position, at this point, much as I would like to settle upon a firm time agreement, make such an agreement.

I ask the majority leader, in terms of what the minority leader said, to preserve the recess. Plans have been made by many Senators to go back to their constituencies—it is not any form of vacation—and do their public service, see how the people have reacted to their votes on the canal treaty.

Then we will come back, and as soon as I have an opportunity to develop these amendments, I assure the majority leader that we can sit down and arrive at a time agreement. Until that point, I do not think we will be able to do that.

Mr. GRIFFIN. Mr. President, will the Senator yield?

Mr. ROBERT C. BYRD. I yield.

Mr. GRIFFIN. Mr. President, I should like to supplement what the Senator from Nevada has said.

I think it important that everyone realizes, particularly the American people who have been listening to the Senate debate, that it requires unanimous consent of the Senate to impose such a time agreement. It is not just a matter of the leadership, of the opposition, or a majority vote of the opposition.

If there is one Senator out of a hundred who will not go along with a time agreement, then obviously we cannot impose the restriction that the distinguished majority leader seeks.

I, for, one, will say that I am in the opposition group, but I would favor the proposal of the distinguished majority leader. However, that leaves us a long way from having the unanimous consent of a hundred Senators.

Mr. McCLURE. Mr. President, will the Senator yield?

Mr. LAXALT. I yield.

Mr. McCLURE. Mr. President, there is no one who is aware of the burdens of scheduling the matters before the Senate who cannot sympathize with the problem that the Senator from West Virginia is confronted with in trying to expedite this matter and others. I think there is a great deal of sympathy with that problem on the part of the vast majority of the Members of the Senate.

However, there is another side to that problem as well, and that is that there are 99 other Senators who also have problems with their own schedules. That is one of the reasons why many of us have pressed for a fixed recess schedule, so that we can attend to some of the work that must be done among the people whom we have the duty to represent here.

The Panama Canal treaties are very important issues. There are, as the majority leader has said, a number of other important issues. I am among those who find it advisable as well as proper that I draw from the experience and the judgment of the people of Idaho in order to assist me and guide me in how I should answer the questions which will be asked us on a number of legislative issues.

I regard the legislative recess schedule as simply a way of allocating our time between the work we do here and the work we do outside of these Chambers. I assure the Senator that I will share with him my fixed schedule for all of next week, starting on Sunday evening and running through the entire week, based upon the firm assurances I have had from the joint leadership over a long period of time that I could make that schedule. I have any number of people and groups of people in my State who have sought to reach me, to tell me what they think should be done. They all cannot come 2,500 miles across the country to reach me here. I try to make myself available to them here.

My schedule next week is full—absolutely full—of firm commitments I have had for weeks, based upon firm commitments made to the Senate that we would be able to do that.

I know from my conversations with the Senator from Nevada that this matter can be expedited as soon as it is possible for Senators who have various amendments to get together and try to work out which ones have to be offered and which ones might be left without being offered.

Mr. LAXALT. Mr. President, will the Senator yield at this point?

Mr. McCLURE. I yield.

Mr. LAXALT. I indicate to the Senator from Idaho as I previously have to the majority leader that we have been in the process on a staff level of attempting to distill and coordinate some 55 amendments, reservations, and understandings we have at the desk. That has been quite successful. I think realistically, I say to the majority leader, looking at it less from the standpoint of what is on the desk, between 20 and 25 amendments. The unanswered questions, I must emphasize again, are the unprinted amendments, which are going to be substantial in nature. They will be drafted as soon as we recess and we will evaluate them when we come back.

Mr. McCLURE. Mr. President, will the Senator yield?

Mr. LAXALT. I thank the Senator from Idaho. I yield.

Mr. McCLURE. I thank the Senator for yielding.

Let me add this: We have yet a half day remaining this week, today, we have Thursday and Friday; that is 2½ days yet this week, and we are talking about coming back on Wednesday of next week in order to gain 3. I suspect if we had a unanimous-consent agreement entered into right now we would end up having no votes on Thursday and Friday, and we would have then given up 2 days in order to avoid giving up 3 next week. The 2 that are being given up this week are where every Senator had reason to expect that we would be here on legislative business. As to the 3 that are affected next week, every Senator had reason to believe we would not be here. So I really most sincerely request of the majority leader that he give sensitive concern to the needs of 99 Members of the Senate, many of whom have very grave commitments and commitments that are very difficult for us individually either to break there or to break here. It is a matter of extreme urgency as far as the Senator from Idaho is concerned because I think it is a part of our job to be there. If we do not have certainty

in scheduling we cannot be there. It goes to the credibility of our process. It goes to the credibility of assurances given to us by the leadership and of our assurances, in turn, to the people of the States that we represent.

I say that in all sincerity and with full recognition of the problems that the majority leader has in trying to expedite the legislative schedule here.

Mr. ALLEN. Mr. President, will the Senator yield?

Mr. ROBERT C. BYRD. Mr. President, there is not a day, not a day, that I am not reminded of the sensitive concerns of the other 99 Senators. I am very well aware of those concerns and if there has ever been a majority leader who has attempted to bend over backward in order to accommodate the needs, problems, and concerns of the other 99 Senators any more than I have I would like for someone to speak up and say that name right here and now. I am aware of the concerns.

I get no satisfaction. I have been wrestling with this very question for several days, and I have been going back and forth to Senators who lead the opposition side, and they know that; and Senator LAXALT has reacted in a very splendid way. He has sought to get an agreement. But this brings me no satisfaction, not any, and I know my colleagues on this side of the aisle, I am sure, do not look upon an abbreviated recess with any joy or satisfaction.

So, let no one be under the impression that I have not already wrestled with this matter, and it has been quite tortuous to me, but I recognize where my duty lies, and I think my duty is right where I have stated.

I do not want to come back in the middle of next week, but if we could go out with an agreement that would say we would vote on April 18, which would be Tuesday, 2 weeks from next Tuesday, that would give Senators all of the recess in which to prepare their amendments. They would have all of the first 2 weeks after the Senate reconvenes on the 3d, and they would have Monday and Tuesday of the third week. It seems to me that is ample time, but we would at least know when the vote is going to occur. So do not hold me responsible alone in this bobtailing of the recess. I am simply trying to get the Senate to move on to other business.

We have been on this matter 27 days, and the arguments have been made and they have been repeated ad nauseam, and they will continue to be repeated. So let us all share this responsibility.

Mr. MUSKIE. Mr. President, will the majority leader yield?

Mr. ROBERT C. BYRD. Do not put the responsibility on the majority leader. The majority leader has to do what he thinks he has to do in order to keep the legislation moving.

So I would hope that the Senator from Nevada (Mr. LAXALT) and his colleagues on his side of the question would continue to discuss this today and tomorrow. We do not have to decide at the moment, but I have laid out a suggestion here that seems to me to be amply reasonable and which would give the opponents plenty of time. We know that the implementing legislation still has to come on. So, this treaty is not the end all. We are going to have implementing legislation in which the House of Representatives will have to vote.

Mr. MUSKIE. Mr. President, will the Senator yield?

Mr. ROBERT C. BYRD. I yield.

Mr. MUSKIE. Mr. President, I did not intend to say anything on this point. But given the number of Senators who have expressed concern about the majority leader's decision, I think he needs some support, and I must say I concur in his decision. I do not intend to repeat any of the reasons of the majority leader, but I wish to add one.

I have been around here many years in which an overriding issue that was very time consuming hit the session, and the result all too often was that we consumed and wasted so much time on that single issue that we gave inadequate attention to the issues that followed, that were thereby crowded into too few days and too few weeks. I have seen that happen too many times with time agreements becoming shorter and shorter and speeches on the floor more and more meaningless.

I understand the importance of these treaties and the importance of giving everyone adequate time to address the issue.

But we have other difficult issues coming down the pike and I for one wish to see those given the kind of adequate attention they have not always gotten when they have followed an issue of this kind that consumed a lot of time. I am concerned about that. I can see some of those issues down the road.

I do not like to give up an Easter recess either. It takes me a little longer to get around my State than it did when I was younger, so I like ample time. But I really think the majority leader is on target. He has indicated he is willing to go to the 13th, 14th, the 18th, and I suspect he would even give a couple more days on top of that in order to get certainty.

Mr. ROBERT C. BYRD. No question about it.

Mr. MUSKIE. And I think that is reasonable.

We are always crowded with legislation. We have to begin markup on the budget resolution on the 4th of April. We must finish that by the 15th. If we did not adopt some time-collapsing procedures we would never get that bill marked up, and we have to cover the whole range of Government programs, $500 billion worth, in a week or more.

But we recognize time is a constraint. We discipline ourselves to live within that constraint and we get our work done or at least we have never failed up to now. It may be more difficult this year. But I really think what the majority leader has been proposing provides ample time to do the kind of thing that the Senator from Nevada is describing as being necessary.

I want to join the majority leader in complimenting Senator LAXALT on his management of this side of the debate. I think he has been responsible, I think he has been decent, and I think he has been accommodating. So I am not being critical.

But I really think we have to discipline ourselves in this case to reach a date certain, and I do not care whether it is the 10th of April or the 20th of April. Certainty will enable us to address all the other problems that we have more effectively and with greater service.

So I join the majority leader, and I do not expect a response to these comments immediately, and I suspect the majority leader does not. But I would hope that all who are involved will take the next day-and-a-half to consider these matters, and this is why I rose to add this one other reason.

Mr. ROBERT C. BYRD. I thank the distinguished Senator from Maine for his fine statement.

Mr. SCOTT. Mr. President, will the Senator yield briefly?

Mr. ROBERT C. BYRD. I yield.

Mr. SCOTT. Mr. President, I was not here when this colloquy began, and yet I believe I grasp the substance of the matter. Let me say for the benefit of the majority leader we have 100 not 99 Senators who need to be accommodated, and I think certainly our distinguished leader, the majority leader, should be included rather than just to refer to 99.

I have heard the objection made, the statement made, that we do not need more than 2 weeks, from among people on this side of the aisle, and some on the other side. I would believe, and certainly it is agreeable with this Senator, but more importantly, it is agreeable with a number of Senators, to have a time limitation if the matter was presented after the recess.

The resentment that I see—and I use the word "resentment" advisedly—is that we set a time that we are going to have recesses, and the schedule was made up a long time ago. The leverage is used of denying us some time off provided we will agree to something, a question of pressure being applied, saying, "You children are not going to get off for a period of time unless you agree to a time limitation."

That is where I see the opposition, and I say that in all candor and in a friendly manner to our distinguished majority leader.

I believe when we come back there will not be the slightest difficulty in a 2-week or thereabouts limitation on debate. I would hope that my distinguished friend from West Virginia might consider that because that is the complaint I have heard, and I am talking just candidly and frankly to the majority leader.

Mr. ROBERT C. BYRD. I appreciate the Senator's candid statement. But I do not think such resentment, if there is any, is justified.

The leadership has not attempted to keep the Senate in late. All Senators know that. The leadership has not attempted to bring the Senate in early day in, day in, and day in. The leadership has sought to give committees an opportunity to meet; did not come in on Saturdays. I have not pressed for Saturday meetings, and there has been no

effort to invoke cloture. As a matter of fact, I have tried to discourage any consideration of a cloture motion, and I do not think that is the way to go in this situation.

Mr. LAXALT. Mr. President, will the Senator yield?

Mr. ROBERT C. BYRD. So the leadership, I think, should be given the benefit of the doubt in a situation like this.

I do not know how Senators can complain about the leadership utilizing what was originally laid out as nonlegislative periods as a threat or as a stick to get an agreement. I do not see how they can say that because, after all, this action that I feel bound to take brings me pain, even more pain than those Senators who have been speaking.

Stand in my shoes, wear my shoes, a little while, and see how you would feel about it.

I need a week off as much as anyone needs a week off. I need that time off as much as anyone needs it off. I also make appointments; I make speeches; I have to run for reelection. I have the same problems that any other Senator has here.

But I wish you would consider the position that the leadership, the joint leadership, is put in when we lay out a schedule.

If in the future we are going to have these kinds of problems—I can remember when we did not lay out nonlegislative periods. There were no periods set aside for Senators to count on. We went out on Thursday night before Good Friday, and we came back in on Monday or Tuesday. There were no nonlegislative periods.

I can remember, and the Senator from Louisiana can, when we did not have a month off every other year in August. Things have come a pretty long way, and I have made my contribution toward the fact that we now have nonlegislative periods.

But I think we are all going to have to share this responsibility. If we have to come back next week on Wednesday do not point to the majority leader. Just say, "Those of us who are opposing the treaties and who would not enter into an agreement, we will share it with him; we share that with him," because I think I would not be unfair in stating if we took that nonlegislative period, some of the opponents would be the very first to criticize the leadership of the Senate for not staying in. That would be the first thing they would say, "Well, they ought to have kept us there. We should have stayed on the job."

Well now, you cannot have it both ways. I am willing to bear the brunt of any criticism, but I will have to say to the American people who are listening that we all share responsibility here to reach a decision on these treaties in due time and get them behind us. I am willing to let the chips fall where they may. If the opposition has the votes, that is the end of it. If the proponents have the votes, that is the end of it, but we do have to get on to other things.

May I just say once again——

Mr. ALLEN. Mr. President, will the Senator yield?

Mr. ROBERT C. BYRD. Yes. The Senator has been seeking the floor, and I will give him the courtesy of yielding.

I do not want to carry the argument any further. I have stated the condition I think the Senate is in. I have stated the reason why we ought to have a time agreement, and I have stated my hopefulness that we will take throughout today and tomorrow and obtain an agreement. I think reasonable men can certainly obtain an agreement by tomorrow that will give all Senators a certain target date.

I do not care—I said the 18th of April a minute ago. I say the 21st of April. That will give the Senate 3 full weeks, and we can come in on Saturdays if the opponents want more time. We can come in on Saturdays during that period. But 3 full weeks—just give us a date, that is all I am asking so that Senators will know how to plan.

You say that Senators—you point to the leadership and you say, "The leadership laid out a schedule. Now, if it bobtails it, it impairs our capabilities of making plans. We cannot make plans with certainty." That is what I am asking for now. Give us a target date so that we can all make plans with certainty, so that we will know the day and hour when we will reach a final decision on this treaty.

Mr. STENNIS. Mr. President, I do not want to reargue anything, but I do feel like perhaps I want to say just a word along this line. There has been no prior discussion with the leader. But as one of many who have been holding a lot of hearings on matters that are to follow this important matter, it seems to me that we ought to follow the leadership here. He has had cooperation from many others, but I think he has handled this thing very skillfully in keeping it going and getting it along. I think we are going to have to make a choice between changing our rules where we will not have the freedom of debate, and so forth, that we have now or tightening up on ourselves more with some self-discipline, and giving the benefit of the doubt to the leadership, if I may express it that way, when they so honestly feel that they should take this course.

I am frank to say I will not be making any sacrifice by staying here, I have a lot of appointments, but many others will. But this is our place of duty. This budget resolution has got to be met. Time is running out on that. There are a lot of matters coming following this. I expect in all other things we ought to follow the leader.

Mr. LAXALT. Mr. President, will the leader yield for just a moment?

Mr. ROBERT C. BYRD. I thank the distinguished Senator from Mississippi, as I thank the distinguished Senator from Maine.

Mr. ALLEN. Mr. President, will the Senator yield?

Mr. ROBERT C. BYRD. I did promise to yield to Mr. ALLEN.

Mr. LEAHY. I wonder if Mr. ALLEN will yield to me for a couple of minutes.

Mr. ALLEN. Yes.

Mr. LEAHY. Go ahead. I will proceed after you complete your remarks. I am perfectly willing to wait.

Mr. ALLEN. I think the Senator.

Mr. President, I say to the distinguished majority leader, whom I admire and respect so much and whose leadership I enjoy following here in the Senate, that I am mindful of the duties and responsibilities and the burdens of the leadership, and even though the distinguished majority leader of necessity has to be in almost daily contact with each Member of the Senate, either directly or through the minority leader, yet I see that the majority leader's position is a lonely one, somewhat like the Presidency; it is a lonely position, and he does come in for criticism as well as praise. That is one of the burdens of the office.

I stated with respect to the other treaty that I felt we could agree on a time certain to vote, and we were able to reach a reasonable agreement that gave satisfaction on all sides, and certainly gave the leadership and the managers of the treaty, and the President himself, I am sure, the opportunity to get sufficient votes to obtain approval of the first treaty.

I believe that there would be no great difficulty in reaching a time agreement—a reasonable time agreement—after we come back from the recess; and I do feel that if we did not have the problem of the recess, we would have no difficulty today in reaching an agreement on a time limitation. But when you mix the two together, when you mix the recess with the demand or the request, shall I say, that we agree to a time limit, that is where we meet considerable difficulty; because if it is said to us that we must reach a time agreement or the recess is to be canceled, or half of it, that is not conducive to reaching an agreement.

I do not care about the recess myself; I would just as soon stay here. I have a full schedule of speeches down in Alabama; I would like to keep it, but that is not important. What is important is whether we are going to be called on, as I see it—others may not see it that way—to sacrifice a principle for the little comfort that is contained in a recess.

We need not have another day's recess, as far as I am concerned, if that is the way it is felt, but I do believe that we should not be called on to agree before we recess on a time limit, or else we will forfeit these days of recess; I just feel like that does not please Senators so very much.

I recognize that the Senate is going to go along with the majority leader; but I do hope that the majority leader will accept the assurances, the sincerity, and the good faith, the bona fides of Senators, and feel confident that when we return from the recess, good faith efforts will be made to come to a time agreement; and I would anticipate that the agreement that would be reached would not be greatly different from the time suggested by the majority leader, possibly well within that.

What is resented, I will say with all the deference, respect, and admiration that I have for the majority leader, is that coupling these together does not sit well, at least with the Senator from Alabama—possibly it does with others.

but I believe possibly it does not—that we are told, "Agree today or tomorrow on a time limit, or we are going to cancel half of your recess."

I just question whether the right course is being pursued, and I hope the majority leader will accept the assurances of those who do not want to be forced into a time limit that a good faith effort will be made.

Before I stop, I want to say that not only do I admire the distinguished majority leader, I admire the distinguished minority leader for the position that he is taking on this matter. I do not believe the fate of this treaty is at stake in permitting this recess. I do not give a rap about the recess personally. It does not make a bit of difference to me; I had just as soon consider this treaty for days on end. That suits me fine. But I do believe we can come to an agreement after the recess, and I hope we will not be put to this requirement that we reach an agreement before the recess.

I appreciate the majority leader's strong stand on this issue, and I thank the distinguished majority leader for yielding to me.

Mr. ROBERT C. BYRD. Mr. President, the Senator from West Virginia does not just indicate now that we must have an agreement today or tomorrow or the holiday will be bobtailed. I have indicated this for several days, and the majority whip, in his whip notice, I believe of last Friday, indicated that if an agreement were not reached we would probably have to shorten the holiday. This is not something that has just suddenly come up. Members have been put on notice for quite some time that this would be a distinct possibility.

Mr. ALLEN. Well, I would like to say to the distinguished majority leader and Senators that if this "agree or we cancel the recess" is the penalty that is being placed on the opponents of the treaties, it would seem to me that this penalty, like the rain that falls on the just and the unjust alike, is going to fall on the 68 Senators as well as the 32 Senators, because they are going to be inconvenienced also.

Mr. ROBERT C. BYRD. Mr. President, we all know that, and we know it is not a penalty being placed on the opponents, so let us clear the RECORD on that. It is a penalty being placed on all of us.

If we cannot sit down as reasonable men and agree on a time limit now, how does the Senator think he can assure the majority leader that when we come back on April 3 we can agree on a time limit and reach an agreement then, if it only takes one Senator at that time to object?

Mr. ALLEN. It only took one Senator the other time, I would remind the majority leader.

Mr. ROBERT C. BYRD. I am glad the Senator reminded me of that. But I am willing to work today and tomorrow to reach an agreement, and it seems to me that reasonable men should be able to reach an agreement today or tomorrow as easily as 10 days from now, and I hope we can.

But this is not a penalty on those opposing the treaty. It is a penalty on all of us. I guess I would be the one who would have the greatest whiplash of all, but that is a thing I have to contend with.

I yield to the Senator from Vermont.

Mr. LEAHY. Mr. President, I heard a thing or two that disturbed me somewhat when the distinguished Senator from Mississippi (Mr. STENNIS) was speaking earlier. I might say I know of no Member of this body I admire more than Senator STENNIS. I know of no one in this body who has more of a sense for the history and traditions of the Senate than Senator STENNIS. When I hear him saying that he is concerned that we either reach a point where we can make agreements on time limitations on some of these matters or we may be faced with a position where the rules of the Senate themselves will have to be changed, I think when someone of Senator STENNIS' caliber and background and known philosophy in this area would make a statement like that, it shows the amount of concern it has caused.

I think the Senate owes a tremendous debt of gratitude to our leaders, Senator ROBERT C. BYRD and Senator BAKER, for the amount of work they have done during the time they have been the leaders of the Senate in working out time agreements. As Senator BYRD knows, I am ordinarily one of the first to ask, "Can we not have some exact times when we will be here and we will not be here?" As the distinguished majority leader knows, I have, during the past 3 years, been back to my home State just about once a week, for one thing or another. The people of Vermont want to see me back there, and I want to be back there. But I support the majority leader on this matter very, very much.

Even though I have matters planned all of next week in every part of the State of Vermont, and which would begin well before dawn every day and extend past midnight, talking with the people of Vermont to find out how they feel about various issues, discussing among other issues the treaties, I know there will be one question I will be asked by every single person who has any question in Vermont. That is going to be: "You have been on this treaty now for a month and a half."

I might say, incidentally, Mr. President, that every reliable poll taken in Vermont shows the people there split right down the middle, half in favor of the treaty and half against.

All will say the same thing. We have been on this treaty now for a month and a half. When we ratified the NATO treaty, the treaty which set up the most significant alliance in recorded history, it took us 12 days. The people in Vermont know that we are facing energy problems, we are facing farm problems—and I believe we will have the farm bill coming back here—we are facing taxes, social security, and all the other issues which impact on them directly every single day of the year.

They say, "My God, is there anybody down there who can make up their mind at this point? We can certainly make up our minds." Every one of those Vermonters have made up their mind. They say, "Can you tell us, Pat, old boy, what day you will finish that up and get on to these other matters which are really necessary to us?"

Quite frankly, Mr. President, I would rather see the distinguished majority leader cancel the whole recess so I can tell the people in Vermont that we are down here working, trying to get this matter cleared up so we can get to the other things that are of far more importance. I support the majority leader.

Mr. ROBERT C. BYRD. I thank the Senator. I would like to read a note which was handed to me. I was supposed to make a speech today at 1:45, or something like that. It would have been a speech which would have been of benefit to me. I have been handed a note:

The speech was canceled as the people had to leave at 2 p.m.

So this cuts across all of us when we stand here and do our duty and have to cancel a few speeches. I thought it might be appropriate to indicate that I did not cancel this one; the people who were going to have me speak canceled it because of my having to be here to take a stand on what I think is in the best interest of the country.

Mr. LONG. Will the Senator yield?

Mr. ROBERT C. BYRD. I yield.

Mr. LONG. I thank the distinguished majority leader.

The Senator from Louisiana all the time has been thinking that if we are going to pass this treaty we will have to enter a motion and limit the debate. We have a rule for that. Some of us did not enjoy setting a new precedent, when some of our Members were fully employing their rights under the rules and conducting, we might say, a filibuster after cloture. But they had a right, certainly. They had precedents on their side to do it. It would seem to me that from time to time we just have to live by the cloture procedure even though we prefer not to.

I honestly think it really serves no purpose to change the plans, to change the schedule. If the Senator has to do it, he can get it to a vote just as quickly by filing a cloture motion. I applaud the Senator for pleading with Senators to cooperate. I think he ought to do that. Before he comes out with a cloture motion, he definitely ought to plead with everybody, cajole, or just beg, just do anything he can to try to intrigue Senators to cooperate and bring the matter to a vote.

If the Senator cannot have the cooperation, it seems to me he ought to just face the fact that he can file a cloture motion and force the matter to a vote. We have a rule for that purpose. If he has to do it, he ought to just do it.

We do not like to tell people they cannot talk as long as they want to, but when we get down to it, does the Senator think the American people understand our sitting here for 3 solid months on something which is controversial, but where people do have the chance to make up their minds? It is pretty clear to this Senator most people know how they are going to vote.

In the end, do we not resolve the positions of Senators by calling the roll at some point?

Mr. ROBERT C. BYRD. Exactly.

Mr. LONG. It seems to me that the Senator, whether he likes it or not, will find himself forced into that rather unhappy position. I know he does not like to apply for cloture, but I think he will be forced to do it, unless he can bring Senators around to him.

Mr. ROBERT C. BYRD. I thank the Senator.

Mr. President, I yield the floor.

The PRESIDING OFFICER (Mr. MELCHER). The pending question is on the second division of the amendment by the Senator from Alabama. The Senator from Washington is recognized.

Mr. MAGNUSON. Mr. President, I have an emergency matter that I would like to take up with the leadership. It should not take over 2 minutes.

Mr. ALLEN. I yield to the Senator.

Mr. MAGNUSON. This is a rescission from the White House. The Senator from Maine should be interested in this. The President has requested that Congress rescind the expenditure of close to $60 million. It must be acted upon today because time will run out shortly.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Senator from Washington may proceed as in legislative session for not to exceed 5 minutes.

Mr. ALLEN. Reserving the right to object and I shall not object, Mr. President, I would like to ask the majority leader if we are going to be able to return to the amendment this time which has been used.

Mr. MAGNUSON. Mr. President, I ask unanimous consent——

Mr. ALLEN. I am not talking about the House message. We have been talking for an hour and a half. Will that be taken from the time of the amendment or will it be added back to the time on the amendment?

Mr. ROBERT C. BYRD. Mr. President, there will remain something like an hour and 10 or 15 minutes after this. I am sure the proponents of the treaty will yield all but 5 minutes of that, or 10 minutes, so the Senator would still have his time.

Mr. ALLEN. I have no objection to the Senator from Washington proceeding.

Mr. HARRY F. BYRD, JR. Mr. President, reserving the right to object, if $60 billion is involved——

Mr. MAGNUSON. $60 million.

Mr. HARRY F. BYRD, JR. $60 million?

Mr. LEAHY. $60 million here and $60 million there would add up to a lot of money.

Mr. HARRY F. BYRD, JR. Even if it is only $60 million, we should have a little more time than just 5 minutes.

The PRESIDING OFFICER. Does the Senator from Virginia object?

Mr. HARRY F. BYRD, JR. No.

The PRESIDING OFFICER. Is there objection?

Mr. ROBERT C. BYRD. Will the Senator yield for a request?

Mr. MAGNUSON. I yield.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the vote on Mr. ALLEN's amendment occur at 4 p.m. today, and when the Senator from Washington completes his action that a Senator may put in a quorum call so that those of us who are nearby can arrive and discuss these matters further.

The vote on the amendment will occur at 4 p.m.

The PRESIDING OFFICER. Without objection, both unanimous-consent requests are agreed to.

The Senator from Washington.

RESCISSION OF CERTAIN BUDGET AUTHORITY

Mr. MAGNUSON. Mr. President, there is being held at the desk, pursuant to unanimous consent, H.R. 10982, the first budget rescission bill of fiscal year 1978, and due to the fact that this measure has been cleared on both sides, the Senate must take action on this matter.

I ask that the Chair lay before the Senate a message from the House on H.R. 10982.

The PRESIDING OFFICER. The bill will be stated by title.

The legislative clerk read as follows:

A bill (H.R. 10982) to rescind certain budget authority contained in the message of the President of January 27, 1978 (H. Doc. 95-285), transmitted pursuant to the Impoundment Control Act of 1974.

Mr. MAGNUSON. Mr. President, I ask unanimous consent that the bill shall be considered as having been read twice; that the Senate proceed to its immediate consideration, and that it be considered to have been read the third time and passed, and that a motion to reconsider as having been made and tabled.

Mr. HARRY F. BYRD, JR. Mr. President, I reserve the right to object.

The PRESIDING OFFICER. The Senator from Virginia reserves the right to object.

The Senator from Virginia.

Mr. HARRY F. BYRD, JR. May I ask the distinguished Senator what the $60 million——

Mr. MAGNUSON. I was going to explain that. I have to make this motion first.

Mr. HARRY F. BYRD, JR. How do I know whether I want to object or not.

Mr. MAGNUSON. Well, I will explain it.

Mr. HARRY F. BYRD, JR. I would like the Senator to explain it.

Mr. MAGNUSON. I will withdraw that motion and I will explain it.

The PRESIDING OFFICER. Without objection, the bill will be considered as read twice.

Mr. HARRY F. BYRD, JR. The objection is withdrawn.

The PRESIDING OFFICER. The Chair must point out that the bill must be before the Senate to be considered without objection.

The bill will be considered as having been read twice and the Senate will proceed to its immediate consideration.

Mr. MAGNUSON. Now, Mr. President, this is the first budget rescission bill reported by the Committee on Appropriations for the fiscal year 1978 under the Congressional Budget and Impoundment Control Act of 1974. It just passed the House of Representatives on March 10 by a vote of 318 to 0.

It involves three items and rescinds $55,225,000 representing the same amounts proposed by the President.

The three items are: $40,200,000 under the military assistance program, which they do not need; $10,055,000 for the Federal Home Loan Bank Board, that they do not need; and $5 million for contributions for international peacekeeping activities under the State Department that they do not need.

I know of nothing controversial about the proposed rescissions. They represent a portion of the funds provided in previous appropriations that were not required due to subsequent events and other circumstances.

The proposed rescissions have all been reviewed by the respective chairmen and the ranking minority members of both Appropriations Committees, House and Senate.

As I say, the rescission was agreed to by the House on a vote of 318 to 0.

Now, Mr. President, I renew my request.

The PRESIDING OFFICER. Is there objection?

Without objection, the bill is considered to have been read the third time and passed, and the motion to reconsider is tabled.

SENATE RESOLUTION 424—SUBMISSION OF A RESOLUTION RELATING TO A NEW CANAL CONNECTING THE ATLANTIC AND PACIFIC OCEANS

Mr. MAGNUSON. Now, Mr. President, while I am on my feet, I have another matter which will take only a moment.

I send to the desk a resolution on behalf of myself and many other Senators, I think, who will join me, dealing with a second transoceanic canal.

I must say that I have been interested in this issue for a long time, dating back to 1938, as I mentioned to the Senate some time back during this an earlier debate on the need for a second canal.

This is a sense of the Senate, resolution that the President of the United States should immediately begin negotiations with the Government of the Republic of Panama or with the government of any other appropriate country, if agreed to by the two parties, regarding the construction, the maintenance, the operation of a new canal connecting the Pacific and Atlantic Oceans.

I thank Senators for yielding.

Mr. GARN. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. CHURCH. Mr. President, I ask that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. CHURCH. Mr. President, I yield now to the distinguished Senator from Maine (Mr. MUSKIE).

INFLATION AND THE FARM BILL

The PRESIDING OFFICER. The Senator from Maine.

Mr. MUSKIE. Mr. President, yesterday the Senate rejected by overwhelming votes Senator BELLMON'S and my effort to keep the Nation's budget in perspective. By overwhelming margins the Senate voted to increase the rate of inflation by a full point. By overwhelming margins the Senate voted to increase the Federal budget deficit. And by overwhelming margins the Senate voted to reject the discipline that we imposed on ourselves with enactment of the Budget Act 4 years ago.

Mr. President, for whatever reasons the absence of a clear administration position on the legislation supported this erosion.

Mr. President, today in the Washington Post there is an article on the warning by the Saudi Arabians that continued decline in the value of the dollar will inevitably lead to an increase in oil prices. There is an inference in that article that the concern of the President with this potential has triggered renewed anti-inflation initiatives, and expanded efforts to shore up the dollar. I find this inference, in light of yesterday's results in the Senate, interesting at best.

President Carter and his Secretary of Agriculture had a unique opportunity to take a tough stand on inflation on the farm bills. They did nothing. They waffled. And it is this kind of waffling that is discrediting the value of the dollar.

In that same story, it is suggested that the administration is considering a major effort to increase exports as a means of offsetting the decline in the dollar and improving our balance of payments. I cannot, Mr. President, believe that this administration would, on the one hand, consider improving our balance of payments by increasing our exports when at the same time their silence supported passage of legislation which will significantly reduce production of the most significant exports this country has.

I will not repeat the statistics I cited on the floor yesterday, but a decline in farm production inevitably will lead to a decline in commodities available for export. Whether or not the increased price as a result of reduced output will offset that decline depends entirely on the ability of the world to pay what may become exorbitant prices for food and feed grains. In any event, a reduction of production at this time can only lead to a reduction of our capacity to meet the demands of the export market and thus could erode hoped-for increases in exports and the associated improvement in the balance-of-payments situation.

It may be that many of my colleagues, and apparently the President, do not understand the critical nature of the current economic situation. Another round of oil price increases would have a serious and perhaps disastrous impact on recovery. Another round in devaluation of the dollar will have an equally serious effect on the world economy and the growing deficit in the Federal budget can only lead to another round of double digit inflation.

Mr. President, it will take a team effort to control inflation, to reduce the budget deficit, and to shore up the dollar. I think it is well for us to recognize the importance of that fact. Those few Senators who yesterday put national interest ahead of special interest obviously cannot do it alone. The failure of the President and two leading Senate contenders for the Presidency to exercise this kind of responsibility suggests that the public should not anticipate increased confidence in the dollar, control of inflation, and reduced deficits.

Mr. President, I ask unanimous consent that that article be printed at the close of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. MUSKIE. There is an inference in that article, Mr. President, that concern of the President with this potential has triggered renewed antiinflationary initiatives and has expanded efforts to shore up the dollar. I find this inference, in the light of yesterday's results in the Senate, interesting at best.

EXHIBIT 1

[From the Washington Post, Mar. 22, 1978]

SAUDIS LINK OIL PRICES TO A STABLE DOLLAR

(By Hobart Rowen)

King Khalid of Saudi Arabia has told President Carter that oil prices may have to be raised if the U.S. dollar continues its decline in world markets.

The Saudi leader said in a recent letter that his nation, in effect, has resisted several efforts within the Organization of Petroleum Exporting Countries (OPEC) to raise prices, but the United States could no longer be sure that the Saudi view would continue to prevail.

Authoritative sources stressed that Khalid's letter was not threatening, and that in fact, "it was very well reasoned." They said the anti-inflation program that President Carter now has under consideration had not been triggered by the Khalid letter.

The declining dollar, which contributes to inflationary pressures here by boosting the cost of imported goods, also has had an adverse impact on the oil cartel. For OPEC, which sells its oil for dollars around the world, a cheaper dollar amounts to a cut in their prices, and a loss of real revenues.

Officials conceded that a series of three government announcements of steps to shore up the dollar—most recently, an accord with West Germany—have not yet had the desired results, and that "some more definitive signal of a fundamental nature is going to be needed."

Congressional approval of an energy conservation bill is cited as the most important signal. But pressure has also been increasing on Carter for a stronger anti-inflation program that might give foreign exchange markets more confidence in the dollar.

Carter has been urged to take stronger anti-inflation steps by Federal Reserve Chairman G. William Miller, and by both Republican and Democratic members of the Joint Economic Committee. Additional anti-inflation measures have also been urged by the Government's own wage-price watchdog, Barry Bosworth, director of the Council on Wage and Price Stability.

As part of a new basket of actions dealing with inflation, the Administration reportedly is considering a Government task force to see how American exports might be stimulated.

An intensified export drive, some Administration officials believe, would cut down the U.S. trade deficit, which is one of the sources of pressure on the dollar.

An export program, officials said, could lead to some new form of tax incentives for exports, in effect reversing current Carter Administrative policy.

White House officials have been working on various anti-inflation options with the hope of making something public by tomorrow. But officials cautioned yesterday that that date might "slip," because final decisions have not been made by the President.

The idea of an export task force has been pushed by the Commerce Department, and endorsed by Special Trade Representative Robert S. Strauss.

"The answer to this nation's problems," Strauss said in an interview, "is not in restricting imports, and making the buying public pay more money when they're already choked by inflation, but the answer is a tremendous thrust from an export program."

But other officials, who concede that it would be useful to sweep away any artificial impediments to exports, caution that any benefits would not be gained in the short run, and certainly not quickly enough to ease current pressure on the dollar.

High on the list of potential actions to stimulate exports, according to informed sources, are tax incentives, even though the Carter Administration has rejected continuation of one form of export tax incentive, the DISC program, in its own tax bill now before Congress.

Other possible steps include beefed-up export financing, a bolstered export promotion drive, and an effort to persuade private businessmen that great export opportunities exist if they would put more effort into it. "We may have to act more like the Japanese do," one official said.

Not all Administration officials are sold on this approach, especially if it includes a politically embarrassing reversal on tax incentives for exports. "Besides," says one unconvinced official, "if the United States tries to pay its oil bills by pushing exports into the less-developed countries with the help of subsidies, that's hardly a contribution to global strategy."

Mr. MELCHER addressed the Chair.

The PRESIDING OFFICER. The Senator from Montana.

Mr. MELCHER. Mr. President, I think some of the points that the Senator from Maine has raised I would agree with. But there are vital points that are not mentioned at all.

When we are talking about the Government of Saudi Arabia and their part in setting OPEC-priced oil, we have to admit that the oil sent through OPEC was set at a considerably higher price than had been the case prior to 1973. We have to admit that our balance of payments is seriously aggravated by the imports of OPEC oil.

But we cannot lose sight on that oil they produce, the exports they have, the OPEC countries protected the price of their export. They set high oil prices and that is their major export.

We have not done anything in setting the price for American grain that is exported. It is much too low.

Mr. MUSKIE. Will the Senator yield?

Mr. MELCHER. If the wheat that we export was not being sold at around $2.60, $2.85 a bushel, but was set at a price that would compare to OPEC oil, our balance of payments would be much better.

I am delighted to yield to the Senator.

Mr. MUSKIE. No. 1, I want to make it clear to the Senator that I was as indignant and am still indignant after 3 years about the action of the OPEC prices, in quadrupling oil prices at the time that it did. I did not try to cover the history of that situation in my brief remarks.

The point I wanted to make is a very simple one. The Budget Committee within the last 2 weeks held a hearing on inflation. The witnesses included the new Chairman of the Federal Reserve Board, and others. There is no question, based on the testimony we have had, not only in that hearing, but in the hearings throughout this budget season, that our No. 1 problem is inflation.

Why is it the No. 1 problem? Initially, of course, as the record of those hearings made clear, it was triggered by that escalation in energy prices.

But what sustains it? What sustains it, may I say to the Senator, according to the testimony of these experts—I am no economic expert—what sustains it is the determination of every individual in our economy, every group in our economy, to catch up.

The underlying catchup inflation has been steady at a 6 to 6½ percentage increase for the last 2 years.

This inflation is not some new inflationary input into the economy. It is a circular thing. Everybody is catching up with everybody else and chasing everybody else in a circle.

So, unless somebody at some point breaks out of the circle to go through the anti-inflation door, that circle is going to continue to turn.

We seem to reject every opportunity to take a deflationary action. We seem to embrace—and I am not talking about just yesterday—every attractive opportunity to help somebody catch up, refusing to recognize that that catchup effort is itself inflationary.

I do not know of any smooth, painless, nonsacrificial way for us to stop that circle from turning. But I do think, as chairman of the Budget Committee, I have a responsibility, which I am going to try to exercise more conscientiously than I have in the past, to identify those inflationary inputs that keep that inflation circle whirling at what everybody tells us, who knows anything about economics, is a faster and faster pace.

Now, Senators who made their vote yesterday, cast it as a matter of conscience, and my good friend from Montana did, as well. But to pretend, as I heard one speech on the floor yesterday pretend, that voting for that bill yesterday was in no way inflationary, is simply to ignore reality.

Mr. MELCHER. Mr. President, I voted for that bill, not just on the basis of helping farmers, not just on the basis of raising our loan rates on grains and cotton so farmers could get a higher price in the marketplace, and not just on the basis of raising target prices for these commodities so farmers could survive during this tough economic crunch, but I also voted on the basis of the long-range good for the United States.

There is no way that we can correct our balance of payments without selling American grain abroad. There is no way that we can catch up, as the Senator from Maine says that we should catch up, without recognizing that we have to have a price commensurate with our exports that will match the price of imports.

The OPEC price for oil is real. They did it for their own good. The prices set on other imports that we bring into this country are set by other countries for their own good.

We have to make sure that American grain farmers and cotton producers have some protection, too.

The long-range effect, if we do not do something to protect them, is that we lose these producers and we will be in worse shape on our balance of payments, our economy will be in worse shape. We simply cannot take it out of the hides of farmers to meet the rising costs of inflation and to assure a stability on those rising rates simply by holding down farm prices. The agriculture producers must survive or our balance of payment will worsen, the dollar will be weaker, and the American economy will be much worse.

Mr. DOLE addressed the Chair.

The PRESIDING OFFICER (Mr. HARRY F. BYRD, JR.). The Senator from Kansas.

Mr. DOLE. Mr. President, I appreciate the comments just made by the distinguished chairman of the Budget Committee and also by the distinguished Senator from Montana.

The House in a vote less than an hour ago did agree to go to conference on the farm legislation, and in the process an effort was made to instruct the conferees on the so-called flexible parity bill, that was defeated, but I think the important thing is that I understand House conferees have been appointed and the Senate conferees will be appointed and they will go to conference.

I think they will overcome some of the real fears, I might add, expressed by the chairman yesterday, because it is not possible to judge the impact of the McGovern, the Dole, and the Talmadge amendments when we did not know about the one until midnight the night before.

Perhaps I am wrong in the eyes of the chairman, but I certainly do not criticize his efforts to call it to the attention of the Senate, and to point up the problem, so long as it is done with an even hand, and that is the way the Budget Committee has been operating—with an even hand—in the school lunch programs and the farm programs. I do not think we can quarrel about that.

Mr. MUSKIE. Mr. President, will the Senator yield?

Mr. DOLE. I yield.

Mr. MUSKIE. I express my appreciation to the Senator. He always applauds my efforts, even when he does not agree with them.

Does the Senator have any idea when the conference will meet before this weekend?

Mr. DOLE. I am not certain. Senator TALMADGE, I understand, may be in the process now of contacting Senators who may be appointed as conferees on the part of the Senate. We hope we can do it during the recess—perhaps not vote until after the recess, but at least assure the farmers that there will be something to vote on when we return, if there is a recess. I suppose that is another question.

Mr. MUSKIE. I assure the Senator that I will do my best to get the budget evaluation and the economic evaluation and all the other pertinent information that is was not possible for use to have yesterday, so that the conferees will have it at their disposal at the conference.

Mr. DOLE. I hope the staff of the Budget Committee will be available to some of us on the conference, because we should know what the impact will be so far as consumers are concerned and so far as inflation is concerned—not just the benefit, but also the other side.

Mr. MUSKIE. We will try to comply with the Senator's requests.

Mr. DOLE. Mr. President, I hope—as does the Senator from Montana (Mr. MELCHER)—that we can resolve the differences in conference in the next few days, either this week or next week. Whether or not there is a recess, the conferees can meet. It seems to this Senator that the need is that urgent, that the farmers need some assurance.

I also suggest that, notwithstanding certain White House pressures and other efforts to defeat the so-called flexible parity concepts, that concept is very popular with America's farmers. I was heartened today by the vote in the House of Representatives, when a motion to table, with instructions to the conferees to adopt the flexible parity approach, received 160 votes to some 230 votes—a difference of 47 or 57 votes. It indicates to this Senator the strong support of the voluntary flexible parity concept, which I believe many of my colleagues—Democrats and Republicans—believe would be the least costly. It would not be subject to the criticisms of paying farmers not to farm, and I think it has great appeal. I hope that when the conference does meet, this Senator and others who will be conferees can persuade the conferees to adopt that view.

Mr. President, I suggest the absent of a quorum.

The PRESIDING OFFICER (Mr. MELCHER). The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. HELMS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

PANAMA CANAL TREATY

Mr. HELMS. Mr. President, I ask unanimous consent that Mr. Nick Nonenmacher, of my staff, be accorded the privileges of the floor during consideration of and any votes thereon of the Panama Canal Treaty.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HELMS. I thank the Chair.

Mr. THURMOND. Mr. President, I rise in support of the Allen amendment. This is the second portion of the Allen amendment No. 86. It reads this way:

Nothing contained in the Treaty shall prevent the United States from negotiating with any other nation for construction, mainte-

nance, and operation of a transoceanic canal anywhere in the Western Hemisphere or from constructing, maintaining, or operating any such canal.

Article XII of the current treaty prevents the United States from negotiating with another country for the right to construct an interoceanic canal in the Western Hemisphere.

As stated in the debate earlier today this was supposedly a U.S. concession to obtain from Panama an exclusion that no other country build another canal in Panama.

The administration contends the concession is of no great significance since studies show Panama is clearly the best place for a future canal.

While this may be true, the concession was significant because it takes from the United States a strong leverage over Panama during the treaty period.

Since resort to military force, both legally and practically, would be no viable alternative to the United States, we would find it difficult to exert any real pressure on Panama in a dispute. However, if the United States were free to construct a sea-level canal elsewhere this would give the United States leverage on Panama not to take unreasonable actions.

The canal is of overwhelming economic importance to Panama, and the freedom of the United States to create a competitive and superior waterway elsewhere would form a most powerful incentive for Panama to come to reasonable accommodations in whatever disputes that might arise.

Although current studies indicate that Panama is the only place worth considering for a sea-level canal, I wonder why we felt compelled to sacrifice flexibility in taking advantage of unforeseen future developments which might open up a better solution in another location? When looking as far ahead as 22 years, one ought never say "never."

Mr. President, much has been said about what the United States had to give up to get an agreement from Panama that they would not allow another country to build a second canal in Panama. To keep what we already had in the original treaties it is claimed the United States had to offer a quid pro quo in the form of a provision preventing us from even negotiating to build another canal elsewhere.

The Senate must remember that the greatest giveaway of all is the treaty itself in which we are giving the canal to Panama. One would think that after that giveway we would not have to offer a quid pro quo to balance each provision of the treaty.

By surrendering the right to even negotiate with another country for another canal route, we not only surrender the canal, but surrender as well our leverage over Panama to keep the canal open.

Mr. President, this is the Western Hemisphere we are dealing with in these treaties. It is our national security and our economic health involved here. In case of war especially we would be forced to shuttle ships from one ocean to the other, and it could be done quickly through the canal. We are the ones who need minerals from other nations that have to be brought through the canal, otherwise they would have to go around the Horn and travel thousands of miles further, using a lot more fuel and costing much more each trip.

Once we act on these treaties it is final. When we pass a law and make a mistake we can do it over. If the Senate passes this treaty then the action is final, and we cannot do it over. We will have to live forever with the treaty that we have ratified.

Mr. President, I urge acceptance of the Allen amendment by the Senate.

Mr. President, on January 17, 1978 I wrote the Secretary of State and propounded some questions with regard to defense installations and matters of that nature.

On March 20, 1978, over 2 months later, a letter has come to me in answer to those questions. I am not altogether satisfied with the answer given to question 3 in this letter. It was answered by Lawrence W. Jackley, colonel, U.S. Army, special assistant, Panama Canal Treaty negotiations. In Question 3 the question I propounded to the Secretary was this:

Question 3. What use do the treaties give the United States of military installations, air bases, pipelines, forts and naval installations that go over to Panama upon ratification:

Answer. The few secondary, active military facilities transferred to Panama upon entry into force of the treaty include:

The troop area of Ft. Amador.

Albrook (East), which includes the light aircraft capable Army airfield and warehouse facilities.

The troop area of Ft. Gulick between three and five years after entry into force of the treaty. These facilities will be used by Panamanian Armed Forces which are assigned a Canal defense role. Under the terms of the Panama Canal Treaty, there are no naval installations or pipelines required to be transferred to Panama until December 31, 1999.

So, Mr. President, it can be seen that that answer is not completely responsive to the question I propounded. It does not address my question of what use the United States can make of these facilities should a requirement so develop.

Mr. President, I think it might be helpful to the Members of this body if these questions and answers are made available. They do provide for the Senate clarification of questions which the State Department could not or would not answer last fall. The listings in outline form are easy to read and should help clarify for the Senate what goes over to Panama, what may go over and what we keep during the treaty period. I ask unanimous consent that the letter dated March 20, 1978, addressed to me and signed by Col. Lawrence W. Jackley, with attachments, be printed in the RECORD following these remarks.

There being no objection, the letter and attachments were ordered to be printed in the RECORD, as follows:

OFFICE OF THE
SECRETARY OF DEFENSE,
Washington, D.C., March 20, 1978.

Senator STROM THURMOND,
U.S. Senate,
Washington, D.C.

DEAR SENATOR THURMOND: The Department of State has asked the Department of Defense to respond to your letter of January 17, concerning the lands and waters arrangements of the proposed Panama Canal Treaty. I regret the delay, caused through administrative error, in responding to your questions.

Question 1. What title transfers will be made in the Ports of Balboa and Cristobal? Are these properties essential to the operation of the Canal?

Answer. Article XIII of the Panama Canal Treaty transfers to Panama all rights, title and interest of the United States in property, installations and equipment in the Ports of Balboa and Cristobal, the boundaries of which are set forth in the Map Atlas supporting Annex B, Agreement in Implementation of Article III of the treaty (attachments 1 and 2). The United States retains the use of specific port installations, required to carry out our responsibilities to operate the Canal, described in detail in various articles of Annexes A and B of the Implementing Agreement cited above and retains our existing titles to them.

Article V of the Agreement in Implementation of Article III of the Panama Canal Treaty sets out the guidelines and conditions under which Panama will be responsible for the operation and maintenance of the Ports of Balboa and Cristobal and the Panama Railroad, which will be transferred to Panama without charge upon the entry into force of the treaty. It also establishes a Ports and Railroad Committee which has certain decisionmaking authority and certain coordinating responsibility concerning these Ports and the Railroad activities developed as a balance of our needs to ensure the continuation of essential port and railroad services and Panama's desire to obtain the economic and commercial advantages connected with these facilities.

ANALYSIS OF PORT PROVISIONS

Panama will have jurisdictional rights over vessels in the ports and must approve vessel movement to and from the docks and piers. The United States, however, will control all vessel movement in Canal waters including those within the ports in order to maximize Canal efficiency and to continue the excellent safety record of Canal operations. In the exercise of this authority the Commission may require Commission pilots to be aboard any vessel for which it deems a pilot necessary.

Paragraph 2 (c) and (d) refer to paragraphs in Annex B which contain lists of port installations and equipment which Panama agrees to maintain and over which the United States has certain use rights.

With reference to those facilities listed in paragraph 3 of Annex B, the Commission will have a right to their use on a guaranteed basis in accordance with the normal schedule for maintenance of its equipment and in emergency situations. Under this scheme, facilities which are required from time to time as a necessary part of Canal maintenance but are not fully utilized at present can be made available for related commercial uses under Panama's authority without impairing our right to use them when needed.

In paragraph 2(e), Panama agrees to schedule port services on a priority basis for vessels transiting the Canal in order to avoid all possible delays in the scheduling of Canal transits.

Paragraph 2(f) contains a general undertaking by Panama to operate the ports in a manner compatible with Canal operation and to terminate any activity found to be incompatible.

Finally, the United States is authorized to use the Naval Industrial Reserve Shipyard in the Port of Balboa in the event of an emergency relating to Canal defense. Panama has agreed that the United States may retake those facilities transferred to Panama under the treaty which are included within the Naval Industrial Reserve Shipyard as it is defined in paragraph 20(b) of the Agreed Minute to this Implementing Agreement.

Question 2. Does the treaty include transfer of the installation and equipment of the Panama Railroad Company?

Answer. Yes. Details are as described above. The treaty also provides that the U.S. shall have the right to reassume management and operations of the railroad if Panama decides that its continued operation of the railroad at the minimum levels of service agreed upon is no longer viable (paragraph 4(e), Article V, Agreement in Implementation of Article III, Panama Canal Treaty).

ANALYSIS OF PANAMA RAILROAD PROVISION

Panama makes the commitment to maintain it in efficient operating condition with service necessary for effective Canal operation and defense. The United States has the following rights with respect to the railroad:

(a) to have access to, construct, use, and maintain utilities along the railroad right of way;

(b) to use the railroad on a priority basis for purposes of Canal operation or defense at costs no larger than those charged Panama's most favored customer on a commercial basis;

(c) to retain responsibility for spur tracks and sidings servicing installations in Canal operating areas; and

(d) to resume operation of the railroad if Panama decides it is not viable to continue the operation of the railroad at the agreed levels of service.

Paragraph 5 establishes the Ports and Railroad Committee and sets out its functions. The Committee will be the appropriate body to agree upon additions to the Ports or Railroad areas from areas made available under the treaty for the use of the United States. The Committee must approve any change in land use in the ports or railroad areas before it takes place as well as any initiation of, change in or termination of services relating to the ports or to the railroad. The level and frequency of railroad services scheduled for 1977 will be maintained until the Committee is able to establish new ones.

The Committee also will maintain adequate safety, fire prevention and oil pollution standards for these facilities. Again, those Panama Canal Company standards in effect immediately prior to the entry into force of the treaty will be maintained until the Committee is able to established new standards.

The Committee will also establish procedures to facilities the movement of vessels and coordinate the activities of the two governments in the port areas.

Finally, the principle is established that the Committee will be guided by the premise that the operation of the ports and the railroad shall be consistent with efficient Canal operation and defense. Detailed understandings related to the operation of the ports and railroad are specified in the Agreed Minute to the Agreement in Implementation of Article III.

Question 3. What use do the treaties give the United States of military installations, air bases, pipelines, forts and naval installations that go over to Panama upon ratification:

Answer. The few secondary active military facilities transferred to Panama upon entry into force of the treaty include:

The troop area of Ft. Amador.

Albrook (East), which includes the light aircraft capable Army airfield and warehouse facilities.

The troop area of Ft. Gulick between three and five years after entry into force of the treaty. These facilities will be used by Panamanian Armed Forces which are assigned a Canal defense role. Under the terms of the Panama Canal Treaty, there are no naval installations or pipelines required to be transferred to Panama until December 31, 1999.

Question 4. Please provide a list by name, location and size of military installations or facilities to be transferred to Panama upon ratification of the Treaty.

Answer. At Attachment A is an overall status of the military facilities and installations as reflected in the Implementing Agreement to Article IV of the Panama Canal Treaty. Information concerning the size of each installation will be available on completion of the boundary survey required by Paragraph (1) of Annex A to the above Implementing Agreement.

I trust that this information will be helpful.

Sincerely,

LAWRENCE W. JACKLEY,
Colonel, U.S. Army, Special Assistant, Panama Canal Treaty Negotiations.

TREATY DAY: STATUS OF MILITARY FACILITIES AND AREAS

I. Defense Sites: U.S. Control for Life of Treaty:

A Howard AFB and Ft. Kobbe.

B. Rodman Naval Base, Marine Barracks, Cocoli, Arrijan and Farfan areas.

C. Ft. Clayton.

D. Albrook AFB (West).

E. Corozal Army Industrial Support Area.

F. Ft. Davis.

G. Ft. Sherman.

H. Galeta Island Naval Communications Station.

I. Semaphor Hill Communications Link.

J. US Navy Transisthmian Pipeline.

II. Military Areas of Coordination (Green): U.S. Control for Life of Treaty, or, as Long as Required, Unless Otherwise Noted:

A. Ft. Amador;

Troop area to Panama Treaty Day.

Housing and Community Support Areas: Retained as long as required.

B. Quarry Heights:

Military and Communications Facilities Retained for Life of Treaty.

Site of Combined Board.

C. Curundu Heights Housing and Antenna Field:

To Panama (for Military Personnel) in three Years (Except BOQ's).

Antennas Relocated to Howard AFB.

D. Curundu Housing:

Contractor Portion of Housing Area Retained as Long as Required.

Remainder Retained for Life of Treaty.

E. Corozal Cemetary:

F. Ft. Clayton Training Area (Retained as Long as Required).

G. Empire Firing Ranges (Retained for Life of Treaty).

H. Summit Naval Radio Station:

Retained for Life of Treaty.

Special Regime, Only U.S. Access.

I. Pina Firing Ranges (Retained for Life of Treaty).

J. Ft. Sherman Training Area (Retained for Life of Treaty).

K. Ft. Gulick and Ammunition Storage Area:

Housing, Community Service Areas and Ammunition Storage Area Retained as Long as Required.

Troop Area for One Panamanian Rifle Company Transferred in Three Years.

Remainder of Troop Area Transferred to Panama in Five Years.

L. U.S. Naval Station, Panama Canal, Ft. Amador:

Retained for Life of Treaty.

Special Regime, only U.S. Access.

M. Coco Solo Hospital:

Retained for Life of Treaty.

Special Regime, Only U.S. Acess.

N. Coco Solo/France Field Housing:

France Field Housing to Panama in Five Years.

Coco Solo Housing Retained as Long as Required.

O. Schools and housing, medical/health facilities and miscellaneous facilities as described in par (3), Annex A, Agreement in Implementation of Article IV of the Panama Canal Treaty.

III. Areas and Facilities Transferred to Panama by the Agreement in Implementation of the Panama Canal Treaty:

1. Ft. Grant:

No Military Facilities.

FAA Site Retained Under Separate Agreement.

2. Vera Cruz Strip:

Panama to Construct Road (Location Subject to U.S. Agreement).

Will Replace Panamanian Access Through Howard AFB.

3. Empire Range Parcels:

Not Required by U.S.

Moves Boundary Away from Urban Area (Arrajan).

4. Albrook (East) and Warehouse Area:

Provide Helicopter Facility to Panamanian AF.

Enable Panamanian Commercial Development.

Warehouse Area Phased to Panama in Three Years (U.S. Facilities Relocated to Defense Sites).

U.S. Helicopter Facilities Relocated Howard AFB.

5. Ft. Clayton Training Area Parcel:

Parcels not Required by U.S.

Border on Panamanian Urban Areas.

6. Cerro Tigre:

Former Ammunition Storage Area.

Not Used by U.S.

Rail/Highway Ammunition Transfer Point Retained.

7. Cerro Palado:

Former Ammunition Storage Area.

Not Used by U.S.

8. Pina Training Area Parcel (Not Required for Ranges).

9. Sherman Training Area Parcel (Not Required for U.S. Training).

10. Ft. Gulick Reservation Parcels:

(Not Used for Military Facilities).

11. Coco Solo Area, North of the "Colon Corridor":

Contains several unused WWII Military Facilities.

Except for Facilities/Areas Noted in Sections I and II Area is not Required for Military Purposes.

12. U.S. Army Tropic Test Center Parcel:

Surveyed for data collection.

Primarily used for static environmental tests.

If area is used for other purposes by Panama, test sites will be moved to Empire Range.

Mr. THURMOND. Mr. President, I yield the floor.

Mr. HELMS. Mr. President, I wonder if the distinguished Senator from Alabama will yield to me.

The PRESIDING OFFICER. There is no time limit.

Mr. ALLEN. I yield such time as he may require to the distinguished senior Senator from North Carolina.

The PRESIDING OFFICER. There is no time involved. The Senator from North Carolina may proceed.

Mr. HELMS. I thank the Senator.

Mr. President, I apologize for the raspiness of my voice. I think I caught my cold from my grandson, and in that case I will say it was worth it. But, Mr. President, I rise in support of the amendment of the distinguished Senator from Alabama.

Mr. President, I am delighted to yield at this time to the distinguished majority leader, if he desires the floor.

Mr. ROBERT C. BYRD. I thank the distinguished Senator from North Carolina.

Mr. President, the proponents and the opponents have had an opportunity to sit down and discuss the matter as to when the Senate will reconvene and as to when we might view with some certainty the prospect of a final vote on the treaty, and the method by which we could reach an agreed-upon final vote.

There seems to be a consensus of agreement among the floor managers on both sides of the aisle and between the minority and majority leaders and supporters of both positions anent the treaties that the final decision as to a date and time for a vote on the resolution of ratification of the Panama Canal Treaty would be placed in the hands of the majority leader, the minority leader, and Mr. HELMS; and that, further, the majority and minority leaders and Mr. HELMS would sit down no later than April 5 and agree upon a date and time certain for the vote on the resolution of ratification, with the understanding that such date and time certain would not be later than the date of April 26.

With that understanding, I am agreeable to proceeding with the recess as it was laid out originally, and also with the understanding that upon our return we can meet and have a method, a modus operandi, for reaching a definite date for a vote on the resolution of ratification, with the outside date being no later than April 26.

The meeting among the majority and minority leaders and Mr. HELMS would occur at 3 p.m. on April 5.

Mr. BAKER. Mr. President, will the Senator yield to me?

Mr. ROBERT C. BYRD. Yes, I yield to the minority leader.

Mr. BAKER. Mr. President, the proposal of the majority leader, as described, is one that I think is eminently fair, and was arrived at after extensive conversations with the distinguished Senator from Nevada (Mr. LAXALT), the distinguished Senator from Alabama (Mr. ALLEN), and others.

Mr. ROBERT C. BYRD. May I also say, Mr. SARBANES and Mr. CHURCH?

Mr. BAKER. And Mr. CHURCH.

Mr. ROBERT C. BYRD. And the minority leader and myself.

Mr. BAKER. And has been discussed with the distinguished Senator from North Carolina, who has agreed to serve on this committee. I think it is a good arrangement, Mr. President.

I would only say that the agreement does not say that the vote will occur on April 26. It says instead that the parties described, that is, the majority leader and minority leader and the distinguished Senator from North Carolina, will meet at 3 p.m. on April 5, which is two days after we return, and that we will consider and make a judgment at that time, by majority vote, with regard to when the Senate will proceed to final action on the Panama Canal Treaty.

Mr. ROBERT C. BYRD. With the understanding that that date will not be later than April 26.

Mr. BAKER. That is correct, but I think it very well could be earlier.

Mr. ROBERT C. BYRD. Could be earlier, yes.

Mr. BAKER. I would like to express my appreciation to the majority leader, who I know has worked hard and diligently to get to this point, to the Senator from Alabama, who has been a careful and energetic opponent of these treaties, but has been eminently fair in trying to get to a decision, to the Senator from Nevada, and to all others who have made it possible to get to this point at this time.

Mr. DOLE. Mr. President, reserving the right to object, is there a precedent for vesting that authority in a committee of this kind?

Mr. ROBERT C. BYRD. I do not know if there is a precedent, but I would not want this to be one.

Mr. DOLE. The point I make is that there are 100 Senators in this body, and there are about 15 present right now, and we are about to enter into some unanimous-consent agreement whereby three Senators—we know the vote would be 2-to-1 in any event—would make a decision on when we would have a final vote on the treaty. I just wonder if that is the right way to proceed. I understand the desire to reach a vote, but there are some of us who have questions about up-or-down votes on some of the important amendments. Would that be addressed at a later time, or would we be boxed in on a time limit, so that we cannot raise that question effectively?

Mr. ROBERT C. BYRD. This agreement would not waive the rights of any Senator under the rules.

Mr. DOLE. But there is no precedent for vesting this much authority in such a committee?

Mr. ROBERT C. BYRD. I know of no such precedent. I would not say that in the history of the Senate something like this has not been done before, but I certainly would not want this to be accepted as a precedent.

Mr. DOLE. Is the Senator from West Virginia satisfied that this a proper precedent and the proper way to handle it? I have great respect for the majority leader, which is the reason why I ask the question.

Mr. ROBERT C. BYRD. Well, I think it is about the best way of reaching an understanding here that would, I think, be acceptable to both sides of the question, and certainly the representations in the meetings that we have had talking about it have been by proponents and opponents.

I do not want to see this as a precedent any more than the Senator from Kansas wants to see it as a precedent. It seems to me it does allow ample time for further debate of the treaties and yet it assures the Senate and the people that the day of decision is not going to be held beyond a certain point.

Mr. SCOTT. Will the Senator yield at that point?

Mr. ROBERT C. BYRD. As far as I am concerned, that would be the understanding.

Mr. DOLE. So it would be that the vote would be on the 26th of April and it would not necessarily add this other factor? I am willing to vote on April 26, but I am wondering about the committee arrangement, perhaps voting earlier than the 26th. There is the fact that we ought not to be spinning our wheels here, but we ought to be voting.

Mr. ROBERT C. BYRD. May I say to the distinguished Senator that I hope we could reach an agreement on a final vote before the 26th. If such an agreement is reached, it would seem to me it would be one that would be entered into with the understanding of both sides and it would be a reasonable way of handling this matter.

I sought to get an agreement earlier today to vote by a certain date. If that agreement had been reached, it would have been entered into by no more Senators, not a greater number of Senators, than are now on the floor. Quite often unanimous-consent agreements are entered into establishing a date and time certain to vote with only a few Senators on the floor. But I do this because on my part I feel I am speaking for the majority, and if there is a Senator on my side of the aisle with an objection he would have lodged it with me and I would certainly protect him.

Mr. DOLE. Basically, the question would be if we decided to vote on the 12th. If that does not meet with the approval of someone, could there be a motion on the floor, or how would we fix the date? Is that it?

Mr. ROBERT C. BYRD. I think, as we always reach that stage, if before the time certain it is agreed to for a vote on a very controversial matter, the majority leader, the minority leader, and their respective managers of the measure on both sides of the aisle reach an agreement. Many times we put out on the hotline what the agreement is going to comprehend and if there is any objection we go in another direction. I do not particularly like this approach, but I think it is one which protects both sides and protects all Senators.

Mr. DOLE. It would seem to this Senator that the vote is already 2 to 1, which would make the decision. I do not know what protection those of us who have objections would have. We have great respect for the majority and minority leader. We also know they are probably anxious to get this matter behind the Senate. I have not tried to delay this, but I do have some amendments on which I would like to get up or down votes. If I am deprived of the ability to say to the treaty proponents that I intend to debate this at length unless I can have an up or down vote because of some time agreement, I will lose that leverage.

Mr. LAXALT. Will the Senator yield for an observation?

Mr. ROBERT C. BYRD. I yield.

Mr. LAXALT. In response to the concern of the Senator from Kansas, I share that concern. The majority leader, and he can correct me if I am wrong, will say that the only thing which has been settled by virtue of this understanding timewise is that the vote will be taken by the 26th of April.

Mr. DOLE. I agree with that.

Mr. LAXALT. Within that, whatever comes out of the so-called committee of three will be subject to a unanimous-consent agreement, and if it did not fall within the objection of the Senator from

Kansas, we would have to look for another solution. Is that correct?

Mr. ROBERT C. BYRD. The decision by the three Senators aforementioned would be the decision as to the date and time of the vote.

Mr. SCOTT. Mr. President, will the Senator yield?

Mr. ROBERT C. BYRD. I yield.

Mr. SCOTT. Would it be the understanding of the distinguished majority leader that that would be a unanimous vote, that it would have to be a unanimous vote?

Mr. ROBERT C. BYRD. No.

Mr. SCOTT. Then there would be no protection at all. I would object. I do not object at this time, but I reserve the right to object. The distinguished Senator from North Carolina can very vigorously defend the position of those who oppose the treaty but be outvoted by those who favor the treaty, the majority leader and the minority leader. So we have no protection.

I was thinking that this would be coming back to the Senate and the Senate would probably agree to whatever final date was recommended. If it is this way, then the minority has no protection, if our minority leader and the majority leader, both proponents of the treaty, would vote one way and the distinguished Senator from North Carolina would be helpless, because his one vote would not outweigh the two votes.

Mr. ROBERT C. BYRD. What the Senator is asking is that the vote of the Senator from North Carolina outweigh the two votes of the minority and majority leaders. That is what he is suggesting.

Mr. SCOTT. No; I am not.

Mr. ROBERT C. BYRD. That is precisely what he is suggesting, that it would require a unanimous vote, which would mean that Senator HELMS, by objecting, would be binding the hands of the two leaders.

Mr. President, I hope the Senator would have confidence in the two leaders. We will be as accommodating as we can be and as considerate as we can be of the needs and desires of the opponents. They will be well represented, I say to the Senator.

Mr. SCOTT. If the Senator will yield further, Mr. President, I do not have any reservation about the distinguished Senator from North Carolina or the distinguished majority or minority leader. But I am saying if the will of the Senate is to be carried out, it would seem reasonable that whatever agreement would be reached would probably be ratified and would probably be pro forma. But I still think that the definite date agreed upon at the April 5 meeting should come back before the Senate. I would undoubtedly support it and I believe others would.

Mr. ROBERT C. BYRD. If the Senator will allow me, I am perfectly agreeable to doing that. I am stating that was not our understanding. That is perfectly all right with me. I would really prefer it that way, if I may speak for my personal preferences at this point. I would prefer that whatever date the three decide upon be brought back to the Senate and be subjected to a unanimous-consent agreement, with the condition that there be no date later than April 26.

Mr. ALLEN. That is a good modification. I think that is a good modification.

The PRESIDING OFFICER. Is there objection?

Mr. ALLEN. Reserving the right to object, does the distinguished majority leader revise the unanimous-consent request?

Mr. ROBERT C. BYRD. I so revise it.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I thank all Senators for their cooperation in this matter.

ADJOURNMENT OF THE HOUSE AND RECESS OF THE SENATE

Mr. ROBERT C. BYRD. Mr. President, as in legislative session I ask that the Chair lay before the Senate a message from the House on House Concurrent Resolution 544.

The PRESIDING OFFICER. The resolution will be stated.

The assistant legislative clerk read as follows:

Resolved by the House of Representatives (the Senate concurring), That when the House adjourns on Wednesday, March 22, 1978, it stand adjourned until 12 o'clock meridian on Monday, April 3, 1978, and that when the Senate recesses on Thursday, March 23, 1978, it stand in recess until Wednesday, March 29, 1978 or April 3, 1978, as determined by the Senate on Thursday, March 23, 1978.

The PRESIDING OFFICER. Without objection, the Senate will proceed to its immediate consideration.

The concurrent resolution (H. Con. Res. 544) was considered and agreed to.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the concurrent resolution was agreed to.

Mr. SARBANES. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. ALLEN. I yield to the Senator from Georgia.

EMERGENCY AGRICULTURAL ACT OF 1978

Mr. TALMADGE. Mr. President, as in legislative session I ask the Chair to lay before the Senate a message from the House of Representatives on H.R. 6782.

The Presiding Officer (Mr. MELCHER) laid before the Senate a message from the House of Representatives announcing its disagreement to the amendment of the Senate to the bill (H.R. 6782) to permit marketing orders to include provisions concerning marketing promotion, including paid advertisement, of raisins and distribution among handlers of the pro rata costs of such promotion, and requesting a conference with the Senate on the disagreeing votes of the two Houses thereon.

Mr. TALMADGE. I move that the Senate insist upon its amendment and agree to the request of the House for a conference, and that the Chair be authorized to appoint the conferees on the part of the Senate.

The PRESIDING OFFICER. Is there objection?

Mr. GARN. Mr. President, reserving the right to object, and I shall not object.

The PRESIDING OFFICER. The Senator from Utah reserves the right to object.

Mr. GARN. However, Senator DOLE wished to be present at the time this recommendation was made, and they are seeking his presence at this time.

Mr. TALMADGE. We are appointing the conferees recommended by Senator DOLE on the minority side.

Mr. GARN. All I know is that he did request to be on the floor. I did not say that he would disagree.

Mr. TALMADGE. I would never have requested the appointment of conferees without checking with the ranking minority member, and I am appointing conferees that he recommended, I can assure my friend from Utah.

Mr. GARN. I withdraw my reservation.

Mr. TALMADGE. I thank my friend from Utah.

I may say that Senator DOLE's relationship and mine has been extremely pleasant, and we get along together extremely well. I would never appoint the Republican conferees without clearing it with the ranking minority member.

Mr. GARN. Senator Dole is now here, and may I say I did not question the senior Senator at all, the chairman of the Agriculture Committee. It is just that in operating the floor for the minority I was instructed that he wanted to be here and that was the extent of my reservation. I have no question at all about the Senator's motives.

Mr. TALMADGE. I thank my friend from Utah.

The motion was agreed to; and the Presiding Officer appointed Mr. TALMADGE, Mr. EASTLAND, Mr. MCGOVERN, Mr. ALLEN, Mr. HUDDLESTON, Mr. DOLE, Mr. YOUNG, and Mr. CURTIS conferees on the part of the Senate.

APPOINTMENT OF SENATOR STAFFORD AS VICE CHAIRMAN OF THE U.S. DELEGATION TO THE INTERPARLIAMENTARY UNION CONFERENCE

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that Mr. STAFFORD be designated the vice chairman of the Senate delegation attending the IPU Conference during the next few days.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, will the Senator yield? Once more, I beg his indulgence.

ORDER FOR RECESS TODAY UNTIL 10 A.M. TOMORROW

Mr. ROBERT C. BYRD. Mr. President, so that Senators may be on notice now that the nonlegislative period will extend to April 3, 1978, I ask unanimous consent that when the Senate completes its busi-

ness today, it stand in recess until the hour of 10 o'clock tomorrow morning.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR RECESS TOMORROW UNTIL 12 MERIDIAN ON MONDAY, APRIL 3, 1978

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that when the Senate recesses on tomorrow, it stand in recess, in accordance with the provisions of House Concurrent Resolution 544, until the hour of 12 noon on Monday, April 3, 1978.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ALLEN. Will the Senator yield?

Mr. ROBERT C. BYRD. Yes; I yield.

Mr. ALLEN. I commend the distinguished majority leader for his fine spirit of compromise with respect to this resolution and the setting of the return from the recess at April 3, in accordance with the announced recess schedule early this year. I feel that his spirit of compromise has enabled this unanimous-consent agreement to be reached and I feel sure that there is going to be no disposition on the part of the opponents of the treaties to squeeze the last day out of this allotted time. Speaking for myself, I am hopeful that a much earlier date can be agreed upon. I believe that is the sentiment of all of the opponents of the treaty.

Mr. ROBERT C. BYRD. Mr. President, if the distinguished Senator from North Carolina will yield, I thank the distinguished Senator from Alabama. I am glad to receive those assurances. I know they are sincere and I know that the Senator will work with other Senators in attempting to reach a final conclusion prior to April 26. He indicated that to me in private; he has said that in public. I am grateful for it, and I respect him for it.

Mr. ALLEN. I thank the distinguished Senator.

Mr. HELMS. Mr. President, I, too, commend the distinguished majority leader. I think what we have seen here is a restoration of good faith which ought to prevail at all times in the Senate. I feel sure that the final vote on this treaty will occur much sooner than he has contemplated.

Mr. ROBERT C. BYRD. I thank the Senator.

THE PANAMA CANAL TREATY

The Senate resumed the consideration of the treaty.

Mr. ALLEN. Mr. President, I yield to the distinguished Senator from North Carolina.

Mr. HELMS. Mr. President, I rise in support of the amendment of the Senator from Alabama. It is entirely possible that the United States may wish to build another canal, if the present canal becomes unavailable to us.

There have been some attempts on this floor to assert that the canal is of declining importance commercially and militarily. But the Senator from North Carolina believes that it is the consensus of expert opinion that the canal is growing in importance and will be of even more importance to us by the year 2000.

There are two issues here which must be distinguished very carefully. The first is the need to have an interoceanic canal between the Atlantic and the Pacific. The second is whether the present canal is sufficient in its present size and configuration to meet the needs of the United States and of world shipping. There is no question but that the experts agree on both points, particularly if major modernization is carried out by the addition of a third lane of locks.

Mr. President, frankly, there is only one situation that would justify the construction of a new canal: the circumstance that would arise if Panama were unwilling or unable to operate the canal efficiently and without discrimination. As a result of these treaties, ownership and control of the canal will pass to Panama. In other words, whoever controls Panama will control the canal. It is all very well to say that it is in Panama's interest to keep the canal open and efficient. By the same token, it was in Egypt's interest to keep the Suez Canal open and efficient. Yet Suez was closed twice, to the detriment of world shipping. International power pressures are often beyond the capability of small nations to resist.

Nor is there any guarantee that the Government of Panama will represent the interests of the people of Panama. Indeed, there is considerable doubt that Dictator Torrijos represents the interests of the people of Panama. Indeed, there is considerable doubt that Dictator Torrijos represents the interests of the people of Panama even today. Despite the fact that other governments of Panama have sought new treaties too, there is very little reason to conclude that the present dictatorship represents the interests of Panama.

When we consider the massive corruption of the Panamanian dictator and his family, their Swiss bank accounts, the lack of reliable accounting for public funds, the exploitation of the people through excessive state-controlled lotteries and gambling, the documented participation of the Torrijos family and Torrijos cronies in international narcotics trafficking, the gross mismanagement of governmental affairs and enterprises, the constant and gross violations of human rights—all of these things suggest that Torrijos does not have the interests of the Panamanian people at heart. For all practical purposes, we might as well be giving the canal to the Mafia. We are certainly not giving it to the Panamanian people, and that point ought to be clear to all. Torrijos is the only gangster in the world who issues his own postage stamps.

So there is no guarantee that the best interests of the people of Panama will prevail. It is far more likely that once Torrijos gets his hands on a $10 billion asset—to wit, the Panama Canal—it will be run for his benefit, not for the Panamanian people's benefit. Once the canal passes into Panamanian sovereignty, the United States will have no more say in the matter, if Panama chooses to ignore the treaty. We could only assert our rights through military force. And since there seems to be little disposition in this body to defend U.S. rights in the Canal Zone by military force, at a time when the assets belong to us and are administered as part of U.S. territory, we must assume that there will be even less disposition to invade Panama to enforce our interpretation of treaty rights.

Moreover, we cannot evade the political implications of the ideological orientation of the Panamanian Government. I do not know that Torrijos is a Communist in the technical sense. I do not even know whether he can be called a Marxist in the technical sense. To call him a Communist would impute a sense of discipline and obedience to orders. He is probably too self-seeking to be part of the disciplines of the international Communist movement. Nor, to my knowledge, has anyone ever accused him of being an intellectual able to spin out ideological theory.

Be that as it may, Mr. President, but the fact is that both his parents were Communist organizers and that, by choice, he chose a dedicated Marxist intellectual, Romulo Escobar Bethancourt, to negotiate this treaty. Just because he trots out some U.S.-oriented advisers to argue his case with visiting U.S. Senators does not tell us anything about the future. Those U.S.-oriented advisers may very well have to flee to the United States once these treaties are ratified.

Nor should we put any stock in supposed assurances General Torrijos gives to U.S. Senators who have visited with him. He gave assurances that he would never allow Communists in Panama. After all, we must remember that General Torrijos was doing a selling job when the Senators visited him. What was he supposed to tell those Senators in a sales talk? Was he supposed to tell us or them that he was waiting to turn everything over to a hostile power the minute the treaty is signed?

I have no idea whether he is going to do that or not, but I do credit the man with enough shrewdness not to tell us what he is going to do. So let us, regardless of all the rhetoric in this Chamber, let us not pretend to the American people that pronouncements of General Torrijos on Communism have any value whatsoever.

As a matter of fact, Mr President, I remember that in 1946 and 1947 Mao Tse-tung was not a Communist, to hear the way some experts explained it to us at that time. They told us that Mao Tse-tung was an agrarian reformer. And back in 1958, Fidel Castro was not a Communist either, to hear these same experts come back home and tell us what a great fellow he was. Well, we fought two wars in Asia, because too many people believed the former; that is to say, that Mao Tse-tung was not a Communist. We fought two wars because the American people had been misled on that point and now we are rapidly losing our influence in Africa because too many people believed all of these experts when they said that Fidel Castro was not a Communist.

Now, Mr. Castro, as soon as he took over Cuba at gunpoint, he declared, "I am a Communist now and always have been and always will be," but before he took over, the major news media of this country, the commentators, the political experts, went down and worshiped virtually at the shrine of Fidel Castro and came back and said he is an agrarian reformer.

Now if we look at the pattern of nationalization in Panama, the takeover of the Panama Light & Power Co., the takeover of the telephone company there, the pressures against the Chiriqui Land Co., that is, the banana plantations of United Brands, all of these betray that anti-U.S. nationalism which often becomes anticapitalism and alinement with nonmarket economies.

It is disheartening to see U.S. businessmen who have been taken to the cleaners by the Dictator Torrijos, businessmen pleading today on behalf of these treaties. Those businessmen who still retain some business interests in Panama, or hope to gain or retain the dictators' favor, are merely feeding the alligator, hoping that the alligator will eat them last.

Now we must not forget, Mr. President, that Panama is already a member of the bloc of nonalined nations, with Torrijos attending their meeting at Sri Lanka.

Now, Mr. President, neither is there any contradiction between Marxism and the development of Panama as a banking center. Marxism is basically opposed to private ownership of the means of production and the free market but not even communism is exempt from the need to raise and manage capital. The Communists are some of the best bankers in the world. They know the value of the dollar even better than we seem to know it in the United States. They speak the same language and they deal with the same money markets as do international banks in the free world. It is not surprising that the Red Chinese, for example, maintain one of the biggest banks in Hong Kong. It is not even surprising that, for their own purposes, they allow the existence of Hong Kong, which, like Panama, is an important offshore banking center.

And finally, Mr. President, I might point out that events often accelerate beyond the intentions or expectations of leaders, and that may be that the present dictator of Panama has no intention or inclination to go any further in anti-American actions. But the prelude to Castro and Cuba was Batista. And in some respects the comparison of Torrijos to Batista is even more appropriate, with regard to corruption and wholesale violations of human rights. By making ourselves the partner and guarantor of gangster rule in Panama, we are setting ourselves up to be the target of a Communist revolution there.

And let us make no mistake about it.

Now there is no attempt here by this Senator from North Carolina to prophesy. I do not have a crystal ball, Mr. President, and I doubt that any other Senator does. I am simply attempting to show that the development of a hostile government in Panama is a reasonable consideration. It is a contingency that prudence demands we be prepared for. It is reasonable to believe that the treaties may improve our relations with Panama. It is equally reasonable to believe that our relations might deteriorate.

The notion of some treaty proponents that only favorable circumstances can develop as a result of these treaties is pure fantasy. Life is full of surprises. We can hope for the best, but we should also be prepared to protect our interest if something less than the best happens.

Now the only leverage that the United States would have over Panama would be the threat to build a canal elsewhere. If Panama should become unreasonable, we must maintain the option to go somewhere else. In the judgment of the Senator from North Carolina, we probably would not have to go elsewhere; the threat to go elsewhere would probably be sufficient to bring Panama around.

But the one thing we would have no reason to do is to build another canal, a sea-level canal in Panama. The experts fully agree that there is no way to justify, on an economic basis, a sea-level canal. The cost would be too high to be self-supporting. The economics of it do not make any sense. The advantage of a sea-level canal over the present lock canal is too slight to justify the enormous expenditure that would be required. It is simply not cost-effective, particularly when we consider that the present canal could be modernized with a third lane of locks to handle larger ships at about one-fifth to one-third the cost of building a sea-level canal.

However, if the present canal were denied to us, if Panama became hostile, or became, unwillingly the puppet of a state hostile to us, then we would need a new canal, and obviously we would build it somewhere else.

The treaty gives us a right we do not need; namely, the right to build another canal in Panama; and at the same time, gives up a right that we do need, that is, the right to go somewhere else. And this is plainly, Mr. President, a bad bargain.

So, again, I would say that I enthusiastically support the amendment of the distinguished Senator from Alabama, and I urge its approval by the Senate, and I thank the distinguished Senator for yielding to me.

Mr. ALLEN. Mr. President, we have only 10 minutes before the vote on the amendment, and I shall use only 5 minutes, in order that the proponents of the treaty may have an equal amount of time.

I commend the distinguished Senator from North Carolina (Mr. HELMS) for his very fine speech on behalf of this amendment, and I commend the distinguished Senator from South Carolina (Mr. THURMOND) for his very persuasive speech in support of the amendment.

This is the second part of the amendment. The amendment has been divided into two parts, and a vote was had earlier today on the first part. The second part of the amendment knocks out, in effect, a provision of the treaty putting the prohibition on the United States that for the next 22 years we shall not have the authority to negotiate with another country for a transoceanic canal in the Western Hemisphere, connecting the two oceans; that we cannot even negotiate with another nation; that we cannot build, operate, or maintain a canal other than in Panama.

If a prohibition such as this had been sought to have been placed on Panama, we would hear all sorts of objections from the proponents of the treaties, saying that we should not place this indignity upon Panama, but it is all right to place an indignity on the United States and provide that we cannot, for 22 years, negotiate with another nation for another canal.

The negotiators said that is necessary in order to get the concession that we shall have the veto power over the construction of another canal in Panama. Well, we already have that right of veto, not only in the 1903 Treaty but also in the 1955 Treaty. This puts us in the anomalous position of having a right to say that no other nation can build a canal in Panama, while we have that right under both of those treaties. The treaties provide that we shall give up that right. Then, in order to get back that right—a right we already have, which the treaties have us do away with—we have to put in the humiliating provision that for the next 22 years, no matter what the need for another canal, no matter how dire the necessity for another canal might be, we cannot negotiate with another nation for such canal.

Who in the world would suggest that the United States build another canal in Panama, to cost us some $10 billion, and have Panama expropriate it or become so unhappy with the treaty that the United States would negotiate another treaty with them as to the second canal, giving them that canal?

So there is no danger of the United States wanting to build another canal in Panama; nor, as I see it, is there any danger of another nation spending some $10 billion to build another canal in Panama. How would they amortize that indebtedness? They could not possibly do it, because we have not even paid for the original canal. We still owe $319 million on it. Of course, under the treaty, that is going to be canceled. It is going to be given to Panama.

The amendment we have before us would merely eliminate the provision that we cannot negotiate with another nation for another canal. What is the reason for placing that prohibition on the United States? They say that we should not abuse the sovereignty of Panama. Well, we certainly should not abuse the sovereignty of the United States and place such a limitation upon the exercise of our right to negotiate with another nation.

Mr. President, I hope the amendment will be agreed to. I feel that this is going to be a test of whether the leadership is going to stonewall all amendments, whether they are going to call on the Senate to rubberstamp this treaty without amendments. I am going to be in-

terested in seeing whether the leadership comes forward with a leadership amendment to this treaty, as they did to the other treaty. Things are going to be very interesting. This is one of the major tests of the leadership's willingness to accept provisions that will benefit the United States of America.

I yield the floor, Mr. President.

Mr. SARBANES. Mr. President, we go to a vote at 4 o'clock on this amendment. Therefore, not only will I be very brief, but also, I must of necessity be very brief.

I do make the observation that in listening to the concluding remarks of the distinguished Senator from Alabama, I think it is fair to say that almost every amendment he puts forward is a major test of one thing or another. I notice that this was characterized in that way, and I notice that virtually every other amendment he has presented in the course of these treaties has been characterized in the same way.

The study that was referred to earlier, the very extensive study on which the United States spent $22 million, the Atlantic-Pacific Interoceanic Canal Study Commission, concluded that the only feasible place to build a sea-level canal if you were to build one—and there are a lot of questions involved as to whether one should or should not be built, whether it is economically feasible, what the environmental consequences of doing it would be—in any event, if it were to be done, the only feasible place to do it is in the Republic of Panama. That is the basis on which the arrangement contained in article XII of the treaty before us was arrived at.

This amendment, as I noted earlier in the day, is being proposed to article I of the treaty, which has absolutely nothing to do with this subject matter. It is not being proposed to article XII of the treaty, which is the pertinent and relevant article. It is being brought in here to article I of the treaty. I hope that as we proceed, we can get amendments offered to the pertinent articles of the treaty and not all brought in with respect to article I, with the possibility that they will be brought back again with respect to the article to which they are pertinent, and with the even further possibility that they will be brought back at the end.

What is embodied in the treaty constitutes a reciprocal arrangement between ourselves and Panama. As the executive director of this study indicated, we have really obtained something for nothing, and I think the provision should be seen in those terms.

The distinguished Senator from North Carolina made some reference to the regime in Panama and their treatment of United Fruit, in their operations. I simply want to underscore that the chief executive officer of United Brands Co., of which United Fruit, which operates the banana plantations in Panama, is a division, appeared before our committee and stated:

> We are convinced that ratification of the Panama Canal treaties is the only fair conclusion to the good faith negotiations conducted by our two countries over the last several years.

He went on to say:

> Our most important reason for urging ratification of the treaties can be stated simply and succinctly: We believe it is the right thing to do.

It is important to point this out, because this company's experience in Panama was cited as a reason not to support these treaties; yet, here is the chief executive officer of the company that is being cited for that proposition taking a very strong position in favor of these treaties. He also points out that it is his view that the Panamanian Government and the Panamanian people are capable of assuming the responsibility for managing the canal over the period of time set forth in the treaty documents.

He points cut that the company has a long history in Panama; that the United Fruit Co. Division, which is engaged in the production and distribution of tropical agricultural products, has operated in Panama for nearly 90 years; that they are the largest single user of the Panama Canal.

During 1977 their vessels transmitted the canal nearly 400 times, an average of 33 trips per month. They paid approximately $3 million in canal tolls and transit-related charges.

So here is a company with a very direct involvement which has been cited on the floor in terms of their experience as an argument against the treaties and here is this company on the basis of their experience urging, as strongly as they can, the ratification of the Panama Canal treaties as the only fair conclusion and as the right thing to do.

The PRESIDING OFFICER. Under the previous order the hour of 4 p.m. having arrived the Senate will now proceed to vote on division 2 of amendment No. 86.

Mr. SARBANES. Have the yeas and nays been ordered on the division?

The PRESIDING OFFICER. They have not.

Mr. ALLEN. I call for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. SARBANES. Mr. President, I move to table division 2 of the amendment of the Senator from Alabama now pending before the Senate and ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion to lay on the table division 2 of the amendment of the Senator from Alabama. On this question the yeas and nays have been ordered and the clerk will call the roll.

The legislative clerk proceeded to call the roll.

The PRESIDING OFFICER (Mr. KENNEDY). The Senate will be in order. The clerk will withhold until the Senate is in order.

The Senate is not in order. Senators are requested to take their seats and take their conversations to the cloakroom, please. The clerk will continue to suspend until the Senate is in order.

The Senate is not in order. The Senate is still not in order.

Senators are requested to take their conversations to the cloakroom.

The clerk resumed and concluded the call of the roll.

Mr. CRANSTON. I announce that the Senator from Alaska (Mr. GRAVEL), the Senator from Hawaii (Mr. INOUYE), and the Senator from Vermont (Mr. LEAHY) are necessarily absent.

I further announce that the Senator from Colorado (Mr. HASKELL) is absent on official business.

I further announce that, if present and voting, the Senator from Alaska (Mr. GRAVEL) would vote "yea."

Mr. STEVENS. I announce that the Senator from Nebraska (Mr. CURTIS), and the Senator from Arizona (Mr. GOLDWATER) are necessarily absent.

The result was announced—yeas 52, nays 42, as follows:

[Rollcall Vote No. 75 Leg.]

YEAS—52

Abourezk	Hart	McIntyre
Anderson	Hatfield,	Moynihan
Baker	Mark O.	Muskie
Bayh	Hathaway	Nelson
Bentsen	Hayakawa	Pearson
Biden	Heinz	Pell
Bumpers	Hodges	Percy
Byrd, Robert C.	Hollings	Proxmire
Case	Huddleston	Ribicoff
Chafee	Humphrey	Riegle
Church	Jackson	Sarbanes
Clark	Javits	Sasser
Cranston	Kennedy	Sparkman
Culver	Long	Stafford
Danforth	Magnuson	Stevenson
Durkin	Mathias	Weicker
Eagleton	Matsunaga	Williams
Glenn	McGovern	

NAYS—42

Allen	Griffin	Randolph
Bartlett	Hansen	Roth
Bellmon	Hatch	Schmitt
Brooke	Hatfield,	Schweiker
Burdick	Paul G.	Scott
Byrd,	Helms	Stennis
Harry F., Jr.	Johnston	Stevens
Cannon	Laxalt	Stone
Chiles	Lugar	Talmadge
DeConcini	McClure	Thurmond
Dole	Melcher	Tower
Domenici	Metzenbaum	Wallop
Eastland	Morgan	Young
Ford	Nunn	Zorinsky
Garn	Packwood	

NOT VOTING—6

Curtis	Gravel	Inouye
Goldwater	Haskell	Leahy

So the motion to lay on the table division 2 of amendment No. 86 was agreed to.

Mr. ROBERT C. BYRD. I move to reconsider the vote by which the motion to lay on the table was agreed to.

Mr. CHURCH. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The Senator from Louisiana is recognized. The Senate will be in order; the Senator is entitled to be heard. The Chair requests the Senator to withhold until order is restored.

The Senator from Louisiana.

Mr. LONG. Mr. President, I ask unan-

imous consent to be recognized as in legislative session.

Mr. ROBERT C. BYRD. For how long?

Mr. LONG. Five minutes.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

EXTENSION OF THE TEMPORARY DEBT LIMIT

Mr. LONG. Mr. President, there is at the desk a bill (H.R. 11518) to extend the present debt limit of $752 billion through July 31 of this year. This represents neither an increase nor a reduction in the debt limit; it simply leaves it the way it is, but it extends it through July 31. This is necessary if Congress is to recess even for a few days. I know of no objection, at least no serious objection, to its immediate consideration, Mr. President, and I ask unanimous consent that the Senate proceed to its consideration.

The PRESIDING OFFICER. The bill will be stated by title.

The second assistant legislative clerk read as follows:

A bill (H.R. 11518) to extend the existing temporary debt limit.

The PRESIDING OFFICER. Is there objection to the present consideration of the bill? Without objection, the bill will be considered to have been read twice, and the Senate will proceed to its immediate consideration.

Mr. ROBERT C. BYRD. Mr. President, will the Senator yield?

Mr. LONG. Yes.

REQUEST FOR COMMITTEE MEETING

Mr. ROBERT C. BYRD. Mr. President, I have been asked by the Senator from Mississippi (Mr. EASTLAND) to ask unanimous consent that the Committee on the Judiciary be authorized to meet in room 208 at this time, to report out the nomination of Mr. Civiletti.

The PRESIDING OFFICER. Is there objection?

Mr. THURMOND. Mr. President, reserving the right to object, I do object, while the Senate is in session.

The PRESIDING OFFICER. Objection is heard.

EXTENSION OF THE TEMPORARY DEBT LIMIT

The Senate continued with the consideration of H.R. 11518.

Mr. LONG. Mr. President, under present law, the debt limit is $752 billion which consists of a $400 billion permanent limit and a $352 billion temporary additional limit which expires on March 31, 1978. Without any action by Congress, the legal limit will fall to $400 billion on April 1.

Mr. HARRY F. BYRD, JR. Mr. President, may we have order?

The PRESIDING OFFICER. The Senate is not in order. The Senate will be in order. Senators are requested to take their seats or to withdraw with their conversations to the cloakrooms.

The Senator from Louisiana may proceed.

Mr. LONG. Revised estimates of budget outlays were made available to the Finance Committee on Tuesday, March 14, 1978. These revisions indicate it will be possible for the administration to carry on for an additional 4 months without an increase in the present debt ceiling, because actual outlays continue to fall short of budget estimates. Legislation is necessary, however, to continue the present debt limit for the additional period.

The budget revisions attribute the shortfall to, first, a review of the fiscal year 1978 total outlays in view of the overestimate of actual spending in the first months of the year; second, policy changes enacted by Congress or proposed by the administration since the budget was submitted; and third, technical changes in several of the estimates.

As a result, the estimate of outlays was reduced by $8.7 billion from $462.2 to $453.5 billion, and estimated receipts were increased by $100 million. The new calculations reduce the budget deficit estimated for fiscal year 1978 from $61.8 to $53 billion.

A simple extension of the present limit for the additional 4 months appeared to be the most desirable choice at the present time. By July, Congress will have adopted the first budget resolution for fiscal year 1979 and several of the appropriations bills for that year will have been passed. There will be available then some congressional guidance with respect to the targets for budget totals and debt limit, and a debt limit bill at that time reflects the contents of the budget resolution.

Mr. HARRY F. BYRD, JR. Mr. President, will the Senator yield?

Mr. LONG. I yield to the distinguished Senator from Virginia.

Mr. HARRY F. BYRD, JR. Mr. President, the Federal funds deficit for fiscal year 1979 is projected to be $74 billion. I point out that that is the largest Federal funds deficit in the history of our Nation. I ask unanimous consent to have printed in the RECORD at this point a table showing the national debt for each of the fiscal years beginning in 1900. This table will show that the national debt has doubled in the past 7 years.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

The national debt in the Twentieth Century: Total at the end of fiscal years 1900–79

(Rounded to the nearest billion dollars)

1900	1
1901	1
1902	1

SOURCE.—Office of Management and Budget (March 1978).

Mr. BARTLETT. Mr. President, I call up my amendment No. 89.

Mr. LONG. Is that on this bill?

The PRESIDING OFFICER. The Senate is still considering the debt limit bill. The question is on the third reading of the bill.

The bill (H.R. 11518) was ordered to a third reading, was read the third time, and passed.

THE PANAMA CANAL TREATY

The Senate continued with the consideration of Executive N, 95th Congress, 1st session.

AMENDMENT NO. 89

Mr. BARTLETT. Mr. President, I call up my amendment No. 89 as a substitute, revising the Panama Canal Treaty to a lease agreement between the United States and Panama.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Oklahoma (Mr. BARTLETT) proposes an amendment numbered 89:

Strike paragraph 2 of article I and insert in lieu thereof the following:

2. Notwithstanding any other provision of this Treaty, the Republic of Panama hereby leases to the United States of America the areas and installations made available by the Republic of Panama for the use of the United States of America under this Treaty and related agreements, and agrees that the United States of America shall have the rights necessary to regulate the transit of ships through the Panama Canal, and to manage, operate, maintain, improve, protect, and defend the Canal, except that such lease and such agreement shall terminate at the close of a period of ninety-nine years beginning on the date of entry into force of this Treaty, unless the United States of America, at its option, renews such lease and such agreement for additional periods of ninety-nine years. The consideration for such lease and such agreement shall be the amount required to be paid under paragraph 4 of Article XIII of this Treaty to the Republic of Panama by the Panama Canal Commission, a United States Government agency provided for under this Treaty. The Republic of Panama guarantees to the United States of America the peaceful use of the land and water areas leased pursuant to this paragraph.

Mr. BARTLETT. Mr. President, I ask for the yeas and nays on my amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. SCOTT. Will the Senator yield?

Mr. BARTLETT. I yield to the distinguished Senator from Virginia.

Mr. SCOTT. Mr. President, I appreciate the Senator yielding. I wanted to mention that when the Senate resumes after our recess next week, I intend to offer a further amendment to article I of the treaty. The principal amendment that I would offer relates to the United States retaining the ownership of the Canal Zone, but sharing the operations of the zone with other American countries. I believe that the American people are more concerned about the loss of ownership and control of this property than they are about anything else.

The preamble of the proposed Panama Canal Treaty says, "Acknowledging the Republic of Panama's sovereignty over its territory," and I believe that is intended to mean to include the Canal Zone. In any event, it says that upon "entry into force, this treaty terminates and supersedes the 1903 Treaty" and a variety of other treaties the United States has with Panama, and, in effect, would mean that we would lose the sovereign rights over the Canal Zone, we would lose proprietary rights, and we would lose control of the zone.

We have acquired proprietary rights not only from Panama under the 1903 treaty, but we have acquired them by purchase and condemnation from the private owners. We have acquired them from the French Company and also from Colombia.

It would appear, if we read only article I, that we would have a conflict as to whether the United States is giving up its proprietary rights. When we turn to article XXIII it says that we are going to turn over the canal property in operating condition and free of liens and debts except as the two parties may otherwise agree, and that the United States transfers without charge to the Republic of Panama all right, title, and interest the United States of America may have with respect to all real property, including nonmovable improvements thereon, as set forth.

Mr. President, I just wanted to make an announcement in advance of the recess, because we will be appraising the language during the recess period. The essence of this amendment, which will be offered when we reconvene after the Easter recess, is that the United States would retain title but that we would have the Board of Directors of the Panama Canal Company made up of one American citizen, one Panamanian, and citizens of five other Continental American countries to be selected by the respective governments of those states.

To me, that would eliminate the charge of colonialism, and yet the United States would maintain title and have a voice in the control. We could get rid of any suggestion of colonialism and we could protect the canal. As Admiral Moorer said, there is no substitute for ownership and control when we are thinking about a military situation.

I appreciate the distinguished Senator from Oklahoma yielding so I could make this very brief statement. I thank the Senator.

Mr. SARBANES. Will the Senator yield?

Mr. BARTLETT. I yield to the Senator from Maryland.

Mr. SARBANES. For the benefit and enlightenment of our colleagues, I wonder if we could reach a time agreement on when we will go to a vote on the amendment. I believe it would be very helpful to the Members. I suggest there be 90 minutes, equally divided. Is that satisfactory?

Mr. BARTLETT. That would be fine.

Mr. SARBANES. Mr. President, I ask unanimous consent that with respect to the amendment of the Senator from Oklahoma——

Mr. BARTLETT. Will the Senator yield? I will be happy to reduce that to 60 minutes.

Mr. SARBANES. Mr. President I ask unanimous consent that the vote with respect to the amendment of the Senator from Oklahoma which is pending at the desk, take place not later than 1 hour from now, with the time equally divided between the author of the amendment and the managers of the treaty.

The PRESIDING OFFICER. Is there objection?

Mr. BARTLETT. I have no objection.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BARTLETT. I yield to the Senator from Utah.

Mr. HATCH. Mr. President, I intend to call up an amendment immediately following the distinguished Senator from Oklahoma. Perhaps it would be well at this time, since we are getting some of the procedural problems set aside, to say that I would also agree to 1 hour on my amendment as well, to be divided equally, if that is satisfactory to the distinguished Senator from Maryland. I doubt if I will use the whole time, and I would hope the distinguished Senator from Maryland would not use his full time.

The PRESIDING OFFICER. Is the Senator from Utah propounding a separate request?

Mr. HATCH. Yes.

Mr. SARBANES. Mr. President, I make a further unanimous-consent request that following the vote with respect to the Bartlett amendment, Mr. HATCH be recognized to call up an amendment, and that the vote with respect to the amendment called up by the Senator from Utah occur no later than 1 hour thereafter, with the time to be equally divided with respect to that amendment.

The PRESIDING OFFICER. Is there objection? Hearing none, it is so ordered.

Mr. SARBANES. Will the Senator yield for a further moment?

Mr. BARTLETT. I yield.

Mr. SARBANES. In view of the unanimous-consent requests which have been entered, I think we ought to advise Members of the Senate to anticipate a vote at 5:30, or thereabouts, perhaps somewhat earlier, on the Bartlett amendment, and a vote about 1 hour later, or somewhat less than that, on the Hatch amendment.

I thank the Senator from Oklahoma.

Mr. BARTLETT. Mr. President, after many years of public discussion and official negotiation, during four administrations, after weeks of debate here in the Senate, concluding in the ratification of the treaty of neutrality, the treaty ratification process now advances to the very heart of the Panama Canal issue.

Article I of the Panama Canal Treaty terminates all previous treaties between the United States and the Republic of Panama, redefines the rights and responsibilities which are delegated to the United States and Panama for the management, operation and defense of the canal, and affirms the goal of uninterrupted, efficient operation of the canal.

In a sense, however, the real essence of this article, and of the entire treaty issue, is the recognition of Panama as territorial sovereign over the canal and Canal Zone.

Both in Panama and in the United States, the debate over the present treaty is virtually as old as the treaty itself. The focus of this debate has been the matter of sovereignty, a circumstance which has regrettably made discussion of the treaty far more emotional and complex than it might have been, had the new agreement conformed to the treaty precedent the United States had established a half century earlier.

The United States and Colombia, Panama's former sovereign, had long enjoyed a mutually beneficial commercial arrangement under the Bidlack-Mallarino Treaty of 1846. The treaty, while guaranteeing Colombia's sovereignty over the Isthmus of Panama, granted the United States "the right of way or transit across the Isthmus of Panama upon any modes of communication that now exist or that may be, hereafter, constructed."

With the treaty, the United States acquired the right to preserve the neutrality of transportation routes across the isthmus. Thus, America's Panama Canal policy was truly formulated 65 years before the canal became a reality. In the exercise of that policy, the United States built the highly successful Panama railroad across the isthmus. It was also in the legitimate exercise of that policy that the United States deployed military forces and warships to Panama on occasions when transportation across the isthmus was jeopardized.

These principles were reaffirmed on January 22, 1903, when U.S. Secretary of State John Hay signed a treaty with Colombian Minister Tomas Herran. The Hay-Herran Treaty, while granting the United States the right to construct a canal across the isthmus, acknowledged Colombian sovereignty of the Canal Zone. The treaty established U.S. jurisdiction and control over the canal and Canal Zone by leasing the property to the United States for a period of 100 years. The lease was to be renewable indefinitely at the option of the United States.

This precedent was followed again by Secretary of State John Hay in treaty negotiations with the new Republic of Panama. The treaty originally drafted by Hay appropriately avoided the question of sovereignty and proposed instead a simple 100-year lease of the Canal Zone by the United States, renewable indefinitely by our country. Under Hay's proposal, it is quite possible that the matter of renegotiation of the treaty might never have arisen until the year 2003.

Fortunately, in the opinion of the Senate and the Roosevelt administration, the Hay proposal was substantially revised by Panama's own Envoy, Phillipe Bunau-Varilla. Rather than simply leasing the Canal Zone, the revised treaty granted the United States "sovereign rights" over the Canal Zone "in perpetuity."

Thus, the new treaty was undermined from the beginning, as John Hay would later confess in a letter to Senator John C. Spooner of Wisconsin, champion of a Panamanian route versus a Nicaraguan route for the canal. Hay described the new treaty as "very satisfactory, vastly advantageous to the United States, and we must confess, with what face we can muster, not so advantageous to Panama. . . . You and I know too well how many points there are in this treaty to which a Panamanian patriot could object."

In negotiating a new treaty with the Republic of Panama, the United States should have been guided by the precedents which existed before the Hay-Bunau-Varilla Treaty. We might have also been guided by another international agreement, negotiated, ironically, in the same year as the Panama Canal Treaty. The agreement, entered into force February 23, 1903, renewed in 1934, and remaining in effect indefinitely, provides for the lease to the United States by the Republic of Cuba of an area of land and water known as Guantanamo Bay.

The treaty is entitled "Lease of Lands for Coaling and Naval Stations," and, while its provisions are not precisely analogous to the issue of the Panama Canal, the language of article III of the agreement is indeed relevant to our current dilemma. Article III states:

> While on the one hand the United States recognizes the continuance of the ultimate sovereignty of the Republic of Cuba over the above described areas of land and water, on the other hand the Republic of Cuba consents that during the period of the occupation by the United States of said areas under the terms of this agreement the United States shall exercise complete jurisdiction and control over and within said areas . . .

It is extremely important to note the manner in which the separate concepts of sovereignty and jurisdiction and control were addressed in this agreement. This distinction is, perhaps, the primary reason the Guantanamo Bay lease remains in effect and undisputed today. Likewise, the absence of such a distinction is a principal defect, not only of the 1903 Panama Canal Treaty, but the proposed new treaty before us.

Mr. President, as I outlined in detail in a statement of February 23, 1978, the weight of evidence before the Senate affirms once again that the Panama Canal is vital to America's economic and national security interests, and that these interests will be secured only by continued U.S. administration and control of the Panama Canal.

It is clear that "America's Panama Canal policy," formulated a half century before the canal was constructed, remains valid today. I believe the course we must take to preserve that policy is equally clear.

The necessary revisions in the 1903 treaty between the United States and Panama will be achieved most appropriately and effectively through a lease agreement—an agreement similar in principle to those in force or proposed by the United States prior to the 1903 treaty, and to the existing treaty covering Guantanamo Bay, Cuba. Such an agreement would surely have appealed to the Republic of Panama. Within the framework of an international lease, every reasonable demand of Panama could be met.

First, the complex and emotional issue of sovereignty could finally be resolved in Panama's favor. At the same time, more tangible concessions could be made to address the justified resentment Panamanians have held for the U.S. presence, not only as a sovereign power, but a superior one in their own country. Dual economic, social, and legal standards would, and should, be dissolved.

Other appropriate concessions could include:

A substantial reduction of the land and water area of the Panama Canal Zone.

A substantial reduction in the number of U.S. military bases in Panama.

A substantial reduction in the level of U.S. forces in Panama.

A substantial increase in Panamanian employment in the operation of the canal and participation in higher levels of management of the canal.

A substantial increase in the share of the canal revenues for Panama.

A substantial increase in the U.S. annuity to Panama.

It should be noted that these provisions are not inconsistent with the terms of the Panama Canal Treaty before us. However, the proposed new treaty goes far beyond these generous concessions to phase out and eventually relinquish completely U.S. administration and control over the canal and Canal Zone.

During the recent debate over the treaty of neutrality, many Senators, perhaps even a majority, expressed serious misgivings about the loss of the U.S. rights to assure the continued effective operation of the canal. My amendment, revising the proposed new Panama Canal Treaty as a legitimate international lease agreement, reaffirms those rights. Unlike the 1903 treaty, however, it would do so in a fair and just manner, in good faith and without apology.

I would explain to my colleagues that if the Senate agrees to the provisions of my amendment, I would then at a later time introduce another amendment of paragraph 2 of article II, which would deal with the termination provisions in that paragraph.

There could be other minor changes that would be necessary in the body of the Panama Canal Treaty required because of the adoption of this amendment.

I think that this amendment is particularly important because it does put to rest, once and for all, the sovereignty issue, the issue which has been the burning area of debate over the last several months, several years, several decades.

It is the issue that has caused the real problem. It is the issue that the Panamanians want redressed.

So I hope that my colleagues in the Senate will seriously consider this proposal and will see fit to pass it as an amendment to the Panama Canal Treaty.

Mr. President, I withhold the remainder of my time.

Mr. SARBANES. Mr. President, what is the time situation?

The PRESIDING OFFICER. The Senator from Oklahoma has 15 minutes remaining. The Senator from Maryland has 30.

Mr. SARBANES. Mr. President. I hope not to use the full 30 minutes.

The amendment which the distinguished Senator from Oklahoma has offered, in effect, reestablishes a perpetuity arrangement with respect to the American presence in Panama. It calls for, and I quote now from the amendment:

> A lease which shall terminate at the close of a period of 99 years beginning on the date of entry into force of this treaty unless the United States of America, at its option, renews such lease and such agreement for additional periods of 99 years.

I want it very clearly understood what the amendment calls for is not only a 99-year lease at the outset, but renewals

for further 99-year periods—and I stress the word "periods" in the plural— additional periods of 99 years, at the option of the United States—not by agreement between the United States and the Republic of Panama, but at the option of the United States.

So, in other words, what this amendment would do is establish the principle of perpetuity with respect to the American presence in Panama.

Mr. President, it should not take much elaboration on the amendment for everyone to perceive that this runs directly counter to and contrary to the premises on which the treaties before us have been negotiated. There is absolutely no possibility that the other party to the agreement, the Republic of Panama, would accept a relationship which established in the United States the right, at its own option, to renew such lease and such agreements for additional periods—and again I underscore "periods"—of 99 years.

Now, earlier in considering the Neutrality Treaty, the permanent Neutrality Treaty, which governed the situation after the year 2000 and preserved to the United States important rights to take action and maintain the neutrality of the canal, efforts were made to amend that treaty to either give the United States a perpetual right to remain in Panama or to give it a right over a period of years.

Those proposals were rejected by the Members of the Senate by rather large margins in each instance, and the proposal which the Senator from Oklahoma has now submitted is not only a renewal of those proposals, but really goes much further than most of the ones that were presented before this body.

The whole question of perpetuity has been one of the issues of contention between the United States and Panama.

There are many countries in which we have American bases or some other American presence, but there is no country in which the United States has the right for such a presence in perpetuity—perpetually. Under the treaty before the United States has the right to have a continuing presence both in terms of the military and in terms of operating and managing the canal until the end of this century.

This amendment is not only a 99-year lease, but has the provision, and I want to read these words again:

> The United States of America, at its option, renews such lease and such agreements for additional periods of 99 years.

Now, I ask anyone who engages in making anything that approaches an even-handed bargain whether they would characterize any agreement with another party whereby the other party had the right to continually extend it, not with your agreement, but of their own volition, as constituting an even-handed agreement.

Obviously, the amendment, which attacks the entire basis of the treaty negotiation, really goes back to an approach that was embodied in the 1903 treaty which has been one of the difficulties in contention between the United States and the Republic of Panama.

Mr. President, I reserve the remainder of my time.

Mr. BARTLETT addressed the Chair.

The PRESIDING OFFICER. The Senator from Oklahoma.

Mr. BARTLETT. Mr. President, I yield to the distinguished Senator from Wyoming.

Mr. HANSEN. Mr. President, I thank my distinguished colleague from Oklahoma for yielding to me.

It seems to this Senator that the Senator from Oklahoma has hit upon a very workable, practical solution to what, obviously, is becoming an extremely difficult problem.

I can understand, as I am certain all Senators do, the concern that Panamanians feel over the issue of sovereignty. That seems to be one of the most difficult of all the problems that we have been trying to address in working out a treaty that will be workable, that can be counted upon to give the kind of assurance that the United States must have and, indeed, upon which a significant part of the world depends in order to assure the accessibility to the canal that is obviously in the interests of all people.

A treaty which would recognize this lease arrangement successfully resolves the issue of sovereignty. We do not challenge the sovereignty of Panama but we, by virtue of a lease arrangement, again will have the advantages that sovereignty, for such a period of time, might provide.

I think it should be observed that the lease arrangement has worked well in Guantanamo Bay in Cuba, a country that has certainly been hostile in recent years to the United States. We have in that Communist-controlled country a very important naval base. If it can work in Cuba, it most certainly could work in Panama.

I think we can find other illustrations throughout the world where the United States has had military bases and has occupied land under a lease arrangement. That argues well for the implementation of this same concept in the nation of Panama.

Furthermore, this amendment would keep intact the major provisions of the proposed Panama Canal Treaty. There are other advantages that could be pointed out.

The Senator from Oklahoma has said that these are concessions which certainly could be considered and might very well be included in a lease arrangement: a substantial reduction of land and water area of the Panama Canal Zone; a substantial reduction in the number of U.S. military bases in Panama; a substantial reduction in the level of U.S. forces in Panama; a substantial increase in Panamanian employment in the operation of the canal and participation in higher levels of management of the canal; a substantial increase in the share of the canal revenues for Panama.

And lastly, he calls attention to a concession which would be in the interests of Panama; namely a substantial increase in the U.S. annuity to Panama.

I think the Senator from Oklahoma has come forward with a very excellent suggestion. We had difficulty with these treaties and almost every Member of this body has participated at one time or another in trying to resolve the extremely complex and difficult issues in there two treaties before the Senate.

The efforts to which the White House and the executive have gone in trying to secure a sufficient number of votes to assure ratification of this treaty, I think underscores the difficulties that fair-minded people have had in trying on the one hand to state that we cannot amend the treaty and turning around and amending the resolution of ratification; thus, assuring Senators who were deeply concerned and disturbed that we have in fact accomplished through indirection that which we would be denied accomplishing in a straight-forward manner.

I have been one who does not believe that we can have it both ways. I do not think that it makes sense to say that if the Panama Canal Treaty is amended it will automatically constitute a rejection of the treaty, as indeed I believe it will, and then to find assurance and comfort in the device that has been put forward by three proponents in saying that, despite the fact that we cannot amend the treaty, we can amend the resolution of ratification. We must adopt reasonable tenable positions and explain our actions to our constituents. Otherwise, Americans who later look at what we have done here today will wonder how on earth we could have arrived in a rational way at the conclusion that seemingly we have reached.

I salute the distinguished Senator from Oklahoma. I hope that his amendment will be given serious consideration and the support that I think it deserves. It would resolve many of the issues that I think need to be resolved. It will resolve them in a way that will not disrupt the whole process that is taking place here and yet would accomplish and would secure for the United States those important operational rights that we know and recognize are important.

I thank my colleague from Oklahoma for yielding, Mr. President.

Mr. BARTLETT. I thank the distinguished Senator from Wyoming for those very important, interesting, and pervasive remarks in favor of this proposal. I appreciate his taking the time to address himself on this support matter.

I would say to the distinguished Senator from Maryland that the treaty with Cuba on Guantanamo Bay provides that the United States has a lease on the land and water as long as it is occupied by the United States. So, in effect, it has a very similar provision to that in this lease proposal.

This lease proposal is nearly identical with the proposal that the Secretary of State, John Hay, had prepared for negotiation with Panama. I think it erases the basic problem that exists in the 1903 treaty that was executed and ratified between the two countries.

It replaces the 1903 treaty with a much more workable agreement that provides for a long-term lease which can be renewed indefinitely at the option of this country.

It permits the opportunity for the

United States to manage the Panama Canal. I think this, along with the sovereignty issue, is a basic issue in the minds of many of the people in this country. They know that this country has done a good job of managing the canal. It has kept the fees at a reasonable level. It has kept the Panama Canal open and available to ships of all nations, and it has provided a deterrent for anyone who might have had in mind mischief in or around the canal. It has provided very capably for the defense of the canal.

I think we have this responsibility to continue as a leader of the Western Hemisphere including effective management of the Panama Canal. It is vital that the world be assured that the canal will continue to be operated.

There are so many severe questions about the Panama Canal under the Panama Canal Treaty and the Treay of Neutrality, under the management of Panama and even during the period up to 1999, when the management of the Panama Canal will be more or less a joint effort between the two nations. There is danger of the canal becoming a white elephant economically. There is a good possibility that it will be brought out in this debate after the year 1999 that the Panama Canal will have severe economic difficulties. There is not the assurance of continued operation and management with Panama as the manager, as compared with that of the United States.

So I hope my colleagues will join me in supporting this amendment. I am prepared at this time, if the distinguished Senator from Maryland is prepared, to yield the remainder of my time.

Mr. SARBANES. Mr. President, I will take just a moment.

I think it must be clearly understood that the proposed amendment would not only eliminate the day which is now set at the end of the century, 22 years away, which is almost a generation for ending an American presence in Panama but would substitute for it not only a 99-year lease duration period, but that such period, is renewable for successive 99-year periods at the sole option of the United States. So, in essence, the proposed amendment would provide for an in perpetuity arrangement.

After many years of negotiations between the United States and the Republic of Panama the parties have agreed upon an extended period for U.S. operation of the canal and U.S. military base rights in Panama.

That period is 22 years, until the end of the century. Moreover, the United States obtained in the Permanent Neutrality Treaty rights of indefinite duration with respect to the use of and defense of the Panama Canal.

This amendment, therefore, is totally contrary to the premises of the negotiations. It is obviously completely unacceptable to the other party, and it would really mean that we would lose the opportunity to conclude these agreements.

Feeling strongly as I do that these agreements serve American interests, our defense interests, our economic interests, and our foreign policy interests, I urge my colleagues to reject the amendment.

Mr. President, I am prepared to yield back my time and go to a vote if that suits the Senator from Oklahoma.

Mr. BARTLETT. Mr. President, I have just a word to say and then I will be prepared to yield back the remainder of my time.

I think, from the debate that has taken place so far, and the amendments, reservations, and understandings which have been adopted, that the majority of Senators of this Senate are not pleased with the agreement that is so strongly supported by the distinguished Senator from Maryland.

This amendment is a new means of approaching a treaty, one that has precedent in this country and one that eliminates the difficulty that has been created down through the years over the sovereignty of the Panama Canal.

So this is done in a way that I believe leads to a solution of the problems that exist between our Nations regarding sovereignty and yet permits the continued management and operation of the canal and the waters and area around it by this Nation. In my opinion, it is so important to assure the people of this country that the Panama Canal will be properly maintained, equipped, and protected as well as managed.

I am ready to yield and do yield the remainder of my time, along with the Senator from Maryland.

Mr. SARBANES. Mr. President, I yield the remainder of our time.

The PRESIDING OFFICER (Mr. ZORINSKY). All time having been yielded back the question is on agreeing to the amendment of the Senator from Oklahoma.

On this question, the yeas and nays have been ordered and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from South Dakota (Mr. ABOUREZK), the Senator from Alaska (Mr. GRAVEL), the Senator from Hawaii (Mr. INOUYE), the Senator from Alabama (Mr. SPARKMAN), and the Senator from Tennessee (Mr. SASSER) are necessarily absent.

I further announce that the Senator from Colorado (Mr. HASKELL) is absent on official business.

I further announce that, if present and voting, the Senator from Alaska (Mr. GRAVEL) would vote "nay."

Mr. STEVENS. I announce that the Senator from Nebraska (Mr. CURTIS), the Senator from Arizona (Mr. GOLDWATER), and the Senator from North Dakota (Mr. YOUNG) are necessarily absent.

The result was announced—yeas 15, nays 76, as follows:

[Rollcall Vote No. 76 Ex.]

YEAS—15

Allen	Hatch	Schmitt
Bartlett	Helms	Scott
Eastland	Laxalt	Stevens
Garn	Lugar	Thurmond
Hansen	McClure	Tower

NAYS—76

Anderson	Brooke	Cannon
Baker	Bumpers	Case
Bayh	Burdick	Chafee
Bellmon	Byrd, Harry F., Jr.	Chiles
Bentsen	Byrd, Robert C.	Church
Biden	Cranston	Clark
Culver	Danforth	Huddleston
DeConcini	Dole	Humphrey
Domenici	Durkin	Jackson
Eagleton	Ford	Javits
Glenn	Griffin	Johnston
Hart	Hatfield, Mark O.	Kennedy
Hatfield, Paul G.	Hathaway	Leahy
Hayakawa	Heinz	Long
Hodges	Hollings	Magnuson
Mathias	Matsunaga	McGovern
McIntyre	Melcher	Metzenbaum
Morgan	Moynihan	Muskie
Nelson	Nunn	Packwood
Pearson	Pell	Percy
Proxmire	Randolph	Ribicoff
Riegle	Roth	Sarbanes
Schweiker	Stafford	Stennis
Stevenson	Stone	Talmadge
Wallop	Weicker	Williams
Zorinsky		

NOT VOTING—9

Abourezk	Gravel	Sasser
Curtis	Haskell	Sparkman
Goldwater	Inouye	Young

So Mr. BARTLETT's amendment was rejected.

Mr. SARBANES. Mr. President, I move to reconsider the vote by which the amendment was rejected.

Mr. CHURCH. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. Under the previous order, the Senator from Utah (Mr. HATCH) is recognized.

UP AMENDMENT NO. 14

Mr. HATCH. Mr. President, I call up my unprinted amendment and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Utah (Mr. HATCH) proposes an unprinted amendment numbered 14:

At the end of Article I, add the following:

"5. The Republic of Panama agrees that, for the duration of this Treaty, it shall not nationalize, expropriate, seize ownership, or control of any property owned by the Panama Canal Commission, or any property owned by any United States citizen, or owned by any corporation, partnership, or association in which United States citizens have an interest or interests, situated in Panama or in any area made available to the United States of America by the Republic of Panama, pursuant to this Treaty and related agreements.".

The PRESIDING OFFICER. On this amendment there is a time limitation of 1 hour, to be equally divided between the Senator from Utah (Mr. HATCH) and the Senator from Maryland (Mr. SARBANES).

Mr. HATCH. Mr. President, while we have enough Senators present, I ask for the yeas and nays on my amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. HATCH. Mr. President, I have agreed to keep my remarks brief, so that we can consider this amendment with expedition. I intend to conclude my remarks in less than 10 minutes.

During the course of this debate——

Mr. CHURCH. Mr. President, will the Senator yield? I apologize for interrupting.

Mr. HATCH. Yes.

Mr. CHURCH. Will the Senator be able to make his unanimous-consent agree-

ment conform, with a total of 20 minutes, 10 minutes to a side?

Mr. HATCH. Mr. President, I ask unanimous consent that the time for consideration of this amendment be limited to not more than 20 minutes, the time to be equally divided between the parties.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. HATCH. Mr. President, during the course of this debate I have discussed many of the serious ambiguities contained in these treaties. Today I would like to draw attention to a fatal omission. Nowhere in this treaty is there a provision which protects the United States should Dictator Torrijos decide to nationalize the canal. Indeed, the language of the treaty contains no guarantee that the Republic of Panama will not expropriate the property made available to the Panama Canal Commission, and is silent as regards the property rights of American citizens and corporations or other business enterprises in Panama.

Perhaps the proponents of the treaty wish to argue that Panama would have no reason to nationalize the canal or sell it to a third party because such action would jeopardize Panama's right under the treaty and related agreements to millions of dollars in the form of payments and credits.

At first glance, this would appear to be a reasonable response. But upon reflection we must ask ourselves why the Panamanians might not be encouraged to seek greater profits through a nationalization scheme involving payments from a third party, such as the Soviet Union or one of its satellites.

What I am suggesting, Mr. President, is that the payment provisions are not an iron-clad guarantee that the Panamanians will not, at some future date, nationalize the canal or turn over the facilities to a regime hostile to the United States.

Furthermore, I think that Senators should be mindful of what took place regarding the Suez Canal. Suppose Panama flagrantly violates either the letter or the spirit of the treaties and puts the Panama Canal Commission out of business or at the mercy of a hostile power? Would that justify the use of force to secure our rights and to maintain neutrality?

We did not think so with Suez. In 1954, Egypt made a treaty with Great Britain whereby Great Britain would withdraw its troops from the Suez Canal by 1956. In return, Egypt agreed that Great Britain would retain installations and technicians at Suez for 7 years. The British troops were withdrawn on June 13, 1956. In July, Egypt seized the canal, breaking the treaty with Great Britain.

Moreover, in the 1954 treaty, Egypt had agreed to observe the Convention of Constantinople of 1888, upon which the present neutrality treaty is based. The treaty of 1888 required the Suez Canal to be open to commercial passage in time of war as well as in time of peace to vessels of all nations. But from 1950 to 1956, Egypt denied Israeli ships and cargo passage through the canal. Israel appealed to the U.N. and the Security Council under article 25 ordered Egypt to fulfill its obligations. Egypt as a signatory to the U.N. Charter was bound to obey; yet she refused.

Egypt had thus violated the 1888 treaty, the 1954 treaty, and the U.N. Charter. And yet when Israel, Great Britain, and France attacked Egypt, the United States joined the Soviet Union at the U.N. in using threats and pressure against Israel, Great Britain, and France for violating the U.N. Charter. Egypt had violated three treaties, yet the aggrieved nations could not use force against her under international law.

To prevent a similar situation from developing in Panama, it seems to me, Mr. President, that this treaty requires some specific guarantees with respect to the possibility of nationalization. I recognize that these would be only paper guarantees, but at least they are better than what we now have—which is no guarantee at all.

Accordingly, I am offering an amendment to article I of the treaties which states simply that the Republic of Panama guarantees that, for the duration of this treaty, it will not nationalize, expropriate, seize ownership, or control of any property owned by the Panama Canal Commission, or any U.S. citizen, corporation, partnership, or association in which U.S. citizens have an interest. I might add that the Foreign Assistance Act of 1961, as amended, contains similar provisions in order to discourage countries receiving foreign aid from nationalizing or expropriating American property.

Mr. President, in the interest of expedition, I reserve the remainder of my time. Might I ask how much time is remaining to the Senator from Utah?

The PRESIDING OFFICER. Four minutes.

Mr. HATCH. I thank the Chair. I reserve the remainder of my time.

The PRESIDING OFFICER. Who yields time?

Mr. CHURCH. Mr. President, this amendment is directly contrary to our national policy. In our relations with other sovereign governments, we have always recognized that those governments have the right of eminent domain, even as our Government possesses that right. We have only insisted, when other governments exercise the right of eminent domain as to us, taking over private property and converting it into public ownership, that the private owners, if they be American citizens, are fairly compensated.

This amendment would deprive the Republic of Panama from exercising the right of eminent domain. It is thus clearly contrary to the established policy of the United States with respect to our dealings with all other governments in the world.

If we read through the amendment carefully, it goes even further. The first sentence reads:

> The Republic of Panama agrees that for the duration of this treaty it shall not nationalize, expropriate, or seize ownership or control of any property owned by the Panama Canal Commission.

Let us stop there.

Since the Panama Canal Commission, under the treaty, is an agency of the U.S. Government, any effort by the Government of Panama to nationalize, expropriate, or seize ownership or control of any property owned by the Panama Canal Commission would be an act taken directly against the United States. It thus would be a violation of the treaty and, in turn, release the United States from any of its obligations under the treaty.

Therefore, the first part of this amendment is totally unneeded. But the amendment continues:

> or any property owned by any United States citizen, or owned by any corporation, partnership, or association in which United States citizens have an interest or interests, situated in Panama.

In other words, the amendment reaches out beyond the Canal Zone and now imposes upon the entire Panamanian nation a protection which would prohibit the Government of Panama from exercising the right of eminent domain against any privately held property or any business if any part of that business was owned by an American citizen.

Let us assume that a Mexican company was the object of an eminent domain proceedings. If we were to adopt this amendment, that Mexican company having holdings in Panama would be protected as long as one American citizen owned one share of stock in the company.

So the amendment not only goes further than any such proposition that I have ever seen before in attempting to handcuff another government and prevent it from exercising eminent domain against legitimate American business interests, but it would cover foreign business interests as well, as long as one stockholder was an American citizen.

The amendment, Mr. President, is effectively wrong even from the standpoint of those who would depart from American national policy and establish a unique rule in our dealings with Panama, because it obviously extends its umbrella not only to American companies but to foreign companies as long as there was any form of participation, even a single share of stock owned by an American citizen.

For all these reasons, Mr. President, it would be a grave mistake to adopt such an amendment. At the appropriate time it is my intention to move to table this amendment.

Mr. President, I reserve the remainder of my time.

Mr. HATCH. Mr. President, I appreciate the comments of the distinguished Senator from Idaho. I would like to call his attention to the fact that my interest in this amendment is the interest of protecting American citizens, American companies, American business interests, as well as the Panama Canal Commission against expropriation and/or nationalization by Panama. I think there is a distinctly different law in both countries between the right of eminent domain and the expropriation of American property, or the nationalization of Amer-

ican property. I think our citizens deserve to have this kind of protection.

I want to protect American citizens as well as our country, even those citizens who own as little as one share of stock in a Panamanian company or in some Pan-American interest or in some American company in Panama which might otherwise be expropriated.

The problems of expropriation and nationalization are not new to the United States of America. We are in a tremendous bind right now from an oil and energy standpoint as a result of these very same problems.

We understand that this is a unique situation. It is one thing to always protect the wonderful feelings of the Panamanians. I cannot see any way that this would be offensive to those feelings. This amendment would benefit U.S. citizens, this country, and Panama in the process because we would both know where we stand. Therefore, I urgently urge my colleagues to support this amendment. It is meritorious. If it is not supported, I will have to conclude that the same stonewalling as has taken place in the past is continuing.

Mr. President, I reserve the remainder of my time, but I am prepared to yield the remainder of my time back and have a vote up or down.

Mr. President, if I could make one further comment, the Foreign Assistance Act has the same language as we have here. It is an act which has governed foreign relations of this country for many years. This amendment has been artfully drafted to protect the U.S. interests and this country, and I think it does no harm to Panama other than to let them know where we stand on this issue. I yield back the remainder of my time.

Mr. CHURCH. Mr. President, as I have already explained, the amendment, as drafted, does not represent American policy toward any other country. If the Senator from Utah cannot see how it would be regarded by the people of Panama, then I really think he should take off his blinders. Suppose Panama were to say to us that the Government of the United States might not, for the duration of the treaty, exercise the right of eminent domain in the language of this amendment, which would then extend not only to Panamanian property but to any property in the United States in which a Panamanian held any interest, even a single share of stock.

The amendment reaches much further than I think even its sponsor intends and on that basis alone should be rejected.

Mr. HATCH. Will the Senator yield?

Mr. CHURCH. I am happy to yield.

Mr. HATCH. I appreciate the distinguished Senator yielding. Basically, all we are doing is incorporating the language of the Foreign Assistance Act of 1961, pursuant to which almost all foreign policy of this country is based. The language is very similar. Incidentally, if the distinguished Senator from Idaho is concerned about the fairness in the United States, I would be willing to grant the same privilege to Panama, that we will not expropriate or nationalize any of their interests in our country.

Mr. CHURCH. The Senator's argument does not correspond with the language of the amendment. I know the provision in the Foreign Aid Act to which he refers, but we have never taken a position, under that act or any other, that foreign governments may not exercise a right of eminent domain. You can use other words. You can say "confiscate," you can say, "expropriate;" but those are just other words for the right of eminent domain by which a government takes private property. Our policy has always been to recognize the right of other governments to exercise the power of eminent domain, even as we insist upon our right to exercise that power. But, in cases where private businesses owned by American citizens are seized by foreign governments, we have always insisted that the owners be fairly compensated. That is the policy of the United States. It is not reflected in the language of this amendment. Indeed, this amendment contradicts that policy.

For that reason, Mr. President, I move to lay the amendment on the table.

Mr. HATCH. Will the Senator yield?

Mr. CHURCH. Yes. I do not know how much time we have.

The PRESIDING OFFICER. The motion is not debatable.

Mr. CHURCH. I withhold my motion, if there is time for me to do so.

Mr. HATCH. It was my understanding that we were going to vote up or down on this. I talked to both Senators on the other side.

Mr. CHURCH. No, the only understanding we had was as to the 20-minute limitation, divided half and half.

Mr. HATCH. I talked to both of you and said, "Let's have an up and down on this." You must not have heard me, then.

I respectfully request that we vote up or down.

Mr. SARBANES. Will the Senator yield on that?

Mr. HATCH. Yes, I am delighted.

Mr. SARBANES. I simply want to state for myself—Senator CHURCH will have to answer for himself—but I say to the Senator that at no time do I recall that question being put to me by the Senator, and I certainly did not respond.

Mr. HATCH. It was, but obviously, you did not hear it, so I shall have to accept it.

Mr. CHURCH. I did not hear it, either.

Mr. HATCH. That was one reason I offered to cut down on the time. But I did ask it and perhaps you did not hear it.

I would like to ask you to consider having a vote up or down on this. It certainly would not hurt anything. Since I remember mentioning it, even though I accept the fact that you did not hear it, I think it would be only fair.

The PRESIDING OFFICER. All time on the amendment has expired.

Mr. SARBANES. Well, Mr. President—has all time expired?

The PRESIDING OFFICER. Yes; it has.

Mr. SARBANES. I ask unanimous consent to proceed for 2 additional minutes.

Mr. CHILES. I object.

The PRESIDING OFFICER. The objection is heard. The question is on agreeing to the amendment.

Mr. LEAHY. A parliamentary inquiry, Mr. President.

The PRESIDING OFFICER. The Senator will state it.

Mr. LEAHY. What is the situation on the amendment? Has it been tabled?

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The yeas and nays have been ordered.

Mr. CHURCH. Mr. President, the Senator from Maryland would like to have an additional minute. I ask unanimous consent that he may have that additional minute.

The PRESIDING OFFICER. Is there objection?

Mr. HATCH. If the Senator from Utah may have the same unanimous consent for an additional minute, which I shall probably not use.

Mr. CHURCH. I have no objection.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. SARBANES. I want to say that a motion to table is a standard and respected parliamentary procedure. The Senator from Utah did not make that request of me and the Senator from Idaho said he did not make it of him. I, frankly, do not respond positively to the tactic that says, "Well, I will do it in a certain amount of time if you will do it my way, but you are not going to do it my way, I am not going to do it in a certain amount of time." We have not asked that with respect to the parliamentary rights of the opponents to the treaty as they propose crippling amendments. It seems unreasonable to me that they should seek to place us in this position. Given where we are right now, I frankly think we ought to move to table because I do not think we should be dealt with in this unfair fashion.

The PRESIDING OFFICER. The Senator's minute has expired.

The Senator from Utah has 1 minute.

Mr. HATCH. In my 1 minute, I would like to say this: I have already acknowledged that the two Senators on the other side probably did not hear me, but I did say, "If we cut this down, we will go back-to-back with Senator BARTLETT's. I will try to cut it down to an hour." Then we cut it down to 20 minutes.

It was right here, at the head table, that I said I would like to have a vote up or down. I thought you both said yes. Apparently, you did not hear me. I accept that. Now I am asking you, in fairness, let us have a vote up or down. If you do not want to, that is your right and privilege, and I shall have to consent to it.

Mr. SARBANES. Does the Senator have time he could yield to me?

The PRESIDING OFFICER. All time has expired.

Mr. SARBANES. I am happy to go to a vote up or down, but I want it understood that this tactic is not accepted by me.

Mr. HATCH. Now, wait a minute.

The PRESIDING OFFICER. The yeas and nays have been ordered.

The PRESIDING OFFICER. All time

has expired. The yeas and nays have been ordered. The clerk will call the roll.

The second assistant legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from Indiana (Mr. BAYH), the Senator from Alaska (Mr. GRAVEL), the Senator from Hawaii (Mr. INOUYE), the Senator from Tennessee (Mr. SASSER), the Senator from Alabama (Mr. SPARKMAN), the Senators from Mississippi (Mr. STENNIS and Mr. EASTLAND) are necessarily absent.

I further announce that the Senator from Colorado (Mr. HASKELL) is absent on official business.

Mr. STEVENS. I announce that the Senator from Nebraska (Mr. CURTIS), Senator from Arizona (Mr. GOLDWATER), and the Senator from Maryland (Mr. MATHIAS) are necessarily absent.

I also announce that the Senator from Vermont (Mr. STAFFORD) is absent on official business.

The result was announced—yeas 26, nays 62, as follows:

[Rollcall Vote No. 77 Ex.]

YEAS—26

Allen	Hansen	Randolph
Bartlett	Hatch	Roth
Brooke	Hatfield,	Schmitt
Cannon	Paul G.	Schweiker
DeConcini	Helms	Scott
Dole	Laxalt	Stevens
Domenici	Lugar	Thurmond
Ford	McClure	Tower
Garn	Nunn	Wallop

NAYS—62

Abourezk	Griffin	Metzenbaum
Anderson	Hart	Morgan
Baker	Hatfield,	Moynihan
Bellmon	Mark O.	Muskie
Bentsen	Hathaway	Nelson
Biden	Hayakawa	Packwood
Bumpers	Heinz	Pearson
Burdick	Hodges	Pell
Byrd,	Hollings	Percy
Harry F., Jr.	Huddleston	Proxmire
Byrd, Robert C.	Humphrey	Ribicoff
Case	Jackson	Riegle
Chafee	Javits	Sarbanes
Chiles	Johnston	Stevenson
Church	Kennedy	Stone
Clark	Leahy	Talmadge
Cranston	Long	Weicker
Culver	Magnuson	Williams
Danforth	Matsunaga	Young
Durkin	McGovern	Zorinsky
Eagleton	McIntyre	
Glenn	Melcher	

NOT VOTING—12

Bayh	Gravel	Sasser
Curtis	Haskell	Sparkman
Eastland	Inouye	Stafford
Goldwater	Mathias	Stennis

So the amendment was rejected.

Mr. SARBANES. Mr. President, I move to reconsider the vote by which the amendment was rejected.

Mr. ROBERT C. BYRD. I move to lay the motion on the table.

The motion to lay on the table was agreed to.

ROUTINE MORNING BUSINESS

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that there now be a period for the transaction of routine morning business, not to extend beyond 30 minutes, with statements limited to 5 minutes each.

The PRESIDING OFFICER (Mr. WILLIAMS). Without objection, it is so ordered.

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Chirdon, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session, the Presiding Officer laid before the Senate messages from the President of the United States submitting sundry nominations which were referred to the appropriate committees.

(The nominations received today are printed at the end of the Senate proceedings.)

REPORT OF THE U.S. ARMS CONTROL AND DISARMAMENT AGENCY—MESSAGE FROM THE PRESIDENT—PM 156

The PRESIDING OFFICER laid before the Senate the following message from the President of the United States, together with an accompanying report, which was referred to the Committee on Foreign Relations:

To the Congress of the United States:

One year ago, in my inaugural address, I pledged "perseverance and wisdom in our efforts to limit the world's armaments to those necessary for each nation's own domestic safety." The report which I am transmitting is an account of the actions taken in 1977 by the U.S. Arms Control and Disarmament Agency towards the fulfillment of that pledge.

The Arms Control and Disarmament Agency is the focal point of my Administration's efforts to reach arms control agreements through negotiations and to develop policies which will lead to reduced worldwide reliance on weaponry. This central role was legislated by the Congress seventeen years ago, and it is entirely in keeping with my concept of how these objectives should be pursued.

The arms control policy and goals set forth in this report reflect my own commitment to the achievement of these important objectives. In the nuclear age, when war could bring catastrophic consequences, our national security policy must include efforts to control arms, as well as to provide for our military defense. The two are complementary activities, both necessary to achieve our overall objectives—peace and security for this Nation and the world.

When necessary, we will maintain our security and protect our interests by strengthening our military capabilities. Whenever possible, however, we seek to enhance our security through arms control. Our security and the security of all nations can be better served through equitable and verifiable limits on arms than through unbridled competition. The United States has chosen arms control as an essential means of promoting its security. As we pursue this continuing course, we must convince other nations that arms control is in their interest as well. Their cooperation is vital if balanced arms control agreements are to be achieved.

Ensuring the stability of the nuclear relationship between the United States and the Soviet Union is the most urgent arms control task today. In the longer term, however, I believe that preventing the worldwide proliferation of nuclear weapons may be of equal significance. Other pressing problems, such as the worldwide traffic in vast quantities of sophisticated conventional arms and regional arms buildups, have far-reaching implications for our own peace and security and that of the rest of the world. As such, I have taken steps to restrict U.S. arms transfers and to gain the cooperation of other suppliers in curbing worldwide sales.

The challenge of preventing war—and redirecting resources from arsenals of war to human needs—is the greatest challenge confronting mankind in this last quarter of the twentieth century. It is a challenge I accept.

JIMMY CARTER.

THE WHITE HOUSE, *March 22, 1978.*

REPORT OF THE NATIONAL ADVISORY COUNCIL ON ADULT EDUCATION—MESSAGE FROM THE PRESIDENT—PM 157

The PRESIDING OFFICER laid before the Senate the following message from the President of the United States, together with an accompanying report, which was referred to the Committee on Human Resources:

To the Congress of the United States:

I transmit herewith the Annual Report of the National Advisory Council on Adult Education for Fiscal Year 1977, as required by Section 311(d) of the Adult Education Act of 1977 (Public Law 89-750), as amended.

JIMMY CARTER.

THE WHITE HOUSE, *March 22, 1978.*

PRESIDENTIAL APPROVALS

A message from the President of the United States stated that on March 13, 1978, he had approved and signed S. 838, an act to amend the Indian Claims Commission Act of August 13, 1946, and for other purposes.

The message also stated that on March 14, 1978, he had approved and signed S. 2076, an act to authorize the Secretary of the Interior to make payments to appropriate school districts to assist in providing educational facilities and services for persons living within or near the Grand Canyon National Park on nontaxable Federal lands, and for other purposes.

MESSAGES FROM THE HOUSE

At 10:59 a.m., a message from the House of Representatives delivered by Mr. Berry, one of its reading clerks, announced that the House has agreed to the following concurrent resolution, in which it requests the concurrence of the Senate:

H. Con. Res. 544. A concurrent resolution providing for an adjournment of the House from March 22 to April 3, 1978 and a recess

of the Senate from March 23 to March 29 or April 3, 1978.

The message also announced that the House has passed the following bills, in which it requests the concurrence of the Senate:

H.R. 1396 An act for the relief of Mrs. Sun Pork Winer;

H.R. 1751. An act for the relief of Lucy Davao Jara Graham;

H.R. 1779. An act for the relief of Gilberto Taneo Gilberstadt;

H.R. 1938. An act for the relief of Santos Marquez Arellano;

H.R. 2291. An act for the relief of Carmen Cecilia Blanquicett;

H.R. 2555. An act for the relief of Michelle Lagrosa Sese;

H.R. 4607. An act for the relief of William Mok;

H.R. 5230. An act for the relief of Jung In Bang;

H.R. 5933. An act for the relief of Jonathan Winston Max;

H.R 6801. An act for the relief of Hye Jin Wilder;

H.R. 6934 An act for the relief of Donna Marainne Benney;

H.R. 7795. An act for the relief of Veronica Judith Hudson;

H.R. 8192. An act for the relief of Andree Marie Helene McGiffin; and

H.R. 8308. An act for the relief of Jac Keun Christianson.

ENROLLED BILLS SIGNED

At 12:53 p.m., a message from the House of Representatives delivered by Mr. Berry, announced that the Speaker has signed the following enrolled bills:

S. 833. An act for the relief of Ah Yong Cho Ewak;

S. 1135. An act for the relief of Youngsoon Choi; and

H.R. 3813. An act to amend the Act of October 2, 1968, an Act to establish a Redwood National Park in the State of California, and for other purposes.

The enrolled bills were subsequently signed by the President pro tempore.

At 2:45 p.m., a message from the House of Representatives delivered by Mr. Hackney, announced that the House disagrees to the amendments of the Senate to the bill (H.R. 6782) to permit marketing orders to include provisions concerning marketing promotion, including paid advertisement of raisins and distribution among handlers of the pro rata costs of such promotion; asks a conference with the Senate on the disagreeing votes of the two Houses thereon; and that Mr. FOLEY, Mr. POAGE, Mr. DE LA GARZA, Mr. JONES of North Carolina, Mr. JONES of Tennessee, Mr. MATHIS, Mr. BOWEN, Mr. ROSE, Mr. RICHMOND, Mr. WAMPLER, Mr. SEBELIUS, Mr. JOHNSON of Colorado, and Mr. MOORE were appointed managers of the conference on the part of the House.

At 6:13 p.m., a message from the House of Representatives delivered by Mr. Hackney, announced that the House has passed the joint resolution (H.J. Res. 796) making an urgent supplemental appropriation for disaster relief for the fiscal year ending September 30, 1978, in which it requests the concurrence of the Senate.

HOUSE BILLS REFERRED

The following bills were read twice by their titles and referred as indicated:

H.R. 1396. An act for the relief of Mrs. Sun Pok Winer; to the Committee on the Judiciary.

H.R. 1751. An act for the relief of Lucy Davao Jara Graham; to the Committee on the Judiciary.

H.R. 1779. An act for the relief of Gilberto Taneo Gilberstadt; to the Committee on the Judiciary.

H.R. 1938. An act for the relief of Santos Marquez Arellano; to the Committee on the Judiciary.

H.R. 2291. An act for the relief of Carmen Cecilia Blanquicett; to the Committee on the Judiciary.

H.R. 2555. An act for the relief of Michelle Lagrosa Sese; to the Committee on the Judiciary.

H.R. 4607. An act for the relief of William Mok; to the Committee on the Judiciary.

H.R. 5230. An act for the relief of Jung In Bang; to the Committee on the Judiciary.

H.R. 5933. An act for the relief of Jonathan Winston Max; to the Committee on the Judiciary.

H.R. 6801. An act for the relief of Hye Jin Wilder; to the Committee on the Judiciary.

H.R. 6934. An act for the relief of Donna Marainne Benney; to the Committee on the Judiciary.

H.R. 7795. An act for the relief of Veronica Judith Hudson; to the Committee on the Judiciary.

H.R. 8192. An act for the relief of Andree Marie Helene McGiffin; to the Committee on the Judiciary.

H.R. 8308. An act for the relief of Jac Keun Christianson; to the Committee on the Judiciary.

ENROLLED BILLS PRESENTED

The Secretary of the Senate reported that on today, March 22, 1978, he presented to the President of the United States the following enrolled bills:

S. 833. An act for the relief of Ah Young Cho Kwak.

S. 1135. An act for the relief of Youngsoon Choi.

ORDER FOR COMMITTEE REPORT ON S. 1264

Mr. CHILES. Mr. President, I ask unanimous consent that the Committee on Governmental Affairs have until midnight, Friday, March 24, 1978, to report S. 1264, a bill to provide policies, methods, and criteria for the acquisition of property and services by executive agencies.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR STAR PRINT OF S. 2525

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that there be a star print of S. 2525. I make the request on behalf of Mr. HUDDLESTON.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent on behalf of Mr. HUDDLESTON that 500 extra copies of the star print be printed.

The PRESIDING OFFICER. Without objection, it is so ordered.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. JACKSON, from the Committee on Governmental Affairs, without amendment:

S. Res. 423. An original resolution to authorize a staff investigator of the Senate Permanent Subcommittee on Investigations to present himself and give executive session testimony before the Select Committee on Assassinations of the United States House of Representatives. Ordered placed on the calendar.

By Mr. PELL, from the Committee on Rules and Administration, without amendment:

H.R. 5981. An act to amend the American Folklife Preservation Act to extend the authorizations of appropriations contained in such act (Rept. No. 95-712).

By Mr. LONG, from the Committee on Finance, without amendment:

S. 2779. An original bill to authorize additional appropriations for the work incentive program established by title IV of the Social Security Act (Rept. No. 95-713).

By Mr. LONG, from the Committee on Finance, with an amendment:

H.R. 8423. An act to amend titles II and XVIII of the Social Security Act to make improvements in the end stage renal disease program presently authorized under section 226 of that act, and for other purposes (Rept. No. 95-714).

By Mr. CHILES, from the Committee on Governmental Affairs, with an amendment:

S. 1264. A bill to provide policies, methods, and criteria for the acquisition of property and services by executive agencies (together with additional views) (Rept. No. 95-715).

By Mr. CRANSTON, from the Committee on Banking, Housing, and Urban Affairs, without amendment:

S. 2790. An original bill to amend the Renegotiation Act of 1951 (together with additional views) (Rept. No. 95-716).

S. 2791. An original bill to amend the Renegotiation Act of 1951 (together with additional views) (Rept. No. 95-717).

● Mr. CRANSTON. Mr. President, I am filing on behalf of the Committee on Banking, Housing, and Urban Affairs, reports on the Renegotiation Abeyance Act of 1978 and the Renegotiation Exemption Act of 1978.

The Renegotiation Act of 1951 was originally intended as a temporary statute to meet the emergency procurement situation existing at the time of the Korean war. The act has been amended and extended 13 times in the past 24 years. I do not know whether this sets some sort of record for long-lived temporary agencies, but the 94th Congress did finally allow the authority of the Renegotiation Board to expire on September 30, 1976.

The Board, of course, continues to exist, living off the stored up fat of its accumulated backlog of filings.

The Banking Committee, however, by a vote of 8 to 6 adopted the Lugar-Cranston proposal to put the Renegotiation Act in mothballs until such time as the President determines, during a national emergency, that authority to renegotiate contracts would be in the best interests of the United States. And, we make specific that the Board is to cease existence when its backlog is completed.

I think many will agree that under

emergency conditions when careful procurement practices and hard negotiations with contractors are not feasible renegotiation is called for, as provided in the committee bill.

Since 1970, the defense procurement process has been under a major overhaul and strengthening process. The Truth-in-Negotiations Act has been a good policeman on the beat in protecting the taxpayer against faulty pricing information.

Under that act, contractors must permit the Defense Contract Audit Agency to perform a defective pricing audit at any time including 3 years after completion of the contract. The Defense Contract Audit Agency has the power to adjust downward retroactively the price of the contract, including any profit derived from inaccurate, incomplete or noncurrent data. Ten million dollars were recovered in fiscal year 1976 by the Agency.

Placing the Renegotiation Act in mothballs will not deprive the taxpayer of these protections.

Profits are not the problem in defense costs. The Renegotiation Board last year reviewed some $40 billion in contracts. It could find only $19 million in excessive profits. That figure is almost equal to the monthly cost overruns on the Trident submarine.

Costs and overruns are serious problems in defense procurement. Much is being done to control costs and to improve the Government's procurement program. The Cost Accounting Standards Act, under which mandatory, uniform cost accounting standards are promulgated, is aiding this process.

The profit incentive is the mainspring of our economic system. The belief that people will work willingly and hard for reward lies at the heart of economic and contractual relations, whether these be business contracts or collective-bargaining agreements.

The Government should bargain hard. The losses sustained by defense contractors are proof that the Department of Defense is not necessarily a pushover.

The committee believes that stripping away profits earned through efficiency, good management—and sometimes good luck—by means of a subjective determination of what constitutes an "excessive" profit is not in the best interests of Government contracting policy or the efficiency of our economic system. In fact, many suspect, as I do, that when so-called excessive profits result from other than efficiency and good management, the fault is more than likely the Government's for failing to bargain knowledgeably and responsibly prior to signing the contract.

That is why I support all efforts to improve the performance of Government procurement officials and contract managers. With the skills, knowledge and legal tools already in hand, I am willing to risk letting the profit-incentive system do its part to produce more efficiencies in the defense procurement field.

The second bill being reported today is the Renegotiation Exemption Act. This bill, which is taken from a provision of S. 1594, as introduced by the distinguished chairman, Senator PROXMIRE, raises the threshold for exemption from the act from $1 million to $5 million, retroactive to 1972. The committee was informed by the Renegotiation Board that this would eliminate about 58 percent of the Board's current backlog. This action, together with the Renegotiation Abeyance Act, would hasten the day that the Renegotiation Board, a relic of the Korean war, is finally mothballed.●

● Mr. BROOKE. Mr. President, today I join with my colleagues on the Banking, Housing, and Urban Affairs Committee in reporting S. 2791, the Renegotiation Abeyance Act of 1978.

The current act—the Renegotiation Act of 1951—was allowed to lapse on September 30, 1976. But there is a great deal of uncertainty as to the future of the Renegotiation Board, which is currently working on a 5-year backlog of contracts completed prior to the expiration of its authority. The bill which the Banking Committee is reporting today would settle, in a definitive manner, the question of the future status of the Renegotiation Board. S. 2791 would put the Renegotiation Board into abeyance until such time as the President determines, during a national emergency, that it would be in the best interests of the United States to reconstitute it. The Board's authority to make determinations in cases which came before it during its authorized period would remain in force. But in view of the overwhelmingly negative evidence which was presented to the Banking Committee during its 4 days of hearings, and thereafter, the committee felt that this was an appropriate time to let the sun set on this anachronistic bureaucracy.

Let me briefly recapitulate the reasoning behind our decision.

Few would argue that the renegotiation process is not a vital element of procurement in times of national emergency, when normal orderly procurement processes are inadequate to cope with demands. Such was the case in 1951, when the current Renegotiation Board was conceived to deal with the unusually high demands on the procurement process of the rearmament program during the Korean War. The Board served our Nation well during that period and in the decade which followed, when the procurement process was still in a rather inchoate stage. But during the 1960's and early 1970's, a number of improvements to the process were made, both by legislation and regulation. I might note these changes came under the leadership and prodding of our chairman, Senator PROXMIRE. It was the opinion of the majority on the committee that these reforms, such as the greatly improved government contracting and audit capacity (which currently has more than 54,000 employees, including 9,000 auditors), the Truth-in-Negotiations Act, and the imposition of cost accounting standards, do much to create a fair and equitable contracting process and significantly reduce the probability that contractors will earn excessive profits.

Recent studies by the Department of Defense, the Conference Board, and the Renegotiation Board's own statistics indicate that defense contractors are not reaping excessive profits on Government contracts. Quite the contrary; they are averaging a lower return on sales than those engaged in commercial business. Over the last few years, the investment community's valuation of firms heavily involved in defense contracting has reflected a generally low level of expectation based on profits which have been spotty and unspectacular during the 1970's. The claim by proponents of a strengthened Renegotiation Board that hundreds of millions of dollars in excess profit determinations could be realized if only the loopholes in the legislation were closed does not appear to be verified by the stock market performance of the defense industry during recent years.

Among the arguments which were most telling against the Renegotiation Board were the following: With its focus on profits rather than costs, renegotiation is actually counterproductive to the goal of keeping defense costs down. Because of the uncertainty it creates, it aggravates the serious problem of capital shortfall in the defense industry. Worst of all, it may actually deter new or additional contractors from entering competition for defense production, thus stifling competition and most probably increasing costs to the Government.

Moreover, there was strong evidence that the Renegotiation Board was not cost effective. A General Accounting Office study confirmed that there were indeed significant incremental costs associated with compliance with the Renegotiation Act. For Hewlett-Packard, the firm most closely audited, the costs associated with compliance amounted to one-half of one percent of renegotiable sales. If one were to assume that compliance costs on an industrywide basis were only half that of Hewlett-Packard, the costs would still amount to over $100 million annually. Excluding Justice Department and court costs, which are substantial in view of the fact that the vast majority of excess profit determinations since 1971 have been appealed to the Court of Claims where they are heard de nova; and excluding the actual operating costs of the Renegotiation Board itself ($6 million last year), it has been costing the Government in the range of $5 to $10 for every dollar recovered by the Board in excess profit determinations over the past 2 years. Needless to say, it was the feeling of the majority of the committee that it simply does not make good sense for the Government to be engaged in such a losing enterprise.

In sum, the case for terminating the authority of the Renegotiation Board seemed incontrovertible. It was clearly a counterproductive and unnecessary bureaucracy which had become not only superfluous but destructive in its effect on our defense industrial base. I urge my colleagues to support the Banking Committee in its effort to streamline the Federal bureaucracy by getting rid of the anachronism which is the Renegotiation Board.●

● Mr. LUGAR. Mr. President, today the Banking, Housing, and Urban Affairs Committee is reporting S. 2791, the Renegotiation Abeyance Act of 1978, which would suspend the authority of the Renegotiation Board to review defense contracts until such time as the President deems it necessary to reconstitute the Board to cope with procurement needs during a national emergency. This bill was reported out of the Banking, Housing, and Urban Affairs Committee as a substitute for S. 1594, which would have extended and broadened the authority of the Renegotiation Board.

The simple fact is that the Renegotiation Board is a bureaucracy which has outlived it usefulness. During the 1950's, the Board was an important part of the procurement process, serving as a watchdog that saved the taxpayers millions of dollars. In recent years, however, it has become a superfluous and counterproductive bureaucracy, which spends more money auditing defense contractors than it collects in the form of excess profits. It also has frustrated efforts to administer our defense industrial base in an efficient and effective manner. Recent studies by the General Accounting Office and others have indicated that the Renegotiation Board costs the taxpayer between $3 and $5 for every $1 which it returns to the Treasury as a result of actions taken by the Board.

The current act—the Renegotiation Act of 1951—was passed in response to the abnormal procurement situations associated with the Korean war. That the Renegotiation Act was intended as a temporary, emergency measure is evidenced by the fact that its expiration date was set for 2 years from the date of enactment. However, this "temporary legislation" has been amended and extended 13 times in the past 25 years. The authority of the Renegotiation Board, which administers the act, was finally allowed to expire on September 30, 1976. Without authorizing legislation, the Board has no authority to review contracts concluded after that date. It is, however, currently working on a 5-year backlog of contracts concluded prior to the expiration.

In recent years, almost all of the Board's determinations have been against smaller firms, producing low technology products. This does not mean that larger defense contractors have been escaping the renegotiation process through subterfuge. Rather, it indicates that, on the whole, the procurement process has been working and the Government has been driving hard bargains.

Low levels of profitability have been verified by recent studies of defense and defense-related industries and by the published statistics of the Renegotiation Board itself relating to overall renegotiable earnings. In fact, there is compelling evidence that profits in the defense industry may be inadequate for the maintenance of an effective and efficient defense industrial base and for assuring competition within that base.

The Profit '76 Department of Defense study analyzed a 5-year period of defense industry profits. That study found that, when measured on the basis of sales, defense contractors' profits on the average were lower than those in commercial business. During the 1970–74 period, pretax profits of defense contractors averaged 4.7 percent on sales, while the profits of commercial producers of durable goods averaged 6.7 percent.

If the Congress wishes to improve the procurement process to protect against undue profits and inefficiency, it seems reasonable that we attack this problem at the heart, at the beginning of the process, through better contracting and auditing procedures. Renegotiation was conceived as a safety net to guard against hasty or faulty procuring techniques. That it is no longer needed is evident. Indeed, in recent years it has only compounded the problem it was designed to ameliorate. I urge my colleagues to join with me in ridding our Government of this archaic bureaucracy.●

By Mr. ABOUREZK, from the Select Committee on Indian Affairs, without amendment:

H.R. 2540. An act pertaining to the inheritance of trust or restricted lands on the Umatilla Indian Reservation (Rept. No. 95–718).

By Mr. ABOUREZK, from the Select Committee on Indian Affairs, with amendments:

S. 1633. A bill to provide for the extension of certain Federal benefits, services, and assistance to the Pascua Yaqui Indians of Arizona, and for other purposes (Rept. No. 95–719).

EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of committees were submitted:

By Mr. JACKSON, from Committee on Energy and Natural Resources:

H. William Menard, of California, to be Director of the Geological Survey.

(The nomination from the Committee on Energy and Natural Resources was reported with the recommendation that it be confirmed, subject to the nominee's commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

● Mr. JACKSON. Mr. President, the Committee on Energy and Natural Resources today approved the nomination of Dr. H. William Menard to be Director of the Geological Survey.

Dr. Menard is a distinguished marine geologist who has been for many years professor of geology at the Scripps Institute of Oceanography.

The committee held a hearing on this nomination last Friday. I ask unanimous consent that Dr. Menard's statement to the committee and his sworn financial statement be printed in the RECORD at this point.

I also ask unanimous consent that letters from Robert J. Lipshutz, Counsel to the President, and from William L. Kendig, Acting Interior Department Ethics Counselor, to Dr. Menard be printed in the RECORD. These letters deal with the actions to be taken by Dr. Menard to comply with conflict-of-interest statutes and regulations.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

STATEMENT OF DR. H. WILLIAM MENARD

Mr. Chairman and distinguished Senators, it is an honor to appear before you as the President's nominee for Director of the United States Geological Survey. My nomination has been unusual in the sense that, unlike eight of the nine previous Directors, I am not a member of the Survey itself. However, I assure you that I share the universal view that the Survey is one of the greatest scientific agencies in the Government and, indeed, in the world. Likewise, I assure you that, if confirmed, I shall be as devoted and diligent to protect and enhance the legitimate interests of the Survey as were those Directors who matured within it. At the same time, I shall be as concerned as they were that the Geological Survey shall continue to serve the Nation's needs for reliable, credible, scientific information of the highest quality. I believe that these needs are growing rapidly because of the increasing difficulties we encounter in finding adequate resources while protecting the environment.

If confirmed I shall be the tenth Director and shall serve in the hundredth year of an organization that is characteristically vigorous rather than venerable. I hope to lead the Survey into a century that will outshine the first. The Survey is not an organization that does science for science's sake but it cannot fulfill its mission of service unless it is staffed by the best scientists and they cannot be the best unless they sometimes pursue knowledge wherever it leads. For example, it is science at its limits that allows us to hope we can predict earthquakes. Thus it is important to the Survey's mission that the Earth sciences have just entered a golden age brought on by the unifying theory called "plate tectonics." The new technology of satellites and computers is enabling us to develop these great scientific advances and at the same time to enhance enormously our ability to serve the Nation.

If the Geological Survey is to serve the Nation best, it will need some of the best young scientists in the Nation. Fortunately these young men and women are challenged by the problems of resources and the environment and I believe that we can attract them to careers of service through science.

As to my qualifications to be the Director of the United States Geological Survey, my education, service, career, achievements and finances have been bared for your inspection. The procedure does credit to the openness of our form of Government but offers little scope for elaboration on my part. Instead, please allow me to answer any questions about my background which may remain.

Thank you.

FINANCIAL STATEMENT

Provide a complete, current financial net worth statement which itemizes in detail all assets (including bank accounts, real estate, securities, trusts, investments, and other financial holdings) and all liabilities (including debts, mortgages, loans, and other financial obligations) of yourself, your spouse, and other immediate members of your household.

ASSETS

Cash on hand and in banks, $191,000.

U.S. Government securities—add schedule,[1] $150,000.

Listed securities—add schedule,[2] $331,708.

Accounts and notes receivable: Due from others, $6,200.

Real estate interests, including mortgages—add schedule,[3] $400,000.

[1] $100,000 U.S. Treasury, 20 July '78. $50,000 U.S. Treasury, 20 April '78.

[2] See attachments.

[3] 7337–39 Eads Ave., La Jolla, $140,000. 7948 Roseland Dr., La Jolla, $260,000.

Personal property, $37,000.
Other assets—itemize: Vested interest in retirement fund, $42,100.
Total assets, $1,158,908.

LIABILITIES

Accounts payable

Unpaid income tax, $150,000.
Real estate mortgages payable—add schedule,[4] $144,300.
Other debts—itemize: Building contract, $20,000.
Total liabilities, $314,300.
Net worth, $843,608.

1. List sources, amounts and dates of all anticipated receipts from deferred income arrangements, stock options, uncompleted contracts and other future benefits which you expect to derive from previous relationships, professional services and firm memberships or from former employers, clients, and customers.

I have four older books in print that may yield $1000/yr.

In addition I have just edited a book for W. H. Freeman & Co. that, perhaps, may yield $2000–$4000/yr. for a while.

2. Are any assets pledged? No.

3. Are you currently a party to any legal action? No.

4. Have you ever declared bankruptcy? No.

H. WILLIAM MENARD.

STATEMENT FOR COMPLETION BY PRESIDENTIAL NOMINEES

Name: Henry William Menard.
Position to which nominated: Director, U.S. Geological Survey.
Date of birth: October 12, 1920.
Place of birth: Fresno, Calif.
Marital status: Married.
Full name of spouse: Gifford Merrill Menard.
Name and ages of children: Andrew Ogden Menard, 29; Elizabeth Merrill Menard, 27; Dorothy Merrill Menard, 25.

Education—
California Institute Technology, 1938–42, B.S., 1942.
California Institute Technology, 1946–47, M.S., 1947.
Harvard University, 1948–49, Ph. D., 1949.

Honors and awards: List below all scholarships, fellowships, honorary degrees, military medals, honorary society memberships, and any other special recognitions for outstanding service or achievement—

Bronze Star Medal, Navy Commendation Ribbon; Teaching Fellow, Cal Tech and Harvard and Woods Hole Ocean. Inst.; Guggenheim Fellow; Overseas. Fellow, Churchill College, Cambridge Univ.; Member National Academy Sciences; Am. Academy Arts and Sciences; Shepard Medal of Soc.

Economic Paleontologists and Mineralogists.

Memberships: List below all memberships and offices held in professional, fraternal, business, scholarly, civic, charitable and other organizations—

National Academy Sciences, 1968-date.
Amer. Assoc. Adv. Sciences, 1948?-date.
Geological Soc. America, 1948?-date.
Amer. Assoc. Petroleum Geologists, 1948?-date.
Amer. Geophysical Union, 1952?-date.
Royal Astronomical Soc., 1972?-date.
Cosmos Club, 1966-date.
Explorers Club, 1975-date.
Federation Amer. Scientists, 1970-date.
Authors Guild, 1970-date.
Amer. Academy Arts Sicences, 1975-date.

Employment record: List below all positions held since college, including the title and description of job, name of employer, location, and date—

1942–46, U.S. Navy, Ensign to Lt., Photo Interpretation, Pacific & European Areas.

1946–49, Graduate schools, with temporary employment as a geologist with So. Calif. Edison Co. (3 months) and Amerada Oil Co. (5 months).

1949–55, Marine geologist, U.S. Navy Electronics Lab., San Diego, Calif.

(1953–56), President, director and diving geologist, Geological Diving Consultants, Inc., San Diego, CA (A collaterial activity during leave and with the permission of the Director U.S.N.E.L.)

1956-date, Associate Professor to Professor, and sometimes acting director, Institute of Marine Resources, and Scripps Institute of Oceanography, Univ. of Calif., La Jolla, CA.

(1965–66), Technical Assistant (GS–18) (for oceanography and geology) Office of Science and Technology, Exec. Office President, Washington, D.C.

(See attached biography for additional information).

Government experience: List any experience in or direct association with Federal, State, or local governments, including any advisory, consultative, honorary or other part-time service or positions—

In addition to those listed under employment, I have frequently been a consultant to the Federal government through committees of the National Academy of Sciences. I have also advised the Office of Technology Assessment, the National Science Foundation and the Navy directly.

Published writings: List the titles, publishers and dates of any books, articles, or reports you have written—

See attached bibliography of about 100 publications including four books.

Qualifications: State fully your qualifications to serve in the position to which you have been named (attach sheet)

Future employment relationships:

1. Indicate whether you will sever all connections with your present employer, business firm, association or organization if you are confirmed by the Senate—

I shall be on a leave of absence without pay as is customary with the University of California.

2. As far as can be foreseen, state whether you have any plans after completing government service to resume employment, affiliation or practice with your current or any previous employer, business firm, association or organization—

See above.

3. Has anybody made you a commitment to a job after you leave government?

See above.

4. Do you expect to serve the full term for which you have been appointed?

Yes, although there is no specified term.

Potential conflicts of interest:

1. Describe any financial arrangements or deferred compensation agreements or other continuing dealings with business associates, clients or customers who will be affected by policies which you will influence in the position to which you have been nominated—

None.

2. List any investments, obligations, liabilities, or other relationships which might involve potential conflicts of interest with the position to which you have been nominated—

My wife and I have minor holdings of oil company common stocks.

3. Describe any business relationship, dealing or financial transaction (other than tax-paying) which you have had during the last 10 years with the Federal Government, whether for yourself or relatives, on behalf of a client, or acting as an agent, that might in any way constitute or result in a possible conflict of interest with the position to which you have been nominated—

None.

4. List and describe any lobbying activity during the past 10 years in which you have engaged for the purpose of directly or indirectly influencing the passage, defeat or modification of any legislation at the national level of government or for the purpose of affecting the administration and execution of national law or public policy—

During the years 1975–76 I provided depositions as an expert witness in an action of the State of California vs. the Department of the Interior, i.e. People v. Kleppe et al. 50041335–LA75CV2203, which was dismissed on 19 July 1976. It was concerned with the adequacy of environmental impact statements.

5. Explain how you will resolve any potential conflict of interest that may be disclosed by your responses to the above items—

I expect to sell the oil stocks.

Qualifications:

The U.S. Geological Survey consists of a large group of professional scientists of the highest quality and reputation. The Director has been and should be a scientist of stature whom these professionals will respect and follow. I have been recommended for the position by the National Academy of Sciences. My qualifications include a doctorate in geology, and I am a professor of geology. In addition, I am a registered professional geologist, and have been a consultant to government, universities and large corporations. I have published about a hundred professional articles and books, based on original research, which are widely cited by other scientists. My efforts have been rewarded by election to the National Academy of Sciences and other honorific societies and by awards of fellowships and prizes.

It might be questioned whether the career of a prospective Director has been narrowly focused or whether it has been broad enough so his leadership will be in directions that are important and useful for the nation. As to this, my career for about fifteen years concentrated on the exploration of the deep sea on oceanographic expeditions. My scientific reputation derives largely from this type of research which still continues. However, in 1965–66 I served a year in the Office of Science and Technology and became concerned with

---

[4] La Jolla Federal Savings and Loan, $54,874. Bank of America, $89,426.

the sociology of science, governmental institutions for science, and environmental versus resource problems. Since then I have participated in many environmental and resource studies and have been a member of the Committee on Science and Public Policy and also the Commission on Natural Resources of the National Academy of Sciences. I have also published a book, "Science, Growth and Change," that analyzes both scientific careers, in sociological terms, and the factors that influence the growth of federal scientific agencies including the USGS. In another book, "Geology, Resources and Society," I have attempted to relate geological education to the basic problems of resource depletion, environmental preservation and geological hazards. I have also published research papers on oil exploration and deep sea mineral resources.

Another question is whether a prospective Director is experienced at, or capable of, managing a large organization. I have no such experience. I have studied organizational history and management, however, and I have been offered managerial jobs including, a decade ago, a position as Assistant Director of the USGS. I am familiar with the management of small, complex organizations. I have organized and led numerous multiship, multi-institution, and multi-national oceanographic expeditions. I conceived and co-organized a highly successful business doing underwater geology. I also developed and led a group that produced one of the first computerized data-management systems for marine geophysical observations.

THE WHITE HOUSE,
Washington, D.C., March 15, 1978.

MR. HENRY W. MENARD, Jr.,
Director-Designate, U.S. Geological Survey, Department of the Interior, Washington, D.C.

DEAR MR. MENARD: I acknowledge receipt of your Response to the Outline of Information Requested of Prospective Nominees. I also acknowledge receipt of your letter of commitment to the President and congratulate you on your pending appointment as Director, U.S. Geological Survey, Department of the Interior.

You indicate in your submission that you are a Professor at the University of California and intend to take an unpaid leave of absence from the University upon your confirmation as Director of the U.S. Geological Survey. Under the Carter-Mondale Guidelines on Conflicts of Interest your retention of a professorship in a leave of absence status is entirely appropriate. In view of your continuing relationship with the University of California, however, this disqualification should continue throughout your period of government service, unless you completely sever your relationship with the University at some future date. I remind you, however, that pursuant to 18 U.S.C. 208(a), you should disqualify yourself from acting on any particular matter affecting the interests of organizations you have served for financial gain in the 12 months prior to taking office. This disqualification should be for such limited period of time as you, in your discretion, determine necessary to remove the appearance of the possibility of prejudice on your part.

You also indicate that you have an interest in the University of California retirement plan and that you will continue to make payments into this plan while you are on leave of absence. I understand that you will receive no disbursement from the University of California into your retirement plan while you are employed at the Department of Interior. Your participation in an established retirement fund of this sort is permissible under the applicable federal statutes.

Your submission notes that you have a substantial portfolio of securities. In addition, your wife has stock interests in several companies. As you know, the Carter-Mondale Guidelines on Conflicts of Interest impute the interests and assets of one spouse to the other. Accordingly, as Director of the U.S. Geological Survey, you must disqualify yourself to act on any particular matter, as defined in 18 U.S.C. 208(a), which would affect the interests of any of the companies in which you or your wife hold a security or other form of financial interest.

You advise in your submission that your wife is unemployed. Should she decide to accept employment while you are at the Department of Interior, you should disqualify yourself to act on any particular matter which would affect her employer.

Based on our review of the materials submitted by you and assuming you take the actions you have indicated you will take and those that are suggested in this letter, it appears that you will have complied with the Carter-Mondale Guidelines on Conflicts of Interest.

I wish you every success in the undertaking you are about to assume in the interest of the people of the United States.

Sincerely,

ROBERT J. LIPSHUTZ,
Counsel to the President.

U.S. DEPARTMENT OF THE INTERIOR,
Washington, D.C., March 16, 1978.

Dr. H. WILLIAM MENARD,
Director-Designate, U.S. Geological Survey, Department of the Interior, Washington, D.C.

DEAR DR. MENARD: I have reviewed the list you have provided to the Senate Energy and Natural Resources Committee showing securities held by you and Mrs. Menard. My review concentrated on matching your financial interest to the specific prohibitions which apply to U.S. Geological Survey employees, and to the general conflict of interest provisions which apply to all Department of the Interior employees.

As you know, you are not officially required to file the Confidential Statement of Employment and Financial Interests required by the Department of the Interior until you are confirmed by the Senate and you enter on duty. However, I have reviewed your voluntary submission and I am presenting my findings as I would if you were, in fact, Director of the U.S. Geological Survey. I have concentrated my review at this time totally on your security holdings.

The Organic Act of March 3, 1879 (43 U.S.C. 31) which established the U.S. Geological Survey imposes the following specific restriction on Survey employees:

"The Director and members of the Geological Survey shall have no personal or private interests in the lands or mineral wealth of the region under survey, and shall execute no surveys or examinations for private parties or corporations."

This prohibition is incorporated into Department of the Interior conduct regulations as 43 CFR 20.735–12(b)(3). This prohibition is all encompassing and does not allow consideration of the substantiality of the financial interest. Any financial interests held by Survey employees in companies having extensive acreages of leased Federal lands under exploration for oil, gas and mineral development would violate the Organic Act restriction. Five companies shown on your financial interest statement come within the restrictions imposed by the Organic Act. They are Atlantic Richfield, Exxon, Mobil Oil, Public Service Company of Colorado, and Pacific Gas and Electric.

By regulations contained in 43 CFR 20.735–13(b), the Survey has implemented a policy which imposes another restriction specifically on Survey employees, as follows:

". . . Members of the Geological Survey shall not hold substantial personal or private interests, direct or indirect, in any private mining enterprise doing business in the United States. . . ."

This prohibition does allow consideration for the substantiality of the financial interest. The basis for judgment of substantiality is to view substantiality in terms of what we believe the average citizen would consider to be a material dollar interest. This means that substantiality is a factor to be judged apart from the percentage of ownership it represents. The most important aspect of determining substantiality is to relate job duties to the investment. Duties presenting frequent opportunity for the employee to deal in matters related to his financial interests mean that even low dollar value financial investments may create a problem. Substantial financial interests held by Survey employees in companies whose revenue is generated in large part by mining activities would violate the Survey's regulatory policy restriction. Of the stocks you list, four companies come within the restrictions imposed by the Survey's regulatory policy. They are Armco Steel, Chesapeake and Ohio (Chessie System), National Gypsum, and Public Service Electric and Gas Company. It is my opinion that virtually any interest in these companies by the Director would be considered substantial.

Two other major restrictions are pertinent. One, the Surface Mining Control and Reclamation Act of 1977, applies to certain Federal employees and the second, 43 CFR 20.735–15(a) applies to all Interior employees.

The Surface Mining Act (P.L. 95–87 sections 201 (c) and (f)), and the implementing regulations in 30 CFR 706 prohibit Federal employees who perform functions or duties under the Act from having any direct or indirect financial interest in underground or surface coal mining operations. The position of Director, U.S. Geological Survey, is identified as a position which requires performance of functions or duties under the Surface Mining Act and, therefore, the position is subject to the financial interest restriction. One company you listed, Norfolk and Western, wholly owns Pocahantas Land Corporation (PLC). PLC has 1.4 billion tons of coal reserves. Because PLC contributes a relatively small amount to Norfolk and Western's revenue, your interest does not violate the Survey's regulatory policy. As discussed subsequently, your interest in Norfolk and Western is nevertheless of concern in terms of the Surface Mining Act restrictions.

The Department's Employee Responsibilities and Conduct regulations in 43 CFR 20.735–15(a) state that:

"No Department employee shall have a direct or indirect financial interest that conflicts substantially, or appears to conflict substantially, with his or her Government duties and responsibilities."

In view of the Geological Survey's involvement in matters related to the mineral industries, it is essential that your financial interests be reviewed in terms of the appearance of conflict of interest. It is my belief that as Director of U.S. Geological Survey the financial interests you have in the companies I have listed above would, in addition to violating the restrictions mentioned, each create an appearance of a conflict of interest and would therefore be prohibited holdings.

The restrictions imposed by Departmental regulations and by the Surface Mining Act apply to the interests of the employee, his spouse, minor child, or any other relative living in the employee's home.

In summary, when you are confirmed by the Senate you will be required to file a Confidential Statement of Employment and Financial Interests with me as Acting Department Ethics Counselor. Assuming your security interests are the same as shown on the listing you provided to the Senate Com-

mittee and based upon the principles stated previously, I would counsel you to divest of the financial interests in Armco Steel, Atlantic Richfield, Chesapeake and Ohio (Chessie System), Exxon, Mobil Oil, National Gypsum, Norfolk and Western, Public Service Company of Colorado, Pacific Gas and Electric, and Public Service Electric and Gas.

I am returning herewith the copy of your financial statement provided to me. I trust this information will be helpful and I extend my best wishes for a swift and early confirmation.

Sincerely yours,

WILLIAM L. KENDIG,
Acting Department Ethics Counselor.●

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first time and, by unanimous consent, the second time, and referred as indicated:

By MR. BAKER (for himself, Mr. BELLMON, Mr. DANFORTH, Mr. RIBICOFF, Mr. MARK O. HATFIELD, Mr. STEVENS, and Mr. YOUNG):

S. 2777. A bill to establish a family security program, to provide public service jobs for certain public assistance recipients, to provide a voucher program for private sector employment, to increase the earned income credit, and for other purposes; to the Committee on Finance.

By Mr. BENTSEN:

S. 2778. A bill to provide for increased criminal penalties for the unauthorized manufacture or distribution of PCP and to provide for piperidine reporting; to the Committee on the Judiciary.

By Mr. LONG (from the Committee on Finance):

S. 2779. A bill to authorize additional appropriations for the work incentive program established by title IV of the Social Security Act. Original bill placed on the calendar.

By Mr. HATHAWAY:

S. 2780. A bill to amend the Public Health Service Act to provide for grants and contracts for projects to provide health and dental care to medically underserved rural populations, and for other purposes; to the Committee on Human Resources.

By Mr. JACKSON (for himself, Mr. MAGNUSON, Mr. PACKWOOD, and Mr. MARK O. HATFIELD):

S. 2781. A bill to amend the Federal Unemployment Tax Act so as to exclude from coverage thereunder agricultural hand-harvest labor performed by a full-time student under the age of sixteen (16) years; to the Committee on Finance.

By Mr. PELL:

S. 2782. A bill to protect consumers from misrepresentative advertising of gold and silver jewelry, and for other purposes; to the Committee on Commerce, Science, and Transportation.

By Mr. MATHIAS:

S. 2783. A bill for the relief of Mary Motamen; to the Committee on the Judiciary.

By Mr. SCOTT (for himself, Mr. HELMS, and Mr. LAXALT):

S. 2784. A bill to amend the Immigration and Nationality Act, and for other purposes; to the Committee on the Judiciary.

By Mr. MATHIAS:

S. 2785. A bill to amend the Federal Aviation Act of 1958 in order to require the Administrator of the Federal Aviation Administration to prepare and put into effect comprehensive noise abatement plans for airports operated by the Administrator; to the Committee on Commerce, Science, and Transportation.

By Mr. HANSEN:

S. 2786. A bill for the relief of Hanna-Luisa Heck; to the Committee on the Judiciary.

By Mr. CHILES (for himself, Mr. DECONCINI, and Mr. HEINZ):

S. 2787. A bill to provide for the resolution of claims and disputes relating to Government contracts awarded by executive agencies; to the Committee on the Judiciary and the Committee on Governmental Affairs, jointly, by unanimous consent.

By Mr. LONG (for himself, Mr. MAGNUSON, and Mr. STEVENSON):

S. 2788. A bill to amend section 216 of the Regional Rail Reorganization Act of 1973 to authorize the purchase of an additional $600,000,000 of the series A preferred stock of the Corporation, and for other purposes; to the Committee on Commerce, Science, and Transportation.

By Mr. LONG:

S. 2789. A bill to provide authorization for appropriations for the Office of Rail Public Counsel, and for other purposes; to the Committee on Commerce, Science, and Transportation.

By Mr. CRANSTON (from the Committee on Banking, Housing, and Urban Affairs):

S. 2790. A bill to amend the Renegotiation Act of 1951. Original bill placed on the calendar.

S. 2791. A bill to amend the Renegotiation Act of 1951. Original bill placed on the calendar.

By Mr. JAVITS (for himself, Mr. WILLIAMS, Mr. PELL, Mr. RANDOLPH, Mr. EAGLETON, Mr. CHAFEE, Mr. RIEGLE, Mr. HATCH, and Mr. HATHAWAY):

S. 2792. A bill to revise and extend the program for Gifted and Talented Children in order to provide a consolidation of that program with other educational programs, and for other purposes; to the Committee on Human Resources.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. BAKER (for himself, Mr. BELLMON, Mr. DANFORTH, Mr. RIBICOFF, Mr. MARK O. HATFIELD, Mr. STEVENS, and Mr. YOUNG):

S. 2777. A bill to establish a family security program, to provide public service jobs for certain public assistance recipients, to provide a voucher program for private sector employment, to increase the earned income credit, and for other purposes; to the Committee on Finance.

(The remarks of Mr. BAKER when he introduced the bill appear earlier in today's proceedings.)

By Mr. BENTSEN:

S. 2778. A bill to provide for increased criminal penalties for the unauthorized manufacture or distribution of PCP and to provide for piperidine reporting; to the Committee on the Judiciary.

(The remarks of Mr. BENTSEN when he introduced the bill appear earlier in today's proceedings.)

By Mr. HATHAWAY:

S. 2780. A bill to amend the Public Health Service Act to provide for grants and contracts for projects to provide health and dental care to medically underserved rural populations, and for other purposes; to the Committee on Human Resources.

RURAL HEALTH ASSISTANCE ACT OF 1978

● Mr. HATHAWAY. Mr. President, it is my great pleasure today to introduce the Rural Health Assistance Act of 1978. This legislation is intended to improve access to quality health and dental care in medically underserved rural areas.

That greater Federal attention must be focused on health care in rural areas cannot be denied. This became clear during the hearings of the Senate Subcommittee on Health which I chaired in Bangor last summer and in Washington last month. Sixty percent of the medically underserved population in this country live in rural areas. Many indicators of health status indicate a serious and growing disparity in the health of rural Americans in contrast to the Nation as a whole. Experts in rural health have indicated that low population density creates special problems since the critical mass of people in an area is often far less than that usually required for services, resources, or facilities. There are more elderly poor people and more elderly residents in rural areas, often requiring more care than the general population. In addition, fewer rural residents are covered by health insurance than their urban counterparts.

The need for services is great, yet the availability of services is sorely limited. There is still a critical shortage of physicians, dentists, and other health care professionals in rural areas. Emergency medical services are less available, and accessibility to the limited care that is available is restricted by long distances, geographic barriers, and inadequate transportation services.

Congress has been taking steps to improve the availability of health care in rural locales. For example, the Rural Health Clinics Act was recently passed to extend medicare and medicaid coverage to nurse practitioners and physician assistants in rural health clinics. I was pleased to cosponsor this measure as I believe it will make care accessible to communities which lack adequate coverage by doctors. There are 70 such communities in Maine alone.

While some progress is being made, we still have a long way to go. The level of Federal attention to the problems of rural America is still inadequate. This is particularly true where the health of our citizens is concerned. While more than one-half of the medically underserved Americans live in rural areas, they receive less than 25 percent of the available Federal funds. Testimony at the Health Subcommittee hearings revealed that HEW currently spends more than $7.50 for every medically underserved urban resident, but only about $2.25 for each rural person in a medically underserved area.

The legislation which I am introducing today is an attempt to rectify this imbalance. The Rural Health Assistance Act of 1978 recognizes the need for improved rural health care and authorizes grants and contracts for projects to provide health and dental care to medically underserved rural areas.

The bill is designed to encourage innovative approaches to the delivery of

care, drawing on existing resources as well as identifying and attracting new ones. It is intended to allow for maximum flexibility without imposing administrative requirements such as those required of community health centers, which might be difficult or impossible to meet. Furthermore, it will replace the health of underserved rural areas project with a permanent statutory authority.

The Rural Health Assistance Act also amends section 330 of the Public Health Service Act relating to community health centers to increase the assistance to rural areas. To date, the community health centers program has been largely directed to urban areas. Testimony from the Health Subcommittee hearings, citing a report prepared by Rural America, Inc., indicated that approximately 75 percent of the comprehensive community health centers, accounting for more than 80 percent of the funds, were located in cities. To correct this inequity, the final provision of the bill I am introducing today will require that a minimum of 40 percent of community health center funds be used for grants to centers in medically underserved rural areas.

I am hopeful that this legislation will receive favorable consideration as it progresses through the legislative process.

Mr. President, I ask unanimous consent that the text of this bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2780

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. This Act may be cited as the "Rural Health Assistance Act of 1978."

SEC. 2. (a) The Congress finds that—

1. there is a shortage of health and dental manpower in rural areas;

2. there are proportionately more poor people and more elderly people in rural areas, requiring more medical and dental care than the general population;

3. fewer rural residents are covered by health insurance than non-rural residents;

4. access to health and dental care services is impeded in rural areas due to distance and geographic barriers;

5. the health and dental care planning and service delivery needs and capabilities of rural areas to address those needs are different from those of urban areas.

(b) It is the policy of the United States and the purpose of this Act to encourage and support the development and demonstration of innovative methods for delivery of health and dental care to medically underserved rural populations.

SEC. 3. Title III of the Public Health Service Act is amended by inserting after section 328 the following new section:

"HEALTH AND DENTAL CARE PROJECTS FOR MEDICALLY UNDERSERVED RURAL POPULATIONS

"SEC. 329(a). The Secretary is authorized to make grants to and enter contracts with public and non-profit private entities to conduct projects for the development and demonstration of innovative methods for the delivery of health and dental care to medically underserved rural populations.

(b) For the purposes of this section, "medically underserved rural population" means—

1. an area that is not an urbanized area (as defined by the Bureau of the Census) and is designated by the Secretary as an area with a shortage of personal health services; or

2. a population group located in an area that is not an urbanized area (as defined by the Bureau of the Census) and designated by the Secretary as having a shortage of such services.

(c) Grants and contracts may be made pursuant to this section to examine—

1. methods of attracting and retaining physicians, dentists, physician assistants, nurse practitioners, and other allied health professionals to practice in medically underserved rural areas;

2. different organizational models tailored to meet the unique needs of rural settings;

3. methods of identifying, coordinating, and integrating existing facilities, services, and programs to maximize use of available resources, avoid duplication of effort, and ensure a coordinated, comprehensive care system. Projects under this subsection may include development and demonstration of a regional approach to the delivery of health care linkages between health care, social, and supplemental services;

4. programs of prevention and health education to gain full utility from resources available;

5. specific services or mixture of services appropriate for a given area, including ambulatory care, home health care, environmental health services, community outreach services, transportation services, and other supplemental services;

6. effect of availability of primary care and home health services in rural areas in terms of reduction of emergency room visits, hospitalizations, and long term care facilities;

7. management and technological improvements to increase productivity, effectiveness, efficiency, and financial stability of health and dental care providers, including new or improved methods for biomedical communication, medical and financial record-keeping and billing systems;

8. identification and development of potential funding sources for health and dental care; and

9. other innovative approaches designed by the applicant and approved by the Secretary to improve the availability of quality health and dental care in medically underserved rural areas.

(d) The Secretary shall submit an annual report to Congress which shall include a description of actions taken, services provided, and funds expended under this section, and evaluation of the effectiveness of such actions, services and expenditures of funds, and such other information as the Secretary considers appropriate.

(e) An application for a grant under this section shall be in such form, submitted to the Secretary in such manner, and contain such assurances, as the Secretary may require.

(f) The amount of any grant under this section shall be determined by the Secretary, but shall not exceed the amount that the Secretary determines is needed to carry out the purposes of the grant.

(g) The Secretary may make payments under this section in advance or by way of reimbursement, and at such intervals and on such conditions as the Secretary finds necessary.

(h) There are authorized to be appropriated for the purpose of making grants and contracts under this section $20,000,000 for the fiscal year ending September 30, 1979, $25,000,000 for the fiscal year ending September 30, 1980, and $30,000,000 for the fiscal year ending September 30, 1981.

SEC. 4. Section 330 of the Public Health Service Act is amended by adding at the ends of subsection (g)(1) and subsection (g)(2) the following sentence:

"No less than 40 percent of the funds appropriated under this subsection shall be used for grants for community health centers in areas that are not urbanized areas (as defined by the Bureau of the Census).●

By Mr. JACKSON (for himself, Mr. MAGNUSON, Mr. PACKWOOD, and Mr. MARK O. HATFIELD):

S. 2781. A bill to amend the Federal Unemployment Tax Act so as to exclude from coverage thereunder agricultural hand-harvest labor performed by a full-time student under the age of sixteen (16) years; to the Committee on Finance.

FEDERAL UNEMPLOYMENT TAX ACT AMENDMENTS

● Mr. JACKSON. Mr. President, on behalf of myself and Senator MAGNUSON, I am introducing legislation which will amend the Federal Unemployment Tax Act (FUTA) so as to exclude from coverage thereunder agricultural hand-harvest labor performed by full-time students under the age of 16 years; provided that such labor is not accorded unemployment benefits under existing State law.

This legislation is designed to rectify a situation whereby farmers are required under FUTA to pay Federal unemployment taxes on labor performed by youngsters who are not eligible to receive unemployment compensation benefits under State law. Farmers throughout the State of Washington have brought this situation to the attention of Senator MAGNUSON and myself, and have stressed the need for positive congressional action to relieve them of the burden of this unjust and inequitable Federal requirement that, quite simply, sweeps too broadly.

Furthermore, the amendment will relieve to a significant degree much of the attendant excessive paperwork and recordkeeping which is required by FUTA. Many of the farmers affected by this legislation hire more than 1,000 children for just a few weeks work in the summertime, and it is almost impossible for them to meet these stringent bookkeeping requirements during the hectic pace of the harvest season.

While serving to relieve the individual farmer of these tax and recordkeeping burdens, this legislation will also bolster the valuable berry farming and processing industries of the State of Washington. The berry crop provides summertime employment for thousands of youngsters in the fields and hundreds of adults in the processing plants. Since 1974, however, the State of Washington has witnessed a 30-percent decline in total acreage devoted to berry farming, and thousands of jobs have been lost as a result. To help counter this trend, and to enable youngsters to return to the fields for an educational and traditional summertime experience, Senator MAGNUSON and I were instrumental in gaining Senate approval of an amendment to the Fair Labor Standards Act which permits youngsters between the ages of 10 and 12 to pick hand-harvest crops. The FUTA amendment Senator MAGNUSON and I are sponsoring will, in addition to the Fair Labor Standard Act amendment, further help to assure farmers that berry crops are profitable and a worthwhile agricultural endeavor, and one which will not

tie them down with needless paperwork and an unjust tax.

The legislation, however, is also designed to protect youngsters ages 10 to 16 in the event that State law provides unemployment benefits for them. In States where such benefits are available to these individuals, this exclusion shall not apply and farmers will be required to pay the required FUTA tax.

The entire Washington delegation in the House of Representatives has endorsed legislation (H.R. 11305) which will provide the necessary relief. However, I must stress the fact that this inequitable and discouraging situation is not peculiar to Washington State. Oregon has a large number of berry farming and processing concerns employing thousands of youths, and has also experienced a drastic reduction in employment and total acreage devoted to this particular type of agricultural operation. Given these circumstances, Senators PACKWOOD and HATFIELD have joined in cosponsorship of this measure to provide sufficient relief so that berry farming and processing in the Northwest States can remain viable and productive industries.

Mr. President, I ask unanimous consent that the text of this bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2781

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) section 3306(c)(1) of the Internal Revenue Code of 1954 is amended—

(1) in subparagraph (A)—

(A) by striking out "subparagraph (B))" in clause (i) and inserting in lieu thereof "subparagraph (B), but taking into account labor excluded in subparagraph (C)",

(B) by striking out "subparagraph (B)" in clause (ii) and inserting in lieu thereof "subparagraph (B), but taking into account labor excluded in subparagraph (C))", and

(C) by striking out "and" at the end thereof, and (2) in subparagraph (B), by adding "and" at the end thereof, and

(3) by adding at the end thereof the following new subparagraph:

"(C) such labor is performed by an individual other than a full-time student under the age of sixteen years as a hand-harvest laborer in an agricultural operation; provided, however, that this subparagraph (C) shall not apply if such labor is covered by the state unemployment compensation law of the state in which such labor is performed."

(b) The amendments made by subsection (a) shall be effective in the case of services performed after December 31, 1977.●

By Mr. MATHIAS:

S. 2785. A bill to amend the Federal Aviation Act of 1958 in order to require the Administrator of the Federal Aviation Administration to prepare and put into effect comprehensive noise abatement plans for airports operated by the Administrator; to the Committee on Commerce, Science, and Transportation.

NOISE ABATEMENT AT AIRPORTS

● Mr. MATHIAS. Mr. President, many who live in the Washington metropolitan area, including a number of my constituents, are subjected daily to the thundering noise of aircraft approaching and taking off from Dulles and National Airports. Interrupted conversations, and disrupted sleep are among the petty annoyances that those who live within earshot must endure on a continuing basis. Of a more serious nature, however, is the fact that many medical authorities maintain that sustained noise pollution has a detrimental effect on health. And structural damage to buildings is another serious and costly side effect of aircraft noise.

Our modern aerospace technology has provided us with fast, sleek planes capable of carrying large numbers of passengers. However, the technology has not yet conquered the side effect of noise, which many people in metropolitan areas must endure.

The bill I am introducing today directs the Federal Aviation Administration (FAA) to develop and implement a comprehensive noise abatement program for the two airports it operates—National Airport in Arlington, Va., and Dulles Airport in Chantilly, Va.

The FAA has been studying the problem of aircraft noise for many years now. In fact, in November of 1976 the FAA produced an "Aviation Noise Abatement Policy." The bill I am introducing today would require the FAA to implement this policy at National and Dulles. Specifically, my bill directs the FAA to tailor a noise abatement plan for Dulles and National that would deal with several important areas: Aircraft operating procedures on landings and takeoffs; reduction of incompatible land uses adjacent to the airports; and cooperation with State and local governments to help devise land-use programs. Once implemented, the FAA plan will serve as a model for other airport proprietors around the country.

I have circulated a draft of this bill to 38 citizen and civic associations along the Potomac River flight path from National Airport. Many of them endorsed the language of this bill or its concept. None expressed opposition. I ask unanimous consent that a letter endorsing this legislation from Judith Toth, a Maryland House delegate, appear at the conclusion of my remarks.

The PRESIDING OFFICER. Without objection.

(See exhibit 1.)

Mr. MATHIAS. The Citizens Coordinating Committee on Friendship Heights, Inc., a group of 13 citizen associations representing 6,000 families, also endorses the bill I am introducing today. In a letter to me, the committee states:

Not enough has been said about Secretary Coleman's splendid paper called, "Aviation Noise Abatement Policy" published on November 18, 1976. We are pleased that your bill proposes that its comprehensive approach be reflected in the Airport Noise Abatement Plans that will be required under the new law.

The Potomac Valley League, which represents 23 civic associations of Montgomery County along the National Airport flight path, has also formally endorsed this bill at its meeting of September 20, 1977. As the league so aptly pointed out in their letter to me:

The Potomac Valley League believes that the biggest legislative "gap" is the absence from the Federal Aviation Act of any Congressional demand that the FAA itself, where it is "proprietor and operator" of an airport (i.e., National and Dulles), devise, implement and monitor a "comprehensive noise abatement plan" for either airport. The EPA has suggested the FAA can require such plans of other airport operators. We believe the Congress should require FAA to take the lead in bringing all of its expertise to bear on National and Dulles Airports.

Such a legislative approach fills a gap in the Federal Aviation Act, accords with the DOT's "Aircraft Noise Abatement Policy" dated November 1, 1976, and avoids picking-and-choosing among the strategies now being urged by various civic groups. For example, we enclose for your consideration the recently adopted "noise" positions of—

(a) The Montgomery County Council (accepted by the County Executive);

(b) The Montgomery County Civic Federation;

(c) Representative Newton Steers; and

(d) Representative Joe Fisher of Virginia.

From these varying documents, three fundamental conclusions emerge: first, the problem is real and needs correcting, second, various corrective strategies need truly expert technical evaluation in a comprehensive context, and three, the FAA needs Congressional direction if any substantial improvement is to be made in the local aircraft noise environment.

The Potomac Valley League believes that the proposed bill amending section 611 of the Federal Aviation Act realistically takes all of these fundamentals into account, and can result in real benefits if adopted by the Congress. The Potomac Valley League therefore strongly urges that the proposed bill be introduced in both Houses of Congress, hopefully co-sponsored by the Maryland and Virginia delegations.

We believe it can be strengthened by providing for formal participation by citizens and local governments. For example, the FAA might be required to publish a draft plan in the Federal Register and receive public comments before making it final, and the FAA adoption of implementing procedures and regulations should be done after notice and hearing.

Aircraft noise intrudes, unwelcomed, into the lives of 7 million Americans. It need not be so. The tools are at hand to reduce this problem significantly and alleviate the general psychological stress created by noisy airplanes. And I believe the responsibility for initiating measures to reduce aircraft noise lies with the Federal agency responsible for controlling commercial airport operations, the FAA.

The introduction to the FAA's Aviation Noise Abatement Policy made this point succinctly:

The scope of the noise problem, the interrelationship and special responsibilities of the many parties concerned with it, and the general confusion and prevalent uncertainty about what it is possible to achieve and who is resppnsible have led us to conclude that the federal government should address the overall noise problem with a more comprehensive approach than mere promulgation of a new regulation . . . As the federal officials principally concerned with aviation noise, it is our duty to provide leadership in a national effort to reduce aircraft noise.

I would hope that the Committee on Commerce, Science, and Transportation will schedule early hearings on this bill to provide a forum for the many parties concerned with aircraft noise.

Mr. President, I ask unanimous consent that the text of my bill be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2785

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 611 of the Federal Aviation Act of 1958 is amended by inserting at the end thereof the following new subsection:

"(f) The FAA shall, for each airport which he operates, after consultation with the EPA—

"(1) prepare a comprehensive aircraft noise abatement plan, which shall (A) be based on an integrated approach to his proprietary and air traffic control functions, (B) take into consideration all measures discussed under the heading of 'Additional Federal Action' and 'Protecting the Airport Environment' as Subsections C and D of Section III of Part Two of the Department of Transportation's 'Aviation Noise Abatement Policy' published November 18, 1976, and (C) be designed to minimize the aircraft noise impact of such airport's use, consistent with safety.

"(2) publish such comprehensive aircraft noise abatement plan in the Federal Register not later than 450 days after such date.

"(3) within 545 days of such date, after notice and evidentiary hearing, adopt for each such airport procedures and regulations, mandatory on all concerned including Federal Aviation Administration personnel, implementing such aircraft noise abatement plan,

"(4) establish and maintain an aircraft noise monitoring program at each such airport, publishing the results thereof at least semiannually, and

"(5) review annually thereafter each aircraft noise abatement plan in light of its monitored results and any technological or other relevant developments, and, after consultation with the EPA and with the affected local governments, adopt such changes in the plan and in the mandatory procedures and regulations implementing it as the FAA determines, after notice and hearing, to be in the public interest, bearing in mind his responsibilities as set forth in subparagraph (1) hereof.".

ANNAPOLIS, MD.,
September 27, 1977.

HON. CHARLES MCC. MATHIAS, Jr.,
Russell Senate Office Building,
Washington, D.C.

DEAR SENATOR MATHIAS: I want to add my voice to those of the many citizens of Potomac Valley who are in support of the bill that would amend Section 611 of the Federal Aviation Act so as to require the FAA, as the operator of National Airport and Dulles Airport to (a) develop a comprehensive noise abatement plan for each airport, taking into consideration all strategies and its responsibilities as "proprietor" as well as air traffic controller, (b) adopt mandatory implementation measures, (c) monitor the results, and (d) adjust the plan annually in light of actual results.

I can not overstate the need of the citizens of the area from the air traffic noise along the Potomac corridor.

As you know, I live in Cabin John and can speak from first hand experience. There are times when all the windows are closed that it is impossible to hear the television, let alone normal conversation. If that doesn't connote excessive noise I don't know what does.

I appreciate all you can do in pushing the proposed legislation through Congress. Please let me know what I can do to be of assistance.

Very truly yours,

JUDITH C. TOTH.●

By Mr. CHILES (for himself, Mr. DECONCINI, and Mr. HEINZ):

S. 2787. A bill to provide for the resolution of claims and disputes relating to Government contracts awarded by executive agencies; to the Committee on the Judiciary and the Committee on Governmental Affairs, jointly, by unanimous consent.

CONTRACT DISPUTES ACT OF 1978

Mr. CHILES. Mr. President, I am today introducing a bill which would reestablish principles of equitable treatment for both the Federal Government and Government contractors in contract disputes and claims.

The present means for resolving disputes under Government contracts is a mixture of contract provisions, agency regulation, judicial decisions, and statutory coverage. Basically the methods and forums for handling such disputes exist by executive branch fiat—that is, by the insertion of contract terms specifying how disputes in specific areas will be resolved—and by agency regulations governing the procedural and substantive adjudication of disputes. The agency boards of contract appeals are appointed by, report to, and are paid by the agency involved in the dispute. Their subpena power is limited. Often they must decide cases concerning action by high-level agency officials. The contractor has as long as 6 years to initiate an appeal of an agency board decision under the provisions of the Tucker Act. The availability of such review is limited by the Wunderlich Act and subsequent judicial interpretation of it.

Direct access to the courts is limited to so-called breach of contract claims, and the agencies can, and do, circumscribe such access by terms and conditions in contracts that are not, in general, subject to negotiation. In other words, a contractor has little choice in the matter.

In large part, the present Government contract remedies system has developed in an unplanned manner. Many of the rules and requirements that govern the system are the result of knee-jerk reactions to various events and decisions. The predilections of different agencies to boards of contract appeals and court decisions bring forth new provisions and procedures that are restrictive and uncoordinated. There is a continuing power struggle between the boards and the courts, abetted to a degree by the astuteness of some practicing attorneys in looking after their clients' interests.

The problems are further compounded by the sporadic and ambivalent characterization of agency contract appeal boards by the Supreme Court and by the inappropriate application of Administrative Procedure Act philosophy to the contract dispute adjudicatory process. Although the boards have evolved into trial courts, as the result of S. & E. Contractors, Inc., against United States the Government may be barred totally from appealing adverse findings and conclusions of law by these boards. Furthermore, the present system is often too expensive and time-consuming for the efficient and cost effective resolution of small claims and, on the other hand, often fails to provide the procedural safeguards and other elements of due process that should be the right of litigants.

The existing dispute system, as we know it, may have been satisfactory in earlier years, but Government procurement has grown too important and too complex for the disputes-resolving machinery to operate in a horse and buggy mode. How procurement functions has a far-reaching impact on the economy of our society and on the success of many major Government programs. Both can be affected by the existence of competition and quality contractors—or by the lack thereof. The way potential contractors view the disputes-resolving system influences how, whether, and at what prices they compete for Government contract business.

One cannot dispute the almost universal expressions of opinion by industry and the practicing bar that the system needs change. A good remedies system is a major element in good procurement, and a good system depends not only on fairness and justice, but also on whether the people who are subject to the system believe it is fair and just.

Most, if not all, of the Procurement Commission's recommendations in the disputes and remedies area have been proposed and debated before. Each recommendation traditionally has had its proponents and its opponents. Each group generally has been for or against particular recommendations, depending on whether they would serve his interest group, whether it be the Government, the private bar, or industry. Since no single group has generated enough support to get its favorite recommendations adopted, the present system remains, while the debates continue.

I believe the time has come for the Congress to take positive action to bring order out of this chaos. This bill would achieve the objectives sought by the Commission on Government Procurement:

Induce resolution of more contract disputes by negotiation prior to litigation.

Equalize the bargaining power of the parties when a dispute exists.

Provide alternative forums suited to handle the different types of disputes.

Insure fair and equitable treatment of contractors and Federal agencies.

When considering the individual sections of this remedies bill, it is important to understand that they were designed to complement one another in order to accomplish this set of objectives.

Mr. President, competition, minimal Government regulation, the fair and swift resolution of disputes, these benefits can hardly be measured in dollars, yet they form an important part of the foundation on which this country prospers.

Mr. President, I ask unanimous con-

sent that an analysis of the bill be printed in the RECORD.

There being no objection, the analysis was ordered to be printed in the RECORD, as follows:

ANALYSIS OF MAJOR SECTIONS OF "THE CONTRACT DISPUTES ACT OF 1978"

CLAIMS AND DISPUTES SETTLEMENT AUTHORITY

Section 4 embodies recommendation #5 of the Commission on Government Procurement to enable each executive agency to decide, settle and make payment on all disputes and claims arising out of the contract entered into between the agency and a contractor apart from any boards of appeal. This would include those disputes arising out of claims under the contract, as well as those of breach of contract.

At the present time, the lack of an "all disputes" clause leads to fragmentation of claims and remedies between those under the contract and those in breach. If a contracting officer denies a claim there must be a determination as to which course of action to take. It is often difficult to differentiate between claims under the contract and breach claims. If the contractor decides to press his claim as breach of contract in a court of law and this appeal is denied, he has often lost recourse to an administrative remedy because a 30-day appeal time has been exhausted while the claim was being decided in court. He has no further recourse and his claim must then be forfeited.

This consolidated disputes authority for the agencies should strengthen and simplify the contractors' business relationship with the Government and the Government's ability to deal directly with contractors. It is more efficient for both parties if this artificial division of remedies can be simplified by statute. This increased agency jurisdiction is balanced by the provision of optional direct access to judicial forums (Section 10(a). Otherwise the contractors opportunity for complete justice would be severely curtailed.

DECISION BY THE CONTRACTING OFFICER

Section 5 would require that decisions by the contracting officer be prompt within sixty days from written request, thus insuring prompt and definitive rulings on claims. This would eliminate many problems contractors now have with obtaining decisions at the contracting officer level.

INFORMAL ADMINISTRATIVE CONFERENCE

Section 6 deals with the Procurement Commission recommendation #2 to provide an informal administrative conference to explore the possibility of settlement of the dispute between the contractor and the agency. Under this provision the contractor may request an informal conference on a decision by the Contracting Officer for the purpose of satisfactorily disposing of the claim before it goes on to litigation.

The Commission felt that if contracting officers knew their decisions could be informally reviewed it would give them additional confidence in making decisions that they felt to be controversial or unpopular with their superiors. There is the added benefit in giving the agency the opportunity to review a decision that it may basically not agree with.

Emphasis is placed on the possibility of settlement rather than merely reviewing the decision of the contracting officer. This informal conference must be held or waived by the contractor before any further proceedings take place. Many agencies now provide for formal and informal review of a contracting officer's findings prior to board or court proceedings. However, as of now, the contractor does not normally participate.

CONTRACTORS' RIGHT OF APPEAL TO BOARD OF CONTRACT APPEALS

Section 7 would extend the period from the current thirty days to ninety days and would insure that contractors will not be shut off from the appeals opportunity due to clerical errors, mistakes, or the need to obtain legal advice.

AGENCY BOARDS OF CONTRACT APPEALS

Section 8 implements parts of the Commission's recommendation #3 and would place agency boards of contract appeals on a statutory footing providing independence and giving board members appropriate salaries needed for recruitment and retention.

The statutory minimum of five person boards would eliminate inefficiencies now exhibited in some of the smaller boards. The role of the Administrator of Federal Procurement Policy will insure uniformity of rules and procedures between the boards and will act as a central clearing point to insure that the boards meet the guidelines for establishment. The inclusion of increased subpoena, discovery and other judicial-type powers will insure the board's capability to give fair and equitable treatment to all parties.

SMALL CLAIMS

Section 9 sets into motion the establishment of rules and regulations for expedited resolution of claims of $25,000 or less. By giving the Government no judicial review and allowing the contractor to go to the court with a de novo trial upon receiving an adverse decision, the opportunity for resolution of small claims is increased considerably.

SUIT IN COURT: JUDICIAL REVIEW OF BOARD DECISIONS

Section 10 implements the Commission's recommendations Nos. 6, 7, 8, and 9. Contractors would now be able to go to court directly if they chose.

Such direct access has been called the keystone of the entire reform system recommended by the Commission. It will provide the flexibility that the Commission saw as essential to a fair and workable system. Direct access would permit questions that ultimately must go to court because of their size, importance or nature to go there directly and without delay. It would further assure contractors of their fundamental rights to a full judicial trial.

This recommendation restores to a contractor the right to a day in court, a right which has been eroded by the creation of administrative regulation and subsequent court interpretations of such regulations. Thus, intent of the Tucker Act, which limited the doctrine of sovereign immunity is reaffirmed.

At present, a trial on the merits is afforded to all other plaintiffs filing actions where sovereign immunity has been relinquished and was in this field until the enactment of the Wunderlich Act in 1954 (repealed by this Act).

Time limits are established in this section which give the contractor twelve months to appeal an adverse decision as opposed to the six years presently allowed. This 6-year time period often results in the government being called on to present a defense many years after personnel with knowledge about the case are available and documents or records important to the case have been destroyed.

The government is given 90 days in which to appeal an adverse decision. This stricter time limit has been placed on the government because until a final decision is made in his favor, a contractor cannot get paid for the work in dispute. Contractors must, under government contract requirements, continue work pending a final decision of the claim.

The Attorney General may appeal an adverse decision for an agency when he concurs with the request for appeal from the head of an executive agency. The Administrator of Procurement Policy must also approve this request.

Also included in this section is a new remand policy whereby the court reviewing a board decision may receive additional evidence as may be necessary to make final disposition of the case.

SUBPOENA, DISCOVERY AND DEPOSITION

Section 11 embodies part of the Commission's recommendation No. 3 and gives the administrative boards greater subpoena powers by compelling the attendance of witnesses and requiring the submission of evidence through deposition and discovery techniques. These procedures will, in turn, aid the contractor in developing his case.

INTEREST

Section 12 implements the Commission's recommendation No. 11 and provides for the payment of interest to the contractor upon winning his appeal.

REPEALS AND AMENDMENTS

Section 14(a) implements the Commission's recommendation No. 12 and raises the jurisdictional limit for the district courts from $10,000 to $100,000. This would provide the opportunity for more contractors to appeal cases in their home locale.

Section 14(g) gives the district courts jurisdiction to give injunctive and declaratory relief to contractors in government contract cases.

Mr. CHILES. Mr. President, I ask unanimous consent that the bill be jointly referred to the Committee on the Judiciary and the Committee on Governmental Affairs. I have discussed this action with the chairman of the Judiciary Committee.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Florida? The Chair hearing none, it is so ordered.

By Mr. LONG (for himself, Mr. MAGNUSON, and Mr. STEVENSON):

S. 2788. A bill to amend section 216 of the Regional Rail Reorganization Act of 1973 to authorize the purchase of an additional $600 million of the series A preferred stock of the Corporation, and for other purposes; to the Committee on Commerce, Science, and Transportation.

U.S. RAILWAY ASSOCIATION AMENDMENTS ACT OF 1978

Mr. LONG. Mr. President, there has been increasing concern and much discussion over the Federal funding role in the field of rail transportation in recent years. More recently the subject has been raised with the submission of the Consolidated Railroad Corporation's 5-year plan to the U.S. Railway Association.

As most of my colleagues are aware, it has been a little less than 2 years now since ConRail, capitalized with $2.1 billion of Federal money, went into business by merging parts of six bankrupt northeastern railroads. Since beginning operations in April of 1976, ConRail has been struggling to rehabilitate its revenue car and locomotive fleet which was in poorer physical condition than anticipated by the U.S. Railway Association in its final system plan. The predecessor railroads, especially the Penn Central, did not ade-

quately maintain their physical plants and equipment during the period from bankruptcy to conveyance date. Therefore, the age and condition of ConRail's car and power fleets adversely affected the railroad's performance and manpower during its first 2 years of operations. In addition, many of the yard and shop facilities were in poor condition, requiring substantial repair and modernization.

ConRail's current problems are not entirely due to the inheritance of a deteriorated plant and equipment. ConRail expended over $750 million, excluding depreciation in roadway and track rehabilitation programs during its first year of operation. Although many of these programs were ahead of final system plan projections, the net benefit to the railroad's financial performance was negligible during this period. During the first quarter of 1977 the railroad was adversely affected by the severe winter weather. Losses of over $100 million have been attributed mainly to lost revenues and increased maintenance and labor costs. ConRail continues to refer to this situation as the reason for its poor performance in certain operational and financial areas.

In conclusion, Mr. President, ConRail's operations during its first 2 years have exceeded expectations in some areas, but have lagged behind final system plan projections in others. Its operational and financial statistics for the period indicate the railroad has not progressed in many crucial performance areas. Major problems exist in the operational, revenue generating and cost control areas. Since the long-term goal of ConRail and USRA is to develop a self-sustaining railroad, improvements throughout the system will be required. ConRail projects that it will need an additional $1.283 billion in Federal financing during the period from 1978 to 1982 to support rehabilitation of physical assets, to provide adequate working capital, and to compensate for operating losses. ConRail is seeking a first installment of approximately $600 million to cover its fiscal year 1979 funding shortfall.

There are a number of recommendations that have been suggested for dealing with ConRail's short-term money requirements for fiscal year 1979. I am introducing legislation today which will provide a means for examining these alternative funding mechanisms and conducting oversight hearings on ConRail's operating performance since April 1, 1976.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2788

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "United States Railway Association Amendments Act of 1978".

SEC. 2. (a) Section 216 of the Regional Rail Reorganization Act of 1973 (45 U.S.C. 726) is amended by striking out "$1,100,000,000" each place it appears therein, and inserting in lieu thereof in each such place "$1,700,000,000".

(b) Section 216(b) of such Act (45 U.S.C. 716(b)) is amended by striking out "$2,100,000,000" and inserting in lieu thereof "$2,700,000,000".

SEC. 3. The amendments made by section 2 of this Act shall become effective on the date of enactment of this Act.

By Mr. LONG:

S. 2789. A bill to provide authorization for appropriations for the Office of Rail Public Counsel, and for other purposes; to the Committee on Commerce, Science, and Transportation.

RAIL PUBLIC COUNSEL AUTHORIZATION ACT OF 1979

Mr. LONG. Mr. President, I am introducing today the Rail Public Counsel Authorization Act of 1979 for appropriate reference.

The Rail Public Counsel's Office was created by section 304 of the Railroad Revitalization and Regulatory Reform Act of 1976 to provide responsible and professional representation for the many communities and users of rail service who otherwise might not be adequately represented in proceedings involving rail matters.

This legislation will assure that the public interest considerations are properly presented before the various deciding bodies.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2789

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 27(6) of the Interstate Commerce Act (49 U.S.C. 26(b)) is amended—

(a) by striking out "and" immediately after ", 1977,"; and

(b) by inserting immediately before the period at the end thereof the following ", and not to exceed $800,000 for the fiscal year ending September 30, 1979".

By Mr. JAVITS (for himself, Mr. WILLIAMS, Mr. PELL, Mr. RANDOLPH, Mr. EAGLETON, Mr. CHAFEE, Mr. RIEGLE, Mr. HATCH, and Mr. HATHAWAY):

S. 2792. A bill to revise and extend the program for gifted and talented children in order to provide a consolidation of that program with other educational programs, and for other purposes; to the Committee on Human Reources.

GIFTED AND TALENTED EDUCATION ACT OF 1978

Mr. JAVITS. Mr. President, on March 15, I introduced S. 2749, the Gifted and Talented Education Act of 1978. Unfortunately, a major error in the printing of the bill resulted in the substitution of part of another piece of legislation for part of S. 2749, rendering the printed version of S. 2749 incomprehensible.

I, therefore, introduce the proper text as a new bill, with the following cosponsors: Senators WILLIAMS, PELL, RANDOLPH, EAGLETON, CHAFEE, RIEGLE, HATCH, and HATHAWAY.

I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2792

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the Gifted and Talented Education Act of 1978".

AUTHORIZATION

SEC. 2. Section 401 of the Elementary and Secondary Education Act of 1965 (hereinafter in this Act referred to as the "Act") is amended by redesignating subsection (d), and all references thereto, as subsection (e), and by adding after subsection (c) of such section, the following new subsection:

"(d) There is authorized to be appropriated the sum of $50,000,000 for obligation by the Commissioner during the fiscal year 1979 and for each of the four succeeding fiscal years, for the purpose of making grants under part D (Education of Gifted and Talented Children) of this title.".

ALLOTMENT

SEC. 102. (a) (1) The first sentence of section 402(a)(1) of the Act is amended by striking out "subsections (a) or (b), or both," and inserting in lieu thereof "subsections (a), (b), or (d) or under any such subsection,".

(2) The second sentence of such section is amended by striking out "under part B or part C, or both" and inserting in lieu thereof "under part B, part C, or part D, or any such part,".

(b) (1) Section 402(a)(2) of the Act is amended by striking out the second and the third sentence thereof.

(2) Section 402(a) of the Act is amended by inserting after paragraph (2) the following new paragraphs:

"(3) From the amounts appropriated to carry out part D of this title for any fiscal year pursuant to subsection (d) of section 401, the Commissioner shall reserve 75 per centum of such amounts to be allotted to the States. The Commissioner shall allot to each State from such amount so reserved an amount which bears the same ratio to such amounts so reserved as the number of children aged five to seventeen, inclusive, in the State bears to the number of such children in all the States.

"(4) For the purpose of this subsection, the term 'State' shall not include Guam, American Samoa, the Virgin Islands, and the Trust Territory of the Pacific Islands. The number of children aged five to seventeen, inclusive, in a State an in all States shall be determined by the Commissioner on the basis of the most recent statisfactory data available to him.".

(c) Section 402(b) of the Act is amended by striking out "part B or C" and inserting in lieu thereof "part B, C, or D".

STATE PLANS

SEC. 4. (a) Section 403(a)(2) of the Act is amended by striking out "parts B and C" and inserting in lieu thereof "parts B, C, and D".

(b) Section 403(a)(8) of the Act is amended by striking out "and" at the end of clause (B), by striking out the semicolon at the end of clause (C) and by adding at the end thereof the following new clauses:

"(D) that not less than 25 per centum of the amounts which such State receives from its allotment under sections 401(d) and 402 (a)(3) in any fiscal year shall be used to make payments to local educational agencies to be used by local educational agencies for programs and projects which include identification and education of disadvantaged gifted and talented children from low-income families; and

"(E) from the funds described under clause

(A), the State will administer the provisions of State plans relating to section 441(a) of part D.

(c) Section 403(a) of the Act is amended by striking out "and" at the end of paragraph (10), by striking out the period at the end of paragraph (11), and inserting in lieu thereof a semicolon and the word "and", and by adding at the end thereof the following new paragraphs:

"(12) provide, with respect to programs and projects authorized by part D of this title—

"(A) satisfactory assurance that funds paid to the State from its allotment will be expended solely to plan, establish, and operate programs and projects which—

"(i) are designed to identify and to meet the special educational and related needs of gifted and talented children, and

"(ii) are of sufficient size, scope, and quality as to hold reasonable promise of making substantial progress toward meeting those needs:

"(B) that the State educational agency will establish such policies and procedures as are necessary for acquiring and disseminating information derived from educational research, demonstration and pilot projects, new educational practices and techniques, and the evaluation of the effectiveness of the program or project in achieving its purpose; and

"(13) provide that funds made available to any local educational agency from the State's allotment for the programs authorized under part D of this title may be used for the acquisition of instructional equipment to the extent such equipment is necessary to enhance the quality or the effectiveness of the program for which the application by such an agency is made.".

PAYMENTS

SEC. 5. Section 405 of the Act is amended by inserting "(a)" after the section designation, and by adding at the end thereof the following new subsection

"(b)(1) From the amounts allotted to each State under section 402(a)(3) for carrying out programs authorized by part D, the Commissioner shall pay to that State an amount equal to the Federal share of the amount expended by the State in carrying out its State plan (after withholding any amount necessary pursuant to section 406 (f)).

"(2) The Federal share for the fiscal year 1979 shall be 90 per centum, for the fiscal year 1980, 80 per centum, for the fiscal year 1981, 70 per centum, for the fiscal year 1982, 60 per centum, and for the fiscal year 1983, 50 per centum.".

PROGRAM AUTHORIZED

SEC. 6. Title IV of the Act is amended by adding at the end thereof the following new part:

"Part D—Education of Gifted and Talented Children

"PROGRAM AUTHORIZED

"SEC. 441. (a) The Commissioner shall carry out a program from 75 per centum of the amounts appropriated pursuant to section 401(d) (for making grants to the States pursuant to States plans approved under section 403) for the planning, development, operation, and improvement of programs and projects designed to meet the special educational needs of gifted and talented children at the preschool and elementary and secondary school levels.

"(b) From 25 per centum of the sums appropriated pursuant to section 401(d) the Commissioner is authorized to—

"(1) make grants to State educational agencies to assist them in establishing and maintaining, directly or through grants to institutions of higher education, a program for training personnel engaged or preparing to engage in educating gifted and talented children or as supervisors of such personnel;

"(2) make grants to institutions of higher education and other appropriate nonprofit institutions or agencies to provide training to leadership personnel for the education of gifted and talented children and youth; and

"(3) enter into contracts with, and make grants to, public and private agencies and organizations, including State and local educational agencies, for the establishment and operation of model projects for the identification and education of gifted and talented children.

For the purpose of clause (2) of this subsection, leadership personnel may include, but are not limited to, teacher trainers, school administrators, supervisors, researchers, and State consultants, and grants under such clause may be used for internships, with local, State, or Federal agencies and other public or private agencies or institutions.

"(c) Notwithstanding the second sentence of section 405(b)(1) of the General Education Provisions Act, the National Institute of Education shall, in accordance with the terms and conditions of section 405 of such Act carry out a program of research and related activities relating to education of gifted and talented children. The Commissioner is authorized to transfer, from amounts available for the purposes of subsection (b), to the Institute of Education such sums as may be necessary for the program required by this subsection, but such sums shall not exceed 5 per centum of the amount available for this part in any fiscal year. As used in the preceding sentence the term 'research and related activity' means research, research training, surveys and demonstrations in the field of education of gifted and talented children and youth, or the dissemination of information derived from such research, surveys or demonstration, and all such activities, including experimental and model schools.

"ADMINISTRATION

"SEC. 442. (a) The Commissioner shall designate an administrative unit within the Office of Education to administer the programs and projects authorized by this part and to coordinate all programs for gifted and talented children and youth administered by the Office of Education.

"(b) The Commissioner shall establish or designate a clearinghouse to obtain and disseminate to the public information pertaining to the education of gifted and talented children and youth. The Commissioner is authorized to contract with public or private agencies or organizations to establish and operate the clearinghouse.".

ADDITIONAL COSPONSORS

S. 1010

At the request of Mr. MCINTYRE, the Senator from North Carolina (Mr. MORGAN) was added as a cosponsor of S. 1010, the Consumer Cooperative Bank Act.

S. 2533

At the request of Mr. CHURCH, the Senator from New York (Mr. JAVITS) and the Senator from Georgia (Mr. NUNN) were added as cosponsors of S. 2533, a bill to provide for the use of alcohol produced from renewable resources as a motor vehicle fuel.

S. 2557

At the request of Mr. HUDDLESTON, the Senator from Nebraska (Mr. ZORINSKY) and the Senator from Ohio (Mr. METZENBAUM) were added as cosponsors of S. 2557, the Emergency Transportation Repair Act.

S. 2565

At the request of Mr. MATHIS, the Senator from Minnesota (Mrs. HUMPHREY) was added as a cosponsor of S. 2565, a bill to provide for further research and services with regard to victims of rape.

S. 2568

At the request of Mr. DOMENICI, the Senator from Indiana (Mr. LUGAR) was added as a cosponsor of S. 2568, a bill for the relief of Pranas Brazinskas.

S. 2569

At the request of Mr. DOMENICI, the Senator from Indiana (Mr. LUGAR) was added as a cosponsor of S. 2569, a bill for the relief of Algireas Brazinskas.

S. 2573

At the request of Mr. HELMS, the Senator from Nebraska (Mr. CURTIS) and the Senator from Utah (Mr. GARN) were added as cosponsors of S. 2573, a bill to limit the jurisdiction of the Supreme Court concerning voluntary prayer in public schools.

S. 2606

At the request of Mr. CHURCH, the Senator from Idaho (Mr. MCCLURE) was added as a cosponsor of S. 2606, a bill to amend and supplement the Federal reclamation laws.

S. 2727

At the request of Mr. STEVENS, the Senator from Washington (Mr. MAGNUSON), the Senator from Louisiana (Mr. LONG), the Senator from Kentucky (Mr. FORD), the Senator from Michigan (Mr. RIEGLE), the Senator from Colorado (Mr. HART), the Senator from Rhode Island (Mr. CHAFEE), and the Senator from Minnesota (Mr. ANDERSON) were added as cosponsors of S. 2727, a bill to promote and coordinate amateur sports.

S. 2730

At the request of Mr. WILLIAMS, the Senator from Idaho (Mr. CHURCH), the Senator from Alaska (Mr. STEVENS), and the Senator from Maine (Mr. MUSKIE) were added as cosponsors of S. 2730, a bill to establish a Hubert H. Humphrey Fellowship in Social and Political Thought at the Woodrow Wilson International Center for Scholars at the Smithsonian Institution and to establish a trust fund to provide a stipend for such fellowship.

SENATE JOINT RESOLUTION 118

At the request of Mr. JOHNSTON, the Senator from Maine (Mr. HATHAWAY) was added as a cosponsor of Senate Joint Resolution 118, to declare an Emergency Medical Services Week.

SENATE RESOLUTION 419

At the request of Mr. DECONCINI, the Senator from South Dakota (Mr. ABOUREZK), the Senator from Maryland (Mr. SARBANES), the Senator from Alabama (Mr. ALLEN), the Senator from Rhode Island (Mr. PELL), the Senator from Kansas (Mr. DOLE), the Senator from Oregon (Mr. PACKWOOD), and the Senator from New Jersey (Mr. WILLIAMS) were added as cosponsors of Senate Resolution 419, condemning the kidnaping of former Italian Premier Aldo Moro.

SENATE CONCURRENT RESOLUTION 72

At the request of Mr. CASE, the Senator from New Mexico (Mr. DOMENICI), the Senator from Hawaii (Mr. MATSUNAGA), and the Senator from Indiana (Mr. LUGAR) were added as cosponsors of Senate Concurrent Resolution 72, regarding efforts to counter international terrorism.

SENATE RESOLUTION 423—ORIGINAL RESOLUTION REPORTED AUTHORIZING A STAFF INVESTIGATOR TO PRESENT TESTIMONY

Mr. JACKSON, from the Committee on Governmental Affairs, reported the following original resolution, which was ordered placed on the calendar:

S. RES. 423

Whereas, by letter dated March 16, 1978, the Chairman of the Select Committee on Assassinations of the United States House of Representatives has requested that Philip R. Manuel, a staff investigator of the Senate Permanent Subcommittee on Investigations, appear and give executive session testimony before that body on matters pertinent to the inquiry currently being conducted by that body;

Whereas, the subject matter of that executive session testimony pertains to information obtained by Mr. Manuel in the course of his employment as a staff investigator for the Senate Permanent Subcommittee on Investigations; and

Whereas, by the privileges of the Senate of the United States and by Rule XXX of the Standing Rules of the Senate, no information secured by staff employees of the Senate pursuant to their official duties may be revealed without the consent of the Senate: Therefore, be it

Resolved, That Philip R. Manuel is authorized to present himself and give executive session testimony before the Select Committee on Assassinations of the United States House of Representatives pursuant to the written request of the Chairman of said Select Committee.

SEC. 2. The Secretary of the Senate shall transmit a copy of this resolution to the Honorable Louis Stokes, Chairman, Select Committee on Assassinations, United States House of Representatives, Washington, D.C. 20515.

● Mr. JACKSON. Mr. President, I report today a resolution to permit executive session testimony by a staff investigator of the permanent Subcommittee on Investigations of the Committee on Governmental Affairs pursuant to the written request of the chairman of the Select Committee on Assassinations of the House of Representatives.

By letter dated March 16, 1978, the Honorable LOUIS STOKES, chairman of the House Select Committee on Assassinations, requested that the permanent Subcommittee on Investigations authorize Philip R. Manuel, a subcommittee investigator, to appear and give executive session testimony before that body concerning information obtained by Mr. Manuel in the course of his employment as a staff investigator and pertinent to the inquiry currently being conducted by the Select Committee on Assassinations.

Pursuant to rule XXX of the Standing Rules of the Senate, and the privileges of the Senate, such testimony may not be presented without the approval of the Senate.

Accordingly, I report the resolution approved by the Committee on Governmental Affairs, and ask that this resolution be agreed to.●

SENATE RESOLUTION 424—SUBMISSION OF A RESOLUTION RELATING TO A NEW CANAL CONNECTING THE ATLANTIC AND PACIFIC OCEANS

Mr. MAGNUSON submitted a resolution, which was referred to the Committee on Foreign Relations:

S. Res. 424

Resolved, that it is the sense of the Senate that the President of the United States should immediately begin negotiations with the government of the Republic of Panama, or with the government of any other appropriate country if agreed to by the two Parties, regarding the construction, maintenance and operation of a new canal connecting the Pacific and Atlantic Oceans.

(The remarks of Mr. MAGNUSON when he submitted the resolution appear earlier in today's proceedings.)

AMENDMENTS SUBMITTED FOR PRINTING

NAVIGATION DEVELOPMENT ACT—H.R. 8309

AMENDMENT NO. 1742

(Ordered to be printed and to lie on the table.)

Mr. SARBANES (for himself and Mr. MATHIAS) submitted an amendment intended to be proposed by them, jointly, to the bill (H.R. 8309) authorizing certain public works on rivers for navigation, and for other purposes.

● Mr. SARBANES. Mr. President, I send to the desk on behalf of myself and my able colleague, the distinguished senior Senator from Maryland (Mr. MATHIAS), an amendment to H.R. 8309, the Navigation Development Act, which authorizes the U.S. Army Corps of Engineers to deepen the channel of the Choptank River and the Cambridge Harbor turning basin in Dorchester County, Md. My amendment will authorize the corps to increase the channel and harbor depth to 25 feet so that more vessels with larger cargoes can call on the Cambridge Port.

The deeper channel and harbor are vitally important to the economy of Cambridge, Md., and to the eastern shore area which it serves. The area's seafood packing industry depends on a steady traffic of fully loaded vessels. In addition, Cambridge has undertaken a special effort to export agricultural products and recently a vessel loaded with locally grown corn departed Cambridge for Nigeria. This was the largest vessel ever to use the harbor and there is a great export potential with clear benefits for the local farm economy. Cambridge is also undertaking a vigorous economic development program in which it seeks to expand its economic base. All of these activities require that the harbor and channel be deep enough to handle fully loaded cargo vessels.

The Cambridge community strongly support this project and community leaders and local officials, particularly Mayor Albert Atkinson and State Senator Fred Malkus, have been unstinting in their effort to get this project underway. After some delays, the channel and harbor dredging have now been approved by the Corps of Engineers and the Department of the Army. The project has a fine cost-benefit ratio and local financial participation is assured. Mr. President, this is a most important project and I urge my colleagues to support its authorization when H.R. 8309 is considered by the Senate.●

VETERANS PENSION—S. 2384

AMENDMENT NO. 1743

(Ordered to be printed and referred to the Committee on Veterans' Affairs.)

Mr. THURMOND (for himself, Mr. HANSEN, and Mr. STAFFORD) submitted an amendment intended to be proposed by them, jointly, to the bill (S. 2384) to amend title 38 of the United States Code in order to provide a security pension program for non-service-connected disabled veterans of a period of war who are in need, for surviving spouses of veterans of a period of war who are in need, and for surviving children of veterans of a period of war who are in need; to provide for annual automatic cost-of-living adjustments in the security pension program; to prevent reductions in security pension benefits solely attributable to cost-of-living increases in social security benefits; and for other purposes.

NATIONAL PROGRAM OF WATER RESEARCH AND DEVELOPMENT—S. 2704

AMENDMENT NO. 1744

(Ordered to be printed and referred to the Committee on Environment and Public Works.)

Mr. DOMENICI submitted an amendment intended to be proposed by him to the bill (S. 2704) to promote a more adequate and responsive national program of water research and development, and for other purposes.

● Mr. DOMENICI. Mr. President, when I joined recently in cosponsoring S. 2704, by request, I made a speech on the floor analyzing the bill. In that speech, I explained why the new bill must not be used to undercut the 1977 initiative authorizing four demonstration projects for saline water conversion. Unless we amend S. 2704, it would repeal entirely the Water Research and Conversion Act of 1977 (Public Law 95–84).

I am today submitting an amendment that would incorporate within S. 2704 the exact language approved by the Congress in Public Law 95–84. Section 2 of that 1977 law directed the Secretary of the Interior—

To study, design, construct, operate, and maintain desalting plants demonstrating the

engineering and economic viability of membrane and phase-change desalting processes at not more than four locations in the United States . . . provided, that at least two such plants shall demonstrate desalting of brackish ground water.

A total of $40,000,000 was authorized for the section 2 program, beginning in fiscal year 1978, with additional sums to be available "as are necessary to defray operations, maintenance, and energy costs for demonstration plants during the periods of Federal responsibility for such activities."

Specifically, my amendment creates a new section 206 in S. 2704, and provides specific dollar authorizations for this work in section 402 of the bill. As indicated, this would merely codify the 1977 provision within this new, organic act.

Mr. President, I ask unanimous consent that the text of my amendment be printed at this point in the RECORD.

There being no objection, the amendment was ordered to be printed in the RECORD, as follows:

AMENDMENT No. 1744

On page 18, after line 19, insert the following:

"SEC. 206(a) Notwithstanding any limitation imposed by Section 205(b)(3) of this Title, the Secretary is authorized and directed to study, design, construct, operate, and maintain desalting plants demonstrating the engineering and economic viability of membrane and phase-change desalting processes at not more than four locations in the United States, including Puerto Rico, Virgin Islands, and Guam: *Provided*, That at least two such plants shall demonstrate desalting of brackish ground water.

"(b) Funds appropriated pursuant to the authority provided by this section may not be expended until thirty calendar days (excluding days on which either the House of Representatives or the Senate is not in session because of an adjournment of more than three calendar days to a day certain) have elapsed following transmittal of a report to the chairman of the Committee on Interior and Insular Affairs of the House of Representatives and the chairman of the Committee on Environment and Public Works of the United States Senate. Such report shall present information that includes, but is not limited to, the location of the demonstration plant, the characteristics of the water proposed to be desalted, the process to be utilized, the water supply problems confronting the area in which the plant will be located, alternative sources of water and their probable cost, the capacity of the plant, the initial investment cost of the demonstration plant, the annual operating cost of the demonstration plant, the source of energy for the plant and its cost, the means of reject brine disposal and its environmental consequences, and the unit cost of product water, considering the amortization of all components of the demonstration plant and ancillary facilities. Such report shall also be accompanied by a proposed contract between the Secretary and a duly authorized non-Federal public entity, in which such entity shall agree to furnish, at no cost to the United States, necessary water rights, water supplies, rights-of-way, power source interconnections, and brine disposal facilities. Such proposed contract will further provide that the United States will construct the plant described in the report at no cost to the non-Federal public entity and that the United States will provide all costs of operation and maintenance of the plant for a term of at least two but not more than five years, during which access to the plant and its operating data will not be denied to the Secretary or his representatives. The Secretary is authorized to include in the proposed contract a provision for conveying all rights, title, and interest of the Federal Government to the non-Federal public entity, subject only to a future right to re-enter the facility for the purpose of financing at Federal expense modifications for advanced technology and for its operation and maintenance for a successive term under the same conditions as pertain to the original term."

On page 25, after line 16, insert the following:

"(c) There is authorized to be appropriated, to remain available until expended, for the fiscal year ending September 30, 1978, and thereafter the sum of $40,000,000 to finance the construction of demonstration plants authorized by Section 206 of this Act. There are also authorized to be appropriated such additional sums as are necessary to defray operation, maintenance, and energy costs for demonstration plants during the periods of Federal responsibility for activities under Section 206 of this Act." ●

INTERNATIONAL DEVELOPMENT CORPORATION ACT OF 1978—S. 2420

AMENDMENTS NOS. 1745 AND 1746

(Ordered to be printed and referred to the Committee on Foreign Relations and the Committee on Governmental Affairs.)

Mr. KENNEDY submitted two amendments intended to be proposed by him to the bill (S. 2420) to promote the foreign policy, security, and general welfare of the United States by assisting peoples of the world in their efforts toward economic development by establishing the International Development Corporation Administration, and for other purposes.

● Mr. KENNEDY. Mr. President, beginning today I am submitting a series of amendments to strengthen provisions of S. 2420, the International Development Cooperation Act of 1978, now pending before the Committee on Foreign Relations.

As my colleagues know, this is the late Senator Hubert Humphrey's final piece of legislation, and it is a monument to his many years of dedicated work and concern over America's foreign assistance program. His bill, prepared during the final months of his life, is probably the most significant legislative initiative in the foreign assistance field since President Kennedy's proposals in the early 1960's.

The Humphrey bill wipes the slate clean and starts anew. It broadens the humanitarian and developmental purposes of our foreign assistance program, and strengthens the "new directions" mandated by Congress in recent years to guide our Nation's effort in helping developing countries around the globe. I am pleased to be a cosponsor of this legislation, and I shall work with others in the days and weeks ahead to assure its favorable consideration and final passage.

However, as we all know, the pending bill was considered by Senator Humphrey to be a "working bill"—a strong and firm place from which to begin the large task of rewriting and replacing the Foreign Assistance Act of 1961, as amended. Hearings on the bill have just begun, and there will clearly be a number of major changes and revisions in the bill as its many innovative and important new provisions are more closely studied.

It is within this context, Mr. President, that I will be offering a series of "working amendments" to the bill—to place before the Foreign Relations Committee and its Subcommittee on Foreign Assistance certain proposals to modify the bill, to expand it in certain areas, and to perfect some portions of it.

INTERNATIONAL HEALTH PROGRAMS

First, one of the most important features of the pending bill is its basic revision of the authorizing language for our bilateral development assistance programs. In general, I strongly support the new language in the bill, especially in the agricultural and nutrition field, as well as in human resources development. However, I am concerned over a lack of emphasis on international health programs, and the need to strengthen the bill's provisions in chapter II for population and international health assistance.

We are passing through a period of critical choices in our Nation's foreign assistance program. In this, as in many other areas of U.S. foreign policy, we are faced with the need to reassess our approach and policy toward overseas assistance. The increasing limitation on funds demands that we carefully review our foreign aid expenditures to assure that they support our legitimate foreign policy objectives as well as satisfy the humanitarian needs of the world and the development needs of underdeveloped countries during the coming decade.

In a series of hearings over the past several years before the Subcommittee on Refugees and the Subcommittee on Health, both of which I have served as chairman, a number of important points have emerged which I believe must be given greater emphasis in designing new and productive approaches to our foreign assistance program. The first of these is that the economic development of any country depends greatly upon the well-being of its peoples. Economic advance will always be impeded by hunger, by widespread disease, and by overpopulation. Second, we must recognize that the humanitarian components of any assistance program must be well integrated, so that assistance programs in the areas of nutrition, health, and population can no longer be thought of as independent of one another. Third, we must devise health programs that will meet the real needs of the poor people of these countries and learn to formulate projects that will get the benefits of our assistance program down to the grassroots level. Finally, in this changing political world, we must realize that it is no longer suitable to work alone and paternalistically in our international health programs. We must develop truly cooperative ventures with needy countries, directed more at helping them to solve their own health problems for the long term, rather than attempting to effect our own short-term solutions to these problems.

Mr. President, the amendments which

I am proposing today focus on the international health aspects of our foreign assistance program, although they do have large implications in other areas.

But even in the health field, the problems of the Third World are massive, and we should be doing more about it. Moreover, what we do, we should do more effectively. This is not only a question of satisfying the traditional American humanitarian concern; it is also something that we should be doing in our enlightened self-interest. The health of one part of the world inevitably affects the health of another part. By helping to eradicate smallpox in the last afflicted areas of the globe, we eliminated the need for expensive, and sometimes hazardous, smallpox innoculations in other areas of the world.

Today, the health problems of the world, and especially of developing nations, are truly staggering. It is an enormous human tragedy that one-fourth of the people on this Earth have no access to any health care whatever, while another billion people have only the most rudimentary and ineffective care. In some nations, four persons out of every five receive no health care at all throughout their lives. These are the very people who need health care the most. Over 300 million people throughout the world suffer from filariasis, while in Africa 1 person in 10 will be affected by the "river blindness" form of this disease, which seriously impedes agricultural productivity and economic development. Malaria affects 200 million people, and in some parts of tropical Africa every child over 1 year old will catch this disease and 1 million children will die of it each year.

The list is very long, and statistics like these are well known. But behind the figures are the people, the hundreds of millions of human beings living lives of desperation. Fear and hunger, sickness and death, are the horsemen of their daily living apocalypse.

Why is not more being done? Why do the experts tell us that the situation will get worse by the year 2000? It is time that the people of the United States and other advanced nations rise up in outrage at these conditions, and demands that governments work together to end this global blight. In the United States, very little research is being carried out on tropical diseases, and yet this must be an important component of any foreign assistance program.

Mr. President, I would suggest that not only can much be done about these disease problems, but that dollars spent in this area are some of the most cost effective in terms of foreign assistance. Further, improvement of the health of peoples abroad can have a direct influence on the health and the health-care costs of the American people. Again, I need only cite one example of this. The U.S. contribution to the worldwide smallpox eradication campaign cost us a total of some $25 million, but because eradication of this disease enabled us to terminate our own domestic smallpox vaccination program, we are now able to save over $125 million a year domestically as the direct result of our modest international effort in this area.

Mr. President, the principal objectives of these amendments are:

First, to give full recognition to health activities in our foreign assistance program, and to integrate these activities with related efforts in nutrition and population;

Second, to attempt to orient our foreign assistance program more toward the solution of the problems of the rural poor in terms of the most prevalent tropical diseases and needs of a developing primary health care system, rather than to engage in activities which primarily benefit the urban rich;

Third, to encourage the Agency to utilize more effectively the technical and professional competence that now exists in the Department of Health, Education, and Welfare, in those assistance programs which require the skilled expertise and backup scientific support that exist in such units as the Center for Disease Control and the National Institutes of Health;

Fourth, to mobilize the universities and other institutions to provide the necessary backup in research—basic biomedical, primary health care, et certera—and training of health professionals and paraprofessionals that any development program will need, with an emphasis on helping Third World countries develop their own experts to do much of what has to be done for themselves; and

Fifth, to attempt to free up the foreign assistance agency from its old style parochialism and lack of technical expertise by involving outside professionals more extensively in policy-decision and implementation.

EXPLANATION OF AMENDMENTS

Mr. President, my first amendment, entitled "Health and Disease Prevention," separates the authorization for health from that for population, and is intended to direct the health activities of the agency as devising and carrying out in partnership with developing nations and international organizations a strategy for programs of preventive medicine and basic health care. It focuses on the problems posed by the most serious infectious diseases in underdeveloped countries, with an emphasis on programs carried out in and in cooperation with developing countries, but linked with and supported by the unique health facilities and personnel in American institutions.

The second amendment creates a new title IV in chapter II, and is devoted to strengthening institutional capacity for health development. Section 241, general provisions, emphasizes the importance of strengthening the capabilities of universities and other institutions to assist in the research and teaching efforts required to improve the health of developing countries, and calls for programs of research and application of health technologies in developing countries, linked closely with these American institutions.

Section 242, general authority, authorizes the Administrator to undertake programs to build and strengthen the institutional capacity and human resource skills both in developing countries and within the United States, so as to utilize the expertise of American institutions to the best advantage in the training of foreign nationals and the establishment of collaborative programs to meet the health needs of developing countries.

Section 243 establishes a Board for International Health Development, composed of members with broad expertise in the international health area, some of whom will represent other governmental departments, so that a full integration of U.S. governmental efforts in this area may be achieved. Among the duties of this Board are participation in the formulation of basic policy and strategy, the recommendation of the apportionment of funds in the health area, the assessment of the impact of health programs in developing countries, and the establishment of a peer review system to serve as a quality review monitor of grants and contract programs in the health field.

Section 244 contains the authorization for the utilization for these purposes of the funds made available under section 204.

Section 245 requires of the administrator an annual report to Congress of the activities carried out under this title during the previous year, and a projection of future activities to be conducted during the subsequent fiscal year.

Mr. President, it is time that our foreign assistance program was made more rational, and more responsive both to the needs of the American foreign policy as well as to the problems of hundreds of millions of poor people throughout the world who are ravaged continually by disease and whose desperate appeal for help we can no longer disregard.

Mr. President, I ask unanimous consent that the text of these health amendments be printed in the RECORD.

There being no objection, the amendments were ordered to be printed in the RECORD, as follows:

AMENDMENT NO. 1745

On page 6, line 16, after "poverty", insert "and disease".

On page 11, line 12, after "population planning", insert "; health;".

On page 17, line 3, after "POPULATION" strike out "AND HEALTH".

On page 17, line 4, strike out "poor health conditions and".

On page 17, line 17, strike out all after "nutrition." through line 20.

On page 17, line 25, insert "," after "planning" and strike out "In addition to" and insert in lieu thereof "principally".

On page 18, line 2, after "research" insert "." and "In addition,".

On page 19, strike all of line 18 through line 3 of page 20.

On page 20, line 4, section "(f)" is relettered "(e)".

On page 20, line 5, after "section" insert "and section 204".

On page 20, line 10, insert the following new section:

"SEC. 204. HEALTH AND DISEASE PREVENTION. (a) The Congress recognizes that poor health and widespread debilitating disease can vitiate otherwise successful development efforts. The widespread existence of acute and chronic infectious diseases afflicting tens and hundreds of millions of people inhibits food production, accentuates the effects of malnutrition, and impedes economic progress.

Good health conditions are a principal element in improved quality of life and contribute to the individual's capacity to participate in the development process. The Administrator is authorized, on such terms and conditions as he may determine, to furnish assistance for disease prevention and control, improved sanitation and water facilities, basic health education and the extension of primary health care facilities—

"(1) to expand significantly the provision of basic health and sanitation education and services, especially to rural poor people, and to support such research into primary health care services as may best enhance their capacity for self-help.

"(2) to control the major endemic infectious diseases and their consequences; and

"(3) to expand significantly the provision of simplified and improved health technologies to combat these diseases, especially among rural poor people.

There are authorized to be appropriated to the Administrator for the purposes of this section, in addition to funds otherwise available for such purposes, $ for the fiscal year 1979, which amounts are authorized to remain available until expended.

"(b) Assistance provided under this section shall be used primarily for activities which are specifically designed to conserve or restore the health of the poor, through such means as creation and strengthening of local institutions linked to the regional and national levels; the training of appropriate medical care and public health personnel as suitable to their needs; and the creation and strengthening of systems, particularly at the community level, to provide other services and supplies needed by sick people and those at risk from disease, such as by immunization programs, disease vector control, epidemiological support, pure water, health education and improved sanitation.

"(c) The Congress finds that human suffering and disease are widespread and growing in the poorest and most slowly developing countries. In the allocation of funds under this section, special attention shall be given to improving the health in countries which have been designated as relatively least developed by the United Nations Conference on Trade and Development.

"(d) Assistance provided under this section shall be used in coordination with programs carried out under sections 202 and 203, since the problems of malnutrition, disease, and excessive population are intimately connected. In particular, the Administrator is encouraged—

"(1) to devise and carry out in partnership with developing nations and international organizations a strategy for programs of preventive medicine and basic health care, emphasizing the most serious infectious diseases which affect large portions of the population and especially those which affect children;

"(2) to insure that programs of maternal and child health include a population planning component;

"(3) to provide technical, financial, and material support to individuals or groups at the local level for such programs; and

"(4) to utilize to the maximum extent practicable the professional and technical capabilities of the Department of Health, Education, and Welfare through inter-agency agreements.

"(e) Health research carried out under this Act shall—

"(1) be undertaken to the maximum extent practicable in developing countries by developing country personnel, linked with and supported by the unique biomedical research facilities and highly trained personnel of private, public, and governmental research laboratories within the United States;

"(2) take account of the special needs of the poor people of developing countries in the determination of research priorities, including research having a focus on the important disease problems and health care needs of these nations; and

"(3) make extensive use of field testing to adapt basic research to local conditions.

Special emphasis shall be placed on disseminating research results to local health units in which they can be put to use, and especially on institutional and other arrangements needed to assure that the general population has effective access to both new and existing technology.

"(f) Local currency proceeds from sales of commodities provided under the Agricultural Trade and Development Act of 1954, as amended, which are owned by foreign governments, shall be used whenever practicable to carry out the provisions of this section."

Sections "204" through "208" are renumbered "205" through "209".

AMENDMENT No. 1746

On page 40, following line 23, insert the following new Title:

"TITLE IV—STRENGTHENING INSTITUTIONAL CAPACITY FOR HEALTH DEVELOPMENT

"SEC. 241. GENERAL PROVISIONS.—(a) The Congress declares that the United States should strengthen the capacities of United States public institutions, universities, and other eligible private agencies in program-related health institutional development and research, consistent with sections 203 and 204, to enhance the institutional capabilities of the developing countries to provide for themselves the basic public health care needed by their populations; should improve the participation of United States public institutions and universities in the United States government efforts to apply health sciences more effectively to the goal of protecting and improving the health of the people of the world; and in general should provide increased and longer term support to the application of science to solving the special health problems of developing countries.

"The Congress so declares because it finds—

"(1) that the good health of its people is one of the most significant foundations for the economic progress of a nation;

"(2) that the improvement of health and nutrition is of the greatest benefit to the poorest majority of the developing world;

"(3) that research, teaching, and the appropriate application of medical technologies are prime factors in improving health abroad, as well as in the United States;

"(4) that medical research and services abroad has in the past and will continue in the future to provide benefits for the health of the American people, and that improving the health of peoples abroad is of benefit to all; and

"(5) that universities and other institutions need to be encouraged to continue or to expand their efforts to assist in improving the health in developing countries.

"(b) Accordingly the Congress declares that, in order to prevent disease and establish freedom from illness, various components must be brought together, including—

"(1) strengthening the capabilities of universities and other institutions to assist in the research and teaching efforts required to improve the health of developing countries;

"(2) institution-building programs for development of national and regional biomedical research and application capacities in the developing countries;

"(3) international health research centers, including support of appropriate activities by the World Health Organization;

"(4) research program grants, including the establishment of specialized centers for research and training in the disease problems of underdeveloped nations; and

"(5) contract research.

"(c) The United States should—

"(1) effectively involve United States universities and other eligible institutions more extensively in each component;

"(2) provide mechanisms for the universities and institutions to participate and advise in the planning, development, and implementation of each component; and

"(3) assist such universities and institutions in cooperative joint efforts with—

"(A) health institutions in developing countries; and

"(B) regional and international health research centers, directed to strengthening their joint and respective capabilities and to engage them more effectively in research, teaching, and primary health care activities for solving problems of disease in underdeveloped countries.

"SEC. 242. GENERAL AUTHORITY. (a) To carry out the purpose of this title, the Administrator is authorized to provide assistance on such terms and conditions as he shall determine—

"(1) to strengthen the capabilities of universities and other eligible institutions in teaching, research, and the application of health technologies to enable them to implement current programs authorized by paragraphs (2) through (5), and those proposed in the report required by section 245;

"(2) to build and strengthen the institutional capacity and human resource skills of developing countries so that such countries may participate more fully in the health care of their own peoples;

"(3) to provide program support for long-term collaborative university research on the disease and health care problems of developing countries;

"(4) to involve universities and other eligible institutions more fully in the international work of biomedical science, including the international research centers, the activities of international organizations such as the World Health Organization, and the institutions of developing nations; and

"(5) to provide program support for international medical research centers, to provide support for research programs identified for specific problem-solving needs, and to develop and strengthen national research systems in the developing countries, with emphasis on the special needs of their developing health care systems.

"(b) Programs under this title shall be carried out so as—

"(1) to utilize and strengthen the capabilities of universities in—

"(A) developing capacity in the cooperating country for instruction in public health and medical care skills, and other relevant skills appropriate to local needs;

"(B) biomedical research to be conducted in the cooperating countries, international medical research centers, and in the United States;

"(C) the planning, initiation, and development of services through which information concerning health and related subjects will be made available directly to the poor people of developing countries by means of education and demonstration; and

"(D) the exchange of educators, scientists, and students for the purpose of assisting in successful development in the cooperating nations;

"(2) to take into account the value to the health of the American people of such programs, integrating to the extent practicable programs and financing authorized under this title with such programs as are supported by other government resources so as to maximize the contribution to the development of health in the United States and in developing nations; and

"(3) to build on existing programs and institutions whenever practicable, including

those of the Department of Health, Education, and Welfare, the Center for Disease Control, the universities, and other institutions.

"(c) To the maximum extent practicable, activities under this section shall—

"(1) be designed to achieve the most effective interrelationship between the teaching of health sciences, biomedical research, and health care delivery systems;

"(2) focus primarily on the health needs of developing countries;

"(3) be adapted to local circumstances; and

"(4) be carried out within the developing countries.

"SEC. 243. HUBERT H. HUMPHREY INTERNATIONAL HEALTH FELLOWSHIP PROGRAM. The Administrator is authorized to establish on such terms and conditions as he shall determine, a program of training of medical, public health, and support professionals required to accomplish the purposes of section 204 and of this Title. This program shall be known as the Hubert H. Humphrey International Health Fellowship program. Not less than 50 percent of all fellowships awarded shall be for the training in appropriate institutions of personnel from developing countries.

"SEC. 244. BOARD FOR INTERNATIONAL HEALTH DEVELOPMENT.—(a) To assist in the administration of the programs authorized by this title, the President shall establish a permanent Board for International Health Development (hereinafter in this title referred to as the "Board", consisting of ten members, of whom one shall be the Administrator, one shall be the Director of the Office of International Health in the Department of Health, Education, and Welfare, one shall be the Director of the Center for Disease Control, one shall be the Director of the National Institutes of Health, one shall be appointed from the private health-related voluntary organizations, and not less than two shall be appointed from the universities. Terms of members shall be set by the President at the time of the appointment. Members of the Board shall be entitled to such reimbursement for expenses incurred in the performance of their duties (including per diem in lieu of subsistence while away from their homes or regular place of business) as the Administrator deems appropriate.

"(b) The Board's general area of responsibility shall include, but not be limited to—

"(1) participation in the planning, development, and implementation of,

"(2) initiating recommendations for, and

"(3) monitoring of,

the activities described in section 242.

"(c) The Board's duties shall include, but not necessarily be limited to—

"(1) participating in the formulation of basic policy, procedures, and criteria for project and program proposal reveiw, selection, and monitoring;

"(2) recommending which developing countries could benefit from programs carried out under this title, and identifying those nations which have an interest in participating with the United States in establishing or developing health institutions which engage in teaching and research;

"(3) reviewing and evaluating memoranda of understanding or other documents that detail the terms and conditions between the Administrator and universities and other institutions participating in programs under this title;

"(4) recommending to the Administrator the apportionment of funds authorized under section 242 of this title; and

"(5) recommending to the Administrator the numbers and types of medical, public health, and support professional fellowships to be awarded within the program established in section 243, and the continued review of the quality and efficacy of this program; and

"(6) assessing the impact of programs carried out under this title in improving health in developing countries.

"(d) The Administrator shall publish the recommendations of the Board, with his response to those recommendations, and in those cases where he disagrees he must publish the bases for such disagreement.

"(e) The Administrator may authorize the Board to create such subordinate units as may be necessary for the performance of the duties, including but not limited to the development of an appropriate and effective peer review system to monitor the grants and contracts adopted under section 204 and under this title. The Administrator is encouraged to the maximum extent practicable to utilize existing governmental peer review mechanisms.

"(f) In addition to any other functions assigned to and agreed to by the Board, the Board shall be consulted in the preparation of the annual report required by Section 245 and on other health development activities related to programs under this title.

"SEC. 245. AUTHORIZATION.—(a) The Administrator is authorized to use any of the funds made available under section 204 to carry out the purposes of this title. Funds made available for such purposes may be used without regard to the provisions of sections 207 and 208 (b) of this Act.

"(b) Foreign currencies owned by the United States and determined by the Secretary of the Treasury to be excess to the needs of the United States shall be used to the maximum extent possible in lieu of dollars in carrying out the provisions of this title.

"(c) Assistance authorized under this title shall be in addition to any allotments or grants that may be made under other authorizations.

"(d) Universities and other eligible institutions may accept and expend funds from other sources, public or private, to carry out the purposes of this title. All such funds, both prospective and in hand, shall be periodically disclosed to the Administrator as by regulation required, but no less often than in an annual report.

"SEC. 246. ANNUAL REPORT.—The Administrator shall transmit to the Congress, not later than February 1 of each year, a report detailing the activities carried out in pursuing of this title during the preceding fiscal year and containing a projection of program activity to be conducted during the subsequent fiscal year. Such report shall contain a summary of the activities of the Board established pursuant to section 243 and may include the separate views of the Board in respect to any aspect of the programs conducted or proposed to be conducted under this title.".●

DECLARATIONS SUBMITTED FOR PRINTING

DECLARATION NO. 3

(Ordered to be printed and to lie on the table.)

Mr. MAGNUSON submitted a declaration intended to be proposed by him to the resolution of ratification of the Panama Canal Treaty, Ex. N, 95–1.

ADDITIONAL COSPONSORS—EX. N, 95–1

AMENDMENT NO. 10

At the request of Mr. DOLE, the Senator from Utah (Mr. GARN) and the Senator from North Dakota (Mr. BURDICK) were added as cosponsors of amendment No. 10 intended to be proposed to the Panama Canal Treaty, Ex. N, 95–1, eliminating the treaty restrictions against U.S. negotiations for a new interoceanic canal.

NOTICES OF HEARINGS

SUBCOMMITTEE ON ENERGY CONSERVATION AND REGULATION

● Mr. JOHNSTON. Mr. President, the Subcommittee on Energy Conservation and Regulation of the Committee on Energy and Natural Resources will hold a series of hearings in preparation for committee markup of S. 2692, the bill authorizing fiscal year 1979 funds for the civilian programs of the Department of Energy. These hearings will be held in accordance with the following schedule:

Thursday, April 13—Administrator, Economic Regulatory Administration.

Friday, April 14—Assistant Secretary for Conservation and Solar Application; Director of Administration.

Tuesday, April 18—Chairman, Federal Energy Regulatory Commission; Administrator, Energy Information Administration.

Questions about these hearings should be addressed to Ben Cooper or James T. Bruce of the committee staff at 224–9894.●

SUBCOMMITTEE ON TAXATION AND DEBT MANAGEMENT

● Mr. HARRY F. BYRD, JR. Mr. President, as chairman I wish to announce that the Subcommittee on Taxation and Debt Management of the Finance Committee will hold a hearing on Monday, April 24, 1978, on S. 2738, a bill to provide for the indexation of certain provisions of the Federal income tax laws. The hearing may also consider other bills which may be introduced relating to tax indexing.

Senator BOB DOLE is the chief sponsor of S. 2738. Senators JAMES A. MCCLURE and ROBERT P. GRIFFIN are cosponsors.

The hearing will begin at 10 a.m. in room 2221, Dirksen Senate Office Building.

Witnesses who desire to testify at the hearing should submit a written request to Michael Stern, staff director, Committee on Finance, room 2227 Dirksen Senate Office Building, Washington, D.C. 20510, by no later than the close of business on Friday, April 14, 1978.

The provisions contained in S. 2738 are of general applicability and would result in a reduction in Federal revenues as follows:

(Billions of dollars)

FY 1979	−5
FY 1980	−12
FY 1981	−21
FY 1982	−30
FY 1983	−41

●

SUBCOMMITTEE ON PARKS AND RECREATION

● Mr. ABOUREZK. Mr. President, I would like to announce for the information of the Senate and the public, the scheduling of a public hearing before the Subcommittee on Parks and Recreation of the Committee on Energy and Natural Resources.

The hearing is scheduled for April 6, 1978, beginning at 10 a.m. in room 3110 of the Dirksen Senate Office Building and will include the following measures:

S. 1655—To provide for the establishment of the Lowell National Cultural Park in the Commonwealth of Massachusetts, and for other purposes.

S. 2566—To amend the Pennsylvania Avenue Development Corporation Act of 1972 to authorize appropriations and borrowings from the United States Treasury for further implementation of the development plan for Pennsylvania Avenue between the Capitol and the White House, and for other purposes.

S. 2699—To amend the Act of June 27, 1960 (74 Stat. 220) as amended by the Act of May 24, 1974 (88 Stat. 174, 176; 16 U.S.C. 469) relating to the preservation of historical and archeological data; to authorize appropriations under section 3(b) and 4(a) for fiscal years 1979 through 1983, and for other purposes.

Those wishing to submit a written statement for the record should write to the Parks and Recreation Subcommittee, room 3106, Dirksen Senate Office Building, Washington, D.C. 20510.

For further information regarding the hearing, you may wish to contact Tom Williams or Laura Beaty at 224-7145.●

ADDITIONAL STATEMENTS

HELP PROVIDED OVER-65 TAXPAYER

● Mr. CHURCH. Mr. President, the Internal Revenue Service has emphasized repeatedly that the Federal Government wants no individual to pay more income tax than legally due.

Each taxpayer is entitled to all exemptions, deductions, and credits authorized by law.

The Committee on Aging has a long-standing interest in protecting older Americans from overpaying their income taxes.

Hearings conducted by the committee make it clear that large numbers pay more income tax than required, because they are unaware of tax relief measures designed to help them.

Each year the committee prepares an updated checklist of itemized deductions.

This publication also summarizes major tax relief measures—such as the tax credit for the elderly and the partial or total exemption from Federal income tax of the gain on the sale of a personal residence—for older Americans.

In addition, the committee maintains a supply of tax publications for the elderly, including "Tax Benefits for Older Americans," "Tax Information on Pension and Annuity Income," and others.

Another helpful addition for older persons is a recent article by Sylvia Porter. She provides many useful tax tips—as well as important information—for persons 65 or older.

In addition, she describes sources where taxpayers may obtain assistance.

This article, it seems to me, would be of assistance to Senators and their staff in answering tax questions for elderly constituents.

Mr. President, I submit for the RECORD that Sylvia Porter's article entitled "Help Provided Over-65 Taxpayers."

The article follows:

YOUR MONEY'S WORTH—HELP PROVIDED OVER-65 TAXPAYERS

(By Sylvia Porter)

Q: Which U.S. government agency provides nationwide toll-free telephone assistance, toll-free TV-phones and teletypewriters for the deaf, free information booklets (many printed in extra large type for the partially blind), runs overseas seminars, and offers free walk-in counseling services, some designed particularly for those who don't speak English, for the elderly, the handicapped, and low-income citizens?

A: The Internal Revenue Service.

Why? Because our tax laws are so complex and change so frequently that even if you are more informed than most taxpayers, you may not be aware of all the deductions, credits and exemptions to which you are intitled.

To whom is this of extraordinary importance? The millions who are 65 or over, for when you reach 65 or retire, you are suddenly faced with a myriad of new federal income tax provisions.

What's more, if you're retired, your taxes are no longer withheld by your employer. Your income comes largely from pensions, annuities, investments, business activities, etc., not subject to withholding. The laws governing these forms of income are among the most befuddling in the tax code and require you to fill out several additional schedules as well as the long Form 1040.

In addition, Congress has passed many special tax-relief provisions for the elderly alone—as a result of which about 18 million of the 24 million of you considered older citizens currently pay no federal income tax at all. You can receive levels of income tax-free which are roughly double the tax-free income levels for those under 65.

If you, for instance, are a taxpayer younger than 65, you can now receive income of $3,200 before you become liable for taxes. But if you are single and over 65, you do not have to pay taxes until your income tops $6,400. And your tax-free level may be even higher if you receive Social Security benefits (which are exempt from taxes).

Of every four older Americans, only about one—or approximately 6 million—actually pay income taxes. You are relatively well-off, with your incomes averaging close to $20,000 a year. Under current law, you, too, are entitled to special treatment.

As one illustration, you are granted an extra personal exemption of $750 under today's law. You also are allowed an exemption for all gains on sales of homes selling for $35,000 or less and a portion of gains for your residence if you sell it above this.

These and other tax preferences for you cost the U.S. Treasury a towering $6 billion annually—and under the tax proposals President Carter has submitted to Congress, your tax liabilities, as an older citizen, would be cut even more. More than a million additional returns now filed by taxpayers 65 or older would be dropped from the tax rolls. The average net tax cut would be $250.

If you are 65 or over and single, your tax-free level of income would rise by $850, from $6,400 to $7,250. If you're a couple, both 65 or over, your tax-free level of income would jump by $1,200, from $10,450 to $11,650.

But while many of today's measures ease and new proposals would further reduce the tax burdens of millions of you, they are of little value unless you know they exist and how to take advantage of them.

To help you avoid overpaying your taxes this year, the Senate's Special Committee on Aging has published a revised checklist of itemized deductions for use in preparing your '77 return.

A limited supply of this brochure is available on your request from the Committee on Aging, Room G-233, Dirksen Senate Office Building, Washington, D.C. 20510. When this supply runs out, you may get a copy for $1 from the Government Printing Office, Washington, D.C. 20402.

The IRS also distributes publications to assist older taxpayers. "Tax Benefits for Older Americans" is the main information booklet. It is free and you can get a copy at IRS and Social Security offices. The 1979 brochure will be simplified and will carry sample forms illustrating many of the tax situations which an older taxpayer will face.●

TUITION TAX CREDIT

● Mr. PACKWOOD. Mr. President, last September Senator MOYNIHAN and I introduced S. 2142, a bill to provide a tax credit for persons paying tuition to elementary and secondary schools, colleges, and vocational schools.

The response in Congress to this legislation has been better than we dared to hope. Fifty Senators have cosponsored S. 2142. The Finance Committee has approved a variation of it, sponsored by Senators ROTH, RIBICOFF, MOYNIHAN, and myself, by a vóte of 14 to 1.

A majority of both the House and the Senate support tuition tax credits. The Senate approved amendments offered by Senator ROTH to create college tuition tax credits three times in the last 2 years. The Congress specifically allowed funds for tuition tax credits in the fiscal year 1978 budget. In a key test vote in the House of Representatives on March 20, a majority of Representatives, 218 to 156, indicated they wanted tuition tax credits considered in connection with proposals to liberalize student grant and loan programs.

In spite of the strong showing of support in Congress, it is still difficult to predict how soon Congress will enact this proposal. The outcome will be influenced by the quality of the arguments made by those on both sides. And measured by this standard I feel that Senator MOYNIHAN's recently published article, "Government and the Ruin of Private Education" in the April 1978 issue of Harper's magazine, could be decisive. I never cease to be amazed by the ability of Senator MOYNIHAN to weave words and arguments and logic in a way which raises the quality of the discussion.

Mr. President, I submit for the RECORD a copy of Senator MOYNIHAN's article.

The article follows:

GOVERNMENT AND THE RUIN OF PRIVATE EDUCATION

(By Daniel Patrick Moynihan)

AN ARGUMENT FOR TUITION TAX CREDIT AS A WAY TO SUSTAIN NONGOVERNMENTAL SCHOOLS

What is likely to be among the most important debates on education in American history began quietly with three days of Senate hearings in January. Sen. Bob Packwood (Rep.-Oreg.) and I introduced a bill to provide tax credits to help pay the tuition costs of parents with children in nonpublic schools and colleges and universities. Our bill was distinctive in that fifty Senators were cosponsors. There were twenty-six Republicans and twenty-four Democrats, ranging from

Sen. George McGovern (Dem.-S. Dak.) to Sen. Barry Goldwater (Rep.-Ariz.).

The hearings were distinctive in the strength of the views passed upon us that this was a measure middle-class Americans felt they had coming to them. They had put with and supported a chaos of government programs designed in aid of other classes and, for that matter, other worlds. Now there was something for them. For education. Just as notable was the strength of the opinions of the constitutional lawyers and scholars who testified that in their view there is no question that tuition tax credits are constitutional as a form of assistance to nonpublic elementary and secondary education. Catholics testified, of course. But so did Lutherans, and representatives of Hebrew schools and Baptist schools. A generation ago this was a Catholic issue. It is nothing of the sort any longer. It is an issue that reflects a broad revival of interest in religious education, an upheaval in constitutional scholarship, and a pervasive sense in American society that government has got to stop choking the life out of institutions that could be seen to compete with it.

What in a sense was not distinctive was the response of the Administration, which came early in February.

As is routinely now the case, the party in power and the President in office were pledged to some form of aid to nonpublic elementary and secondary schools. Just as routinely, whoever wins the election seems to break the commitment when the possibility of keeping it arises. What was distinctive in the response of the Carter Administration was that the President, in a White House news conference, announced that he was prepared, as a substitute for our bill, to spend $1.2 billion for the expansion of existing programs of college student assistance. This came just days after his first budget message provided next to nothing. You have got to not want something pretty badly to be willing to spend $1.2 billion to keep from getting it. As for aid to elementary and secondary schools, HEW Secretary Joseph A. Califano, Jr., at the same press conference, allowed that, wotthehell, Republican Presidents had promised the same.

This is the kind of behavior in an institution—the federal government—for which Marxists reserve the formulation: "It is no accident, Comrade."

IN SUPPORT OF PRIVATE SCHOOLS

In the contest between public and private education, the national government feigns neutrality, but in fact it is anything but neutral. As program has been piled atop program, and regulation on regulation, the federal government has systematically organized its activities in ways that contribute to the decay of nonpublic education. Most likely, those responsible have not recognized this; they think themselves blind to the distinction between public and private. But of course they are not. They could not be. For governments inherently, routinely, automatically favor creatures of governments. They know no other way. They recognize the legitimacy of no other institutions. Joseph Schumpeter's gloomy prophecy that liberalism will be destroyed through the steady conquest of the private sector by the public sector bids fair to come true in the United States, and in no domain of our national life is this clearer or seemingly more inexorable than in education.

It is remarkable that the bureaucracy gets away with this, for at the political level nothing is clearer than the avowed support of the parties and their leaders for private education, and for federal policies to buttress it. In its 1976 platform, the Republican party stated:

"We favor consideration of tax credit for parents making elementary and secondary school tuition payments. . . . Diversity in education has great value. . . . Public schools and nonpublic schools should share an education fund on a constitutionally acceptable basis."

The Democratic party platform in 1976:

"Renew[ed] its commitment to the support of a constitutionally acceptable method of providing tax aid for the education of all pupils in nonsegregated schools in order to insure parental freedom in choosing the best education for their children. Specifically, the party will continue to advocate constitutionally permissible federal education legislation which provides for the equitable participation in federal programs of all low- and moderate-income pupils attending the nation's schools." [In the interests of full disclosure, let me say I wrote the plank.]

Three years earlier, on behalf of the Nixon Administration, Secretary of the Treasury George P. Shultz testified before the Ways and Means Committee in support of a tax credit for nonpublic school tuitions. "The nonpublic school system plays a vital role in our society," Shultz said:

"These schools provide a diversity of education in the best of our traditions and are a source of innovation and experimentation in educational advances which benefit the public school system and the public in general. In many American communities, they are an important element of stability and civic responsibility. However, education costs are rising, the enrollment in the nonpublic schools is declining, and an important American institution may be in jeopardy."

Tax credits, he flatly predicted, will help "reverse this trend."

During his 1976 Presidential campaign, Jimmy Carter said almost precisely the same thing in a message to the nation's Catholic school administrators:

"Throughout our nation's history, Catholic educational institutions have played a significant and positive role in the education of our children. . . . Indeed, in many areas of the country parochial schools provide the best education available. Recognization [sic] of these facts must be part and parcel of the consciousness of any American President. Therefore, I am firmly committed to finding constitutionally acceptable methods of providing aid to parents whose children attend parochial schools."

In a major address just a few months ago, Education Commissioner Ernest L. Boyer echoed this sentiment. "Private education is absolutely crucial to the vitality of this nation," Dr. Boyer averred, "and public policy should strengthen rather than diminish these essential institutions." But the moment we got serious, as it were, and proposed legislation that might do this, Boyer, as his office requires, was on the other side. He was quoted: "We would be saying for the first time that the extra costs of private education are deserving of governmental support." This is their essential point: government has no responsibility to any form of education government does not control. It is a modern doctrine, as I shall discuss, and not always an especially honest one. With respect to "extra costs" our witnesses confirmed that, generally speaking, "private" schools, which is to say neighborhood Catholic, Protestant, and Jewish schools, spend about one-fourth of the per-pupil expenditure of their neighboring public schools. But the advocates of this doctrine are fierce and unshakable in their conviction that theirs is the cause of true liberalism, and that those who disagree are the instruments, witting or no, of the pope and the plutocracy. No argument is too weak to be advanced. The Department of Health, Education, and Welfare did not send an education official to testify at our hearings, but its assistant secretary for legislation was supplied with the boiler plate for the occasion: "An elementary-secondary tuition tax credit could undermine the principle of public education in this country." Undermine! When church-related schools existed and thrived in the United States generations before the public schools as we know them came into being?

If there is an argument, it is that the public schools are a threat to their existence. But this is not really what HEW meant. It meant that private schools undermine the principle of state monopoly. If the bureaucracy was to be open and say that private schools challenge and even defy that principle, then well and good. But the bureaucracy is never open, and often truly dishonest. The hapless assistant secretary was forced to say that our bill would "dry up local and state money for education." If there is one clear correlation in American education it is that wherever there is a large proportion of students in nonpublic schools, public expenditures for public schools are very high indeed. New York City is surely a prime example.

Our bill, the Tuition Tax Credit Act of 1977, would enable a taxpayer to subtract from the taxes he owes a sum equal to 50 percent of amounts paid as tuition. The credit is limited to $500 per student per year, which is to say that after tuition passes $1,000 per student, no additional credit is obtained. If the taxpayer in question owes no taxes, or does not owe the full amount, the Treasury will pay the difference to him. This is by no means the only feasible approach to the matter. Sen. Abraham Ribicoff (Dem.-Conn.) has for some time urged a formula whereby the credit would be a varying percentage of tuitions at different levels, this giving additional benefit to those paying higher tuitions. Another variation offers a flat tax credit for whatever the tuition may be, up to a cutoff point.

This past December, Sen. William Roth (Rep.-Del.) brought up on the Senate floor such a tax credit bill—with a $250 ceiling—and it passed by a vote of 61 to 11. Attached as an amendment to the Social Security Bill, it deadlocked the House-Senate Conference Committee until the House conferees agreed that this year the matter would be allowed to come to a vote on the House floor, where it would surely pass.

Almost any formula would entail legislation on the scale of the Servicemen's Readjustment Act of 1944 (the "G.I. Bill"), the National Defense Education Act of 1958, and the Elementary and Secondary Education Act of 1965, placing it among the half-dozen great educational statutes of our history. Although even now not much notice is being paid, this in a curious way is rather a positive sign. At our hearings in January, Rabbi Morris Sherer of Agudath Israel of America, a fifty-five-year-old national orthodox Jewish movement, observed that when he first testified on this subject—seventeen years ago, during the Administration of President Kennedy—it was "so shocking," as he put it, that the *New York Times* put his picture on the front page. But in the interval, he suggested, the climate has so changed, the idea of public support for nonpublic schools had become so widely accepted, that he was sure "today, . . . seventeen years later, it will be relegated to page 99." In the event, not a line about the three days of hearings made it onto any page of the *Times*, albeit they came to the attention of the White House! But the rabbi made a point: there has been a vast change in attitudes on this subject, such that it might reasonably be described as an idea whose time has come, and be judged to have made its way at least partially into that realm of political ideas so "self-evident" that few bother to express what almost everyone takes for granted.

Two-thirds of the tax credits that would

be paid under this bill would go to defray the tuition costs of persons attending colleges and universities. A very considerable sum is involved; altogether the bill would cost the Treasury some $4 billion annually, and the bulk of these funds would be devoted to the central principle of maintaining diversity in higher education. But there is certainly no constitutional issue involved at the college level, and not much political argument either. The House Ways and Means Committee has not previously wanted to commit the money, and that is always a perfectly respectable contention. But should it change its mind, as it might well do now, the matter could be disposed of in an afternoon, as middle-income Americans have come to feel a genuine grievance over this matter.

These are the people who pay most of the taxes in America and get few of the social services. In the main, this has been fine by them. The social legislation of the past generation has been enacted primarily by legislators who represent such constituencies. But in the last decade it has come to be seen that taxes are preventing the education of their children, and this they will not have. In this sense, our bill is straightforward, and similar to many others that have somewhat different formulas but the same objective, one that Americans have pretty much agreed upon since the Northwest Ordinance of 1787.

The Administration's alternative is not bad legislation. It raises the income limits of a good program, the Basic Education Opportunity Grants, from $15,000 to $25,000. For what it may be worth, I drafted the Presidential message that first proposed the program. Sen. Claiborne Pell (Dem.-R.I.) has been an immensely devoted and immensely skilled advocate of this program and its "Pell Grants." The drawbacks are twofold with respect to the program itself. It leaves many families out. It puts all other families under a means test. One must see the form to believe it, and one must ask whether it is really necessary to create that much more digging into our private lives for the federal bureaucracy. (Tax credits work directly through the Internal Revenue Service and need involve nothing more than an extra line on form 1040. But the real problem of the Administration's response is that it leaves out elementary and secondary schools altogether.)

Ours is a disincentive measure, precisely with respect to the support it would provide to elementary and secondary schools that are outside the public school system. This involves an argument that has been going on from the beginning of the American republic, namely, support for church-related schools. Here we enter a dark and bloody ground where battles have raged for generations. And yet here, too, there is every sign that finally the matter is to be resolved. This would be an achievement of social peace that goes well beyond education policy, and rewards a certain elaboration.

THE ORIGINS OF PUBLIC EDUCATION

If you like, the accepted interpretation of the Constitution is changing. It is changing back to its original meaning and intention, which in no way barred public support for church-related schools. After more than a century—a period in which religious fears, and, to a degree, religious bigotry, distorted our judgment about what was and was not constitutional—we are getting back to the clear meaning of the plain language in which the Constitution and the Bill of Rights are written.

The most notable element in this regard concerns the demystification of the First Amendment. Demystification is anything but a plain word with a clear meaning, but it is a useful concept that first appeared in Marxist literature, and is now making its way into more general circles. It embodies the argument that social groups commonly conceal from themselves, as well as from others, the true motives and interests that account for their behavior. All manner of myths grow up to explain and justify actions that are founded on a reality that for one reason or another no one wishes to admit. Frequently a condition of social change is to "demystify" such action, and to reveal the true sources of behavior.

This is happening to the First Amendment, through an interaction of legal argument and historical studies. The historical fact is that education in colonial America was almost exclusively an activity of religious sects, just as in that period, as Bernard Bailyn writes (in Education in the Forming of American Society), "sectarian religion became the most important determinant of group life. . . . And it was by carefully controlled education above all else that denominational leaders hoped to perpetuate the group into future generations." In the diverse school systems of the time, we see a now-familiar phenomenon at work. Eighteenth-century Americans didn't necessarily want religious toleration; they simply had no choice, such was the number of religions. In time, public support for all manner of church schools was common and unremarked. Bailyn makes the nice point that it came about in part because there was no effective way to endow church schools. Back in England, endowments meant land, which meant tenants, which meant rents. But with free land on the frontier, American tenants could not be found, and so the church schools came to be supported by taxes.

With the founding of the American republic, the arrangement continued, for a time. As with much else, change first appeared in New York City. At the turn of the nineteenth century, public funds from New York State's "permanent school fund" were used to support the existing church schools and four private charitable organizations that provided free education for needy youngsters. In 1805, however, the state legislature chartered the New York Free School Society, which shortly obtained a "peculiar privilege," not shared by the other groups, of receiving public funds to equip and construct its school building.

This favored status was soon challenged by the Baptists, whose schools were experiencing financial difficulties in the aftermath of a depression during the 1820s. The Free School Society responded by challenging both the integrity of the Baptist school organization and the legitimacy of any public money going to support schools associated with religious denominations. "It is totally incompatible with our republican institutions," the Society argued, "and a dangerous precedent" to allow any public funds to be spent "by the clergy or church trustees for the support of sectarian education."

Although New York Secretary of State John Van Ness Yates urged the legislature to support the Baptist position, his advice was rejected, and in 1824 the state turned over to the New York City Common Council the responsibility of designating recipients of school funds within the city. In 1825, the Council ruled that no public money could thereafter go to sectarian schools, and the following year, as if to reinforce the claim that it alone represented non-sectorian "public" education, the Free School Society changed its name to the New York Public School Society. Although it remained a private association with a self-perpetuating board of trustees, the Society obtained what amounted to legal recognition that only its version of education—nonsectarian but Protestant—would thereafter receive public support. The phrase "public school" that endures in New York—as in P.S. 104—is a legacy of this change in the name of a private organization.

By 1839, the Public School Society operated eighty-six schools, with an average total attendance of 11,789. In that year, the Catholic Church also operated seven Roman Catholic Free Schools in the city, "open to all children, without discrimination," with more than 5,000 pupils in attendance. "Nonetheless," as Nathan Glazer and I wrote in Beyond the Melting Pot in 1963, "almost half the children of the city attended no school of any kind, at a time when some 94 percent of children of school age in the rest of the state attended common schools established by school districts under the direction of elected officers."

Catholics in the city began clamoring for an immediate share of public education funds, but were flatly turned down by the Common Council, nothwithstanding even Bishop John Hughe's offer to place the parochial schools under the supervision of the Public School Society in return for public money.

As tempers rose, in April, 1841, acting in his capacity of ex officio superintendent of public schools, Secretary of State John C. Spencer submitted a report on the issue to the state senate. Spencer was a scholar—he was Tocqueville's first American editor—as well as an authority on the laws of New York State. He began by examining the essential justice of the Catholic request for public aid to their schools:

"It can scarcely be necessary to say that the founders of these schools, and those who wish to establish others, have absolute rights to the benefits of a common burthen; and that any system which deprive them of their just share in the application of a common and public fund must be justified, if at all, by a necessity which demands the sacrifice of individual rights, for the accomplishment of a social benefit of paramount importance. It is presumed no such necessity can be urged in the present instance."

To those who feared use of public funds for sectarian purposes, Spencer replied that all instruction is in some ways sectarian: "No books can be found, no reading lessons can be selected, which do not contain more or less of some principles of religious faith, either directly avowed, or indirectly assumed." The activities of the Public School Society were no exception to this rule:

"Even the moderate degree of religious instruction which the Public School Society imparts, must therefore be sectarian; that is, it must favor one set of opinions in opposition to another, or others; and it is believed that this always will be the result, in any course of education that the wit of man can devise."

As for avoiding sectarianism by abolishing religious instruction altogether: "On the contrary, it would be in itself sectarian; because it would be consonant of the views of a peculiar class, and opposed to the opinions of other classes."

The Catholics got no satisfaction from the legislature, but the Public School Society was, in effect, disestablished in 1842. The legislature was persuaded, chiefly by Democrats of a Jacksonian persuasion, that the society was a dangerous private monopoly over which the public had no control. The new school law allowed the society to continue to operate its schools but only as district public schools under the supervision of an elected board of education and the state superintendent of common schools.

CLARIFYING THE FIRST AMENDMENT

Soon, a specifically anti-Catholic nativist streak entered the opposition to public support for church-related schools. President Ulysses S. Grant, looking around for an issue on which he might run for a third term, seized on the danger of papist schools. The Republican platform of 1876 declared:

"The public school system of the several states is a bulwark of the American republic; and, with a view to its security and per-

manence, we recommend an amendment to the Constitution of the United States, forbidding the application of any public funds or property for the benefit of any school or institution under sectarian control."

Observe. In 1876 there were those who thought that public aid to church schools should be made unconstitutional. But at least they were clear that the Constitution would have to be amended to do so. It is extraordinary how this so obvious fact got lost in years that followed. We may hope that the matter has now been settled by Walter Berns in his devastatingly clear historical account, The First Amendment and the Future of American Democracy. What Congress intended by the First Amendment was to forbid the preference of one religion over another. At the time of the Revolution, nine of the thirteen colonies had established religions. The establishment clause forbids the nation from having one, this for the obvious reason that to have picked one religion over the others could have destroyed the Union.

To repeat, it is astounding how this plain meaning became lost. We are not here interpreting the Dead Sea Scrolls, or the Upanishad. The House of Representatives debated the First Amendment during the summer of 1789. Then, as now, the Congressmen spoke English. Then, as now, their deliberations were printed up overnight and placed on their desks the next morning. Thus, on August 15, 1789, in reply to Peter Sylvester of New York, who feared the draft amendment "might be thought to have a tendency to abolish religion altogether," Madison responded that "he apprehended the meaning of the words to be that Congress should not establish a religion, and enforce the legal observation of it by law, nor compel men to worship God in any manner contrary to their conscience."

It is necessary here to insist that because the First Amendment does not prohibit aid to church schools it does not follow that the authors of the amendment favored such arrangements. Some did, some didn't. Madison surely would not have. The plain point is that this was left as a political choice, as an issue of public policy to be resolved however we chose, and changed however often we might wish.

Here, then, a friendly word for the nativists. Early Americans were considerably suspicious of non-English immigrants. Bailyn reports that even Benjamin Franklin was "struck by the strangeness . . . of the German communities in Pennsylvania, by their lack of familiarity with English liberties and English government," such that he helped to organize the Society for the Propagation of the Gospel to the Germans in America. Why ought George Templeton Strong in New York City of the 1860s not have wondered what would come of the flood of Catholic Irish, not half of whom, probably, spoke English, and yet be more fearful of the Central and Southern Europeans who followed, none of whom spoke English, none of whom came from a country where political liberties existed? How could he not have suspected the Pope of Rome?

The only perceptible political preference of the papacy in that republican age was for monarchy. In 1870, as if for the purpose of outraging the rationalism of the age, the Vatican Council of Bishops, after nineteen centuries of blessed unawareness, discovered that the pope was infallible—a curious doctrine, and singularly out of harmony with its age. One would not, at the turn of the century, have been overly confident of the Russian and Polish Jews who were then arriving, with a religious faith that had never shown any great interest in political democracy, and an element of nonreligious who were all too well versed in the latest antidemocratic doctrines of the Continent. But the point is that it all worked out. German Protestant and Italian Catholic and Polish Jew have all produced recognizably American progeny, enough to calm the fear and perhaps even to arouse the patriotic fervor of the most nervous nativist of generations past. All that is behind us, and political choices that were at least understandable a century ago make no sense today.

SUPREME COURT RULINGS

What then holds us back? The answer, simply, is the Supreme Court. For generations state legislatures have been passing bills that provide various kinds of aid to church-related schools, but for the last generation the Court has been declaring them unconstitutional in whole or in part. The degree to which the seemly disarray of eighteenth-century arrangements has persisted into the twentieth century is impressive. In 1938, eight states (Maine, Connecticut, New Hampshire, New York, North Carolina, Tennessee, Vermont, and Virginia) paid funds to private schools under certain circumstances. Two decades later, eight states (Alabama, Georgia, Maine, Nevada, New York, Pennsylvania, South Carolina, and Virginia) had constitutional provisions specifically authorizing public aid to private schools. But now the Supreme Court began to fight them, armed with the extension by the Fourteenth Amendment of First Amendment requirements to state governments. The decisive case, the first of its kind, was Everson v. Board of Education in 1947, involving a New Jersey statute authorizing school districts to reimburse parents for bus fares paid by children traveling to and from schools. The Court held that neither Congress nor the state legislature may "pass laws which and one religion, aid all religions, or prefer one religion over another." Nor may any tax "in any amount, large or small, . . . be levied to support any religious activities or institutions, whatever they may be called, or whatever form they may adopt to teach or practice religion." Now this was simply wrong. To cite Berns: "It does not accurately state the intent of the First Amendment." This has nothing in the least to do with whether the New Jersey statue was a desirable one or not. It is merely that incontestably the First Amendment did not prevent the New Jersey legislature from adopting it.

Mr. Justice Black, who wrote the opinion, depended primarily on views of Madison and Jefferson, who, in 1784, got much exercised over a bill reported favorably by the Virginia legislature "establishing a provision for teachers of the Christian religion." The late Mark DeWolfe Howe of the Harvard Law School put it that in Everson the justices made "the historically quite misleading assumption that the same considerations which moved Jefferson and Madison to favor separation of Church and State in Virginia led the nation to demand the religion clauses of the First Amendment." This, he wrote, was a "gravely distorted picture."

The Supreme Court had no sooner ruled in Everson than it began to retreat from its ruling. Slow at first, this of late has become a genuine rout, and in all truth has become an embarrassment. In our hearings, perhaps the most passionate statements came from legal scholars who pleaded that the Court has got to be relieved of this enterprise in which it has got itself hopelessly mixed up. Pass a bill, our scholars urged us; declare it to be constitutional; the Court will be only too willing to agree.

The alternative is the present confusion verging on scandal. Not five years after Everson, recalling the evident duty of all American institutions to foster piety, the Court held:

"We are a religious people whose institutions presuppose a Supreme Being . . . When the state encourages religious authorities by adjusting the schedule of public events to sectarian needs, it follows the best of our traditions. For it then respects the religious nature of our people and accommodates the public service to their spiritual needs . . . . The government must be neutral when it come to competition between sects."

From that not especially edifying passage, the justices seemingly abandoned their own standards of evidence, and even the dictates of reason, to justify the unjustifiable. In *Tilton* v. *Richardson* (1971) the Court was required to pass upon the constitutionality of the Federal Higher Education Facilities Act of 1963 insofar as it applied to church-related colleges and universities. Most of the statute was found constitutional, but only four justices could agree in an opinion. On their behalf, Chief Justice Burger noted that "candor compels the acknowledgment that we can only dimly perceive the boundaries of permissible government activity in this sensitive area of constitutional adjudication."

It was necessary, of course, for the Court to find a serviceable distinction between church-related elementary and secondary schools and sectarian colleges and universities. Venturing toward those dimly perceived boundaries in his judgment for the plurality, the chief justice asserted that "there is substance to the contention that college students are less impressionable and less susceptible to religious indoctrination."

Now surely this "contention" is an empirical statement whose "substance" is susceptible to verification. It is a statement by the justices that something is so. It is a statement, then, for which there must be evidence. The justices know about this sort of thing. When, in Brown v. Board of Education (1954), they held that segregated schools were educationally inferior to integrated schools, they cited evidence. One may argue as to how good the evidence was; that is the nature of social science. But the Court had no doubt that it needed evidence if it was going to say things like that. Very well, then. What is the state of the evidence concerning the greater or lesser impressionability with respect to religious indoctrination of seventeen-year-olds as against nineteen-year-olds, or rather, high schools students as against college students, inasmuch as ages vary considerably? One doubts there is much evidence one way or an other.

But the justices did not rely solely on this contention. "Many church-related colleges and universities are characterized," the chief justice wrote, "by a high degree of academic freedom, and seek to evoke free and critical responses from their students." What an extraordinarily patronizing endorsement! Would the justices have said the same of "many state universities"? Of "many Ivy League campuses"? What about "many elite preparatory schools"? Obviously not "many Catholic elementary schools"!

It gets worse. In a commencement address at LeMoyne College in May, 1977, I suggested that the problem was that the Court had been given "the thankless task of finding constitutional legitimacy for the religious bigotry of the nineteenth century, and that the quality of its decisions suggest the misgivings with which the deed has been done."

Forty-one days later, on June 24, 1977, the Court handed down its decision in Wolman v. Walter, which tested an Ohio statute dealing with expenditure of public funds to provide aid to students in nonpublic elementary and secondary schools. A three-judge district court panel had upheld the statute, and citizens and taxpayers had appealed. Mr. Justice Blackmun handed down what may be the most embarrassing decision in the modern history of the Court. It concludes:

"In summary, we hold constitutional those portions of the Ohio statute authorizing the

State to provide nonpublic school pupils with books . . . We hold unconstitutional those portions relating to instructional materials. . . ."

Backward reels the mind. Books are constitutional. Maps are unconstitutional. Atlases, which are books of maps, are constitutional. Or are they? We must await the next case.

But where are we for the moment? We are at the point where the United States Supreme Court has solemnly found that books are safe but equipment (also "field-trip services") is not safe. Verily, the history of modern man, and assuredly the experience of the Catholic Church, teaches that books are the one truly subversive element in the culture! Maps may err. And, in the case of the Mercator projection, for example, may even give rise to erroneous views that there is a natural tendency for armies and glaciers in the northern hemisphere to move south. But in the end it is books that are to be feared, doubtless even to be forbidden. But no, says the Supreme Court. Beware, says the Court, of field trips. Clearly, and not the least in jest, the Court needs to be rescued from this. As the Court itself bids fair to plead. Observe the state of opinion of Mr. Justice Blackmun's brethren in Wolman:

Chief Justice Burger concurred in part and dissented in part.

Mr. Justice Rehnquist and Mr. Justice White concurred in the judgment in part and dissented in part.

Mr. Justice Brennan concurred in part and dissented in part and filed an opinion.

Mr. Justice Marshall concurred in part and dissented in part and filed an opinion.

Mr. Justice Powell concurred in part and dissented in part and filed an opinion.

Mr. Justice Stevens concurred in part and dissented in part and filed an opinion.

In his Wolman opinion, Mr. Justice Stevens cites with avowed deference Clarence Darrow's argument in the Scopes trial on the great harm that comes to both Church and State whenever one depends on the other. This is not without charm, but must we really accept Mr. Darrow as a constitutional authority in such matters? Darrow was virtually a professional agnostic whose great triumph in the Scopes case was to elicit the admission from William Jennings Bryan that the Silver-Tongued Orator believed every word in the Bible to be true. Well, so does the thirty-ninth President of the United States, and no one thinks it especially hilarious. None of us knows as much as we knew in those fine old times in the hills of Tennessee. Even Darwin is having troubles.

POLITICS AND PLURALISM

In rather striking contrast, the political realm has been far more pluralist and, if you will, liberal in these matters. In 1875 President Grant addressed the Army of Tennessee in Des Moines, exhorting his old comrades that no money should "be appropriated to the support of any sectarian schools . . . Leave the matter of religion to the family altar, the church, and the private school, supported entirely by private contributions. Keep the Church and State forever separate."

The following year, as anticipated in his party's platform, Rep. James G. Blaine (Rep.-Maine) proposed a constitutional amendment to this effect, but it failed in the Senate. Altogether, between 1870 and 1888 there were eleven separate amendments proposed, five in the House and six in the Senate, but all were rejected. In the meantime, state and local governments continued to provide support of one sort or another to sectarian schools, and do so to this day. According to an authoritative survey by the Congressional Research Service, thirty-seven states supplied some aid to nonpublic schools as of January, 1977, although often in tiny amounts, for sharply limited purposes and through quite roundabout means. The public has been a good deal more perceptive about the First Amendment—and about the motives of some politicians—than have the courts.

After World War II, support began to develop for federal aid to elementary and secondary education, which President Kennedy first proposed to Congress in 1963. It failed because the Catholic hierarchy insisted that church-related schools should share in the program, and the Congress, in effect, agreed. In 1964 I negotiated a plank in the Democratic platform which stated:

"The demands on the already inadequate sources of state and local revenues place a serious limitation on education. New methods of financial aid must be explored, including the channeling of federally collected revenues to all levels of education, and, to the extent permitted by the Constitution, to all schools."

The bishops agreed that on these terms they would support a bill, and the Elementary and Secondary Education Act of 1965 followed directly. But church schools got precious little of the federal funds that followed, and today private-school students receive only dribs and drabs of the services to which they are entitled. With respect to Title I, for example, which is the major E.S.E.A. program delivering remedial educational services to disadvantaged youngsters, supposedly without regard to the auspices of the schools in which they are enrolled, a recent study conducted for the National Institute of Education by Dr. Thomas W. Vitullo-Martin concludes that "the program reaches only 47 percent of the nonpublic-school students who should be eligible for it, and provides them with only about 18 percent of the services they should receive." In most communities, Vitullo-Martin continues, "Children with the same level of educational disadvantages have less chance of receiving Title I services if they are enrolled in private schools, and will receive fewer and poorer services."

Now a new element appears. The Catholic issue recedes, and it turns out that all manner of Protestant and Jewish groups want to be able to mantain their schools. They said as much at our hearings. What we now have is a fight for educational pluralism, with the sense arising that something precious to this society is being lost. Nor is this just a matter of religious schools. A spokesman for CORE testified that his organization has "begun a community school in the Bronx. In this school, children read, on the average, at approximately grade level, while in the public schools of District 9, which services the area, children are over a year behind by grade 5 and almost two years behind by grade 8." This experience with one school reinforces Professor Thomas Sowell's research findings attesting to the importance of private schools in the education of black youngsters. "One of the great untold stories of contemporary American education," Sowell writes, "is the extent to which Catholic schools, left behind in ghettoes by the departure of their original white clientele, are successfully educating black youngsters there at low cost."

The cost differences are significant. In our hearings, persons from one city after another offered statistics indicating that the parochial schools in their community customarily educate their students at 25 to 40 percent of the cost of the local public schools. Without students, these schools will vanish. And with them will vanish a large measure of the diversity and excellence that we associate with American education.

I take pluralism to be a valuable characteristic of education, as of much else in this society. We are many peoples, and our social arrangements reflect this disinclination to submerge our inherited distinctiveness in a homogeneous whole.

Our private schools and colleges embody these values. They provide diversity to the society, choices to students and their parents, and a rich array of distinctive educational offerings that even the finest of public institutions may find difficult to supply, not least because they are public and must embody generalized values.

Diversity, pluralism, variety. These are values, too, and perhaps nowhere more valuable than in the experiences that our children have in their early years, when their values and attitudes are formed, their minds awakened, and their friendship formed. We cherish these values, and I do not believe it excessive to ask that they be embodied in our national policies for American education.

Tax credits for school and college tuitions furnish an opportunity to support these values. And they do so without raising any question of constitutionality. They are not a sufficient recognition of private education. But they are a necessary beginning, and a sound example of a public-policy idea whose time, one hopes, at last has come.

If we don't act, the question is likely soon to become moot. The conquest of the private sector is well advanced. In no small part as a result of its inequitable treatment at the hands of the national government, private education in the United States has taken a drubbing in the past quarter century. Everyone knew that elementary school enrollments would decline between 1965 and 1975—it was a demographic inevitability. But it is less widely known that nonpublic schools accounted for 98 percent of the entire net enrollment shrinkage, and that this loss of 1 million students represented more than one-fifth of their total enrollments.

At the college level, private institutions accounted for a majority of all students enrolled in 1951. Twenty-five years later, more than three quarters of all college and university students were in public institutions.

At the elementary and secondary level there is surely a revival of Protestant and Jewish education, but the truth is that Catholic spirits have flagged. Some dioceses—New York is a prime example—press on. In others, the bishops have seemingly come to think that schools are not part of the vocation of the Church, and in any event it is hopeless, given the Supreme Court. It would be ironic for them to give up just as the climate of liberalism was changing in their favor; but it could happen.

The Catholic hierarchy will no doubt consider trying to prevent the creation of the Department of Education that the President has proposed, and no doubt they should. In its proposed configuration it will merely institutionalize at yet a higher level those prejudices that have systematically opposed and sought to bring about the end of church schools. Why should the anti-Catholicism of the Grant era be given a seat at the Cabinet table of a twentieth-century President? Of course, that is not what the President intends. It is not what the distinguished Congressional sponsors of Department of Education bills intend. It is not what the National Education Association intends. But is it to be avoided, in view of the attitudes prevalent within the bureaucracy that would inexorably move from the Office of Education to the Department of Education? Is it right that two-and-one-half centuries after the first Catholic schools opened their doors in New Orleans, the Cabinet of the United States should acquire a member who presides over a bureaucracy devoted to the demise of such schools?

There is something larger involved here. It is time liberalism redefined its purposes in the area of education. State monopoly is

no more appropriate to liberal belief in this field than in any other.●

CONNECTICUT'S PRICELESS COASTLINE

● Mr. RIBICOFF. Mr. President, in 1972 the Congress approved the Coastal Zone Management Act. This legislation was a response to the problems of pollution, overdevelopment, shore erosion, and population expansion along the Nation's seashores. The Coastal Zone Management Act gave the 30 coastal States the primary responsibility for developing plans to protect and promote the 20,000 miles of America's coastline. One area which would benefit under the provisions of this measure is the 270 miles of Connecticut coastline along Long Island Sound.

For the past several years the Connecticut Coastal Area Management Programs has been working to develop a coordinated system for the management of Connecticut's coastal land and water resources. The coastal area management program has conducted hearings and public workshops throughout the State to acquaint Connecticut citizens on its objectives and to seek public recommendations. An advisory board has been actively assisting in the formulation of a comprehensive coastal area management program.

Earlier this year draft legislation was released for public review and comment. This measure is presently working its way through the Connecticut General Assembly. It contains the new or amended legal authority necessary to create a coastal management program for Connecticut with a view toward protecting and enhancing both economic and environmental coastal resources.

The proposed Connecticut coastal area management program is not only consistent with the Long Island Sound Heritage program I proposed last summer—S. 1968—but it also represents an important step forward in preserving and protecting the shoreline along the Long Island Sound. The sound and its shoreline are being menaced by our own carelessness. They are important assets which are diminished by pollution, shoreline erosion, the destruction of important wetlands, and the loss of open spaces.

I am hopeful that the Connecticut General Assembly will carefully and thoughtfully consider the future of the sound and its coastline as it reviews the coastal area management legislation which has been presented to it. This measure will stimulate a strong working partnership between the State and coastal towns in developing programs which will protect this valuable but endangered resource.

Earlier this week a very timely and perceptive editorial on the Connecticut coastal area management legislation appeared in the New York Times. I submit this editorial for the RECORD.

The editorial follows:

CONTROLLING CONNECTICUT'S COAST

Connecticut's coast comprises 270 miles of decaying industrial ports, sandy beaches, offshore islands and quaint seaport villages. Coastal recreation facilities are strained beyond capacity and pollution threatens them further. Over half the state's tidal wetlands have been destroyed. Some 500 Federal, state and local agencies vie for jurisdiction over planning and zoning, road construction, fish management and channel dredging. The Connecticut General Assembly is now considering area management legislation to bring some order to this coast.

The Federal Coastal Zone Management Act of 1972 provided for incentive grants to states to prepare and administer plans for the preservation of their coastlines. The Connecticut bill would authorize the state to proceed with such plans in cooperation with the 36 coastal towns. Once the plans are ready, development proposals for sites near the coast would be scrutinized for their ecological and economic impact.

The main dispute over the Connecticut legislation arises from the fear of coastal towns that they will lose control over their own shorelines, and particularly municipal beaches. However, understandable these concerns, they are exaggerated. The proposed bill clearly authorizes localities to assume responsibility for planning and regulating coastal development. If the state disagrees with a local choice, it cannot unilaterally reverse the judgment; it must go to court. Regulations that will govern the program must be submitted for comment to the affected towns well in advance of their adoption and must be further approved by the General Assembly's Environmental Committee.

Ultimately, of course, the state and public interest in the preservation of the shoreline ought to take some precedence. Municipal control cannot be absolute; indeed, it isn't so now, given the panoply of agencies already in the coastal picture. The jurisdictional maneuvering should not be allowed to obstruct passage of a needed measure. Marine resources, from which millions derive food, recreation and livelihood, are common property that ought to be prudently managed for the benefit of generations to come.●

MARYLAND DAY

● Mr. MATHIAS. Mr. President, this Saturday is the 344th anniversary of the founding of the State of Maryland.

It is fitting that we celebrate Maryland Day in the spring of the year, for the founding of the State of Maryland represents a time of rebirth and renewal, of rejuvenation and hope. And, it represents an honorable and historic quest for liberty.

Symbolic of the State's rich and noble history, and our country's role as a bastion of liberty, is the Liberty Tree at St. John's College in Annapolis.

Patriotic meetings were held under the yellow poplar, or tulip tree, known as the Liberty Tree, to protest against the oppression of Parliament.

The aging Lafayette was reportedly received by the citizens of Annapolis under the tree's winter-barren branches in December of 1824, and it remained an important landmark during the 19th century, especially as a favorite gathering place for Fourth of July picnics.

In his book, "The Ancient City," Elihu S. Riley wrote that the tree was accidentally set on fire in 1848, and—

The occurrence excited as much interest in and exertion on the part of our inhabitants to extinguish it and save the old favorite tree from extinction as if it had been one of the finest buildings of the town.

But an earlier incident is perhaps more memorable. In 1840, school boys exploded 2 pounds of gunpowder within the tree's hollow, apparently destroying it. But, in fact, the effect was just the opposite, and the next year the tree put out lush new growth. One account said "The explosion destroyed worms that were gnawing away at its vitals!"

So, the tree—like our own great State—has enjoyed a full and fabled history from the days of the first settlers; for, the Liberty Tree was almost certainly part of the forest which was growing when Annapolis was first settled by the Puritans in 1649.

On Monday, March 27, in a belated commemoration of Maryland Day, the Caritas Society of St. John's, and other Marylanders, are joining with me in planting on the United States Capitol grounds a sapling directly descended from America's last living Liberty Tree—the last living link with the American Revolution. That tree will add a rich historical dimension to the plantings on Capitol Hill. It will also stand to remind the visitors who come to the Capitol from every corner of the United States that Maryland's Sons of Liberty, who met during the Revolution beneath the Liberty Tree at St. John's, were in the vanguard of the independence movement that created the United States of America.

To my colleagues, Marylanders, and others wishing to observe the planting, I welcome and invite you to meet with us just off Liberty Drive on the U.S. Capitol grounds at 10:30 a.m. this Monday morning.●

FEDERAL FUNDING SOURCES FOR SENIOR CENTERS

● Mr. CHURCH. Mr. President, senior centers have grown in number and effectiveness over the years and are now at work in every State.

But many centers, old or new, need assistance: for expansion or renovation, for staffing expenses, for equipment, or for other reasons. The Senate Committee on Aging is constantly asked for information on funding sources for senior centers. The more popular and widespread the senior centers have become, the more requests for such information we receive.

Therefore, I was very pleased to learn that the National Institute of Senior Centers and the Administration on Aging worked together to define the Federal funding sources for senior centers. Funding for staffing, training, operations, materials, and the facilities are shown in this analysis.

Mr. President, I think that this information can be very valuable to my colleagues in responding to their constituents' requests and I ask that the funding sources be listed in the RECORD.

The material follows:

A TECHNICAL ASSISTANCE GUIDE: FEDERAL SOURCES FOR MULTIPURPOSE SENIOR CENTERS

In addition to Title V of the Older Americans Act (OAA) which supports Senior Center acquisition, alteration, renovation and some expansion, a number of Federal pro-

grams have funding resources that may be used for Senior Centers. Depending on the program, support may be available for facilities, materials, staff or training. Though competition for funds is keen, and each program has its particular requirements and restrictions, it is valuable for Senior Center boards, administrators and staff to know what programs exist and to explore the availability of funds in their states and areas.

The chart below, adapted from an Administration on Aging (AoA) Senior Center handbook for area agencies, outlines the Federal programs. Details on potential Senior Center uses of these programs, restrictions and applicant procedures are on following pages.

Funding sources	Service elements			
	Staff	Training	Materials	Facilities
1. OAA, title III, sec. 303	X	X	X	
2. OAA, title III, sec. 308	X	X		
3. OAA, title IV-A		X		
4. OAA, title V			X	X
5. OAA, title VII	X	X		
6. OAA, title IX	X	X

FEDERAL FUNDING SOURCES FOR MULTIPURPOSE SENIOR CENTER SERVICES AND FACILITIES

PROGRAM NAME	POTENTIAL SENIOR CENTER USES	APPLICANT PROCEDURE
Administration on Aging, DHEW, Older Americans Act of 1965		
1 Area Planning and Social Services: Title III, Section 308.	Provides funds that can be used for the administration, evaluation, development and expansion of senior center services, including salaries, rental costs, equipment and supplies.	State issues guidelines and directly funds service areas not covered by an area plan. Area agencies set forth program objectives and budgets in area plans subject to state approval.
2 Model Projects: Title III, Section 308	Can be used to support uniquely innovative senior centers that can be replicated nationally. Projects are generally approved for a period of 12 months. However, if more time is obviously needed to realize project objectives, a project may be approved for support for a period of 3 years contingent on the availability of funds and acceptable evidence of satisfactory progress.	Contact the Administration on Aging.
3 Training: Title IV–A	Can be used to train staff and participants in senior centers, to develop training materials, and statewide or areawide conferences, workshops, and seminars.	State agency develops a training plan with input from area agencies. Contact should be made with the state agency.
4 Multipurpose Senior Centers: Title V	Grants or contracts to pay up to 75 percent of the cost of acquiring, altering, or renovating existing facilities to serve as multipurpose senior centers; money can be used for initial equipment and furnishings.	Area agency or other eligible applicants apply to state agency; state agency to AoA.
5 Nutrition: Title VII	At least 80 percent of these funds must be used to provide a hot meal once a day, 5 or more days a week, to people 60+ and their spouses. Remaining funds can be used for such supportive services as outreach, nutrition education, counseling, transportation, recreation, shopping assistance, and escort services.	State plans must be submitted by the state governor to AoA on prescribed state plan format.
6 Senior Community Service Employment: Title IX	As a subsidized employment program, Title IX can provide part-time staff for senior centers. However, the goal of title IX is to move these individals into unsubsidized employment. Title IX employees must be economically disadvantaged and age 55+. Funds may also be used to provide training for Title IX staff and employee transportation costs when performing their job.	Application should be made to local subcontractors who hold the Title IX slots. In addition, in July 1977 the governor of each state will be given an allocation of Title IX funds. State agencies can apply to the governor of the state to administer the funds. Application may be made to the state agency or to Title IX subcontractor.
Employment & Training Administration, DOL Comprehensive Employment & Training Act of 1973 (CETA)		
7 Titles I, II, III, VI	Can provide training and staffing for senior center programs by providing subsidized employment to individuals who are eligible based on unemployment and income considerations. Funds may also be used to provide training for CETA staff. Funds may not be used for supplies, equipment, and other property except in specified training situations.	State and area agencies should contact the CETA prime sponsor in their area or state governor's office. The state Manpower Services Council can provide this information.
Public Works & Economic Development Administration Department of Commerce		
8 Local Public Works & Capital Development & Investment Act of 1965: Title I	Unlike Title V, grants may cover 100% of costs for construction, and may also fund renovation and repair and other improvements to community facilities including senior centers; EDA funds can be used in lieu of the non-federal match required under Title V.	State agency can apply to the state Economic Development Administration Regional Office. Area agency or senior center can apply to local municipality.

FEDERAL FUNDING SOURCES FOR MULTIPURPOSE SENIOR CENTER SERVICES AND FACILITIES—Continued

PROGRAM NAME	POTENTIAL SENIOR CENTER USES	APPLICANT PROCEDURE
	Community Planning and Development, HUD	
9 Community Development Block Grants, Housing and Community Development Act of 1974: Title I	Can be used for developing, improving and coordinating senior center services to benefit low and inadequate income individuals. Money can be used as matching funds for other federal service programs. Programs focus on urban areas where there is a great need for physical redevelopment. While some money is available for services, priority in most communities goes to neighborhood redevelopment, housing, rehabilitation, sewer construction, etc.	Contact the locality (city, town or county) which receives Community Development entitlement.
	Department of Housing & Urban Development	
10 Housing for the Elderly & Handicapped Housing Act of 1959, as amended in 1974	Housing projects assisted under Section 202 are to be designed to provide for sufficient activity space for elderly individuals living in this housing. Elderly in the community-at-large may be encouraged to participate.	Only voluntary non-profit agencies or organizations may be sponsors. Applications should be made to HUD regional and field offices.
	U.S. Department of the Treasury, General Revenue Sharing	
11 State and Local Fiscal Assistance Act and 1976 Amendments	Funds may be for program operations, staffing and capital expenses. Revenue sharing funds may be used to match other Federal funds. Since particular consideration is given to non-recurring expenditures these funds are particularly applicable to the development of senior center facilities and the purchase of furniture and equipment. A public hearing is required; senior citizens and their organizations shall have the opportunity to be heard.	Procedure is highly localized. Contact local government (state, county, town, etc.). Provide input into plans for use of these funds through hearings, contact with agency heads, examination of plans now in effect, and state reports of fund allocation. Approach political and budgetary officials for guidance.
	Farmers Home Administration Act, Department of Agriculture	
12 Home Repair and Winterization Housing Act of 1949	Loan money to establish community facilities such as community centers in rural areas or communities with a population of 20,000 or less which are not part of a designated standard metropolitan statistical area.	Contact local county office of the FaHA listed in the telephone directory under U.S. Government—Agriculture.
	ACTION, Domestic Volunteer Services Act of 1973	
13 RSVP; Title II, Part A	RSVP can provide senior volunteer personnel for senior center programs and transportation for the volunteers as needed.	State ACTION office establishes eligibility procedures and issues RSVP forms to applicants. Applications are submitted to state ACTION office.
14 Senior Companions (SCP); Title II, Part B	Stipends for part-time employment of low-income people age 60+, providing supportive services to other older adults.	Contact State ACTION office.
15 VISTA	VISTA can supplement senior center staff with full-time volunteers not exceeding 2 years but not less than 1 year. Volunteers may include professionals and low-income locally recruited individuals.	Contact State ACTION office.
16 Mini-Grant Program; Title I, Part C	Up to $5,000 demonstration grant to mobilize part-time uncompensated volunteers. Amounts over $2,000 must be matched by non-federal funds.	Contact State ACTION office.
	Office of Human Development, HEW, Social Security Act of 1974, Title XX	
17 Social Services	Can be used for staff and other program parts in senior centers in states which have elected to provide any of the following services to older persons in the annual state plan: social group services, telephone reassurance, socialization, friendly visiting, recreational services, and camping services.	Contact the state or local agency (Department of Social Services or Public Welfare) administrating Title XX regarding possible purchase of services contracts with service providers.
18 Public Social Service Training	Can be used for training and retraining of center personnel funded under Title XX. A state training plan must be submitted prior to the beginning of each program year.	Contact the state or local agency (Department of Social Services or Public Welfare) administering Title XX.
	Community Services Administration	
19 Senior Opportunities and Services, Community Services Act of 1974, Title II	Can be used to establish senior center services or to remedy gaps and deficiencies in existing centers and for the expansion of CSA outreach services to low-income elderly.	Community Action Agencies may delegate individual projects by contract to other agencies. Contact regional Community Services Administration office to determine the appropriate local Community Action Agency.
	Bureau of Indian Affairs, Dept. of the Interior	
20 Indian Social Services and Counseling, Snyder Act of 1921	Can be used to fund senior center provision of information and liaison assistance enabling Indians to secure welfare services and assistance from state and local agencies for Indians living on and near reservations, including Indians in Alaska and Oklahoma.	Contact should be made with the local or regional Bureau of Indian Affairs offices.

FEDERAL FUNDING SOURCES FOR MULTIPURPOSE SENIOR CENTER SERVICES AND FACILITIES—Continued

PROGRAM NAME	POTENTIAL SENIOR CENTER USES	APPLICANT PROCEDURE
21 Indian Social Services General Assistance	Can be used to provide senior center services to needy Indians living on or near Indian reservations or in jurisdictions under the Bureau of Indian Affairs in Alaska and Oklahoma.	Contact should be made with the local or regional Bureau of Indian Affairs offices.
	National Endowment for the Arts	
22 Promotion of the Arts-Education, National Foundation on the Arts & the Humanities Act of 1965	Can be used to provide professional artists as staff to instruct center participants in arts activities. Funds can not be used for rehabilitation or construction of facilities.	Contact should be made with the Office of Special Constituencies, National Endowment for the Arts, Washington, D.C.
	National Endowment for the Humanities	
23 Promotion of the Humanities—Public Program Development National Foundation on the Arts and the Humanities Act of 1965.	Can be used to fund center projects which involve humanities programming, i.e., cultural, philosophical and historical dimensions of contemporary public concerns, for center members.	Contact should be made with the Division of Public Programs, National Endowment for the Humanities, Washington, D.C.
	Office of Education DHEW	
24 Lifelong Learning Activities Higher Education Act of 1976, Title I	Can be used to fund senior center learning activities, and the training and retraining of center staff. Instructional materials for older people may be made available under this Title.	Contact should be made with the Office of Education, DHEW.●

"NEITHER SNOW, NOR RAIN, NOR GLOOM OF NIGHT"

● Mr. BAKER. Mr. President, every once in a while, it is a good idea to get a historical perspective on current problems. With all the concern over our mail system, I thought it might be a good idea to call to the attention of my colleagues the fact that in May of this year, delivery of U.S. mail will celebrate its 60th anniversary.

The first days of airmail were rough ones, and early in 1934, the task of carrying mail by air was given briefly to the Army Air Corps. Perhaps the decision to shift airmail delivery from private air carriers to the Air Corps was a stroke of good luck, or perhaps it was carefully planned. In any event, it eventually helped lead to the formation of a separate Air Force.

The story of the Air Corps' brief entry into the mail delivery business has been told in a fascinating article by one who was there, retired Air Force Brig. Gen. Ross G. Hoyt. In the January issue of Air Force magazine, he vividly describes the men and the planes that were the airmail service, and how that experience helped lay the foundation for our U.S. Air Force.

Mr. President, I submit for the RECORD the article "Neither Snow, Nor Rain, Nor Gloom of Night" and I recommend it to my colleagues.

The article follows:

NEITHER SNOW, NOR RAIN, NOR GLOOM OF NIGHT

(By Brig. Gen. Ross G. Hoyt, USAF (Ret.))

Chiseled into the facade of New York City's Main Post Office is a translation from the works of Herodotus, a Greek historian of the fifth century B.C. Describing the fidelity to duty of the Persian mounted couriers carrying messages during the Greek-Persian war of 500 B.C., he wrote: "Neither snow, nor rain, nor heat, nor gloom of night stays these couriers from the swift completion of their appointed rounds."

When, in February 1934, the Air Corps was called upon to provide the aerial couriers to carry the mail, an operation designated Army Air Corps Mail Operation (AACMO), it was confronted with a multitude of additional obstacles. If there is added fog, freezing temperatures in open cockpits, and icing wings; airplanes unsuitable and inadequately equipped for the mission; lack of adequate tools and spare parts resulting in poor maintenance and forced landings; deficiencies in training pilots to fly on instruments and at night, and to following a radio beam; complete unfamiliarity of Air Corps personnel with the organization needed to efficiently carry the mail; unfamiliarity of pilots with the routes they were required to fly; no per diem funds for the first forty-six days of the operation; and an extended period of dangerous flying weather, one has a picture of most, but not all, the problems facing the Chief of the Air Corps, his staff, and, as a matter of fact, the entire Air Corps with the exception of students at service schools and personnel needed to administer Air Corps bases. The Air National Guard also participated in the operation to the maximum of its ability.

When, on February 9, 1934, the Chief of the Air Corps, Maj. Gen. Benjamin D. Foulois, informed Harlee Branch, Second Assistant Postmaster General, that the Air Corps could carry the mail, he was well aware of the Air Corp's deficiencies. He and his predecessors, since the air arm had become a separate branch of the Army, had tried with little success to get remedial measures funded through the War Department budget.

General Foulois, in later years, stated he had reasoned at the time that AACMO would bring Air Corps's deficiencies to the attention of the news media, the Congress, the President, and the nation with a resultant increase in funds. How correct he was is now history, as are the inevitable accidents and deaths, adverse political reactions, accusations, and recriminations caused by those deficiencies. The labor pains were severe and protracted, but there was born an infinitely better-trained, equipped, and eventually better-organized air arm of our national defense.

TEN DAYS TO PREPARE

The Air Corps was given the job of flying the mail with little warning and scant time to prepare. Due to irregularities in the mail contracts between the Post Office Department and the airlines, the contracts were abruptly canceled by Postmaster General James A. Farley with the approval of President Franklin D. Roosevelt.

The rapidity with which the contracts were canceled and the job turned over to the Air Corps is best illustrated by the sequence of events from February 7 through 9, 1934.

On February 7, Karl Crowley, Solicitor General of the Post Office Department, completed a study of domestic airmail contracts and concluded the contracts were illegal by reason of alleged fraud and collusion. Farley concurred and arranged a meeting with the President on February 8. Farley, accompanied by William Howse and Harlee Branch, his First and Second Assistants, and Crowley, recommended to Roosevelt that the domestic airmail contracts be canceled. The President directed Farley to annul the contracts provided Attorney General Homer L. Cummings held the move to be legal.

On February 9, Cummings advised Farley, Branch, and Crowley there were sufficient grounds for the cancellation. That same afternoon Branch informed the Chief of the Air Corps of the contemplated action and asked if the Air Corps could carry the mail. General Foulois requested four to six weeks to prepare. He realized the enormity of the task he had taken upon himself and the Air Corps.

Also on February 9, General Foulois reported to the office of the Chief of Staff of the Army, Gen. Douglas MacArthur, to inform him of the action taken, and found the information had preceded him. Maj. Gen. Hugh A. Drum, Deputy Chief of Staff of the Army, handed General Foulois Executive Order 6591, dated February 9, 1934. It had been prepared in advance by the White House.

The order directed Secretary of War George H. Dern to "place at the disposal of the Postmaster General such airplanes, landing fields, pilots, and other employees and equipment of the Army of the United States needed or required for the transportation of mail during the present emergency over the routes and schedules prescribed by the Postmaster General." Simultaneously, the airlines were directed to cease carrying the mail on February 19, 1934.

There were but ten days in which to prepare, barely time to recover from the shock!

General Foulois knew the Air Corps pilots were the best trained in the world in basic flying techniques. They were not adequately trained in the use of auxiliary equipment essential to flying safety under all weather conditions. The airplanes were nearly all obsolescent—open cockpit pursuit, bombard-

ment, attack, observation, and transport planes lacking instruments and radios. In the case of the smaller types, military equipment had to be removed to provide mail compartments.

Toward the end of AACMO, twelve Martin B–10 bombers, twin-engine monoplanes with closed cockpits, retractable landing gear, and more sophisticated navigation, communication, and instrument flying equipment and capable of carrying a ton of mail, became available for use on the transcontinental airway from Newark to Oakland. Lt. Elwood "Pete" Quesada, now a retired Air Force lieutenant general, flew the last leg of that final AACMO transcontinental airmail flight piloting a B–10. The elapsed time from Oakland to Newark was fourteen hours, including several stops, bettering the best commercial airline time.

ORGANIZING THE OPERATION

On February 10, General Foulois formed an organization to initiate AACMO. Brig. Gen. Oscar Westover, Assistant Chief of the Air Corps, was put in charge with an already functioning staff. Maj. Carl Spaatz (later to become first USAF Chief of Staff) was Chief of the Training and Operations Division, Office Chief of the Air Corps, and acted as General Westover's Chief of Staff. I was G–3 (Operations) under Major Spaatz, and I vividly recall the task placed upon the entire Air Corps during those first ten days and the succeeding months until the airmail was turned back to the airlines on June 1, 1934.

During the first ten days, all Air Corps activities in the continental United States, including those of the Air National Guard, were notified of the impending operation. The National Guard Bureau, the governors and adjutants general of each state, and the commanding generals of the six Army Corps Areas were notified and their cooperation requested.

All Air Corps communications facilities were placed on twenty-four-hour alert; special legislation was requested to obtain funds, since Post Office funds could not be transferred to the Air Corps. This caused the delay in per diem funds, creating some severe hardships. For example, Lt. Paul K. Jacobs, now a retired Air Force colonel, who was control and engineering officer at Pittsburgh, reported the airport to be fourteen miles from the city, six miles from the nearest town, and no accommodations within three miles. This was particularly difficult for mechanics who, after long hours on duty walked to their lodgings if they could obtain credit, before per diem payments started. Some often went hungry and slept on hangar floors or in cockpits.

In cooperation with postal officials, the continental United States was divided into three Air Mail Zones: Eastern, Central, and Western. Each Zone was diveded into routes, and each route into sections with designated airmail stops.

The Eastern Zone, with the most extensive routes of the three, included the territory east of a line from Chicago, St. Louis, and Memphis (all excluded), to New Orleans (included), and was commanded by Maj. Byron Q. Jones, whose headquarters was finally established at Mitchel Field, N.Y., on March 12. The Central Zone, with headquarters at Municipal Airport, Chicago, was commanded by Lt. Col. Horace M. Hickam, and extended from the Eastern Zone boundary to a north-south line through, but not including, Cheyenne. The Western Zone ran from there to the western seaboard and was commanded from headquarters at Salt Lake City Municipal Airport by Lt. Col. Henry H. Arnold.

All Air Corps personnel except those especially exempted and all equipment except a minimum at bases was available to Zone Commanders, subject to coordination with Corps Area commanders and the Chief of the Air Corps.

Basically, there was the transcontinental federal airway with lights, radio beacons, and emergency landing fields, running through all three AACMO Zones from Newark via Cleveland, Toledo, Chicago, Des Moines, Omaha, Cheyenne, Rock Springs, Salt Lake City, Elko, and Sacramento to Oakland. The AACMO routes coincided with those of the airlines, as shown on the accompanying map.

When their contracts were canceled, the airlines were using 500 airplanes and carrying 3,000,000 pounds of mail a year over a 25,000-mile federal airways network.

The route mileage flown by AACMO was less than half that of the airlines. During AACMO, the Air Corps flew 1,600,000 airplane-miles and carried 800,000 pounds. Had the Air Corps continued to fly the airmail for a full year, it would have carried 3,200,000 pounds of mail (more than that carried by the airlines in 1933) with half the number of airplanes.

Upon notification of the impending operation, all Air Corps activities began working round-the-clock to install instruments and radio equipment, and remove all military equipment from many planes to provide mail compartments. Training in night and instrument flying and following the radio beam began, and continued after February 16.

An officer at Langley Field, Va., with a crew of twenty, installed fifty-two radio sets in planes from February 12 to 16. Comparable work was progressing at all major Air Corps stations, Air Corps detachments, and National Guard units. The question arises as to where all those instruments and radios had been reposing prior to the emergency, and why. And why had not a directive been issued previously making it mandatory that all pilots be fully trained in instrument flying?

With the establishment of the routes, the feverish rush began to place personnel (control officers, engineering officers, pilots, and mechanics), airplanes, and spare parts at control points by February 19 or earlier, to allow familiarization flights over the routes.

Morale was high throughout the preparatory period. Everyone was striving to live up to the inscription on the New York City Post Office, in spite of the multitude of additional obstacles encountered along the way. When the accidents, fatalities, but especially criticism started, morale reached a low ebb.

A PYRRHIC VICTORY

Everyone and everything was reported in place by February 19, the day the operation was to begin. I recall standing in the entrance of the Munitions Building in Washington that February morning and not being able to see across Constitution Avenue because of the dense fog. It was a foretaste of the bad weather that dogged AACMO much of the time from February 19 to June 1, 1934. The adverse weather, together with the deficiencies previously mentioned, was responsible for fifty-seven accidents and twelve Air Corps fatalities, all given full publicity.

In a recent conversation with Brig. Gen. Joseph G. Hopkins, then a lieutenant, he described his experience on an airmail flight into Denver in a P–12 open-cockpit pursuit plane. He landed, taxied to the line, stopped the engine, and had to reach over with his right hand to unclench the fingers of his frostbitten left hand from the throttle. Variations of that experience were typical during AACMO operations.

Several fatal accidents were caused by radio failure in bad weather, coupled with lack of instrument flying training, and the inability of pilots to interpret meteorological information.

Lt. Norman D. Sillin, now a retired major general, reported after the death of his roommate, Lt. D. C. Lowry, that he and Lowry, both experienced pilots, had memorized a sentence, each word of which began with one of the ten code letters used by the flashing beacons on each 100-mile segment of the lighted airway. This was all for naught. Lieutenant Lowry crashed fifty miles off the radio beam. His death was attributed to radio failure in bad weather.

Lt. Beirne Lay, Jr., reported his first night practice flight from Chicago to Nashville in a P-12E in which the radio failed, the compass spun, and he had only Rand McNally maps without adequate data. He "climbed from the cockpit at Nashville ahead of schedule, but an old man."

Accidents and casualties in the Eastern Zone were typical: Seven airplanes crashed because of engine trouble. One bomber was abandoned at night, the pilot and two passengers parachuting successfully. When another bomber was landed in a swamp among small trees, the pilot was uninjured but the crew chief was killed and a passenger fractured a collarbone.

In the Western Zone, two accidents in one day resulted in the deaths of three pilots before operations began on February 19. Both airplanes were on familiarization flights, one at night.

At tragic cost, the spotlight of adverse criticism brought into sharp relief the deficiencies of the Air Corps in training and equipment due to the fiscal policy of the War Department and its concept of the Air Corps mission as purely auxiliary to the other branches of the Army.

When the President began receiving adverse criticism from the Congress, the press, radio, and the airlines (they had lost forty valuable contracts), he—apparently wishing to forestall unfavorable political reactions—called Generals MacArthur and Foulois to the White House and blamed the Army and Air Corps for the accidents and deaths. General Foulois, who had considered the accidents and deaths commensurate with the increased flying activity, is reported to have said: "Mr. President, airmail or not, there is only one way to prevent flying accidents and deaths in the Air Corps, and that is to stop flying."

The immediate effect of AACMO was stated in General Foulois's final report: "In the blaze of editorial and congressional reaction to the deaths of army flyers, the President and the Congress were, in my opinion, forced to release funds for immediate use in the Air Corps experimental and research work, for the immediate procurement of advanced types of aircraft and aircraft materiel and for the immediate training of Army Air Corps personnel."

AACMO—CATALYST OF AIRPOWER INDEPENDENCE

There was another far-reaching effect AACMO had on the Air Corps, one that has not heretofore been sufficiently emphasized: a decisive role in the progressive changes in Air Corps organization from an inherent branch of the Army to an independent Department of the Air Force.

In order to establish a line of departure for this evolutionary process, one must retrogress more than a half century to 1921–23 and the sinking of the naval vessels by aerial bombardment off the Virginia Capes and Cape Hatteras under the command of Brig. Gen. William Mitchell, Assistant Chief of Air Service. The sinkings were much to the surprise and no doubt disappointment of the War and Navy Departments. The War Department saw the possibility of losing a branch of the Army. The Navy saw a definite threat to the prestige of the battleship. The War Department should have been delighted,

for it was then engaged in a debate with the Navy Department before the Joint Board as to which should be responsible for coast defense.

The euphoria caused by the brilliant success of General Mitchell's bombers created throughout the Air Service a wave of enthusiasm for a separate air force, expressed volubly and vehemently by those officers who participated in the bombing, and by others. Among those officers, then considered dissidents and undisciplined malcontents by the War Department General Staff, but now looked on by the Air Force as pioneers, far ahead of their times, were General Mitchell; Majs. H. H. Arnold, Herbert Dargue, and Carl Spaatz; Capts, Robert Olds, George Kenney, Harold Lee George, and Donald Wilson; and Lt. Kenneth Walker. All reached general officer rank.

General Mitchell's court-martial in 1925 and the disciplinary action against Major Arnold for his activities in General Mitchell's behalf suppressed outward expression of the movement temporarily, but by 1933 the movement was stirring again. But efforts of the General Staff to suppress any progress toward a separate air force never ceased.

It appears that when the War Department General Staff wished to adopt a new policy or reaffirm an old one, a board was appointed, the results of which confirmed the preconceived ideas of the General Staff.

Accordingly, on August 11, 1933, a special committee of the General Council, known as the Drum Board, was appointed, chaired by Maj. Gen. Hugh A. Drum, Deputy Chief of Staff and a determined opponent of anything smacking of a separate air force. Other members of the Board were the Assistant Chief ci Staff, War Plans Division; the Commandant of the Army War College; the Chief of Air Corps; and the Chief of Coast Artillery. The Board was to review and revise the Air Plan for the Defense of the United States, which the Chief of the Air Corps had been directed to submit for the use of a GHQ (General Headquarters) Air Force in each of three war plans. (A GHQ Air Force did not exist at that time except in war plans.) It had been conceded that such a force was desirable in war, but only under the War Department and the Army commander in the field.

The Drum Board did not accept the recommendations of the Chief of Air Corps, General Foulois. The Board proceeded to "formulate its own views thereon and to embody them in a report of the Committee as a whole as a substitute for the one under consideration." A slap in the face for the Chief of Air Corps.

A detailed study of the Drum Board report reveals how completely the General Staff integrated GHQ Air Force into the Army war plans, tactically, and strategically. The Chief of Air Corps signed the report, thereby concurring. For the time being it was the nadir of hopes for a separate air force. (In those days, the proponents of a separate air force metaphorically defined a Board as something "long, narrow, and wooden.")

In April 1934, because of AACMO experience, but before its termination, Secretary Dern appointed the War Department Special Committee on the Air Corps, known as the Baker Board, chaired by former Secretary of War Newton D. Baker. The Board was charged to "make a constructive study of the adequacy and efficiency of the Army Air Corps for its mission in peace and war."

The Baker Board consisted of six civilians experienced in military aviation including James H. Doolittle, recently resigned from the Air Corps, and four general officers of the General Staff including General Drum as vice chairman, and General Foulois, Chief of the Air Corps.

The Baker Board made many recommendations beneficial to the Air Corps, but always as an integral part of the Army. It concurred with the Drum Board as to control of the GHQ Air Force, probably due to the influence of General Drum and the other three general staff officers. The report stated, "this force, when adequately equipped and organized, will be able to carry out all missions contemplated for a separate or independent air force, cooperate efficiently with the ground forces and make for greater economy." Doolittle submitted a strong minority report in favor of a separate air force. It kept the thought and spirit alive.

However, the Baker Board recommended the organization of the GHQ Air Force, effective March 1, 1935. It consisted of all pursuit, bombardment, and attack units in the continental United States, under the command of a general officer of suitable air experience, with headquarters outside Washington. The first commanding general of the GHQ Air Force was Maj. Gen. Frank M. Andrews. His death in an aircraft accident at Rekjavik, Iceland, early in World War II was a great loss to the Air Force and the nation.

GHQ TO USAF

Even though it remained under the Army, the GHQ Air Force was the first small step toward a Department of the Air Force—a concession that there was a strategic mission for the air arm separate from that of the ground forces and a chink in the armor of the opponents of a separate air force.

Another action for which AACMO was responsible, together with the general burgeoning of aviation at the time, was the appointment by President Roosevelt, in June 1934, of the Federal Aviation Commission (FAC), whose mission was to "make recommendations concerning all phases of aviation." Many Air Corps officers were called to present their views on the future organization of the Air Corps. They were instructed by the General Staff to familiarize themselves with War Department policy and not to testify contrary thereto unless their statements were identified as personal opinion. They expressed themselves in convincing terms in favor of a separate air force.

In view of the fact that the GHQ Air Force was to be organized, the FAC refrained from commenting directly on the matter of an independent air force. However, it did state: "It must be noted that there is ample reason to believe that aircraft have now passed far beyond their former position as useful auxiliaries, and must in the future be considered and utilized as an important means of exerting directly the will of the Commander in Chief. An adequate striking force for use against objectives both near and remote is a necessity." Once again, the principle of an independent air force was expressed.

AACMO, by its disclosure of deficiencies in the Air Corps, triggered actions by the War Department, the Congress, and the President that caused a tremendous upsurge in the technical development and performance of aircraft.

Thus, the tools, in the form of greatly improved fighters and bombers, were provided the USAAF. Operating as a separate air force in World War II, these tools enabled it to destroy German industry, the Luftwaffe, and the will of the German people to effectively resist, and in cooperation with the US Navy to defeat Japan.

Those successes, together with the continued pressure and persuasion of Generals Arnold, Spaatz, Kenney, George, McNarney, Eaker, Norstad, and Kuter along with their converts—President Truman, Generals Marshall, Eisenhower, MacArthur, and many members of Congress—gave sufficient impetus to the movement toward a Department of the Air Force to convince Congress to enact the necessary legislation—the National Security Act of 1947.

General Foulois's "yes," when asked if the Air Corp could carry the mail, set forces in motion that provided the means for the USAAF to prove in combat that it was capable of assuming the role of an independent United States Air Force.●

ENERGY AND LABOR

● Mr. KENNEDY. Mr. President, last week I chaired hearings on how energy policy affects our employment situation. We found that the executive branch does not calculate this effect, even though three witnesses were each able to show research results which reveal great jobs advantages from energy efficiency efforts. We also were shown our tax system favors utilities, large corporations, and energy intensive activities, at the expense of small businessmen, minorities, and the poor.

The real lesson of our hearings is that only through a massive energy efficiency effort can we hope to achieve a full employment economy. This lesson offers much to the labor movement. For without a labor intensive energy strategy more and more jobs will be lost to automation. Barry Commoner has summed up this argument in a February speech to the Canadian Labour Congress. His points are equally applicable to the labor sector in the United States.

Mr. President, without objection I submit a copy of Dr. Commoner's speech for the RECORD.

The speech follows:

SPEECH BY BARRY COMMONER

The theme of this conference—jobs and the environment—is a timely and crucial one. Both are urgent and unsolved problems. Canadian unemployment has jumped from a "normal" rate of 4 or 5 percent to 8.4 percent, the highest since World War II. In the United States, despite a 6.4 percent figure in December, unemployment averaged 7 percent last year. About 15 percent of young workers are unemployed and nearly 40 percent of young, black workers are unemployed. At the same time, in spite of major legislation and a huge effort to clean up the environment, we are still plagued by pollution. Some environmental problems, like toxic chemicals, have become even worse. Their most serious effects, such as sterility and cancer, have been imposed on labor—the workers who produce and use these chemicals.

Now the persistent problems of unemployment and environmental decay have been joined by a third one—the energy crisis. Although there is much confusion about what the energy crisis is, who is to blame for it and even whether it is real, this much is clear: Whatever is done about energy or even if nothing is done, it will have enormous effects on both jobs and the environment, and indeed on all the other issues with which labor is concerned—prices, working conditions and the strength of the economy.

We therefore confront three serious, simultaneous problems: Unemployment, environment and energy. The worst feature of this troublesome triumvirate is that it seems impossible to solve any one problem without making the others worse. When more than 20,000 U.S. steelworkers were laid off in the last six months and steel plants closed, the industry blamed the cost of pollution controls for its inability to compete with steel

imports. Here in Canada you are told that to meet the nation's energy needs, much of Alberta's land and water must be diverted to mining tar sands, and that the resulting environmental damage must be borne as a kind of patriotic duty.

People seem ready to accept the notion that there are built-in, insoluble conflicts among the three goals of employment, energy sufficiency and environmental quality. Compromise seems to be the only way out, trading off jobs for environmental quality and energy for agricultural land and clean waters. "There is no free lunch," we are told; we cannot meet all these goals at once, something has to give. Anyone proposing to solve one of the problems is expected to question the importance of solving the others. The oil companies call for strong incentives for oil and natural gas production, but want environmental controls to be "reexamined" and made "more reasonable." Those of us who are seen as "environmentalists" are expected to argue strongly for environmental quality and energy conservation, making only some sympathetic sounds about the plight of the unemployed.

And inevitably, labor is caught in the middle. Utility executives and business leaders pressure labor to join battle against environmentalists, claiming that their opposition to nuclear power plants will throw people out of work. Auto executives pressure the unions to join in condemning gasoline conservation for fear that it will worsen the economic situation in the auto industry.

Before I examine this situation, let me make my own position unambiguously clear:

If there were in fact a conflict between jobs and environmental quality, or between maintaining the supply of energy and ecological balance, I would personally favor actions that cut unemployment and maintain the flow of energy, and suffer the environmental consequences. I say this because my own interest in the environment and in a sensible energy policy is based on a much more fundamental aim—the improvement of human welfare. And I know of no way to accomplish that aim if people are out of work, if inflation is rampant and the economic system is in a decline.

I'd like to carry this argument even further, and assert that of these three issues, the one which most urgently needs to be solved is unemployment, and the attendant problems of runaway inflation and economic decline. Unless we can solve the unemployment problem, the rest won't matter very much. How long can we tolerate the rejection of one in every five young workers—or two in five if they are black—trying to find their very first job; trying, as every young person must, to discover if they can find a place in society?

It is hard to conceive of a nation finding the will to tackle the enormously complex energy crisis or coping with thousands of chemical pollutants when the new generation which is supposed to reap the benefits of these improvements is condemned to such despair. Or to put it in more practical terms, an economic system incapable of finding work for such a large proportion of its new generation of workers could hardly be expected to muster the huge financial resources needed to clean up the environment and to weather the energy crisis. On these grounds I am convinced that if we were forced to choose among them, the task of reducing unemployment and of rebuilding the faltering economy would have to take precedence over the energy and environmental crisis.

But are we in fact forced to make this desperate choice? Must we sacrifice environmental quality—which is, after all, also essential to human welfare—on the altar of high employment and economic stability? My answer is no.

I am aware that this is a strong claim which seems to fly in the face of common wisdom about our trio of crises. And I would agree, if you are convinced that people are unemployed because they don't want to work, that the Arabs are to blame for the energy crisis and that pollution is due to our sloppy habits, it is indeed hard to see any connections among the three issues. Looked at this way, there does not seem to be a way to harmonize the three goals rather than compromise them; to solve all the crises rather than trying to improve one situation by worsening the others.

But if we look for more fundamental reasons why, like ancient Egypt, we have been afflicted with this series of unexpected plagues, we will discover that they are connected. More than that, we will discover that the only way to meet the fundamental needs of labor—to reduce unemployment and inflation and reverse the present economic decline—is to adopt a policy that would at the same time make sense out of the energy crisis and reduce pollution. The reverse is also true: the only sound energy and environmental policy—a policy that can best give the nation a stable energy supply and a clean environment—is one that serves these needs of labor. This is the main point of my remarks, in which I hope to demonstrate why I have reached these conclusions.

To begin with, we must recognize that the place where labor works, where energy is produced and used, and where most environmental problems are created, is the same: the productive enterprise—the mine, the factory, the farm. This means that the relation between the availability of jobs, the production and use of energy and impact on the environment depends on how these productive enterprises are designed and operated—more generally, on the technology of production.

In turn, the design and operation of a mine, a factory or farm involves economic factors: the wages paid to labor, the price of energy and other necessary inputs, the amount of capital needed to buy or build the productive machinery, the value of the goods that are produced and the expected rate of profit.

The welfare of labor—the availability of jobs, for example—depends on how this complex system operates, and that, in turn, depends on how all of its different technological and economic elements are connected. What labor requires from this system, simply stated, is that it should operate at its highest possible capacity; that it should provide, for all who can work, decent jobs at decent pay, in conditions that protect safety and health; that the goods which it produces should be sold at prices that labor can afford; that inflation, which erodes the standard of living, should be controlled; that labor should be free to organize and to take part in the decisions which affect its welfare.

Our task here is to learn how the production and use of energy and the quality of the environment affect these requirements which labor—and indeed society as a whole—must place on the production and economic system. Specifically, we need to ask what energy policy will encourage strong economic activity, ample job opportunities, control inflation and enable labor to play its proper role.

The first, most obvious feature of such a policy is that energy must be available. It is a simple, but often overlooked fact that every form of production—in factories, farms, transportation, offices—requires energy and cannot operate without it. This is the inescapable result of the physical laws which govern the production and use of energy. These laws tell us that work must be done if we wish anything to happen that won't happen by itself (for example, producing an auto) and that work can be done only if there is a flow of energy. Any block in the flow of energy means that production stops—and people lose their jobs. And a small interruption in the flow of energy can have a much larger effect on the economy. For example, when the Midwest ran out of natural gas last winter—because Texas producers preferred to make an extra profit of $1 per thousand cubic feet by selling gas within the state rather than shipping it north at a lower, regulated price—the resulting economic dislocation involved losses, in wages alone, many times greater than the cost of the missing fuel. No matter what else is done about energy, it must continue to flow if goods are to be produced and people are to remain at work.

The second basic point is that the availability of energy depends on its price. People have frozen to death because they couldn't afford to pay their utility bill. In turn, the price of energy has a heavy influence on general inflation and worsens its damaging effects: reduced purchasing power, lowered demand for goods, depressed production and unemployment.

Because energy is used in producing all goods and services, when the price of energy rises it inevitably drives up the cost of everything else. When the price of energy, which was essentialy constant for 25 years, suddenly began escalating in 1973, wholesale commodity prices followed suit. Before 1973 commodity prices had been inflating at a modest rate of about 2 percent a year. After 1973 they took off, going into double-digit figures in 1974, and since then running at more than 10 percent a year.

The prices of goods that are particularly dependent on energy are hardest hit by inflation. Unfortunately, these energy-intensive goods include housing (which depends on the cost of fuel and electricity), clothing (most of which is now made from petroleum-based synthetic fabrics) and food (which now heavily depends on fertilizers and pesticides, chemicals made out of petroleum and natural gas). This puts a particularly heavy burden on the poor. In the United States, the poorest fifth of all families use about 25 percent of their budget to buy such energy-intensive items; the wealthiest fifth of the families use only 5 percent of their budget for this purpose. When the price of energy rises the poor suffer most.

The rising price of energy also damages the economy and increases unemployment because of its influence on economic predictability. This is an important factor in a new industrial investment because an entrepreneur needs a reliable prediction of the long-term cost of the energy needed to operate it. This is how the rate of return on the investment is computed—the famous "bottom line" which determines whether or not an investment will be made. The price of energy is now rising at a rate unprecedented in the history of the United States. In the ten years before 1973 the energy price index increased at about 3.7 percent per year; in 1973-76 it increased at the rate of 25 percent per year. The problem for the businessman is not so much the actual price of energy, since in most cases he can pass the cost—and usually a little more—along to the consumer. What the businessman cannot cope with is the rate of increase, because when the rate is very high it is also uncertain, making future energy costs highly unpredictable. Several business commentators have pointed to such uncertainties as a major cause of the present slow rate of investment—which means that plants are not built, and job opportunities are lost.

Unfortunately, nearly all of our energy

now comes from sources that must, inevitably, rapidly increase in price. Nearly all of our energy comes from oil, natural gas, coal and uranium. These are nonrenewable resources. They are limited in amount. We are "running out" of them. At this point some people tend to visualize oil and gas supplies slowing down to a trickle as the underground pools run dry. But that is not the way it works.

What happens as oil, for example, is taken out of the ground is that the easiest oil to produce is produced first. As a result, the cost of producing oil inevitably escalates as more oil is produced. The law of diminishing returns is at work. As production of oil, natural gas and, more recently, uranium, increased it became necessary to drill deeper, to tap smaller deposits and to use more expensive recovery methods. Inescapably, whenever the limited supply of a nonrenewable fuel is sufficiently depleted, its price begins to rise exponentially—that is, the higher the price, the faster the price increases. (In the case of oil this is sometimes blamed on OPEC and the Arab states' embargo. But in fact two years before the embargo, the OPEC oil ministers got their cue from a massive and detailed report published by the U.S. National Petroleum Council. The NPC—which should know, since it is composed of the officers of the U.S. oil companies—predicted that the price of domestic U.S. oil, which had been essentially constant for the previous 25–30 years, would, beginning in 1972–73, need to rise exponentially if the oil companies were to maintain their rate of return on investment. The OPEC oil ministers believed their American colleagues and took steps to see that they were not left behind.)

In sum, the situation is this: As long as we continue to use nonrenewable energy sources, the prices of energy will continue to escalate, causing a series of disastrous economic effects—rapid inflation, an erosion of the standard of living of poor families and uncertainties about investments in new production—all of which depresses the economy and worsens unemployment. Continued dependence on nonrenewable energy sources inevitably hurts the country, and labor in particular.

A third basic link between energy and the economy is provided by capital. We now hear frequent complaints in the financial columns that the present weakness of the economy is in good part due to the lag in new capital investment. This is an ominous sign, for a slow rate in investment in new productive enterprises today means much lower productive capacity—and job opportunities—tomorrow. The availability of capital, and the willingness of investors to risk it in new productive enterprises, is a crucial feature of the economy's health.

There is a close connection between the flow of energy and of capital. It is widely recognized that the availability of capital strongly influences energy production. Utilities have been forced to abandon new construction projects (especially nuclear power plants) and investors have been forced to abandon synthetic oil and shale oil projects for lack of the necessary capital. What is less well-known is that the opposite connection is also important: The ways in which we now produce and use energy strongly influence the availability of capital, and therefore the rate of new investment which depends on it.

Various methods of producing energy differ considerably in their capital productivity—that is, in the amount of energy (for example, BTU's) produced annually per dollar of capital invested. One dollar invested in oil production (in 1974) produced about 17 million BTU's of energy per year. But that same dollar invested in producing strip-mined coal yielded only 2 million BTU per year; in shale oil about 400,000 BTU per year; and nuclear power brings up the rear with the equivalent of 20,000 BTU per year. Thus, any energy policy which emphasizes the production of electricity (particularly from nuclear power plants), rather than direct burning of fuel; which favors the use of coal over oil and natural gas; or which emphasizes the production of synthetic or shale oil, would worsen the energy industry's already serious drain on the availability of capital.

Each of the different ways of producing energy also has its own particular demand for labor. For example, in 1973 for every unit of energy yielded (trillion BTU's), oil and natural gas extraction created six jobs; strip mining, six jobs; deep coal mining, 18 jobs. As a result of these differences, and differences in capital productivity, the same amount of capital invested in different ways of producing energy can have very different effects on unemployment. For example, one calculation shows that a given amount of capital would produce two to four times as many jobs if invested in solar energy rather than electricity generation. A report to the New York State Legislative Commission on Energy Systems calculated that investment in energy conservation would produce about three times as many jobs as the same capital invested in nuclear power.

Finally, the impact of different forms of energy production on working conditions and on the general environment also vary a great deal. The physical dangers of work in coal mines and the risk of diseases such as black lung are well known. In the nuclear power industry, uranium miners are exposed to particularly high risks of radiation-induced cancer. The risks of radiation to other workers in the industry are still poorly understood, but some recent studies suggest that they may be higher than most earlier estimates. Shale oil production and conversion of coal to synthetic fuels produce highly carcincgenic substances; workers in a pilot coal conversion plant operated in West Virginia in the 1960's suffered 16–37 times the incidence of skin cancer as comparable workers in different jobs. There may be similar problems in tar sands operations.

The environmental impact of different energy sources closely parallels their impact on the workers' health. Coal mining, shale oil and tar sands oil production devastate the land and use large amounts of scarce water. Coal conversion operations are heavy polluters of the air. Coal-burning power plants pollute the air with nitrogen oxides, sulfur dioxide and carcinogens.

The nuclear power industry has yet to solve its serious environmental problems, such as safe disposal of radioactive wastes. Recent reports show that radiation leaking from reactors has contaminated milk from nearby dairies with unsafe levels of strontium 90. When energy is conserved all of these difficulties are, to that extent, reduced. And if solar energy were used instead of these conventional sources, environmental impact would be very sharply reduced.

From these considerations it is apparent that the effect of energy production on major factors which govern the welfare of the nation, and of labor in particular—inflation, employment, the availability of capital, working conditions and environmental quality—varies greatly depending on the form of energy which is produced. While a continuous flow of energy in some form is essential to keep the production system going and the economy strong, the way the flow is sustained can have the opposite effect. For example, if we were to choose to sustain the necessary flow of energy by relying heavily on very capital-intensive sources of energy (such as nuclear power, shale oil production and the production of synthetic fuels from coal) the enormous drain on capital would hinder investments in the productive enterprises that use the energy and seriously disrupt economic development. It is true that continued production of energy is essential to the economy. But it is also true that we could literally bankrupt the economy by investing heavily in the wrong kinds of energy production.

Perhaps the most striking example of this danger is nuclear power, as Saunders Miller, a prominent utilities investment counselor, has pointed out:

"Based upon thorough in-depth analysis, the conclusion that must be reached is that, from an economic standpoint alone, to rely upon nuclear fission as the primary source of our stationary energy supplies will constitute economic lunacy on a scale unparalleled in recorded history, and may lead to the economic Waterloo of the United States."*

If we turn now from the ways in which we produce energy to a consideration of the ways in which we use it, we see once more that there are profound differences which seriously affect both labor and the national welfare. Here we need to consider how efficiently energy, capital, and labor are used in production processes. A convenient way to measure these efficiencies is in terms of productivity of an enterprise, such as a particular manufacturing operation. This measures how much economic gain—usually expressed as value added—is produced per unit of energy, capital or labor used. Thus, three basic productivities need to be considered:

Energy productivity, or how efficiently the enterprise converts the energy that it uses into value added. This is measured as: dollars of value added per BTU used in production.

Capital productivity, or how efficiently the enterprise converts the capital invested in it into value added. This is measured as: dollars of value added per dollar of capital invested.

Labor productivity, or how efficiently labor is converted into value added This is measured as: dollars of value added per man-hour.

Let us compare the productivities of two industries which produce competing materials: leather products and the chemical industry which produces the plastics that have so heavily replaced leather and other natural materials. Of the two industries, leather production is about 4.5 times more efficient in converting capital into value added, and nearly 13 times more efficient in its use of energy. This relationship between capital and energy productivity is quite general among different industries. Five industries, petroleum products, chemicals, stone, clay and glass products, primary metals and paper, account for about 59 percent of electricity and 77 percent of the total energy used in manufacturing. They also have the lowest capital and energy productivities of all major sectors of manufacturing. There is a good correlation between energy productivity and capital productivity because energy is used to run the machines purchased by capital; the more capital (machinery) involved in an industry, the more energy it uses. And in many cases, this means fewer jobs, since the energy is often used to replace human labor. For example, for the same economic output the chemical

* "The Economics of Nuclear and Coal Power," Miller, S.: New York: Praeger Publishers, 1976; p. 109.

industry uses less than one-fourth the amount of labor than the leather industry.

Another important feature of the relation between energy and the economic system is that—strange as it may seem in the light of supposed economic principles—capital and energy tend to flow toward those enterprises that use them least efficiently. Capital used in industrial production flows heavily toward those sectors which are low in both energy productivity and capital productivity. For example, the five industries cited earlier that use energy and capital least efficiently use nearly one-half of the capital invested in all manufacturing industries. In contrast, the seven most energy-efficient industries (such as leather production) use only 7 percent of the capital invested in manufacturing.

As pointed out earlier, various methods of producing energy also differ significantly in their capital productivity (i.e., how efficiently capital is used to produce energy). Here too capital tends to flow toward those enterprises which use it least efficiently. For example, although electric power represents only 21 percent of the total amount of energy which we use, it consumes 56 percent of the capital invested in energy production. At the same time, due to thermodynamic limitations, no more than one-third of the fuel used to drive a power plant is converted into electricity. Electric power is therefore by far the most expensive form of energy in terms of capital expenditure.

When electricity is used to produce space heat, more than 97 percent of the thermodynamic value of the original energy is wasted. Yet about a fifth of U.S. electric power is used in this way—an enormous waste, not only of energy, but also of the capital needed to produce job-generating factories and homes.

In recent years industries with high energy and capital productivity (such as leather) have given way to industries with low capital and energy productivities (such as plastics). This is particularly true of the displacement of natural products (leather, cotton, wool, wood, paper and soap) by synthetic ones (plastics, synthetic fibers and synthetic detergents). For the reasons cited earlier, this displacement not only drains supplies of energy and capital, but also worsens unemployment. In the U.S. about half of the unemployment is "technological"—that is, job opportunities lost when such new production technologies are introduced and cut the overall demand for labor—and usually disproportionally increase the demand for energy and capital.

Now we can see the basic links among energy, the economic system and the environment: The same shifts in production technology that reduced the productivity of capital and energy and have cut the number of jobs usually increased the impact of production on the environment. As synthetic products replaced natural materials more petroleum and natural gas were used both as raw materials and for fuel, polluting the environment with combustion products and toxic chemicals. The petrochemical industry demonstrates the close links among the wasteful use of energy and capital, the assault on the environment and unemployment.

Thus, we find that unemployment is part of the same economic trends that generated the energy crisis and the environmental crisis: Energy has been produced increasingly in forms (especially electric power, and nuclear power in particular) which use a great deal of capital relative to the amount of energy that they yield. As a result, energy production has claimed an increasing proportion of the capital available for business investment, making it less available for investment in new job-creating enterprises. (In 1960, energy production claimed 26 percent of the capital invested in industry; by 1980 it is expected to claim more than a third.) At the same time, industries which use energy inefficiently also use capital inefficiently; they also pollute the environment most heavily and are often least effective in creating jobs. In sum, the same economic tendencies—the displacement of labor by energy-driven machines—that have worsened employment carry a good deal of the responsibility for the energy crisis and the environmental crisis. The crises in employment, energy, and the environment are, in this sense, the same crisis.

Against this background what can be said about Carter's National Energy Plan, which is the United States' first effort to establish a comprehensive energy policy? Judged by the standards developed above, most of the plan must be given rather bad marks, especially for its effect on labor. The plan is based on the strategy of raising energy prices as a means of encouraging energy conservation. Leaving aside that the plan would in fact accomplish very little conservation (only 16 percent of the increased demand for energy between now and 1985 would be met by conservation) this approach will only worsen inflation, and with it unemployment and all the economic ills which trouble labor. The plan mandates a sharp increase in the present rate of nuclear power plant construction and in the use of coal—with a resulting doubling in the contribution of electricity to the energy to be acquired between now and 1985. This means heavy reliance on the ways of producing energy that are most wasteful of capital, a step that is certain to add to our present economic difficulties. At the same time, by increasing the availability of electricity (relative to direct use of fuel) the plan would encourage those industries that are power-intensive—and which are thereby likely to use little labor. Finally, the plan would create enormous new environmental difficulties, because it relies so heavily on the two methods of producing energy that most severely threaten the environment—the use of coal and nuclear energy.

In sum, the National Energy Plan is likely to aggravate the energy crisis rather than solve it, for it would worsen the main effects of the energy crisis: inflation, unemployment and economic uncertainty. This means, I fear, that if the plan is enacted in anything remotely resembling its present form, we would be confronted even more by the divisive antagonisms among those concerned with unemployment, energy and the environment that only contribute confusion to a national debate that cries out for clarity.

Is there no way out? There is. There are alternatives to the nuclear power plants, the strip mines, the coal gasification projects, to the continued use of oil and natural gas which will rise in price forever. The alternative is, of course, solar energy.

Now at this point many people will react with a far-away look in their eyes, and perhaps with some impatience and frustration, expecting to hear another one of those pie-in-the-sky schemes about a beautiful solar future. But that is not what I am talking about. I am not going to tell you that all will be well if we do more research on solar energy, set up a few more demonstration houses or learn how to build a solar power plant in space. What I am going to tell you —and not on my own authority, but on the authority of U.S. government agencies—is that for most methods of using solar energy the technology is already in hand, and can be introduced at once in most parts of the country, for a wide variety of uses, at economically competitive costs.

To many people, and apparently to some government officials, this is news. But it is good news, for the most important thing about solar energy is that unlike conventional energy sources it will stabilize the price of energy, slow inflation and improve investment planning; it will create rather than destroy jobs; it can turn the country's faltering economy around. It can give us a real energy plan that solves the energy crisis rather than making it worse—the kind of energy plan that meets the needs of labor.

Here are a few reminders about what solar energy is all about.

First, unlike oil, natural gas, coal or uranium, solar energy is renewable; it will never run out (or at least not in the next few billion years). Because solar energy is renewable it is not subject to diminishing returns—which means that its price, instead of escalating like the price of present energy sources, will be stable and even fall as the cost of devices continues to decline. By stabilizing the price of energy, solar energy reduces the threat of inflation and eases the task of planning investments in new productive enterprises, thus relieving two of today's worst economic problems.

Second, the use of solar energy does not depend on any single technique. There are different sources of solar energy, some forms more available in one place and other forms in other places. Everywhere that the sun shines solar energy can be trapped in collectors and used for space heat and hot water. Of course, the amount of sunshine varies from place to place, but not as much as most people think. The sunniest place in the United States, the Southwest, gets only twice as much sunshine as the least sunny place, the Northwest. In some places the most available form of solar energy may be wind (the wind blows because the sun heats the air on the earth's surface unevenly). In agricultural areas solar energy will be available in the form of organic matter (which is produced by plants, through photosynthesis, from sunshine): manure, plant residues, or crops grown to be converted into methane (the fuel of natural gas) or alcohol. In forested areas, waste wood, or even wood grown for the purpose, can be converted into heat, either directly, or by being made into gas. And wherever the sun shines, photovoltaic cells can be used to convert solar energy directly into electricity.

Third, for each of these solar processes the scientific basis is well understood and the technological devices have been built and are in actual use. Solar collectors are used all over the world, and were once (about 30 years ago) common in Florida and California; small windmills used to dot the farm landscape; methane plants are in operation in hundreds of thousands of Indian and Chinese villages; alcohol produced from grain was used extensively, mixed with gasoline, to run cars and trucks during World War II; photovoltaic cells now power satellites and remote weather stations. Of course solar energy needs to be stored during the night or over cloudy periods. This can be done in batteries, in tanks of alcohol or methane, in silos full of grain, as standing timber, or for that matter in piles of manure. All these items exist.

The main questions are, once again, economic: Granted that most solar technology exists, does it pay to introduce it? More precisely the question is not whether it will pay, but when. The cost of conventional nonrenewable fuel is now rising exponentially and will do so indefinitely. Since it is renewable, the cost of solar energy is fixed only by the cost of the equipment, which will fall in price as experience is gained. Place these two curves on the same time scale and inevitably they will sooner or later cross. Solar energy, which a few years ago was more expensive than the conventional alternatives, will inevitably equal them in

price and then each year become cheaper relative to conventional energy.

Estimates of when and how solar energy systems become economically advantageous have now been made by the Solar Energy Task Force of the Federal Energy Administration (now part of the new Department of Energy). Here are the main features of the task forces "National Solar Energy Plan":

Solar heating: In most of the central part of the United States, if the government would provide low-cost loans, it would today pay a householder who uses electricity or oil for space heat and hot water to replace about half of it with a solar collector system. Even borrowing all the necessary funds at eight percent interest, with a 15-year amortization period, would cut the average annual heating bill by 19–20 percent.

Photovoltaic electricity: Here is the biggest surprise. For a long time even those of us most optimistic about solar energy were convinced that this technology—a wonderfully simply way to produce electricity from sunshine—was unfortunately so expensive as to remain uncompetitive for some time to come. Now the FEA report shows that the production of electricity from photovoltaic cell systems can compete with conventional power sources and exactly how that can be accomplished. The report shows that, beginning immediately for the more expensive installations such as gasoline-driven field generators, within two years for road and parking lot lighting, and within five years for residential electricity in the southwest, photovoltaic units can compete, economically, with conventional power. All that is required to achieve this remarkable accomplishment is to invest about $0.5 billion in the purchase of photovoltaic cells by the federal government. This would allow the government to order about 150 million watts capacity of photovoltaic cells. This order would allow the industry to expand its operations sufficiently to reduce the price of the cells from the current price of $15/watt (peak) to $2–$3/watt in the first year; to $1/watt in the second year and to $0.50/watt in the fifth year, achieving the competitive positions noted above and successfully invading the huge market for conventional electricity. A similar federal (or state) purchase plan could bring large-scale power-generating windmills down to a competitive price, according to the FEA report.

Methane and alcohol production from organic matter: While methods of commercializing these sources of solar energy have not yet been worked out by the FEA task force, current research already begins to show how that can be done. Public works funds can be used effectively to rebuild urban garbage and sewage-sludge disposal systems so that they generate methane, which can help meet a city's energy demand. In certain farm operations—such as a dairy with 200 or more cows or a farm raising 5,000 or more chickens—it is already economical to replace current manure-disposal systems with methane generation, using it, for example, to produce electricity to drive farm machinery and heat to warm the barns. In Texas, one company has already begun to sell methane produced from feed-lot manure to the natural gas pipelines. Several Midwestern states are actively developing alcohol production from grain, as a partial substitute for gasoline in cars, trucks and tractors.

The most important aspect of solar energy, I believe, would be its effect on employment and economic recovery, but solar energy has another unique feature—it has no economy of scale. In all conventional energy production, there is a very large economy of scale—the cost of the energy falls sharply with the size of the unit. Solar energy is very different. When a farmer wants to produce more corn he does not produce bigger corn plants, but plants more of them over a larger area. And each corn plant operates at the same efficiency, so that one acre of corn traps solar energy as efficiently as 1,000 acres of corn. The same is true of all solar techniques, such as photovoltaic cells. You can run a flashlight or a whole house on photovoltaic cells, at the same energetic efficiency.

In conventional energy production the large economy of scale means that only very large corporations can compete (that explains why the energy corporations are such big ones). In solar energy production a small or middle-sized company (or a household) can do as well as a corporate giant. As a result, huge, centralized solar installations are unneeded. The power can be produced on a scale that matches its use, where it is used, thus eliminating the need for heavy transmission systems (although light ones will be useful to balance out production and demand). It is easy to see that the introduction of solar energy would mean a rebuilding of not only our system of energy production, but also many of the ways in which energy is used in manufacturing, agriculture and transportation. This would mean a vast program of new construction; it would create new jobs, and in doing so begin to control inflation.

The point of the foregoing analysis of the economic consequences of different ways of producing and using energy is not so much to support this particular theory about the role of energy in the production and economic system. What I wish to emphasize is the basic point that all energy sources and ways of using energy in production, are not alike in their effects on jobs, inflation and economic stability—and therefore on the interests of labor. Yes, some form of energy must be available if production and the economy is to continue—if goods are to be produced and if people are to have jobs and afford to buy what they need. But it makes a big difference which form of energy is chosen to support production, and how it is used. Choose the wrong form of energy and the effort to support the economy and create jobs will have the reverse effect. The economy will suffer and jobs will be lost.

Consider, for example, the often repeated claim that nuclear power plant construction is a good way to produce energy, support the economy and create jobs. This claim simply does not stand up before the facts. When compared with alternative ways of producing the needed energy it becomes clear that nuclear power is not the best way to sustain the economy and to provide jobs. Here is a concrete example: The Fiat Company, in Italy, has just announced the availability of a cogeneration unit ("TOTEM") which uses natural gas, or methane produced from a solar source, to drive a converted gasoline engine, producing electricity and recapturing the normally wasted heat as a source of space heat. About 67,000 TOTEM units would produce a total of about 1,000 megawatts of power—the capacity of a typical U.S. nuclear power plant. However, whereas the nuclear plant would cost about $1 billion, the TOTEM units would cost only $191 million, and they would produce electricity at about one-fourth of the cost of electricity from the nuclear plant.

The economic efficiency of such cogeneration units, as compared with nuclear power means not only lower electricity prices, but also a more effective use of capital, therefore more opportunities for productive investment of captal—and more jobs. Because they can run on methane—a renewable solar fuel—such units can help bridge the gap between our present dependence on nonrenewable fuels and a solar economy. As should be evident from Fiat's accomplishment, such units could readily be manufactured in U.S. and Canadian auto plants, where they could take up the slack created by the disruptive effects of the energy crisis.

It is also informative to compare nuclear power with photovoltaic cells. If the proposed U.S. federal purchase plan were carried out, in five years or so the photovoltaic industry would expand enough to begin to allow local installations to compete economically with nuclear power in many parts of the United States. Again, many more jobs would be created by the solar technology than the nuclear one.

The widespread availability of competitive photovoltaic cells would also create many opportunities for new types of industrial production. For example, it would encourage the development of battery operated handtools, since batteries could readily be recharged by a photovoltaic unit mounted on the factory roof.

These are only two examples of the choices that are now open to us, and I mention them only to emphasize that there are choices. There is only one way in which the familiar arguments that pit jobs against the environment, that put labor leaders on the side of nuclear utility executives, makes sense. And that is if we accept the assumption that the alternatives to a new nuclear power plant is no new electricity and that the alternative to massive strip mining is no new sources of heat. In other words, this argument holds only if we give up the right to choose, among the different ways of producing energy, those which best serve the nation's—and labor's—needs. Then, of course, the bitter choice between jobs and the environment must be made, for if the flow of energy is disrupted we will surely suffer massive unemployment and economic disaster.

I am aware that labor groups have often decided to support nuclear power, shale oil production, coal conversion and similar energy sources which, on the basis of the foregoing analysis, seem to be not in labor's interests. But I know of no instance in which such support has been based on an actual comparison with alternative sources of energy. In every case, it is not a matter of making the wrong choice, but of avoiding a choice—in the belief that energy is essential for production and jobs (which is correct) and that all forms of energy will yield the same beneficial effects (which is not correct). Resolutions have been passed by labor groups which in one place strongly urge a fight for jobs and against inflation, and elsewhere urge the development of all forms of energy, listing sources such as nuclear power and coal conversion—which are bound to do employment and inflation more harm than good—alongside solar energy, which is labor's most powerful weapon against energy-driven inflation and unemployment.

If labor is to win its fight for jobs, for reasonable prices, for decent working conditions and for a strong economy, it must accept the responsibility of deciding, for itself, which forms of energy and which ways of using it will best sustain these aims. Up to now these decisions have not been made by labor, but by management. And now that management's choices—for nonrenewable sources such as oil and capital-intensive sources such as nuclear power, rather than the solar alternative—have precipitated the energy crisis, the decisions are being made by government executives and legislators. But, again, labor is on the sidelines.

Unless labor enters into the debate—on its own terms, making its own decisions about what energy policy best serves the needs of society, and labor in particular—we will make the same disastrous mistakes once more.

Nor is it enough for labor to rely on "environmentalists" and other people of good will to suggest the right way to produce and use energy. There is no guarantee, for example, that an energy policy will be free of serious economic and social disadvantages just because it is based on solar energy. De-

votion to solar energy is not, after all, proof against indifference to social welfare, greed or simple foolishness.

Consider for example two different ways to achieve a transition to solar energy. One option is to deliberately increase the price of conventional energy, so that solar technologies will become more quickly competitive. The other is to hold down the price of conventional energy as much as possible and use public funds to cut the cost of solar alternatives and make them competitive. For the reasons already given, the first approach would place an intolerable economic burden on the people, especially the poor and the minorities who suffer most from unemployment. At the same time, wealthier people would benefit from the transition. This strategy would increase both the general cost of energy and the price the consumer needs to pay to shift to a solar source. Poor people, unable to afford the high price of the new solar technology, would be forced to pay higher fuel prices, while wealthy people, who could afford the solar investment, could avoid buying the high-priced fuel. The strategy of rising fuel prices in order to encourage solar energy would tax the poor and favor the rich, justifying the suspicion already being voiced that public movements for energy conservation and solar energy are likely to be more in the interest of the wealthy than of the poor and the unemployed.

Perhaps the most serious dangers of this approach arise from a feature which in some quarters would be regarded as a virtue—the strategy relies on the "free marketplace" to govern the introduction of solar technologies. Bluntly stated, this means that the introduction of each solar technology would be governed by a single criterion—that it generate a profit for its producer greater than one he might obtain from an alternative investment. Such a strategy would please the companies now entrenched in the energy field. The oil companies would, of course, benefit from higher oil and natural gas prices. Even if the price increase were generated by taxes, it would make the oil companies' holdings in coal and uranium more valuable, and help support the price of oil in the world market—in which most of the U.S. companies are also involved. Private utilities could also benefit, by using their position in the consumer market and their access to capital to sell or lease to their customers whatever solar technologies are most profitable and least damaging to their centralized operations.

The last to gain from such a solar transition would be the poor. They would need to wait for benefits until, in the course of time, the massive substitution of solar energy for conventional sources stabilized the rising price of energy, and reduced the rate of general inflation. Finally, when the cost of the solar technologies fell far enough, the poor could afford them too. Such a profit-oriented transition would mean that the benefits of solar energy would be allowed, as usual, only to trickle down to the mass of people.

Clearly, it would not serve labor's interests—or for that matter, the nation's—to rely on such an approach to an environmentally-sound system of solar energy. Rather, labor and the nation need an approach which permits rational planning of the development, testing and introduction of solar technologies in keeping with their efficacy in the overall process of transition rather than on the basis of the narrow criterion of profitability. This approach would, of course, challenge the widely fostered notion that private profit is the sole acceptable basis for new productive investments. But this has happened before, in connection with the development of energy resources—notably in the development of hydroelectric projects, in particular the Tennessee Valley Authority, rural electrification and most recently nuclear power. In each case the creation of the system required public initiative and at least the initial investment of public funds. The issue is not necessarily one of public ownership, since in the case of nuclear power, the decision to develop it and the design of the technology was determined socially, while the ownership and operation of most of the industry has been in private hands. The example of nuclear power should also remind us that social governance of such decisions is by no means a guarantee that they will be in the best interest of society. Social governance is a necessary but not sufficient condition for maximizing social welfare.

An independent labor position on energy could provide a powerful remedy for some of the serious economic difficulties in U.S. and Canadian industry. Many industries—auto, steel, textiles, shoes and electronics—are being forced to cut back because they cannot compete with imports. These industries face the enormously difficult job of overcoming the economic advantages of foreign producers, achieved by their more modern productive facilities, in order to regain their share of the market. Meanwhile, plants close and people are thrown out of work. From what has been said earlier it should be evident that to cope with the energy crisis all industrial countries will need to develop new renewable sources of energy and new energy and capital-efficient production technologies. Promising examples are photovoltaic cells and cogeneration units such as Fiat's TOTEM. Consider this very sobering thought—that U.S. and Canadian industry, still locked in the old pattern of producing and using energy—will not move quickly enough to develop photovoltaic cells and cogeneration units, failing to meet the inevitable demand for them. If that happens we will soon see Japanese photovoltaic cells and Italian cogeneration units capturing not just a part of the North American market, but all of it. We will have been frozen out of a good chunk of the enormous world-wide industrial transformation that is certain to take place under the impetus of the energy crisis.

I believe that labor can protect us from that fate, strengthen economic development and create jobs by taking its rightful place in the decision-making process that will determine our response to the energy crisis. Labor has the most to lose from the wrong decisions, and the most to gain from the right ones. Labor has the experience to understand how old production facilities can be converted to new uses and how to train workers in the new skills. Labor has the experience to defeat the notion, already being heard in some quarters, that union labor would drive prices up and make the solar transition that much harder, and to show that non-union labor would mean shoddy workmanship that could only hold back the new technologies. Finally, only labor has the political strength to break the corporate stranglehold on energy and to help society apply the power of public governance to the creation of a new energy system that can truly serve human welfare.●

TIPPING THE SCALES OF JUSTICE

● Mr. MATHIAS. Mr. President, last August Congressman PAUL SIMON and I were joined by a number of our colleagues in petitioning the President to declare the conviction of Dr. Samuel Alexander Mudd in the Lincoln assassination conspiracy null and void. It is our belief, supported by extensive evidence, that Dr. Mudd treated John Wilkes Booth's broken leg as any dedicated doctor would routinely treat anyone who was suffering.

Since last summer the White House has sought and received the views of the Justice Department on the case and on the validity of our request. Action by the White House could be forthcoming at any time.

There has been wide popular response to this petition—all of it favorable. This leads me to hope that the President too will find it in his heart to overturn Dr. Mudd's conviction.

If further inducement for favorable Presidential action is necessary, I think I have found it. It comes in the form of letters to Dr. Richard D. Mudd, grandson of Dr. Samuel Alexander Mudd, from students in Mrs. Kern's second grade class at Schluckebier School in Bridgeport, Mich. It pleases me especially that these delightful and persuasive letters come from Michigan schoolchildren because for many years our distinguished colleague from Michigan, the late Senator Philip Hart, was the prime mover in the effort to clear Dr. Mudd's name.

I submit for the RECORD the letters written by Mrs. Kern's second graders, with no editorial changes. I only regret that there is no way to include the pictures which some of the students did instead of letters. Their caliber is equally high.

The letters follow:

DEAR DR. RICHARD MUDD, We have studied about your grandfather. And he did not know that Booth killed Abraham Lincoln. He killed Abraham Lincoln when he was watching a movie. And Booth jumped out of the window and broke his leg. And then that is how he got into the big big prison. But I am very very sorry that your grandfather dide. I am sorry that your son dide in the air plane. But thank God your still alive. I lik you even if I have never even seen you. But we have talked about you. And you seem like a nice man. But do you know what hapend to Abraham Lincoln well? his mother died of milk sick and they tride to do every thing they could. But she still dide and all of her Uncles and Aunds got milk sick. But when Abe was a boy he use to do devilish thing. like number one he got his friend to hold him up and that is how he walked on the seiling. Now we can get back to your grand father when he was put in prison those walls were 8 feet thick. and runing water around the hole prison. and on top of that it was alligaters in the water. And still on top of all that they wep him from his wife and his kids And they put chains on him and did not giv him a nice dinner. And I hop you like your letter that I wrote. And I hop you wife can read this letter with you. And that is the truth about all of this letter.

Love MONTY. And all of thes class and my teacher and my friends.

(Monty Brown).

DEAR DR. MUDD: We read about you and my teacher read us the fort Jefferson. President Lincoln got shot in the back of the head. He was shot by John both. Dr. A Mudd was in a vary big prison for a year. Abraham Lincoln was born in Kentucky. Lincoln's mom was kild from milksik, and his friends where kild to Abraham was born in 1809 and he was kild in July 1865. I'em sorry that your grendfather was in prison. He got out of prison because he helped the people from yellow fever. In the water there are alligaters surroundings it. Abe and his friend played a trick the well was pained his frniend lft him up and he

(anonymous)

DR. SAMUEL MUDD: We were studying about Abraham Lincoln we read a story about Abraham Lincoln in the story we herd his mom died when he was 8 from mike sick and his Aunt and uncle died from mike sick too. He work in losts of places and he like to read books and he playd ticks on people like when he did foot marks on the ciling. I'm sorry your grandfathen got put in prison.

COLLEEN.

DEAR DR. MUDD: we have ben studing about Abraham Lincoln. And Abraham Lincoln was born in 1809 and Dr. Samuel Mudd was but in jail in 1865. When Abraham Lincoln was pore when he was little. And we all love Abraham Lincoln. And John Wilkes booth killed Abraham Lincoln. And Dr. Samuel Mudd fixed John Wilkes booth lag. And after he fixed he's lag. And he got put in jail. And was in jail fore 2 year's. decause he halp the sike people. And there was all water around it.

BONNIE WENDT.

DEAR DR. RICHARD MUDD: We have been studying about you. and we Read about you being in prison. and I Read about Abraham Licoln geting shot by John wilkes Booth. and He Lincona always like to Read Books to. and He use to fool people. and we heard that your son Dieb in a plan cras. and I am sorry that your dad was in prison. For 2 years. Well I have to now.

(anonymous)

DR. RICHARD MUDD: We have ben suding a little about you and Abraham Lincoln. MRS. kerns read a old news paper. Abraham Lincoln was born in 1809 and he was a nice little boy. I feel sad for your granfather because he did not now about the guy. The mans name was John Wilkes Booth. Dr. Samuel Mudd got put in the jail because he fixed John Wilkes Booth. Abraham Lincoln was a very nice man to the slaves. His mom died of milk sick and his aunt and Uncle. Dr. Samuel Mudd helped the people who was sick. Abraham Lincoln had a sister her name was Sara was a year older than Abraham Lincoln.

MITZI WIL.

DEAR DR. MUDD: We have been studying about your grandfather and Abraham Lincoln. I believe that Dr. Samuel Mudd did not have anything to do with the President being killed. Dr. Samuel Mudds home state was Maryland. Dr. Samuel Mudd was put in prison just for doing his job. They took him to Florida and put him in prison. The walls were eight feet thick.

JILL STEDRY.

DEAR DR. MUDD: I habe ben studying. A lot. And I have ben reading a lot. And John Wilkes shot Abraham Lincoln in the neck at the Theater. Abraham Lincoln grew up to be a nice president. And Dr. Mudd got put in prisin.

JEFFERY ALAN MCKINSTRY.

DEAR RICHARD MUDD: We have been studying about Abraham Lincoln. Mrs. Kerns read us one book of Abraham Lincoln and she is starting another one. Abraham Lincoln got shot in the back of the head. Abraham Lincoln was born in 1809. And was shot in 1865. Mrs. Kerns told us you live in Saginaw. John Wilks booth went to Dr. Samuel's house and said, Dr. Dr. you gotta help me so the Dr. fixed John booth's leg. Abraham Lincoln was a good President. from

JULEI SLIVA.

DEAR DR. MUDD: We have been studying about you. Abraham Lincoln got shot in the back of the head. I feel very sory about this. I hope they believe you Dr. Mudd. Dr. Samuel Mudd lived in Maryland. He was a very nice Doctor. Abraham Lincoln lived in Kentucky. I feel very sory for you him. Dr. Samuel Mudd helped peple from yellow fearver so they let him out of prison. The End.

LISA RAE KEITH.

DEAR DR. MUDD: We have studi about Abraham Lincoln. Aunt and Uncle died of milk sick. Abraham was a good President. Mr. Mudd I feel bad about our grandfather died. Abraham Lincoln got shot thew his head. We have ben study about you and our gand father

MARIE ELLIS.

DEAR DR. MUDD: we have studied alot about Abraham Lincoln. He was a nice Pressident and he fighted a war just for the country the people who did not want slavery one the war. When Abraham Lincoln was in a theater he got shot in the head. When he was a boy his parints painted the seeling he got his friend to lift him up and walked acrost the seeling. And on a Sunday Abraham Lincoln fell in the river when he wasint supposet o go swiming. Abe and his frend liked to get in troble. I'm sas that your granfather went to the big big prison. for two years.

MICHAEL CROSS.

DEAR DR. MUDD: We have been study about Abraham Lincoln. Abraham Lincoln got shot in the back of the head. Abraham Lincoln was a poor boy. Lincoln was born in 1809 and got shot in 1865. Lincoln got shot by John Wilkes Booth. John Booth jump on to the stage and broke is leg. The next day John Booth went to Dr. Samuel Mudds house. Dr. Samuel Mudd fixed is leg. And then some people came ovr and said "You fixed the prson that killed Abraham Lincoln", You have to go to prison and he stayed in there for tow years. There was no excapd.

Love,

DEANNA LYNN LEHMAN.

DEAR DR. MUDD: We have learned about Abraham Lincoln got shot in the neck by John Wilkes Booth. And Abraham Lincoln's mom died from milksick. Abraham Lincoln died one hundred years ago. Abraham Lincoln moved to Kentucky in, 1809 he was just a little boy then. Then he moved to Indiana in, 1819. Abraham Lincoln was the sixteenth President and he was in a war.

TODD MICHAEL HARTMAN.

DEAR DR. SAMUEL A. MUDD: We had leard about Abraham Lincoln. Dr. Samuel Mudd is one of are spelling word. Abraham Lincoln got shot in the neck. He died in July 1865. He like to read every day. He like to play every day. Abraham Lincoln was a very good President. Abraham Lincoln He was born in Kentucky. He had lols of friends. Abraham Lincoln was born in 1809. Abraham Lincoln had a war of seth.

WALTER JAMES GRANGER.

DR. RICHARD MUDD: We have been learning about Abraham Lincoln they lifted in Maryland. I'm sorry If your grandfather was put in prison. I know who kill Abraham Lincoln? John Wilkes Booth kill Abraham Lincoln. fort Jefferson was either feet long.

MARC R.

DEAR DR. RICHARD MUDD: I know your grandfather did his job like he was suppose to do. Then he got put in prison for about two years. The first year in prison he wrote notes to his wife. The second year he did the same again. Abraham Lincoln's mother Nancy Lincoln died from milksick. The cows get sick and give the milk. I remember when little Abe fell into the water.

(anonymous)

DEAR DR. MUDD: I'm sorry thet your grandfather was in prsin. Abraham Lincoln was the 16 President we hav ben studding a dot you. I love you

MARY JO.

DEAR DR. MUDD: We have been studying about Abraham Lincoln. And slavery. And I am interested in it. I know that When Abraham Lincoln was a boy he was very pore. And he lived in Kentucky. He liked to played tricks on people. He lived in a log cabin. And his mothers name was Nancy. And his fathers name was Thomas. Abraham had one sister Sarah. Abraham's and Sarah's autn and uncle came over. Abraham and Sarah loved to here the grownups talk. They had lot's of fun. But the fun didn't last for long. Milksick came. Abraham's and Sarah's uncle and aunt deid and so did his mother. A long time later when Abraham was a president he went to a theater and John Wilkes Booth shoot Abraham Lincoln. The end.

(anonymous)

DEAR DR. MUDD: I feel bad about your grand father put in prision. We have been studing about you and Abraham Lincoln. Abraham Lincoln was a good President.

(anonymous) ●

INFLATION

● Mr. BENTSEN. Mr. President, inflation has become one of the most serious social problems of the 1970's. It continues to erode the confidence of average Americans in their free enterprise system. It systematically hits hardest those least able to defend their own economic interests—the poor, the elderly, and the hard pressed hourly wage earner. It ultimately destroys jobs because higher prices mean lower consumer purchasing power and hence less sales, less production, and less jobs. In short, inflation poses a grave threat to the economic well-being of all Americans.

Our inability to bring inflation under control is an understandable frustration to responsible, serious minded public policymakers. So it is perhaps not surprising that a majority of my distinguished Democratic colleagues on the Congressional Joint Economic Committee, honestly and intensely searching for a way to break the back of inflation, have once again approved a recommendation for mandatory wage and price controls.

That recommendation is contained for the second year in a row in the Joint Economic Committee's Annual Report. The report recommends that legislation be enacted giving the Council on Wage and Price Stability authority to "require prenotification of planned price increases from selected industries and to delay for modest periods wage or price increases which could have serious inflationary effects on the economy." Since the authority to delay wage or price increases is logically the authority to fix and control wages and prices, the committee is in fact calling for a limited system of mandatory wage and price controls.

In my opinion the committee recommendation is a serious mistake.

This proposal is likely to spark a healthy renewal of public discussion re-

garding the advisability of mandatory wage and price controls as a tool to fight inflation. Because of my deeply held belief that price and wage controls provide only the illusion of fighting inflation, I want to be one of the first to participate in the public dialogue about to be renewed.

Government dictation of wages and prices has never worked to control inflation in peacetime. Wage and price controls attack the symptoms of the disease, but not the disease itself. They may provide a temporary disguise, they may present a comforting illusion, but sooner or later consumers will confront the harsh reality of shortages, low quality products and hundreds of devices designed to circumvent the controls. Price and wage controls put the economy in a straightjacket which invariably results in inequities among both workers and business enterprises.

Wage and price controls cannot be imposed on our economy without exacting a heavy cost in the form of serious misallocation of resources, inefficient production, and the potential domination of our daily lives by faceless Government bureaucrats. Excessive Government regulation of business, which results in waste and inefficient production, is one of the major reasons for our inability to bring down the cost of living. It is one of those ironies of life that the Joint Economic Committee itself is making a recommendation that would add substantially to the regulatory burden thrust upon the people of this country.

Overregulation by Government is not a new problem.

The great British historian of the last century, Thomas Babington Macaulay, wrote:

> Nothing is so galling to a people as a meddling government . . . which tells them what to read and say and eat and drink and wear.

Almost 150 years after those words were written the people of this country are confronted by a government that not only meddles but, as often as not, does an incompetent job of it.

If we want to fight inflation, to keep prices from rising so rapidly, the way to do it is not by adding on more Government regulation in the form of wage and price controls.

One of the most positive steps we can take to reduce inflation is to reduce Government regulation. Federal regulation in 1976 cost American business and the American consumer some $65 billion—$300 for every man, woman, and child in this Nation.

Most leaders of business and labor strongly oppose the concept of wage and price controls. Businessmen know that controls will result in less investment, low productivity, and slow growth. Labor leaders know that it is more difficult for workers to circumvent wage controls than it is for business to get around price controls. Both business and labor leaders correctly recognize that there is no easy, simple solution to the problem of inflation. We will bring inflation under control when in addition to reducing excessive Government regulation business, we develop ways to encourage competition through the entry of new businesses into our Nation's marketplaces; when we provide adequate incentives for business to invest in more productive machinery and equipment, and when we bring the Federal budget under control.●

COMMITTEE CONFIRMATION PROCEDURES ADOPTED

● Mr. RIBICOFF. Mr. President, in accordance with the provisions of the Legislative Reorganization Act of 1970, I now submit for publication the rules, and an amendment to the rules, of the Committee on Governmental Affairs. The amendment was adopted by the committee on March 20, 1978.

The amendment (rule 8) establishes confirmation standards and procedures for Presidential nominees referred to the committee.

The procedures adopted in the rule have been used by the committee, on an interim basis, since last October. That period of time allowed the opportunity to refine and clarify the process. In formulating the rule, the committee considered the helpful proposals advanced last fall by Common Cause in its study of confirmation. The rule also reflects the findings and recommendations of the committee's own review of the confirmation process, contained in volume I of our "Study on Federal Regulation."

Thus, rule 8 results from what I consider to have been careful and informed consideration of the strengths and weakness of the confirmation process, as it has existed in the past.

Promulgation of this rule does not, in my opinion, detract from the importance of adoption by the Senate of confirmation procedures applicable to all committees. I continue to support Senate Resolution 258, which contains comprehensive Senate-wide confirmation reforms. That measure is cosponsored by Senators PERCY, JAVITS, MATSUNAGA, and myself. The situation that warranted introduction of that resolution last year has not been altered by the passage of time.

Advice and consent is a fundamental constitutional responsibility of the Senate. The power to appoint is shared coequally by the President and the Senate. The Constitution is plain on that important principle: The President "shall nominate, and by and with the advice and consent of the Senate, shall appoint" public officials. In my opinion the Constitution does not envision a passive role for the Senate, merely approving what is presented to it by the President. It is the combined wisdom of the President and the Senate which places a person in a position of public trust. Both are properly held accountable to the people for the subsequent performance and fitness of that official. I believe that the public has a right to expect as much care and deliberation from the Senate in the confirmation process as it does from the President in the selection process.

The exercise of that important responsibility requires published standards and procedures. I believe the committee rule satisfies that requirement. Without sacrificing needed flexibility, it assures a complete and even-handed inquiry into the background and integrity of nominees.

The committee rule guards against unwarranted and unnecessary invasions of personal privacy. Only information essential to an informed judgment by the Senate will come to light. Moreover, it insures fair and even treatment of all nominations. Hereafter all nominees will know, in advance, the requirements and stages of our committee confirmation process. The committee rule recognizes the human dimension of confirmation.

Essentially, the confirmation process is a judgment on the character and suitability of individuals for particular positions. Of course such appraisals mark all selection decisions. But Senate confirmation is in that regard distinctive, because those judgments occur in public. Nominees are subject to general examination and comment in public hearings, public discussions, and public votes. A person's reputation and career could be damaged, even destroyed, by that decision and the manner in which it is reached.

Senate confirmation must not be a trial by fire process. Reasonable expectations of privacy and fair treatment must be guaranteed. To do otherwise would result in discouraging the very people we hope will be attracted to high Federal office. Obviously, the objectives of a careful confirmation process would be defeated if that occurred.

On the other hand, the Senate must know the nominees it is asked to confirm. The Senate must be convinced that nominees are affirmatively qualified for Federal office. How else can the Senate discharge its public trust of advice and consent? All of that requires information, which can only result from a reasonable inquiry into the background and integrity of Presidential nominees. Confirmation, also by its nature, is and must be a public process. Accepting nomination necessarily involves some sacrifice of personal privacy. Background information will come to light, and will be considered.

I believe our committee rule strikes a delicate balance between those competing considerations.

First, there will be a thorough process and established standards. A careful inquiry into the nominee's experience, qualifications, suitability, and integrity will be conducted. Financial and biographical information will be provided by nominees as a requirement of confirmation. The investigative summaries on nominees, prepared by the FBI and other executive agencies, will be reviewed. The nominee will be interviewed, and will be questioned under oath at a public hearing. Real and potential financial conflicts of interest will be considered.

A written report on the background of the nominee will be presented to the committee. That report will detail any unresolved or questionable matters that may have arisen during the course of the inquiry. The committee will recommend confirmation, upon a finding that the nominee has the necessary integrity and is affirmatively qualified by reason of

training, education, or experience to hold the office to which he or she was nominated.

However, the committee process also insures impartial treatment of nominees, and careful handling of sensitive background information. Responsibility for the inquiry will be focused in designated persons, and information will not be distributed pell mell. Financial information provided by nominees will be made available for public inspection, but will not be published.

The committee inquiry will be conducted by experienced investigators, designated by the chairman and ranking minority member. Those individuals will have regular access to reports on nominees prepared by the FBI and other agencies. Every effort will be made to substantiate concerns about a nominee before they are considered by the committee. The written report will be made available in the committee office for inspection by members of the committee.

In summary, I believe that rule 8 will result in an informed confirmation process without unnecessary or haphazard infringements on reasonable expectations of privacy.

I submit the committee rules, including our new rule on confirmation standards and procedures, for the RECORD.

The material is as follows:

RULES OF PROCEDURE ADOPTED BY THE COMMITTEE ON GOVERNMENT AFFAIRS

PURSUANT TO SECTION 133B OF THE LEGISLATIVE REORGANIZATION ACT OF 1946, AS AMENDED

Rule 1. Meetings and meeting procedures other than hearings

A. *Meeting dates.* The committee shall hold its regular meetings on the first Thursday of each month, when the Congress is in session, or at such other times as the chairman shall determine. Additional meetings may be called by the chairman as he deems necessary to expedite committee business. (Sec. 133(a), Legislative Reorganization Act of 1946, as amended.)

B. *Calling special committee meetings.* If at least three members of the committee desire the chairman to call a special meeting, they may file in the offices of the committee a written request therefor, addressed to the chairman. Immediately thereafter, the clerk of the committee shall notify the chairman of such request. If within three calendar days after the filing of such request, the chairman fails to call the requested special meeting, which is to be held within seven calendar days after the filing of such request, a majority of the committee members may file in the offices of the committee their written notice that a special committee meeting will be held, specifying the date and hour thereof, and the committee shall meet on that date and hour. Immediately upon the filing of such notice, the committee clerk shall notify all committee members that such special meeting will be held and inform them of its date and hour. If the chairman is not present at any regular, additional or special meeting, the ranking majority member present shall preside. (Sec. 133(a), Legislative Reorganization Act of 1946, as amended.)

C. *Meeting notices and agenda.* Written notices of committee meetings, accompanied by an agenda enumerating the items of business to be considered, shall be sent to all committee members at least three days in advance of such meetings. In the event that unforeseen requirements of committee business prevent a three-day notice, the committee staff shall communicate such notice by telephone to members or appropriate staff assistants in their offices, and an agenda will be furnished prior to the meeting.

D. *Open business meetings.* Meetings for the transaction of committee or subcommittee business shall be conducted in open session, except that a meeting or portions of a meeting may be held in executive session when the committee members present, by majority vote, so determine. The motion to close a meeting, either in whole or in part, may be considered and determined at a meeting next preceding such meeting. Whenever a meeting for the transaction of committee or subcommittee business is closed to the public, the chairman of the committee or the subcommittee shall offer a public explanation of the reasons the meeting is closed to the public. This paragraph shall not apply to the Permanent Subcommittee on Investigations.

E. *Prior notice of first degree amendments.* It shall not be in order for the Committee, or a subcommittee thereof, to consider any amendment in the first degree proposed to any measure under consideration by the Committee or subcommittee unless a written copy of such amendment has been delivered to each member of the Committee or subcommittee, as the case may be, and to the office of the Committee or subcommittee, at least 24 hours before the meeting of the Committee or subcommittee at which the amendment is to be proposed. This subsection may be waived by a majority of the members present. This subsection shall apply only when at least 72 hours written notice of a session to mark-up a measure is provided to the Committee.

F. *Agency comments.* When the Committee has scheduled and publicly announced a mark-up meeting on pending legislation, if executive branch agencies, whose comments thereon have been requested, have not responded by the time of the announcement of such meeting, the announcement shall include the final date upon which the comments of such agencies, or any other agencies, will be accepted by the Committee.

Rule 2. Quorums

A. *Reporting legislation.* Nine members of the committee shall constitute a quorum for reporting legislative measures or recommendations. (Sec. 133(d), Legislative Reorganization Act of 1946, as amended.)

B. *Transaction of routine business.* Five members of the committee shall constitute a quorum for the transaction of routine business, provided that one member of the minority is present.

For the purpose of this paragraph, the term "routine business" includes the convening of a committee meeting and the consideration of legislation pending before the committee and any amendments thereto, and voting on such amendments. (Rule XXV, Sec. 5(a), Standing Rules of the Senate.)

C. *Taking sworn testimony.* Two members of the committee shall constitute a quorum for taking sworn testimony: *Provided, however,* That one member of the committee shall constitute a quorum for such purposes, with the approval of the chairman and the ranking minority member of the committee, or their designee. (Rule XXV, Sec. 5(b), Standing Rules of the Senate.)

D. *Taking unsworn testimony.* One member of the committee shall constitute a quorum for taking unsworn testimony. (Sec. 133(d)(2), Legislative Reorganization Act of 1946, as amended.)

E. *Subcommittee quorums.* Subject to the provisions of section 5(a) and 5(b) of Rule XXV of the Standing Rules of the Senate, and section 133(d) of the Legislative Reorganization Act as amended, the subcommittees of this committee are authorized to establish their own quorums for the transaction of business and the taking of sworn testimony.

F. *Proxies prohibited in establishment of a quorum.* Proxies shall not be considered for the establishment of a quorum.

Rule 3. voting

A. *Quorum required.* No vote may be taken by the committee, or any subcommittee thereof, on any measure or matter unless a quorum, as prescribed in the preceding section, is actually present.

B. *Reporting legislation.* No measure or recommendation shall be reported from the committee unless a majority of the committee members are actually present, and the vote of the committee to report a measure or matter shall require the concurrence of a majority of those members who are actually present at the time the vote is taken. (Sec. 133(d), Legislative Reorganization Act of 1946, as amended.)

C. *Proxy voting.* Proxy voting shall be allowed on all measures and matters before the committee, or any subcommittees thereof, except that, when the committee, or any subcommittee thereof, is voting to report a measure or recommendation, proxy votes shall be allowed solely for the purposes of recording a member's position on the pending question and then, only if the absent committee member has been informed of the matter on which he is being recorded and has affirmatively requested that he be so recorded. All proxies shall be addressed to the chairman of the committee and filed with the chief clerk thereof, or to the chairman of the subcommittee and filed with the clerk thereof, as the case may be. All proxies shall be in writing and shall contain sufficient reference to the pending matter as is necessary to identify it and to inform the committee as to how the member wishes his vote to be recorded thereon. (Sec. 133(d), Legislative Reorganization Act of 1946, as amended.)

D. *Announcement of vote.* (1) Whenever the committee by rollcall vote reports any measure or matter, the report of the committee upon such measure or matter shall include a tabulation of the votes cast in favor of and the votes cast in opposition to such measure or matter by each member of the committee. (Sec. 133(d), Legislative Reorganization Act of 1946, as amended.)

(2) Whenever the committee by rollcall vote acts upon any measure or amendment thereto, other than reporting a measure or recommendation, the results thereof shall be announced in the committee report on that measure unless previously announced by the committee, and such announcement shall include a tabulation of the votes cast in favor of and the votes cast in opposition to each such measure and amendment thereto by each member of the committee who was present at that meeting. (Sec. 133(b), Legislative Reorganization Act of 1946, as amended.)

(3) In any case in which a rollcall vote is announced, the tabulation of votes shall state separately the proxy vote recorded in favor of and in opposition to that measure, amendment thereto, or recommendation. (Sec. 133 (b) and (d) Legislative Reorganization Act of 1946, as amended.)

Rule 4. Chairmanship of meetings and hearings

The chairman shall preside at all committee meetings and hearings except that he shall designate a temporary chairman to act in his place if he is unable to be present at a scheduled meeting or hearing. If the chairman (or his designee) is absent ten minutes after the scheduled time set for a meeting or hearing, the senior Senator present of the chairman's party shall act in his stead until the chairman's arrival. If there is no member of the chairman's party present, the senior Senator of the committee minority present shall open and conduct the meeting or

hearing until such time as a member of the majority enters.

Rule 5. Hearings and hearing procedures

A. *Announcement of hearings.* The committee, or any subcommittee thereof, shall make public announcement of the date, place, time and subject matter of any hearing to be conducted on any measure or matter at least one week in advance of such hearing, unless the committee, or subcommittee, determines that there is good cause to begin such hearing at an earlier date. (Sec. 133A (a), Legsliative Reorganization Act of 1946, as amended.)

B. *Open hearings.* Each hearing conducted by the committee, or any subcommittee thereof, shall be open to the public unless the committee, or subcommittee, determines that the testimony to be taken at that hearing may (1) relate to a matter of national security, (2) tend to reflect adversely on the character or reputation of the witness or any other individual, or (3) divulge matters deemed confidential under other provisions of law or Government regulations. (Rule XXV, Sec. 7(b), Standing Rules of the Senate.)

C. *Radio, television, and photography.* The committee, or any subcommittee thereof, may permit the proceedings of hearings which are open to the public to be photographed and broadcast by radio, television or both, subject to such conditions as the committee, or subcommittee, may impose. (Rule XXV, Sec. 7(c), Standing Rules of the Senate.)

D. *Advance statements of witnesses.* A witness appearing before the committee, or any subcommittee thereof, shall file a written statement of his proposed testimony at least one day prior to his appearance, unless this requirement is waived by the chairman and the ranking minority member, following their determination that there is good cause for failure of compliance. (Sec. 133A(c), Legislative Reorganization Act of 1946, as amended.)

E. *Minority witnesses.* In any hearings conducted by the committee, or any subcommittee thereof, the minority members of the committee shall be entitled, upon request to the chairman by a majority of the minority to call witnesses of their selection during at least one day of such hearings. (Sec. 133A(e), Legislative Reorganization Act of 1946, as amended.)

Rule 6. Committee reports

A. *Timely filing.* When the committee has ordered a measure or recommendation reported, following final action the report thereon shall be filed in the Senate at the earliest practicable time. (Sec. 133(c), Legislative Reorganization Act of 1946, as amended.)

B. *Supplemental, minority, and additional views.* A member of the committee who gives notice of his intention to file supplemental, minority or additional views at the time of final committee approval of a measure or matter, shall be entitled to not less than three calendar days in which to file such views, in writing, with the chief clerk of the committee. Such views shall then be included in the committee report and printed in the same volume, as a part thereof, and their inclusion shall be noted on the cover of the report. In the absence of timely notice, the committee report may be filed and printed immediately without such views. (Sec. 133(e), Legislative Reorganization Act of 1946, as amended.)

C. *Draft reports of subcommittees.* All draft reports prepared by subcommittees of this committee on any measure or matter referred to it by the chairman, shall be in the form, style, and arrangement required to conform to the applicable provisions of the Standing Rules of the Senate, and shall be in accordance with the established practices followed by the committee. Upon completion of such draft reports, copies thereof shall be filed with the chief clerk of the committee at the earliest practicable time.

D. *Cost estimates in reports.* All committee reports, accompanying a bill or joint resolution of a public character reported by the committee, shall contain (1) an estimate, made by the committee, of the costs which would be incurred in carrying out the legislation for the then current fiscal year and for each of the next five fiscal years thereafter (or for the authorized duration of the proposed legislation, if less than five years); (2) a comparison of such cost estimates with any made by a Federal agency; or (3) a statement of the reasons for failure by the committee to comply with these requirements as impracticable, in the event of inability to comply therewith. (Sec. 252(a), Legislative Reorganization Act of 1970.)

Rule 7. Subcommittees and subcommittee procedures

A. *Regularly established subcommittees.* The committee shall have six regularly established subcommittees. The subcommittees are as follows:

Permanent Subcommittee on Investigations.

Intergovernmental Relations.

Governmental Efficiency and the District of Columbia.

Federal Spending Practices and Open Government.

Energy, Nuclear Proliferation and Federal Services.

Civil Service and General Services.

B. *Ad hoc subcommittees.* Following consultation with the ranking minority member, the chairman shall, from time to time, establish such ad hoc subcommittees as he deems necessary to expedite committee business.

C. *Subcommittee membership.* Following consultation with the majority members, and the ranking minority member, of the committee, the chairman shall announce selections for membership on the subcommittees referred to in paragraphs A and B, above.

D. *Subcommittee meetings and hearings.* Each subcommittee of this committee is authorized to establish meeting dates and adopt rules not inconsistent with the rules of the committee.

E. *Subcommittee budgets.* Each subcommittee of this committee, which requires authorization for the expenditure of funds for the conduct of inquiries and investigations, shall file with the chief clerk of the committee, not later than January 10 of that year, its request for funds for the 12-month period beginning on March 1 and extending through and including the last day in February of the following year. Each such request shall be submitted on the budget form prescribed by the Committee on Rules and Administration, and shall be accompanied by a written justification; addressed to the chairman of the committee, which shall include (1) a statement of the subcommittee's area of activities, (2)its accomplishments during the preceding year; and (3) a table showing a comparison between (*a*) the funds authorized for expenditure during the preceding year, (*b*) the funds actually expended during that year, (*c*) the amount requested for the current year, and (*d*) the number of professional and clerical staff members and consultants employed by the subcommittee during the preceding year and the number of such personnel requested for the current year. (Sec. 133(g), Legislative Reorganization Act of 1946, as amended.)

Rule 8. Confirmation standards and procedures

A. Standards. In considering a nomination, the Committee shall inquire into the nominee's experience, qualifications, suitability, and integrity to serve in the position to which he or she has been nominated. The Committee shall recommend confirmation, upon finding that the nominee has the necessary integrity and is affirmatively qualified by reason of training, education, or experience to carry out the functions of the office to which he or she was nominated.

B. Information Concerning the Nominee. As a requirement of confirmation, each nominee shall submit on forms prepared by the Committee the following information:

(1) A detailed biographical resume which contains information relating to education, employment and achievements;

(2) A financial statement which lists assets and liabilities of the nominee; and

(3) Copies of other relevant documents requested by the Committee, such as a proposed blind trust agreement.

At the request of either the Chairman or the Ranking Minority Member, a nominee shall be required to submit a certified financial statement compiled by an independent auditor.

Information received pursuant to this subsection shall be made available for public inspection; provided, however, that tax returns shall, after review by persons designated in subsection (C) of this rule, be placed under seal to ensure confidentiality.

C. Procedures for Committee Inquiry. The Committee shall conduct an inquiry into the experience, qualifications, suitability and integrity of nominees, and shall give particular attention to the following matters:

(1) A review of the biographical information provided by the nominee, including any professional activities related directly to the duties of the office to which he or she is nominated;

(2) A review of the financial information provided by the nominee, including tax returns for the three years preceding the time of his or her nomination;

(3) A review of any actions, taken or proposed by the nominee, to remedy conflicts of interest; and

(4) A review of any personal or legal matter which may bear upon the nominee's qualifications for the office to which he or she is nominated.

For the purpose of assisting the Committee in the conduct of this inquiry, a Chief Investigator shall be designated by the Chairman and a Minority Investigator shall be designated by the Ranking Minority Member. The Chairman, Ranking Minority Member, and the designated Investigators shall have access to all investigative reports on nominees prepared by any Federal agency, including the Federal Bureau of Investigation. The Committee may request the assistance of the General Accounting Office in conducting an audit of financial information provided by nominees.

D. Report on the Nominee. After a review of all information pertinent to the nomination, a confidential report on the nominee shall be submitted to the Chairman and the Ranking Minority Member. The report shall detail any unresolved or questionable matters that have been raised during the course of the inquiry. Copies of all relevant documents and forms, except any tax returns, submitted pursuant to subsection (B) shall be attached to the report. The report shall be kept in the Committee office for inspection by Members of the Committee.

E. Hearings. The Committee shall conduct a public hearing during which the nominee shall be called to testify under oath on all matters relating to his or her suitability for office, including the policies and programs which he or she will pursue while in that position. No hearing shall be scheduled until at least 72 hours after the following events have occurred: the nominee has responded to pre-hearing questions submitted by the Committee; and the report required by subsection (D) has been submitted to the Chairman and Ranking Minority Member, and is

made available for inspection by Members of the Committee.

F. Action on Confirmation. A mark-up on a nomination shall not occur on the same day that the hearing on the nominee is held. In order to assist the Committee in reaching a recommendation on confirmation, the staff shall make an oral presentation to the Committee at the mark-up, factually summarizing the nominee's background and the steps taken during the pre-hearing inquiry.

G. Application. The procedures contained in subsections (C), (D), (E), and (F) of this rule shall apply to persons nominated by the President to positions requiring their full-time service. At the discretion of the Chairman and Ranking Minority Member, those procedures may apply to persons nominated by the President to serve on a part-time advisory basis.●

TWO STATE LEGISLATURES OPPOSE DISMEMBERMENT OF USDA

● Mr. TALMADGE. Mr. President, I bring to the attention of the Senate two resolutions adopted in recent weeks by the Legislatures of Colorado and Idaho.

House Joint Resolution 1013, sponsored by several members of the Colorado House and Senate, opposes the transfer of the Soil Conservation Service and the U.S. Forest Service from the Department of Agriculture to the Department of the Interior. The resolution urges the Federal Government to "move cautiously in its deliberations regarding any change in the organization for management of the Nation's renewable resources."

I think the Colorado Legislature should be commended for its action. But the resolution adopted by the Idaho Legislature may be even more significant.

Since leaving the governorship of Idaho to become Secretary of the Interior, Cecil Andrus has made no secret of his desire to capture the Forest Service from the Department of Agriculture in the President's reorganization process.

A joint memorial of the Idaho House and Senate to the President, to the Secretary of Agriculture, to Secretary Andrus, and the Congress opposes the transfer of the Forest Service from Agriculture to Interior.

As I said in my press statement of December 27, 1977, there are powerful forces at work in this Government that would tear the Department of Agriculture to pieces. Once again I wish to serve notice that I will oppose these forces with all my ability. I welcome the support of these great State legislative bodies, as well as endorsements I have received for my position from the National Association of Counties, the American Forestry Association, the National Association of Conservation Districts, the National Rural Electric Cooperative Association, the Forest Farmers Association, and others.

Mr. President, I submit the resolutions adopted by the Colorado and Idaho Legislatures for the RECORD.

The resolutions follow:

H.J.R. 1013

Whereas, President Carter has approved a plan to study whether federal responsibilities for natural and environmental programs are effectively organized and to consider possible improvements; and

Whereas, The scope of the study includes a proposal to remove the United States Forest Service and the United States Soil Conservation Service from the United States Department of Agriculture to the United States Department of the Interior; and

Whereas, Because approximately thirty-six percent of the land in Colorado is federally owned, said Forest Service and said Soil Conservation Service have a vital role in Colorado, and their operation in a manner consistent with the needs of the rural areas of Colorado is crucial; and

Whereas, The United States Department of Agriculture has a long history of land management with resource capabilities for carrying out land programs and related activities and has the expertise and facilities for carrying out such programs and related activities on a cooperative basis with ranchers and farmers; and

Whereas, There is a close relationship between land resources and the production of food and fiber which has been historically administered by the United States Department of Agriculture; and

Whereas, When land and water resource management is viewed as the mutual responsibility of government and the private sector, the United States Department of Agriculture is centrally involved, in that ninety percent of the land area of this nation is affected by its programs and policies for conservation and its use of renewable resources; and

Whereas, It is in the interest of all of the residents of Colorado to consider the impact of legislation concerning federally owned land and privately owned land contiguous thereto; and

Whereas, The United States Department of Agriculture has historically managed to balance the demands on public lands and has more experience in the multiple use concept of public lands than any other federal department or agency; and

Whereas, Such actions as are being proposed which concern the transfer of certain functions of the United States Department of Agriculture to other departments will relegate said Department to less than a cabinet-level department of the federal government and leave it without a voice concerning the economic growth of this nation; now, therefore,

Be It Resolved by the House of Representatives of the Fifty-first General Assembly of the State of Colorado, the Senate concurring herein:

That this General Assembly opposes the transfer of the United States Forest Service and the United States Soil Conservation Service from the United States Department of Agriculture to the United States Department of the Interior and that the federal government move cautiously in its deliberations regarding any change in the organization for management of the nation's renewable resources.

Be It Further Resolved, That copies of this Resolution be transmitted to the President of the United States, to the Natural Resources Environment Division of the United States Office of Management and Budget, and to each member of the Congress of the United States from the State of Colorado.

HOUSE JOINT MEMORIAL No. 17

Whereas, the United States Forest Service, established in 1905 within the Department of Agriculture, was created and designed to serve the interests of the public through the management of the forest resources of this nation; and

Whereas, over the span of nearly three-quarters of a century, members of the agricultural community have participated with the Forest Service in beneficial use of forest lands, including grazing of livestock and harvesting of timber in ways which contribute to a sound economy and a wise management of resources; and

Whereas, a long tradition of operation through the Department of Agriculture should not be disturbed without a significant demonstration that the existing organizational structure has failed to serve the public interest; and

Whereas, proposals are now under consideration which would transfer the Forest Service to the Department of Interior or other possible umbrella agency and interrupt the history of service and progress which has served the people of the State of Idaho and of this Nation.

Whereas, we find that the existing structure has served well for nearly seventy-five years, and we encourage the Congress to carefully consider this history of service and accomplishment.

Now, therefore, be it resolved by the members of the Second Regular Session of the Forty-fourth Idaho Legislature, the House of Representatives and the Senate concurring therein, that we urge the Congress and the President to reject proposals for the transfer of the Forest Service from the Department of Agriculture.

Be it further resolved that the Chief Clerk of the House of Representatives, be, and he is hereby authorized and directed to forward copies of this Memorial to the President of the United States, Jimmy Carter, the Honorable Secretary of the Department of Agriculture, Robert S. Bergland, the Honorable Secretary of the Department of Interior, Cecil D. Andrus, the President of the Senate and the Speaker of the House of Representatives of Congress, and the honorable congressional delegation representing the State of Idaho in the Congress of the United States.●

SOCIAL SECURITY TAX CREDITS

● Mr. EAGLETON. Mr. President, on almost any day this year, we have been able to pick up the newspaper and read stories, editorials, and letters to the editor about the Social Security Amendments of 1977. The theme of much of this coverage has been the American public's outrage at the staggering new tax rates included in those amendments. The people are telling us that these new payroll taxes are simply too much to bear.

During the past months, several bills have been introduced in response to this public outcry. These bills would pump general revenue funds into the social security system, thereby enabling us to roll back some of the 1977 payroll tax increase. I am glad to see such legislation introduced this year; as my colleagues will recall, I unsuccessfully advocated partial general revenue funding during last year's debate on the social security amendments.

Unfortunately, the prospects for this type of legislation still do not appear favorable. The President, the distinguished chairman of the Senate Finance Committee, and the distinguished chairman of the House Ways and Means Committee all are presently opposed to any use of general revenue funds for social security. I am enough of a political realist to know, Mr. President, that the formidable opposition of these three gentlemen will make it practically impossible for any legislation of this type to be enacted this year.

The calls for relief continue to be heard from our constituents, however, and we are compelled to offer some relief. One possible avenue of such relief can be found in connection with President Carter's tax cut proposal, which was sent to the Congress earlier

this year. My colleagues will recall that part of the President's reason for offering this income tax cut was to compensate for the higher social security payroll taxes. However, as the details of the President's proposal were made available, it became apparent that an amendment to the plan would be needed. This is because the President has proposed that all taxpayers share equally in the benefits of the income tax cut, even though not all taxpayers will share equally the burden of the new, higher social security tax rates.

This flaw in the Carter proposal is best illustrated by a hypothetical example. Let us imagine two identical families of four, the Smiths and the Joneses, who live side-by-side in identical houses. Both families have $20,000 annual incomes. The only difference between them is that Mr. Smith works for the Federal Government, while Mr. Jones works in private industry.

In 1979, Mr. Smith, who works for the Government, will find that his income tax bill is $270 less than it was in 1978, thanks to the Carter income tax cut. Furthermore, since Smith, as a Federal worker, does not participate in social security, he pays no additional social security tax. He therefore realizes a net benefit of $270. If Smith responds according to the President's plan, he will spend that money and stimulate the economy.

Next door at the Jones House, Mr. Jones also discovers that his 1979 income tax liability is $270 less than his 1978 payment. However, Jones also notices that his social security withholding for 1979 went up in the amount of $261 over 1977, leaving him with a net increase in income of only $9. Obviously, this is not fair. Smith and Jones have identical income and dependents, and they should receive approximately equal net benefits from the tax cut.

This is the object of a bill (S. 2459) which I introduced on January 31, 1978. Under the terms of my bill, an individual would be allowed a credit against income tax equal to 15 percent of the individual's social security tax payments during the tax year. This credit would assure that a portion of the benefits of the income tax cut, specifically the portion aimed at compensating for higher social security taxes, would go only to those who actually pay social security taxes. Remaining benefits of the income tax cut would be shared equally by all income taxpayers.

As I mentioned earlier, direct infusion of general revenue funds into social security proved unacceptable to the Congress last year, and most likely again will prove unacceptable this year. That being the case, I would like to suggest to my colleagues one other possible way to respond to the avalanche of mail from back home seeking relief from the new social security payroll tax rates. That way is to join in cosponsoring my bill, which would provide immediate relief to beleaguered social security taxpayers.●

ALEXANDER GINZBURG

Mr. JACKSON. Mr. President, I wish to take this opportunity to remind my colleagues in the Congress of the plight of the young, heroic Russian, Alexander Ginzburg.

He has already served 7 years in Soviet forced labor camps. He was arrested for a third time on February 3, 1977. Since then, he has been held incommunicado in Kaluga Prison. He has been charged with no crime. He has been permitted no visitors. He cannot communicate with his family or his friends; they do not know whether their communications are allowed to reach him.

Why was Alexander Ginzburg arrested?

He was arrested because he administered a humane charity for political prisoners, and because he spoke the truth about Soviet noncompliance with international accords to which the Soviets themselves are a party.

Alexander Ginzburg was the administrator of the Russian Social Fund, a charitable organization founded by Mr. Solzhenitsyn from the proceeds of the Gulag Archipelago to aid political prisoners confined for their beliefs in Soviet camps, jails, and psychiatric hospitals and to assist their suffering families with food, clothing, and medicine.

He has also been one of the resolute activists on behalf of human rights. In the face of repeated arrests and harassment, he stayed the course. As one of the founders of the Helsinki Watch Group, he spoke out about the Soviet Government's violations of the Helsinki Accords and other international human rights agreements.

The Alexander Ginzburg Defense Committee sums up the matter this way:

If Alexander Ginzburg is brought to trial, it will mean that it is a crime in the Soviet Union to dispense mercy; and that it is a crime in the Soviet Union to speak the truth about violations of law and international agreements.

At this stage, public attention and exposure are the only factors which might bring about some improvement in the fate which looms over this kind, goodhearted, and courageous man. I call upon my colleagues to join in focusing public attention on the story of Alexander Ginzburg.

In this spirit, I submit for the RECORD the text of the recent appeal of Andrei Sakharov on behalf of Alexander Ginzburg.

The material follows:

DR. ANDREI SAKHAROV'S APPEAL

Exactly a year ago, Alexander Ginzburg, manager of the Russian Social Fund of help to political prisoners and their families and member of the Helsinki Accords Watch Group in the USSR, was arrested. He has two small children and is his old mother's only son. He is a kind and generous man, an active man, always compassionate and attentive to other people's sufferings. Our friend, our Alik.

He is still in a prison cell, under investigation, awaiting trial. None of his relatives and friends know what he is being charged with. So many things have happened since Ginzburg's arrest, and yet his imprisonment continues being for us a fact of the greatest importance, a highly alarming fact of which we think with invariable deep bitterness.

Ginzburg became known to the whole world ten years ago, when our country's intelligentsia launched a vast campaign to defend him and his companions against an unjust and harsh sentence. His friend, the poet Yuri Galanskov, who was sentenced during the same trial, perished in a forced labor camp. Over one thousand people at that time signed letters of protest in their defense, thus clearly demonstrating their attitude towards the repressive policy of our regime.

What Ginzburg is facing today is even more unjust and more cruel. His defense must be most energetic and worldwide. Ginzburg's arrest has been the beginning of a tide of political repression. Members of the Helsinki Watch Group have been singled out particularly as victims of this repression.

Ginzburg's defense is at the same time the defense of all his companions and a fight against political repression as such.

February 2, 1978 Andrei Sakharov

TAXPAYERS STANDING TO CHALLENGE IRS RULES

● Mr. KENNEDY. Mr. President, during the tax reform debate in the 94th Congress, I proposed an amendment to authorize judicial review of certain Internal Revenue Service determinations and regulations. My amendment—No. 1966—would have allowed any person to seek judicial review of a private tax ruling if the ruling decreased the tax liability of another person by an aggregate amount of $1 million or more for any taxable year, or of any ruling raising a substantial question of infringement of Federal constitutional rights. In my statement on the amendment, appearing in the July 26, 1976, CONGRESSIONAL RECORD at page 23886, I cited specific examples of giveaway rulings and the basic legal argument for authorizing judicial review of those rulings. Unfortunately the amendment was not adopted by the Senate.

The Congress did, in that tax reform legislation, provide that IRS rulings were to be made public. The publication of rulings will, of course, make clear on a regular basis to the Congress and the public the nature and magnitude of private IRS determinations. To insure greater equity in the ruling process and to allow the public an independent avenue of redress when a ruling which is unconstitutional or otherwise illegal winds up giving away large amounts of Federal dollars, judicial review should now be made available.

A recent article appearing in Tax Notes by Prof. Michael Asimow makes a strong case for Congress' renewing its consideration of this standing issue. Professor Asimow states that—

It is time . . . to sweep away the anachronistic rules precluding suits which challenge lenient tax rules.

After an exhaustive and documented analysis of the arguments for and against a new judicial review statute, he concludes:

The arguments against such a statute, whether on constitutional or policy grounds, are unpersuasive. Erroneously lenient tax rules threaten the horizontal and vertical equity of our tax structure. They also threaten public confidence in the independence of the Treasury and the fairness of the taxing system. As prescribed by a carefully drawn statute judicial review would be good medicine for these ills.

Professor Asimow has proposed his own taxpayer standing statute which,

while similar in objective, differs in a few ways from the one I proposed almost 2 years ago. I believe that it is important that both of these approaches receive careful examination by the Treasury Department, the public, and ultimately the Congress. I intend to introduce legislation on this subject again after I have obtained the views of the IRS. To that end I have asked Commissioner Kurtz for his views on both my earlier amendment and Professor Asimow's proposed statute.

I submit for the RECORD the article entitled "Standing to Challenge Lenient Tax Rules."

The article follows:

STANDING TO CHALLENGE LENIENT TAX RULES: A STATUTORY SOLUTION

(By Michael Asimow)

The Treasury Department is a rulemaking factory. On its assembly line, thousands of pages of regulations and hundreds of thousands of public and private tax rulings have been produced. Although the product is generally of acceptable quality, occasional rules are defective because they are inconsistent with the Internal Revenue Code.

Usually, of course, the effect of the disputed rule is to increase the taxes of a particular taxpayer or group of taxpayers. Present law provides ample protection to aggrieved taxpayers in the form of comprehensive judicial review of the legality of rules which cost them money. But a second, much smaller, class of defective rules have the effect of decreasing the taxes of a particular taxpayer or group of taxpayers. These rules will be referred to in this article as "lenient rules." This article addresses the appropriateness of judicial review of lenient tax rules and the means by which it can be obtained.

1. THE NEED FOR JUDICIAL REVIEW OF LENIENT RULES

The persons whose taxes are directly affected by a rule are not the only ones with an interest in it. In many situations, the competitors of the favored taxpayer must bear a higher tax burden and are thereby injured by the rule. In other situations, the employees or the customers of the beneficiary of a lenient rule may be harmed by the rule.

Even if no person suffers particularized harm from a lenient rule, everyone in the United States may suffer an injury. All of us, as citizens and fellow taxpayers, should be distressed when the horizontal equity of the tax structure is disrupted by a rule which fails to treat similarly situated persons equally.

By the same token, all taxpayers are injured by rules which undercut the progressive character of our tax system by favoritism to high-bracket taxpayers. A failure to collect taxes which legally could be collected will increase the federal budgetary deficit, with a corresponding effect on the rate of inflation, the money supply, and the interest burden on the federal debt. Large budgetary deficits also preclude Congress from initiating or expanding social programs and militate against a decrease in tax rates. In short, a lenient tax rule which is inconsistent with the statute inflicts a spectrum of injuries—perhaps only the pinprick of principle, perhaps a serious wound.

The scope of the problem

It is impossible to document in any rigorous way the scope of the problem of Treasury leniency in rulemaking. Every tax professional has his or her own list of detested (or cherished) rules of dubious legality. Often, for obvious reasons, the beneficiary of the rule is not anxious to publicize it, so many such rules have no notoriety. At this point, I shall list a number of rules whose consistency with the Internal Revenue Code could reasonably be questioned. Some of these rules still exist; others have been weeded out, but only after having thrived for years.

(a) Scholarships given the children of private university faculty members (at their own institutions or at other institutions) are not taxed to the parent or the child, even though the parent's services created an entitlement to the scholarship.[2] This rule illustrates a rather common phenomenon: it has created a substantial reliance interest. Many academic employers make use of this fringe benefit and it is taken for granted by its recipients. The Service recently proposed regulations which would tax such scholarships,[3] but the proposals were withdrawn after they met a barrage of protests.[4]

(b) The deduction of five years' prepaid interest was permitted for many years.[5] This rule gave rise to a huge volume of tax avoidance transactions [6] before it was ultimately revoked.[7]

(c) Free travel fringe benefits given to airline employees are not taxable.[8]

(d) Professionals, such as doctors and lawyers, are given far more favorable treatment than other self-employed persons in applying the maximum tax on personal service income.[9]

(e) The Treasury traditionally viewed group life insurance protection provided by an employer as nontaxable to an employee.[10] This fringe benefit ultimately became so significant that it was legitimized by statute.[11] Perhaps this anomalous statutory provision would never have been enacted but for the reliance interest created by prior rulemaking.

(f) For several years the Treasury viewed a stock option given by an employer to an employee as nontaxable on exercise if "noncompensatory." [12] As a result, stock options became so popular that Congress ultimately enacted legislation conferring generous tax treatment on restricted stock options.[13]

(g) A regulation providing an option to immediately deduct intangible drilling costs of productive oil and gas wells was probably contrary to the statute.[14] However, an enormous reliance interest was created by the regulation; when it was judicially questioned, Congress enacted a theoretically unjustified statute which sanctioned the practice.[15] The case casting doubt on the lenient regulation arose only because of an unusual difference of opinion between the Commissioner of Internal Revenue and the Secretary of the Treasury.

(h) Rulings allowing the immediate deduction of prepaid intangible drilling costs and prepaid state and local income or property taxes [16] seem vulnerable to attack.

(i) The Treasury ruled that a distribution from a qualified pension plan occurring by reason of a reorganization produced a capital gain, even though the employee continued in the same job for a new entity.[17] Although the Tax Court thought this ruling erroneous,[18] it was powerless to alter the situation. Ultimately, the ruling was revoked.[19]

(j) Regulations which classify entities as partnerships or corporations [20] have been heavily criticized by many commentators.[21] These regulations preclude the IRS from treating as corporations many limited partnerships organized to exploit tax shelters. As often occurs, the favorable regulation now has powerful political backing which apparently forestalls the Treasury from revoking the regulation.[22] The Treasury is pinning its hopes on litigation by which it seeks to circumvent the terms of its own regulation.[23]

Undoubtedly, any person working in the tax field could extend this list by adding his or her own favorites.[24] Some of the rules on the list will strike most tax professionals as vulnerable to judicial challenge (either now or at the time they were outstanding); others may seem probably correct. Some of the rules remain outstanding; some have been corrected by the Treasury itself, but only after substantial periods of time.[25] Still others have been confirmed by Congress, a decision reflecting the almost irresistible political pressure generated by threats to a long-standing lenient rule.

Avenues of protection

If the presence of defectively lenient tax rules presents an important problem of tax administration, what avenues of protection are available? Certainly, reconsideration by the Treasury is the swiftest and best approach. The Treasury can and does re-examine its own rules; such reviews may be stimulated by outsiders who criticize the rules or by petitions to reconsider the rules.[26] They may be prompted by internal changes of position. However, Treasury reconsideration of its rules is not an entirely satisfactory solution to the problem. No agency enjoys admitting that a prior position was erroneous, and none relishes exhuming a matter thought to be forever settled.

Moreover, it is commonly suspected by outsiders that the political and economic importance of the beneficiary of lenient rules led to adoption of the dubious rule in the first place [27] and precludes an even-handed reconsideration. Indeed, it seems fairly obvious that well-organized political pressures can abort threatened changes in popular rules.[28] The fact that the beneficiaries of lenient rules are often such powerful interests as the oil and gas industry, important charities, private universities, or the real estate construction industry, gives rise to justifiable doubts that the agency can be relied upon to correct an unwarranted rule on its own.[29]

Many people would also argue that Congressional oversight is sufficient protection against dubiously lenient tax rules. Certainly, Congress has often acted, usually to confirm such rules after they have been questioned.[30] And the important policy issues raised by lenient rulings should ultimately be resolved by Congress.[31]

The shortcomings of congressional review

But many lenient tax rules are sufficiently obscure that they will never be called to the attention of Congress. Needless to say, the beneficiaries of the rules generally prefer to keep them as obscure and unknown as possible. Other rules do not lend themselves to legislative solution.[32]

But most significantly, the political posture in which Congressional reconsideration arises casts grave doubt on this avenue of protection. The persons seeking tax reform (through correction of erroneous lenient rulings) have no national constituency, typically, they are poorly organized and thinly financed. However, the beneficiaries of the largesse are frequently well organized, lavishly financed, and very highly motivated. They may well have the Treasury on their side. Thus, the prospects for an even-handed Congressional evaluation of the propriety of tax rules are dim.

Another shortcoming of reliance on Congressional review of lenient rules is the inertia factor. Persons who question rules are attacking the status quo; it is they who must try to initiate the change, over the opposition of the beneficiaries of the rule (and often the Treasury). Congress is a powerful, but very sluggish monster; it is unlikely to initiate change unless powerful interests are demanding it. This simple observation tends to explain why so few favorable tax rulings are ever reversed by Congress (in the absence of urging by the Treasury).

However, if a judicial decision invalidates a tax rule, the Congressional inertia factor then favors tax reformers. If the courts invalidate a lenient rule, it is the beneficiaries of the rule who must initiate change through the legislative process and undergo all the

Footnotes at end of article.

difficulties and frustrations of moving Congress to act. It is true, certainly, that these difficulties have been overcome at times and the beneficiaries of questioned or invalidated tax rules have succeeded in reincarnating them.[33] But the Treasury may well switch sides after its position has been disapproved by a court. This would, in many cases, effectively thwart Congressional reinstitution of invalidated lenient rules.

A role for the courts

If administrative review and Congressional oversight are important but insufficient checks on lenient tax rules, what of judicial review? Should the courts have a role to play in assessing the legality of such rules? At present, judicial review is unavailable.[34] However, in the opinion of the author, judicial review of lenient tax rules would serve a salutary purpose of tax administration.

In evaluating judicial review, it is essential to place the problem in perspective. Judicial review of agency rules has become the norm. Nonreviewability is the rare exception. Today, in administrative law, it is almost a truism that judicial review is to be favored, to be presumed. Judicial review is widely considered a wise antidote to administrative lethargy and control of administrative agencies by regulated interests. No longer is judicial review considered an unwarranted interference by the courts in the affairs of the agencies; on the contrary, the courts and agencies are viewed as engaged in a collaborative effort in implementing the will of Congress.[35]

In interpreting federal statutes, the courts strain to find that review has not been precluded [36] or committed to agency discretion.[37] Many rules that once would have been considered not ripe for review are today routinely reviewed.[38] The barrier of sovereign immunity has been removed by statute[39] and other statutory changes have simplified jurisdictional and venue problems.[40] The courts often feel at liberty to impose procedural requirements on agency action[41] and to take a "hard look" at the assumptions, hypotheses, and factual data on which agency rules rely.[42] It is no exaggeration to say that judicial review of agency rules has undergone a revolutionary change in a brief span of years.[43]

Historically, the standing requirement has been a serious obstacle to those seeking judicial review of administrative rules. But in recent years, the law of standing has been entirely recast, and many plaintiffs now have standing to obtain review without benefit of any statute more specific than the Administrative Procedure Act, [44] even though prior law would have required dismissal of the case. Today it is well recognized that a television viewer has standing to complain of FCC leniency toward a licensed company; [45] any person with even a remote and tangential interest in an environmental issue can complain in court of regulatory policies destructive of the environment.[46] Competitors, or others in a business relationship to persons receiving favorable regulatory treatment, can attack such treatment.[47] Consumers have free rein to attack rules harmful to their interests.[48] Judicial review has become the norm; nonreviewability the rare exception. Why should judicial review of lenient tax rules be the exception rather than the rule?

The next section of this paper details briefly the difficulties presently confronting challengers of Treasury leniency in the courts. Then a statutory solution will be suggested. Finally, the proposed statute will be explained and defended; and some of the reasons why judicial review of lenient tax rules might be opposed will be discussed.

2. OBSTACLES TO JUDICIAL REVIEW OF TREASURY LENIENCY

Recent developments in the law of standing have made it virtually impossible for anyone to mount a judicial challenge of a lenient tax rule. These developments contrast sharply with the general broadening of the standing rules for other plaintiffs. This section will sketch the standing problem briefly, and will set the stage for a detailed discussion of a statute specifically conferring standing to challenge lenient tax rules.[49]

Persons whose only interest in a dispute is as a citizen or as a taxpayer clearly lack standing in the absence of a statute conferring it. In *Flast* v. *Cohen*,[50] the long-established rule that a federal taxpayer lacks standing [51] was relaxed to a limited extent. The plaintiff challenged a federal spending program as violative of the establishment clause of the First Amendment. The *Flast* decision established that the plaintiff must have a personal stake in the dispute to have standing. This restriction on standing is based on the case or controversy limitation of Article III; additional standing restrictions are merely "prudential."

The Supreme Court found the requisite personal stake in the *Flast* situation because there was a nexus between plaintiff's status (taxpayer) and the program (taxing and spending); moreover, plaintiff alleged a specific (rather than general) constitutional inhibition on the spending program. Unfortunately, the *Flast* decision is not clear on whether these requirements—that plaintiff challenge a spending rather than a regulatory program, and that a specific constitutional limitation bar the expenditure—are constitutional or prudential limitations.[52]

The *Flast* case, originally hailed as a "cornerstone" of the law of standing,[53] has proved to be little more than an aberration. All attempts to expand it have failed.[54] For example, persons challenging primarily executive action (as distinguished from Congressional exercise of the spending power) have no standing under *Flast*.[55] Similarly, citizens, as opposed to taxpayers, have no standing.[56] Thus, *Flast* confers standing to challenge violations of the establishment clause through appropriations—and apparently that is all. Taxpayers challenging Treasury interpretations of tax laws cannot meet the *Flast* criteria.[57] However, it should be noted that *Flast* did establish one essential point: a federal taxpayer can suffer an injury sufficient to confer Article III standing. *Flast* is, therefore, a hopeful portent for a statute conferring standing on taxpayers.

The EKWRO case

Persons challenging tax interpretations, and claiming an injury more particularized than that imposed on taxpayers in general, have met with no recent success.[58] The leading case is *Simon* v. *Eastern Kentucky Welfare Rights Organization* (hereinafter referred to as *EKWRO*).[59] The plaintiffs in *EKWRO* were poor people who had been turned away when they sought reduced charge medical care at private hospitals. The dispute concerned the correctness of an IRS ruling [60] that a private hospital could be "charitable" even though it charged poor persons the full price for all nonemergency services.

The plaintiffs in *EKWRO* claimed standing under section 702 of the Administrative Procedure Act, claiming to be adversely affected or aggrieved within the meaning of a relevant statute. This claim was indeed a plausible one, in light of earlier Supreme Court interpretations of this statute which required only an "injury in fact." [61] However in *EKWRO*, the Court imposed strict rules based on causation and remediability. The plaintiffs lacked standing because their pleading failed to provide a causal link between the IRS ruling and the hospitals' decision to deny them service. Similarly, they could not allege that a court-ordered change in the ruling would cause the hospitals to provide them service.[62]

The *EKWRO* decision was the first to impose strict requirements of causation and remediability in a case challenging an administrative rule as being inconsistent with statutory requirements. However, *EKWRO* drew on several earlier constitutional cases which imposed these requirements. For example, in *Warth* v. *Seldin*,[63] plaintiffs were both poor people and builders who attacked a system of exclusionary zoning. The poor people lacked standing since they failed to point to a specific housing project which they could have afforded and which would have been built but for the zoning requirements. Similarly the builders lacked standing since they failed to allege any specific project currently thwarted by the zoning law.[64] Although it is not crystal clear, it would appear that the causation and remediability requirements imposed by *Warth* and *EKWRO* are constitutional, rather than prudential.[65]

The *EKWRO* causation requirement apparently will stifle complaints against lenient tax treatment brought by a competitor as well as a customer of the favored taxpayer. In the *ASTA* case,[66] travel agents attacked the legality of IRS' failure to tax the profits from promoting tours which were earned by a charity. The court observed that a change in the IRS' policy might well produce no benefits to the travel agents. Imposing a tax might not change the price of the services offered by the charity; even if the charity's price rose, the clients might continue to patronize the charity rather than the plaintiffs.

The zone of interest test

Another barrier to the standing of plaintiffs attacking Treasury leniency has been a strict application of the zone of interest test which requires that the interest asserted by a plaintiff be "arguably" within the zone of interests either protected or regulated by the statute in question.[67]

In *Tax Analysts & Advocates* v. *Blumenthal*,[68] the plaintiffs attacked rulings which granted the foreign tax credit to royalties paid by international oil companies. Plaintiff's standing was based on his ownership of a domestic well; he received only a deduction, not a credit, for his royalties. The court found that this competitive disadvantage supplied the necessary injury in fact,[69] but ruled that the interest asserted by plaintiff was outside the zone of interest arguably protected or regulated by the foreign tax credit. That provision was designed only to protect taxpayers operating abroad from double taxation, not to either benefit or penalize their domestic competitors.[70]

Thus it seems unlikely that anyone—whether it is a taxpayer, a customer, or a competitor—has standing under present law to attack lenient tax rules.[71] If such rules should be judicially reviewed, it is necessary to consider a statute which would confer standing. A proposed statute which would grant standing to challenge lenient tax rules is set forth in the box.

3. THE CONSTITUTIONALITY OF THE PROPOSED STATUTE

Undoubtedly, constitutional attacks would be leveled against such a statute. Consequently, the first task in defending it is to inquire concerning its constitutionality. In the author's opinion, the statute is constitutional.

(a) Taxpayer Standing by Statute:

It seems unlikely that serious Article III problems will arise in connection with a statutory grant of standing to anyone who has an injury defined by the statute.[72] Congressional authorization of the suit solves the problem of separation of powers perceived to be present in so-called public actions.[73] Sensitive to becoming a modern counterpart of the Council of Revision, the Court is reluctant to become the repository of every statutory or constitutional grievance which a plaintiff brings to it. But, if Congress has determined that the challenge is appro-

Footnotes at end of article.

priate, the judiciary does not overstep its proper limits by entertaining the challenge.

Moreover, Congressional approval of the action should dispel concern about whether the plaintiff can be expected to present his case with appropriate vigor and whether the parties are sufficiently adverse, both as required by Article III.[74] Indeed, the vigor of the plaintiff's presentation and the adverseness of the parties has never been strongly correlated with the nature and extent of plaintiff's injury.[75] Thus, a finding by Congress that the requisite vigorous presentation and adversity is likely to be present should weigh heavily with the Court. Finally, the issues presented (whether a statute and a rule are consistent, or whether procedural requisites for rulemaking have been met), and the relief sought (a declaratory judgment that the rule is unlawful), are the sorts of business routinely done by the federal courts. The issues are therefore presented in a "form historically viewed as capable of judicial resolution." [75a]

A statute conferring standing on all citizens would probably be constitutional, if the statute first defined a right possessed by all citizens and allowed any citizen to sue to vindicate that right.[76] For example, under the Freedom of Information Act,[77] any person has the right to request information from the government, regardless of need; if the information is not forthcoming, a right of action is provided. The constitutionality of this statute apparently has not been questioned. The plaintiff has the requisite constitutional injury because he has been denied a benefit to which the statute entitles him. Similarly, Congress has granted standing to "any person" to challenge the failure of the Environmental Protection Agency to perform a nondiscretionary duty owed to anyone (including the United States) in violation of emission standards of limitations.[78] Presumably, the basis of this provision is that everyone in the United States has a right to be free from environment-degrading action or inaction by the EPA.

Congress can grant standing by statute

Justice White's frequently cited concurring opinion in *Trafficante*[79] is significant authority for the proposition that Congress can create a right and then give a particular plaintiff standing to enforce that right, even though, in the absence of statute, the plaintiff would have no standing. *Trafficante* involved a complaint by a white resident of an apartment complex that the landlord was discriminating against minority tenants. The legislative history of the applicable federal statute suggested that the harm done by racial discrimination in housing extended to the whole community, not merely to minority victims. The statute provided that anybody who claimed to be injured could complain to the agency and had a right to sue. Justice White explained that the case or controversy requirement was met where a statute gave a right to sue to everyone who is authorized to complain to the agency, even though that same complainant would have no Article III standing in the absence of the statute.

Thus, the proposed statute begins by declaring that every taxpayer is injured by Treasury rules which are inconsistent with the Code or otherwise unlawful. The injury (which could be elucidated by legislative history or written directly into the statute) is that lenient Treasury rules interfere with both horizontal and vertical equity, reduce tax collections, and increase inflation, government borrowing, and the interest burden of the national debt. These effects tend to preclude the possibility of cuts in tax rates as well as increased appropriations for new or existing programs. Since the statute states that all taxpayers are economically injured by rules which have this effect, it should follow that all of them suffer injury in fact in the constitutional sense.

To be sure, the injury suffered by all taxpayers is generalized, not particularized. The generality of the injury would preclude judicial review in the absence of statute.[80] But in *Warth* v. *Seldin*,[81] the Court made it clear that the requirement of particularity of the injury was prudential, not constitutional. Therefore, this requirement can be removed by statute. Moreover, in a real sense, the injury is particularized; the statute requires a plaintiff first to petition for the repeal of the rule. If this relief is denied, the plaintiff has suffered a particularized injury in the same way as a Freedom of Information Act plaintiff suffers an injury from being denied the information requested.[82]

Finally, it seems clear that taxpayers suffer an injury in fact sufficient to meet Article III standards, at least with the aid of a statute. How else to explain *Flast v. Cohen*,[83] allowing a federal taxpayer to challenge a taxpaying-spending decision under the Establishment Clause? Surely, the impact upon a taxpayer from a failure to tax other taxpayers is identical to the injury described in *Flast*—unlawful spending. To be sure, the *Flast* decision contains a further limitation: the taxing-spending provision must contravene a *specific* constitutional limitation. But the requirement is attributable to the fact that no statute conferred a right to sue. Therefore, it was necessary to establish that the plaintiff as a taxpayer had an interest which the Court could vindicate. The Establishment Clause provided such an interest.[84] But where Congress has first defined a right possessed by taxpayers, and conferred standing to vindicate that right. *Flast* would be strong authority for upholding the statute. Moreover, the Court has traditionally entertained taxpayer actions appealed from state courts, provided there is a genuine "pocketbook injury" to the taxpayer plaintiffs.[85] Since Article III standards are applied in such cases, it seems clear that a taxpayer can suffer economic injury which is sufficiently "distinct and palpable" [85a] from taxing or spending decisions, where the right to be vindicated is defined by the Constitution or by a federal or state statute.

(b) Competitor or Customer Standing by Statute:

The proposed statute attempts to overrule *EKWRO* [86] and *ASTA*[87] by providing that persons suffer economic injury in fact when their interests are impaired directly, indirectly, or incidentally, by a rule or regulation.[88] Such persons are then given standing to sue to remedy this injury.[89] Surely, the patients denied standing in *EKWRO*, or the competitors denied standing in *ASTA*, can meet this standard.

However, the constitutionality of this provision is arguable, for it abrogates the strict causation and remediability requirements of *EKWRO*.[90] It may be that these requirements are incorporated within the irreducible minimum of injury necessary to meet the standing rules of Article III. However, it seems unlikely that the Court would so hold. As previously explained, it seems clear that Congress can create a right to be free from a particular form of government injury, and then give standing to vindicate that right.[91] This is precisely what the statute attempts; it confers a right on persons who are indirectly or incidentally injured by an unlawful rule benefiting their competitor (or someone else in a business relationship with them) to be free of such injury, and gives standing to sue to remedy the injury. Since the right is to be free from indirect or incidental harm, surely persons suffering such harm will have standing.

Moreover, the causation and remediability requirements seem to be instances of the broader rule that nonstatutory standing cannot be based on an injury which is too speculative or hypothetical.[92] But whether particular injuries are too speculative is very much a matter of degree, not an absolute distinction. Accordingly, it seems clear that Congress would have power to define where the line should be drawn, whether such power flows from Congress' power to define the jurisdiction of the federal courts [93] or whether it flows from the taxation power together with the necessary and proper clause.[94]

(c) Standing to Recover the Penalty:

Subsection (e) of the proposed statute provides for a $100 payment b ythe government to a prevailing party (other than the Attorney General). This provision is designed to bring the statute under the authority of the cases supporting qui tam actions. A qui tam action is one brought pursuant to a statute which orders that the plaintiff recover a bounty for a successful suit. For example, in *United States ex rel Marcus* v. *Hess*,[95] the statute allowed anyone to file suit against a person who had defrauded the United States. It provided that any damages recovered would be shared between the United States and the plaintiff. The Supreme Court upheld the validity of the statute, construing it very generously in the plaintiff's favor.

The $100 bonus given a successful plaintiff under the proposed statute would seem akin to the potential recovery of damages under the statute involved in the *United States ex rel Marcus v. Hess*. It seems that the pecuniary benefit to the plaintiff, if he wins the case, is sufficient to give him standing under Article III.[96] At the same time, the $100 bonus is hardly sufficient to attract a rash of litigation since it would be far less than the attorney's fees likely to be incurred in the case.

(d) Standing to Represent the United States:

Still another technique is employed in the proposed statute to assure its constitutionality. The statute first confers standing on the Attorney General to sue the Secretary of the Treasury in the event the Attorney General believes that a Treasury rule is unlawful.[97] It then provides that if the Attorney General declines to sue, a private individual can then sue on behalf of the United States asserting the same claims that the Attorney General could have asserted.[98]

Apart from constitutional concerns, it seems quite appropriate to lodge the primary enforcement responsibility in the Attorney General. The claim that a lenient tax rule is unlawful is really a claim on behalf of the public interest. It would seem that the Attorney General is the most appropriate party to vindicate the interests of the public at large. Therefore, the proposed statute requires that any taxpayer, competitor, or other aggrieved person must petition the Attorney General to bring suit. [99] Only if the Attorney General declines to do so, whether because he believes the rule is lawful or because he lacks personnel ir other resources to conduct the litigation, can the private plaintiff proceed.[100]

The constitutional argument in favor of the suit runs as follows: The Attorney General clearly has standing to sue to vindicate the public interest.[101] Indeed, his standing has often been recognized even in the absence of statute.[102] Consequently, with the aid of a statute, there could be no doubt that he is an appropriate party under Article III.

Moreover, the Attorney General clearly can be given standing to sue another officer of the federal government. Many Supreme Court cases have sustained the standing of a federal government representative (such as the Attorney General) to seek judicial review of the decisions of another federal agency.[103]

Finally, it would seem that Congress could lodge this law enforcement responsibility in any person it chooses, even though that person is not a paid employee of the executive branch.[104] Thus, Congress could decide that a "private attorney general" [105] in the most

Footnotes at end of article.

literal sense could litigate on behalf of the United States.[106]

4. IN DEFENSE OF THE PROPOSED STATUTE

This section will discuss the criticism that might be directed at the proposed statute (aside from constitutional arguments).

(a) Floodgates. It could be argued that this statute would open the floodgates to a huge amount of litigation which would tie the IRS in knots and congest the courts.[107] I think that this floodgates argument, like those forthcoming whenever an expansion of standing doctrine is at issue, is greatly exaggerated. For one thing, taxpayer actions against states and municipalities are almost universal; these actions permit taxpayers or private citizens to challenge any city or state expenditure, even though in many cases the action questioned actually has nothing to do with taxing or spending. The literature contains no complaints that any courts have been flooded or that any agency has been unduly hampered in its job by such litigation.[108]

The proposed statute contains no provision for attorney's fees to the prevailing party. Therefore, it will not attract a pack of hungry lawyers. Surely the $100 payment to the plaintiff would not begin to compensate for the costs of extended litigation through trial and appeal. Moreover, the costs of suit (other than attorney's fees) are imposed on the plaintiff if he loses, a not substantial item in protracted litigation.[109] (Indeed, if Congress wished to do so, it could impose a requirement that, in the court's discretion, the plaintiff be required to post security to cover the costs borne by defendants if plaintiff loses.)[110] The tremendous costs and burdens of protracted federal court litigation will discourage all but the most determined and vigorous plaintiffs from attacking Treasury rules.[111]

One quite valid concern with a statute like the one proposed is that it will attract tax protestors. There are many persons who appear to devote all their time and energy to battling the IRS. Such persons might welcome an opportunity to litigate the taxes of others. The statute deals with this problem by giving the trial judge the power to dismiss the action if it appears that the plaintiff does not fairly and adequately represent the interests of all taxpayers.[112] Thus, persons litigating the matter pro se or with only a perfunctory investment in research could be hastened from the court.

To further limit the impact of the statute, the definition of attackable rules excludes any that could be effectively challenged through the ordinary procedures in the Tax Court, the District Court, or the Court of Claims.[113] This provision is designed to avoid undercutting the policies behind the Anti-Injunction Act and the Declaratory Judgment Act[114] which require that taxpayers harmed by a rule forego litigation until the rule is actually applied against them (or against someone else) by the IRS. Therefore, the statute will not affect the rules prescribed in such cases as *Bob Jones Univ. v. Simon*[115] which prevent premature litigation of tax rules which increase someone's taxes.

Considering the limitations imposed by the section, and the high costs of litigation, it simply is not credible that the section will open the floodgates. If the section does produce an unexpectedly large amount of litigation, Congress can easily introduce further limitations.

(b) Adversaries of the Treasury. A valid concern with a statute conferring standing to challenge lenient rules is that the Treasury may not be wholehearted in its defense. Indeed, it may be sympathetic with the plaintiff's position. This might occur in cases (like that of the rule which excludes scholarships given the children of faculty members) where the Treasury's attempt to change its pro-taxpayer policy was apparently forestalled by vehement opposition.

This problem is dealt with by the statute in several ways. First, it provides an absolute right of intervention for a person who claims that his interests would be damaged by a decision in favor of the plaintiff.[116] Thus, the beneficiaries of the largesse clearly can enter the suit and take part in each aspect of the litigation. However, in order to prevent delays or confusion attendant upon the presence of too many intervenors, the court would have power to control the case by limiting either the number of intervenors or the mode of their participation. These provisions would be parallel to rules for mandatory intervention presently embodied in Rule 24 of the Federal Rules of Civil Procedure.

In addition, the statute provides that if the court is concerned that the interests of the beneficiary may be impaired or impeded, the court is empowered to order the joinder of one or more additional persons as necessary parities.[117] Thus, if no beneficiaries intervened, or if the intervenors mounted an inept defense of the rule (and the Treasury's defense was also inadequate), the interests of other beneficiaries might, as a practical matter, be injured and the court could and should order them (or some of them) to be joined.

The decision in a case in favor of the plaintiff would collaterally estop the Treasury and any intervenor or necessary party from relitigating the issues involved. It would not bind any other person, who, in litigation involving his own taxes, later seeks to assert that the regulation or rule was correct all along.[118] Needless to say, however, the decision in the plaintiff's favor would probably be followed as a matter of stare decisis but it need not be.[119]

(c) *IRS Has Opportunity to Consider.* One objection to a statute allowing standing to challenge lenient rules is that such an action usurps the independence of the Treasury to modify its own rules. Thus, an important limitation upon the rights of any plaintiff to bring suit under the proposed statute is that notice must be given the Treasury prior to filing, by means of a petition to revoke the rule.[120] The Treasury is given 120 days to consider the petition.[121] In some cases, therefore, the lawsuit may be mooted by repeal or modification of the rule.[122]

(d) *Ripeness problems.* Another valid concern with a statute conferring standing is that some rules might not be ripe for judicial consideration in the absence of actual application. In some cases, the judicial decision might be facilitated by concrete, particularized facts. In such cases, the court can still dismiss the action as unripe for review.

However, many rules, including interpretive rules and policy statements, have been reviewed by the courts in advance of actual application.[123] Under the *Abbott Laboratories*[124] formula, the variables are the plaintiff's need for immediate review and the fitness of the issue for judicial resolution. Of course, the plaintiff's need for immediate review would vary, depending upon whether the plaintiff was a competitor or customer[125] of the favored taxpayer, or only an aggrieved taxpayer. Another factor might be the magnitude of the revenue loss incurred as a result of the rule.[126] The fitness of the issue for review would turn upon the extent to which purely legal issues were presented which would not be further illuminated by subsequent developments. Also relevant are the degree of formality and finality involved in the rule. For example, the court might be more willing to find a regulation ripe for review than a private ruling issued at a relatively low level by the Service with apparently relatively little consideration.[127]

Thus, there may well be lenient tax rules which are not ripe for immediate review. However, the ripeness doctrine should be applied cautiously in this context. There may never be a time which is more appropriate for judicial review, since the agency will never actually "apply" its rule. The favored taxpayer will simply engage in private conduct and the agency will do nothing. And the circumstances of the private conduct might be difficult or impossible for the plaintiff to ascertain. Moreover, the variable concerning the plaintiff's need for immediate review should be applied cautiously, assuming Congress decides that every taxpayer suffers an injury from an unlawful erroneous rule. There will be no time at which such injury is demonstrably greater than some other time.

(e) Prospectivity of decision. If a judicial decision striking down a lenient rule were retroactive in effect, there would be real concern that unexpected tax consequences would be visited on transactions entered into in good faith reliance on the rule.[128] Ordinarily, Treasury revocation of rules is prospective in effect.[129] The same should be true of judicial decisions invalidating lenient rules.[130] The degree to which the decision should be retroactive or prospective, and the precise terms of a prospective decree, would be left in the sound decision of the trial court.

5. CONCLUSION

Although the courts were once reluctant to review administrative rules in advance of their application, such review has now become commonplace. Where suits were once dismissed for lack of standing or ripeness, or because of sovereign immunity, or because the action was committed to agency discretion or review was precluded, or for reasons relating to jurisdiction or venue, today the petitions are routinely heard. Although the scope of review of rules has not changed, the actual degree of scrutiny by the federal courts of both substance and procedure has greatly intensified.

It is time for this current of change to sweep away the anachronistic rules precluding suits which challenge lenient tax rules. Although the courts are reluctant to intrude into tax administration by hearing such suits, such concern should dissipate in the wake of statutory sanction. If Congress approves judicial oversight of IRS rulemaking, the courts should have no difficulty in providing it. The arguments against such a statute, whether on constitutional or policy grounds, are unpersuasive. Erroneously lenient tax rules threaten the horizontal and vertical equity of our tax structure. They also threaten public confidence in the independence of the Treasury and the fairness of the taxing system. As prescribed by a carefully drawn statute, judicial review would be good medicine for these ills.

Proposed taxpayer standing statute

(a) Rights of taxpayers—it is hereby declared:

(1) Taxpayers in general—That every taxpayer, as defined in subsection (i), suffers an economic injury in fact by reason of a rule or regulation as defined in subsection (g), which is inconsistent with the provisions of the internal Revenue Code, or otherwise unlawful;

(2) Competitors, etc.—That any person whose economic or competitive interests are impaired, directly, indirectly, or incidentally, by a rule or regulation, as defined in paragraph (g), suffers economic injury in fact if such rule or regulation is inconsistent with the provisions of the Internal Revenue Code, or otherwise unlawful;

(3) Right of review—That every person who suffers an injury described in subsection (1) or (2) has a right to be free of such injury and can enforce such right by maintaining a suit for judicial review as provided in subsection (b).

Footnotes at end of article.

(b) Authorization—The following persons shall have the right to obtain judicial review of any rule or regulation as defined in subsection (g):

(1) Attorney General—The Attorney General of the United States;

(2) Any taxpayer—Except as provided in subsection (h), any person described in subsection (a)(1).

(3) Competitor, etc.—Except as provided in subsection (h), any person described in subsection (a)(2).

(c) Prerequisites to suit—Before any person described in subsections (b)(2) or (b)(3) may obtain judicial review:

(1) Petition to repeal—Such person must petition the Secretary of the Treasury to revoke the rule or regulation in question.

(2) Petition to Attorney General—If the Secretary of the Treasury declines to revoke the rule or regulation in question, or 120 days elapse from the date of the petition to the Secretary, whichever occurs first, such person must petition the Attorney General of the United States to file suit to obtain judicial review of the rule or regulation in question. If the Attorney General declines to seek judicial review, or 60 days elapse from the date of the petition to the Attorney General, whichever occurs first, such person may file suit to obtain judicial review. If the Attorney General files suit for judicial review during the 60-day period described in the preceding sentence, no action may be brought by the persons described in subsections (b)(2) or (b)(3) unless the suit by the Attorney General is not vigorously pursued or is concluded without a decision on the merits.

(d) Rights of plaintiffs—A person described in paragraph (b)(2) or (b)(3) may assert any claims concerning the invalidity of the rule or regulation which the Attorney General could have asserted.

(e) Costs and payment—The costs of an action brought under authority of this section shall be assessed in accordance with section 2412, Title 28. If a person described in paragraph (b)(2) or (b)(3) is the prevailing party, such person shall be entitled to payment of $100 by the United States.

(f) Procedural rules—The following rules shall apply to actions brought under this section:

(1) Jurisdiction and venue—Actions under this section may be brought without regard to the amount in controversy in the United States District Court for the district in which the plaintiff (or any one of the plaintiffs) resides, or in the District of Columbia.

(2) Intervention—Any person who claims that his interests would be damaged if the plaintiff prevails shall be entitled to intervene in the action, but the Court shall have discretion to limit the number of intervenors, or limit their participation in the action, upon a finding that such limitation is needed to avoid undue delay or prejudice to the adjudication of the case.

(3) Joinder—The Court may require that any person be made a party if he is so situated that the disposition of the action in his absence may as a practical matter impair or impede his ability to protect his interests.

(4) Dismissal—The Court shall dismiss the action if it appears that the plaintiff does not fairly and adequately represent the interests of all taxpayers (if he is a person described in subsection (b)(2)) or others similarly situated (if he is a person described in subsection (b)(3)).

(5) Prospective relief—In the discretion of the Court, the relief to be granted a plaintiff may be prospective only.

(g) Rules which may be challenged—Any rule or regulation relating to any tax imposed by the Internal Revenue Code, which is published in the Federal Register, the Internal Revenue Service Cumulative Bulletin, or comparable medium of publication, or which is a written determination, as defined in section 6110(b)(3)(A), can be challenged under this section, except:

(1) Certain policies—A rule consisting of the Treasury's policy concerning whether to litigate or not to litigate particular issues, whether it will follow or not follow the decision of any court, or whether it will rule or not rule on particular transactions;

(2) Procedural rules—A rule of agency organization, procedure, or practice.

(h) Rules which increase taxes—No action shall be brought by a person described in subsections (b)(2) or (b)(3) if the lawfulness of the rule or regulation could be effectively challenged by the plaintiffs through litigation in the Tax Court or through an action for a refund in the Federal District Court or the Court of Claims.

(i) Taxpayer—For purposes of this section, a taxpayer is a person who has paid, or expects to pay, any tax imposed by the Internal Revenue Code during the calendar year in which the action described in this section is filed.

(j) Partial invalidity—If any provision of this statute, or the application thereof to any person or circumstance, is held invalid, the validity of the remainder of the statute and the application of such provision to other persons and circumstances shall not be affected thereby.

FOOTNOTES

[1] Administrative rules which are inconsistent with the statute are unlawful. In addition, a rule might be invalidly adopted because of procedural defects in the rulemaking process. *See*, e.g., *Simon* v. *Eastern Kentucky Welfare Rights Org.*, 506 F.2d 1278, 1290–91, n.30, (maj. op.), 1291–92 (diss. op.), 1293 (dissent to denial of petition for rehearing en banc), *rev'd on other grounds*, 426 U.S. 26 (1976).

[20] Reg. § 301.7701–2 and –3.

[21] *See, e.g., Hyman, Partnerships and "Associations": A Policy Critique of the Morrisey Regulations*, 3 J. Real Est. Tax. —— (1976).

[22] Proposed regulations which would have taxed most limited partnerships as corporations were almost immediately withdrawn.

[23] In *Larson* v. *Commr.*, the Tax Court first issued an opinion which read the regulations with extreme hostility in order to hold a limited partnership taxable as a corporation this opinion was later withdrawn in favor of a second one which read the regulations more literally and held that the partnerships were to be taxed as partnerships. 66 T.C. 159 (1976). The case is now on appeal to the 9th Circuit.

[24] Some additional examples:

a) Royalties paid by oil companies to foreign countries in the form of income taxes qualify for the foreign tax credit. *See Tax Analysis & Advocates* v. *Blumenthal*, ------ F.2d ------, 77–2 U.S.T.C. Para 9478, (D.C. Cir. 1977) pet. for cert. pending.

b) The failure to tax profits earned by a charity from organizing tour groups as unrelated business income. *See American Society of Travel Agents* v. *Blumenthal*, ------ F.2d ------, 72–2 U.S.T.C. Para. 9484 (D.C. Cir. 1977), pet. for rehearing pending (hereinafter cited as ASTA).

c) For more than 20 years, I.R.S. rulings allowed a "cost company" engaged in mining to avoid being treated as a taxpaying entity. *See* Rev. Rul. 77–1, 1977–1 I.R.B. 16, revoking Rev. Rul. 56–542, 1956–2 C.B. 327.

[25] Many egregiously doubtful rules have been changed by the Treasury, although often they remained outstanding for many years. For example, consider the rulings on prepaid interest, lump sum distributions, and proprietary stock options, discussed at text accompanying notes 5–7, 12–13, and 17–19 *supra*.

[26] See 5 U.S.C.A. § 553(e).

[27] Thus, it seems likely that vigorous lobbying by the private hospital industry caused the Treasury to rule that private hospitals can be tax-exempt even though all patients are charged full rates. Rev. Rul. 69–545, 1969–2 C.B. 117, further discussed at notes 59–65 *infra*. Similarly, many suspect some sort of political interference was behind the Treasury's ruling (later revoked) that the ITT-Hartford transaction qualified as a tax-free reorganization. *See generally International Telephone & Telegr. Corp.* v. *Alexander*, 396 F. Supp. 1150 (D. Del. 1975); *ITT-Hartford Rulings Issue: Did the Transaction Add Up to a Tax-Free Reorg?*, 41 J. Tax 4 (1974).

[28] Consider, for example, Treasury withdrawal of proposed regulations which challenge compensatory scholarships and limited partnerships. *See* text at notes, 2–4, 21–23 *supra*.

[29] The fact that many of the dubiously lenient rules used as examples have in fact been revoked by the Treasury should not suggest that most such rules are, in fact, revoked. Revocation of a rule by the Treasury is a sufficiently notorious event that it calls attention to the prior ruling. But the vast majority of lenient rules gain no notoriety because neither the Treasury nor their beneficiaries have highlighted them.

[30] For example, after commentators had questioned the asset depreciation range regulations, Congress wrote most, but not all of them, into law. *See* Bittker, *Treasury Au-*

thority to Issue the Proposed "Asset Depreciation Range Systems" Regulations, 49 Taxes 265 (1971); IRC § 167(m), 263(e). Similarly, consider the intangible drilling cost rules and the stock option rules, discussed at text accompanying notes 12–15, *supra*.

[31] *See* Thrower. *Public Interest Litigation to Affect Substantive Tax Decisions*, 27 Ntl. Tax J. 389 (1974) and Jaffe, *The Citizen as Litigant in Public Actions: The Non-Hohfeldian or Ideological Plaintiff*, 116 U. Pa. L. Rev. 1033 (1968). Jaffe analogizes judicial review of agency action to the role of the courts in checking state laws which unduly burden interstate commerce. Although Congress can and should resolve the issues raised by such laws through preemption statutes, the Supreme Court has played an indispensable role in protecting the national market through its commerce clause decisions.

[32] This may well be the case with the problem of distinguishing partnerships from corporations for tax purposes. *See* text accompanying notes 20–23 *supra*. But a decision invalidating the regulations could force the Treasury to draft new ones.

[33] Thus, the beneficiaries of favorable rules on stock options and intangible drilling costs managed to have the rules written into law after the courts of the Treasury had tried to alter them. *See* text at notes 12–15 *supra*.

[34] *See* text at notes 49–71 *infra*.

[48] *See*, e.g., *Reade* v. *Ewing*, 205 F.2d 630 (2d Cir. 1953); *Federation of Homemakers* v. *Hardin*, 328 F. Supp. 181 (D.D.C. 1971), *aff'd*, 466 F.2d 462 (D.C. Cir. 1972).

[49] The standing issue has been discussed in many excellent and comprehensive law review articles. *See*, e.g., Tushnet, *The New Law of Standing: A Plea for Abandonment*, 62 Cornell L. Rev. 663 (1977); Albert, *Standing to Challenge Administrative Action: An Inadequate Surrogate for Claims for Relief*, 83 Yale L.J. 425 (1974); Monaghan, *Constitutional Adjudication: The Who and When*, 82 Yale L.J. 1363 (1973); Scott, *Standing in the Supreme Court: A Functional Analysis*, 86 Harv. L. Rev. 645 (1973); Jaffe, *supra* note 31; Davis, *Standing: Taxpayers and Others*, 35 U. Chi. L. Rev. 601 (1968); Berger, *Standing to Sue in Public Actions: Is it a Constitutional Requirement*, 78 Yale L.J. 816 (1969); Jaffe, *Standing to Secure Judicial Review: Public Actions*, 74 Harv. L. Rev. 1265 (1961).

[50] 392 U.S. 83 (1968).

[51] *Frothingham* v. *Mellon*, 262 U.S. 447 (1923).

[52] The plaintiff in *Flast* challenged the program as unauthorized by the statute as well as unconstitutional. Unfortunately, the Court did not discuss the statutory claim, so it is not clear whether plaintiff had standing to assert it.

[53] Davis, *supra* note 49 at 601.

[54] *See generally* Note, *Taxpayer Standing to Litigate*, 61 Georg. L. Rev. 747 (1973).

[55] *Schlesinger* v. *Reservists Comm.*, 418 U.S. 208 (1974); *United States* v. *Richardson*, 418 U.S. 166 (1974); *Public Citizen. Inc.* v. *Simon*, 539 F.2d 211 (D.C. Cir. 1976).

[56] *Schlesinger* v. *Reservists Comm.*, *supra* note 55.

[57] Since there is no specific constitutional limitation violated by the rule. Moreover, the rule might not be considered as a Congressional exercise of the taxing and spending power. *See Tax Analysts & Advocates* v. *Blumenthal*, *supra* note 24.

[58] In several cases involving racial discrimination, plaintiffs were found to have standing to challenge IRS rulings which granted tax exemptions and assured deductibility for contributions. In *Green* v. *Kennedy*, 309 F. Supp. 1127 (D.D.C. 1970) (3 judge court), subseq. op. sub nom. *Green* v. *Connally*, 330 F. Supp. 1150 (1971), *aff'd* mem. sub nom. *Coit* v. *Green*, 404 U.S. 997 (1971), plaintiffs attacked the tax benefits given a segregated private school. The plaintiffs (school children and parents) had standing because the tax benefits provided a source of funds for private schools which undermined a court-ordered unitary public school system. In *McGlotten* v. *Connally*, 338 F. Supp. 448 (D.D.C. 1972) (3 judge court), plaintiff was a disappointed applicant for membership in a segregated fraternal order. His claimed injury was that the tax benefits generated funds to enable the order to maintain its segregated policies, and also that the tax exemptions constituted an endorsement of discrimination by the federal government. It is unclear whether these cases, arising in the unique context of racial discrimination, would survive EKWRO, discussed in text at notes 59–65 *infra*. At the very least, the cases are severely threatened by the strict causation requirements imposed by EKWRO.

In *Tax Analysts & Advocates* v. *Shultz*, 376 F. Supp. 889 (D.C. Cir. 1974), the court conferred standing to challenge a lenient gift tax ruling which enhanced the influence on political campaigns of large donors (thus reducing that of small donors). The plaintiff was a small campaign contributor. The court relied on the theory that a diminution in voting power is sufficient for standing citing *Baker* v. *Carr*, 369 U.S. 186 (1962). This case may be limited to the fact that it concerns voting in federal elections. However, like the race cases discussed in this footnote, much of the reasoning seems at war with *EKWRO*.

[59] 426 U.S. 76 (1976).

[60] Rev. Rul. 69–545, 1969–2 C.B. 117, revoking Rev. Rul. 56–185, 1956–1 C.B. 202.

[61] *Assoc. of Data Proc. Serv. Orgs.* v. *Camp*, *supra* note 47; *Barlow* v. *Collins*, *supra* note 47. These cases also require that plaintiff meet the "zone of interest" test, discussed at notes 67–70 *infra*. The "zone of interest" test was not discussed in *EKWRO*.

[62] The *EKWRO* majority opinion seems vulnerable to a criticism levelled by the dissents: it imposes unduly strict pleading requirements. If the plaintiffs had been allowed discovery, it is possible that they could have surmounted the causation and remediability problems through admissions by the hospitals that the decision to deny service in fact resulted from the IRS ruling, rather than from an economic decision unrelated to tax consequences.

[63] 422 U.S. 490 (1975). Similarly, see *Linda R. S.* v. *Richard D.*, 410 U.S. 614 (1973) *Linda R. S.* involved a constitutional attack by the mother of an illegitimate child against a Texas law which imposed support duties upon legitimate, but not illegitimate fathers. The Court observed that even if the law were struck down, and even if the father were prosecuted and convicted for nonsupport, the mother still might not receive any money.

[64] The *Warth* hurdle was surmounted in *Village of Arlington Hts.* v. *Metropolitan Hous. Dev. Corp.*, 97 S. Ct. 555 (1977). Both the builder and a buyer successfully pleaded a desire to build and buy houses in a project which had been specifically blocked by the city.

[65] See *American Society of Travel Agents* v. *Blumenthal*, *supra* note 24. *But see Tax Analysts & Advocates* v. *Blumenthal*, *supra* note 24.

[66] *American Society of Travel Agents* v. *Blumenthal*, *supra* note 24. *But see Tax Analysts & Advocates* v. *Blumenthal*, *supra* note 24, which held that a domestic competitor of international oil companies met the injury requirement. The plaintiff argued that giving the international companies a tax credit, rather than a deduction, for oil royalties was competitively harmful to him. Not only were his taxes higher, even though his economic situation was identical, but the value of his properties was decreased (vis-a-vis foreign properties) by the differential. However, it is far from clear whether this analysis is correct. The injury to plaintiff might be too indirect to meet constitutional requirements. The *ASTA* logic seems more consonant with *EKWRO*. Merely because a competitor is leniently taxed might make little or no difference in one's competitive position or the value of his investment. Similarly, the injuries claimed in *TAA* might well be considered excessively speculative or hypothetical to meet constitutional standards. *See O'Shea* v. *Littleton*, 414 U.S. 488 (1974); *Metcalf* v. *Nat'l Petroleum Council*, 553 F.2d 176 (D.C. Cir. 1977).

[67] The zone test was first promulgated by *Association of Data Processing Serv. Org.* v. *Camp*, and *Barlow* v. *Collins*, both *supra* note 47. The test was applied with considerable latitude by the Supreme Court in *Investment Co. Inst.* v. *Camp*, 401 U.S. 617 (1971). The zone test applies to plaintiffs whose standing is based on section 702 of the Administrative Procedure Act. The test is clearly not a constitutional requirement; it is either a prudential requirement imposed by the Court or an interpretation of the language of section 702. *EKWRO*, 426 U.S. at 39, no. 19.

[68] *Supra* note 24.

[69] *But see* note 66 *supra*.

[70] With unwarranted strictness, the court ruled out examinations of legislative history in applying the zone test (unless it provided a very clear indication); it also refused to look to any statutory provisions except the foreign tax credit. Finally, it refused to find a negative inference in the foreign tax credit which would deny the credit for royalties which were not, in substance, income taxes, thus protecting domestic competitors who paid identical royalties. For a similar strict interpretation of the zone test. *Rhode Island Committee on Energy* v. *Gen'l Serv. Admin.*, 561 F.2d 397 (1st Cir. 1977). For a more liberal interpretation, *see Int'l. Tel. & Tel. Corp.* v. *Alexander*, 396 F. Supp. 1150 (D. Del. 1975).

[71] Of course, it may be that *Tax Analysis and Advocates*, *supra* note 24, was correct on the injury in fact test, but wrong on zone of interests; and that *ASTA*, *supra* note 24, was wrong on the injury in fact test, but right on zone of interests. In that case, competitor standing would still be possible, notwithstanding *EKWRO*. Similarly, it may be that the race cases described in note 58 were cor-

rectly decided (perhaps on the ground that encouragement of racial discrimination by tax rulings harms racial minorities). But in the wake of *EKWRO* it is difficult to imagine the Supreme Court endorsing taxpayer standing in any case. This was the view of Justice Stewart, concurring in *EKWRO:* nobody has standing to challenge another's taxes. 426 U.S. at 46.

[72] This is the consensus of the commentators. *See* Tushnet, *supra* note 49 at 665–670; Monaghan, *supra* note 49 at 1375–79. Case law contains broad dicta to the effect that the Article III standing problems would not arise in the presence of a statute conferring standing. *See Linda R.S.* v. *Richard D., supra* note 63 at 617 n.3; *Sierra Club* v. *Morton,* 405 U.S. 727, 732 n.3 (1972); *United States* v. *Richardson, supra* note 55 at 178 n. 11; *Schlesinger* v. *Reservists Comm., supra* note 55 at 224 n.14; *Flast* v. *Cohen, supra* note 50 at 120, 130–33 (Harlan, J. dissenting); *Trafficante* v. *Metropolitan Life Ins. Co.,* 409 U.S. 205, 212 (1972) (White, J. concurring). More recent dicta have been more cautious. *See EKWRO, supra* note 59 at 41 n.22; *Warth* v. *Seldin, supra* note 63 at 501. They point out that even after Congress has acted, the plaintiff must allege a distinct and palpable injury to himself, whether or not it is shared with others.

[73] *See,* e.g., *United States* v. *Richardson, supra* note 55 at 188–97 (Powell, J. concurring).

[74] *See Flast* v. *Cohen, supra* note 50 at 106.

[75] *See* e.g., Scott, *supra* note 49 at 669–82.

[75a] *Flast* v. *Cohen, supra* n. 50 at 101.

[76] *See* Tushnet, *supra* note 49 at 669–70. Tushnet's excellent discussion of the issue focuses on the necessary and proper clause; if creation of the underlying statutory scheme is constitutional, it follows that the creation of citizen standing to enforce it would be necessary and proper in implementing a constitutional power.

[77] 5 U.S.C.A § 552(a) (3.

[78] Sec. 304 of the Clean Air Act Amendments, 42 U.S.C.A. § 1857h–2(a). Similarly, § 307 confers standing without any limitations at all. Id. § 1857h–5(b) (1). The constitutionality of these provisions has been queried by some courts. *See NRDC* v. *EPA,* 481 F.2d 116 (10th Cir. 1973); *NRDC* v. *EPA,* 507 F.2d 905 (9th Cir. 1974). Others have expressed no doubts about their validity. *See NRDC* v. *EPA,* 484 F.2d 1331 (1st Cir. 1973); *Metro. Wash. Coal. for Clean Air* v. *Dist. of Colum.,* 511 F.2d 809 (D.C. Cir. 1975). *See generally,* Currie, *Judicial Review under Federal Pollution Laws,* 62 Iowa L. Rev. 1221 (1977). Very broad grants of standing are not unusual in recent statutes. For example, "any person" can secure judicial review of rules under the Toxic Substances Control Act, 15 U.S.C.A. § 2618, and "any person" can sue anyone who violates any rules under the Act or the Administrator to compel him to perform a nondiscretionary act. 15 U.S.C.A. § 2619. Moreover, the Act provides for "citizen's petitions" to initiate or repeal a rule; it requires the Administrator to explain his reasons for denying such petitions and provides for judicial review to force the institution of a rule making proceeding 15 U.S.C.A. § 2620. The legislative history lists a number of similar statutes. S. Rep. 94–698, pp. 9, 12, 27–29, 1976–4 U.S. Code Cong. & Adm. News, 4499, 4502, 4517–19.

Another good example is 2 U.S.C.A. § 437h (a), giving standing to any person eligible to vote in a presidential election to bring suit to construe the constitutionality of the Federal Election Campaign Act. In *Buckley* v. *Valeo,* 96 S. Ct. 612, 631 (1976), the Court entertained challenges to the constitutionality of the statute; however, at least some of the parties had more concrete interests than those to be asserted by any voter. Consequently, the Court held that the action was appropriate under Article III without reaching the issues that would have been presented if only voters had been plaintiffs.

[79] *Trafficante* v. *Metropolitan Life Ins. Co., supra* note 72 at 212.

[80] *See Schlesinger* v. *Reservists Committee, supra* note 55; *United States* v. *Richardson, supra* note 55; *Sierra Club* v. *Morton, supra* note 72; *Frothingham* v. *Mellon, supra* note 51.

[81] *Supra* note 63 at 499.

[82] *See Trafficante* v. *Metropolitan Life Ins. Co., supra* note 72. Similarly, see the provision allowing a citizen petition to the EPA to institute or repeal a rule under the Toxic Substance Control Act. 15 U.S.C.A. § 2620, discussed in note 78, *supra.* This provision allows any such petitioner to obtain judicial review of denial of his petition; if successful, he can compel the administrator to institute a rulemaking proceeding.

[83] *Supra* note 50. There is some indication in *Flast* that the Court believes in a "best plaintiff" principle: that it would prefer to have the case brought by the person most directly injured. Consequently, it distinguished between taxpayers suing to vindicate a claim under the establishment clause (where nobody has a particularized injury) and under the free exercise clause (where presumably someone will have a direct injury). *Id.* at 104 n.24. *But see id* at 98, n.17. As in an establishment clause case, there may be no better plaintiff in a case involving a lenient ruling than a taxpayer or occasionally the customer-competitor denied standing by *EKWRO.*

[84] In contrast, in *Frothingham* v. *Mellon, supra* note 51, a taxpayer action attacking a federal spending program under the Tenth Amendment, the Court held that the Constitution conferred no rights to vindicate federalistic principles on individuals or states. This point was aptly made in *Schlesinger* v. *Reservists Comm., supra* note 55 at 224, n. 14, where the Court contrasts the plaintiff's action (under the incompatibility clause of the Constitution) with an action to vindicate the same interests but brought under a hypothetical federal conflict of interest statute. The Court stated that the requisite injury necessary to establish standing could flow from an invasion of the rights conferred by such a statute. Similarly, *see United States* v. *Richardson, supra* note 55 at 178 n.11. For the connection between standing doctrine and the requirement that plaintiff plead a right to be free of the injury done by the defendant, *see* Albert, *supra* note 49.

[85] *See Doremus* v. *Bd. of Educ.,* 342 U.S. 428 (1952) which held that a taxpayer had no standing in a case questioning Bible reading in the schools since there was no alleged or proved "pocketbook injury." In an earlier taxpayer's suit, *Everson* v. *Board of Education,* 330 U.S. 1 (1947), questioning expenditures for school busses, the Court heard the case. *Doremus* is cited with approval in *Flast* v. *Cohen, supra* note 50 at 102.

[85a] *Warth* v. *Seldin, supra* note 63 at 501.

[86] *See* text at note 59 *supra.*

[87] *See* text at note 24 *supra.*

[88] Stat. § (a) (2).

[89] Stat. /(b) (2).

[90] As well as those stated in *Warth* v. *Seldin, supra* note 63, and *Linda R.S.* v. *Richard D., supra* note 63.

[91] *See* text at notes 72–85 *supra.*

[92] *See, e.g., EKWRO, supra* note 59 at 41–46; *O'Shea* v. *Littleton, supra* note 66.

[93] Constitution, Article III, sec 2 *Cf. Katzenbach* v. *Morgan* 384 U.S. 641 (1966).

[94] Art. 1, sec. 8, clause 18. *See* Tushnet, *supra* note 49 at 669–70. Other constitutional objections to the proposed statute would appear to have little substance. It is not an attempt to Interfere with the prosecutorial discretion of the executive, since it involves only rulemaking, not adjudication. *Compare Linda R.S.* v. *Richard D., supra* note 63; *Dunlop* v. *Bachowski,* 421 U.S. 560, 575 n.12 (1975). Nor would the statute call for an advisory opinion. *See Tushnet, supra* note 49 at 677–79; K. Davis, *Administrative Law Treaties* § 21.01 (1958).

[95] 317 U.S. 537 (1943). See *also Marvin* v. *Trout,* 199 U.S. 212, 225–26 (1905).

[96] *See EKWRO,* n. 59 at 39, which states: "The necessity that the plaintiff who seeks to invoke judicial power stand to profit in some personal interest remains an Article III requirement." Similarly see *Harrington* v. *Bush,* 553 F. 2d 190 (D.C. Cir. 1977), which declares that the basic purpose of the doctrine of standing is that the individual complaining party have a connection to the controversy so that its outcome will demonstrably cause him to win or lose in some measure. Presumably, the prospect of winning the $100 bounty would be sufficient to meet this test.

[97] Stat. § (b) (1).

[98] Stat. § (d).

[99] Stat. § (c) (2).

[100] Should the Attorney General file suit but fail to prosecute the matter diligently, or should the case be dismissed without a decision on the merits, private plaintiffs could sue. Stat. § (c) (2).

[101] *See,* e.g., *United States* v. *Raines,* 362 U.S. 17 (1960) (clearly appropriate to give standing to Attorney General to litigate to protect private rights); *United Steelworkers* v. *United States,* 361 U.S. 39 (1959) (United States may be given standing to enjoin a strike to protect public rights).

[102] *See,* e.g., *New York Times Co.* v. *United States,* 403 U.S. 713, 741–48 (1971) (only Justice Marshall questioned the standing of the United States to sue to enjoin publication of Pentagon Papers); *United States* v. *City of Jackson,* 318 F. 2d 1, *reh. den.* 320 F.2d 872 (5th Cir. 1963); Note, *Nonstatutory Executive Authority to Bring Suit,* 85 Harv. L. Rev. 1566 (1972).

[103] *See,* e.g., *United States* v. *Nixon,* 418 U.S. 683 (1974); *Federal Maritime Bd.* v. *Isbrandtsen Co.,* 356 U.S. 481, 483 n. 2 (1958); *Secretary of Agriculture* v. *United States,* 347 U.S. 645 (1954); *United States ex rel Chapman* v. *FPC,* 345 U.S. 153 (1953); *United States* v. *ICC,* 337 U.S. 426 (1949); *ICC* v. *Jersey City,* 322 U.S. 503 (1944), *See Associated Ind. of N.Y.* v. *Ickes,* 134 F.2d 694, 704 (2d Cir. 1943), *vacated as moot,* 320 U.S. 707 (1943).

These cases require that conflicts between officers of the executive branch present issues traditionally justiciable and the litigants must be in fact adverse to one another. The question of whether a regulation is consistent with a statute is surely one which is traditionally justiciable. Presumably, the Attorney General would not institute litigation unless he believed the regulation was unlawful; vigorous presentation of the issues would be likely. Of course, if a particular suit appeared to be collusive or nonadverse, it could be dismissed.

[104] This theory could well be the basis for upholding actions by plaintiffs under qui tam statutes; they are private attorneys general enforcing the rights of the United States. *See* text at 95–96 *supra.*

It might be appropriate to make clear in the statute that a decision against the plaintiff would be res judicata against the Attorney General and all other persons seeking to represent the public interest.

[105] The phrase was coined by Judge Frank in *Associated Industries of New York* v. *Ickes, supra* note 103, and has often been employed in administrative law to describe the situation on which a plaintiff given statutory standing is allowed to represent the public interest in litigation. *See,* e.g., *Trafficante* v. *Metropolitan Life Ins. Co., supra* note 72, which recognizes the need for private attorneys general to enforce the federal open housing statute, since the Attorney General

lacks the resources necessary to enforce it. Since Congress had given a right to an entire community to be free of housing discrimination, it was appropriate to let any community member obtain judicial enforcement.

[106] The rule that provides that a litigant cannot represent the interests of another is prudential. *Warth* v. *Seldin, supra* note 63; *Flast* v. *Cohen, supra* note 50. The rule is shot through with exceptions. *See,* e.g., *Singleton* v. *Wulff,* 96 S. Ct. 2868 (1976). It clearly can be altered by statute. E.g., *Trafficante* v. *Metropolitan Life Ins. Co., supra* note 72. *See generally* Sedler, *Standing to Assert Constitutional Jus Tertil in the Supreme Court.* 71 Yale L.J. 599 (1962).

[107] *See Thrower, Public Interest Litigation to Affect Substantive Decisions,* 27 Ntl. Tax J. 389 (1974). *Cf. Louisiana* v. *McAdoo,* 234 U.S. 627 (1914). In *McAdoo,* a state which produced sugar attacked the Secretary of the Treasury for imposing too low a tariff on imported sugar. The case was dismissed on the grounds of sovereign immunity, but the Court noted that such actions would disturb the whole revenue system and could clog the wheels of government.

[108] *See generally* Note, *Taxpayer Suits: A Survey and Summary,* 69 Yale L.J. 895 (1960). Certainly, there has been no indication that *Flast* v. *Cohen, supra* note 50, which allowed federal taxpayer suits under the Establishment Clause, has led to any vast amount of litigation.

[109] These could include the costs borne by intervenors as well as by the Government. *See* Prop. stat. § (e).

[110] Compare the requirement in some states that plaintiffs in a shareholder's derivative suit post security for the expenses which will be borne by the defendants. *See* e.g., Cal. Corp. Code § 834(b).

[111] *See generally* Scott, *Standing in the Supreme Court—A Functional Analysis,* 86 Harv. L. Rev. 645 (1973).

[112] This is similar to the provision now applicable in class actions and shareholder derivative suits. *See* Fed. R. Civ. Proc. §§ 23(a)(4), 23.1.

[113] Stat. § (h).

[114] IRC § 7421; 28 U.S.C. § 2201. It might be well, however, to amend those provisions to make it clear that actions attacking lenient tax rules would be permissible.

[115] 416 U.S. 725 (1974); *Alexander* v. *Americans United,* 416 U.S. 752; *International Tel. & Tel.* v. *Alexander, supra* note 70.

[116] Stat. § (f)(2). A right to be heard in this situation could be based on constitutional due process. *See Int. Tel. & Tel. Corp.* v. *Alexander, supra* note 70, and Thrower, *supra* note 107.

[117] Stat. § (f)(3). Joinder of necessary parties in this situation is provided by Rule 19(a)(2)(i) of the Federal Rules.

[118] *Cf. Divine* v. *Commissioner,* 500 F.2d 1041 (2d Cir. 1974) (Commissioner not collaterally estopped to reassert his position after losing similar case against another taxpayer.)

[119] Since the plaintiff is representing the interests of the United States, a decision against the plaintiff would collaterally estop the Attorney General from relitigating the issue against the Treasury.

[120] Stat. §(c)(1). This petition would be identical to those filed under sec. 553(e) of the Administrative Procedure Act. This section allows any person to petition an agency for the issuance, amendment, or repeal of a rule.

[121] A comparable limitation is placed on citizen suits under the Clean Air Act and the Federal Water Pollution Control Act. *See Nat. Res. Def. Conc.* v. *Train,* 510 F.2d 692 (D.C. Cir. 1975).

[122] The legislative history of the statute might provide that the courts could place the case off calendar upon a bona fide assertion by the Treasury that it is continuing to study the matter and considering possible modification of the rule. Of course, the plaintiff's case could not be sidetracked indefinitely by such an assertion.

[123] *See* Asimow, *Public Participation in the Adoption of Interpretive Rules and Policy Statements,* 75 Mich. L. Rev. 521, 567–69 (1977).

[124] *Abbott Laboratories* v. *Gardner,* 387 U.S. 136 (1967).

[125] Thus the patients who were plaintiffs in *EKWRO* might have a far more urgent need for review than Mr. Field, the owner of the competing oil well in *TAA* v. *Blumenthal, supra* note 24. In other cases, however, competitors could suffer quite serious and immediate harm. *See., eg., I.B.M.* v. *United States,* 343 F.2d 914 (Ct. Cl. 1965), *cert. den.* 382 U.S. 1028 (1966).

[126] I included no requirement that the plaintiff establish a particular revenue loss attributable to the rule. Such requirements are contained in some of the statutes previously proposed. However, such a limitation would provoke much difficult and problematical litigation about a side issue. It would seem that plaintiffs would seldom be interested in litigating rules which caused only a trivial revenue loss.

[127] Another factor in considering whether a rule is ripe for review is the state of the administrative record in support of the rule. An adequate record should be produced by reason of the plaintiff's petition to the IRS to modify or repeal the rule; the IRS' response to this petition would set forth the grounds for its rejection of the petition. In addition, if a regulation is in question, the public comments made to the Treasury when the regulation was proposed would be part of the record.

[128] *See F.H.E. Oil Co.* v. *Commissioner, supra* note 14.

[129] I.R.C. § 7805(b).

[130] Stat. § (f)(5).●

SENATOR RIBICOFF SPEAKS OUT ON YOUTH CAMP SAFETY

● Mr. WEICKER. Mr. President, although an estimated 8 to 10 million children attend some 10,000 camps each summer, there are no uniform national standards governing health and safety conditions at these camps. For almost 12 years my colleague from Connecticut, Senator RIBICOFF, has been working to try to provide some meaningful protection for the youngsters who attend summer camps. I have been pleased to serve as a principal cosponsor of Senator RIBICOFF's Children and Youth Camp Safety Act.

Yesterday, the Senate Child and Human Development Subcommittee conducted a hearing on S. 258, the Ribicoff youth camp safety bill, and on the overall issue of health and safety conditions at youth camps throughout the country. Senator RIBICOFF appeared as the lead-off witness and I submit his statement to the committee to be printed in the RECORD.

The statement follows:

STATEMENT OF SENATOR RIBICOFF

Mr. Chairman, I first want to express my appreciation for your decision to hold these hearings on my bill—S. 258, the Children and Youth Camp Safety Act—and on the general issue of health and safety conditions in the Nation's youth camps. I am hopeful this session will result in positive action on the very critical issue of youth camp safety.

I regret, however, that it is necessary for me to appear before you this morning. It has been almost twelve years since I first introduced legislation establishing a Federal role in encouraging and aiding States to develop health and safety standards for children attending youth camps. For well over a decade I have worked with such able legislators as our former colleague Vice President Walter Mondale and the late Senator Hubert Humphrey to provide some meaningful protection for the eight to ten million American youngsters who attend an estimated ten thousand summer camps every year. As yet, such protection has not been forthcoming at the Federal level and is virtually nonexistent at the State level.

It is a sad and curious commentary that the Congress enacts legislation to protect plants, sealife, eagles and other bird species, wild horses and burros, and marine mammals. Nevertheless, we fail to provide substantive safeguards for the millions of boys and girls—our children and grandchildren—who attend summer camps.

Camping can be a rich and rewarding experience. A child can learn many new skills and crafts as well as something about himself and his ability to adopt to new surroundings and new challenges. The young camper will have experiences which will help to mold and develop him. In some instances summer camp is the only respite a child may have from crowded urban tenements. A week or month at camp is an important ingredient in developing a child's self-confidence; it contributes toward his maturity.

However, as Professor Betty van der Smissen of Pennsylvania State University has so aptly observed, the camping contribution "can be minimized if the environment in which the camp experience takes place is not safe. To be in a safe environment is a right, not a privilege of the participants."

The fact is, Mr. Chairman, that conditions at many summer and youth camps are simply appalling. All too frequently there is dangerous equipment, unsafe or improperly operated vehicles, poor sanitation facilities, inadequate medical provisions, untrained personnel, improper supervision, and hazardous activities. Consequently children have been killed, permanently injured, sexually abused, or suffer accidents requiring some degree of medical attention. Many of us have seen disturbing and dramatic news accounts of some of these incidents. Nevertheless, only ten States have some type of agency responsible for monitoring camp conditions and operations. I am glad to say, at least, that Connecticut, California, and Michigan are among those ten States.

At times I hear that the Federal Government has no proper role in the area of child and youth camp safety. Some say the issue is better left to the individual States. I would be among the first to agree that it is both the duty and function of each State to protect, safeguard and monitor the health, safety, and welfare of the Nation's youngsters attending youth camps. However, only 12 States have some meaningful health and safety regulations and only 28 States have some regulations dealing with youth camp safety.

Furthermore, 45 States have no regulations which apply to camping personnel; 17 have no standards relating to program safety; 24 States have no requirements for personal health, medical aid, and medical services; 45 States have no regulations covering out-of-camp trips or "primitive outpost" camps; and 35 States do not regulate day camps.

As with Connecticut and a few other States, good safety laws are possible when States want to protect their young campers. Regretably, all States are not so inclined.

Consider, if you will, last summer's abduction of 15-year-old Charlotte Grosse who was camping with a group of Girl Scouts in a remote Florida state park. Shortly after this incident occurred my office inquired into the Florida statutes governing camping. The State of Florida has no comprehensive youth

camp safety laws. Regulations at that time simply dealt with health issues such as camp cleanliness and food preparation. The Florida State Recreation and Park Division advised that the only requirement for young campers is that they be accompanied by an adult.

Some 100,000 children attended 300 camps in Maryland last summer. Yet the State of Maryland has no safety or health standards for its camps, even covering the most hazardous sports and activities. Despite the long and persistent efforts of Maryland Delegate Lucille Maurer, a camp safety measure has yet to be enacted in Annapolis.

Neither Federal nor State regulations can prevent accident. It is not possible to legislate accidents away. We can take affirmative steps, however, to eliminate the causes of many accidents by encouraging and assisting States to develop proper and effective standards for youth camps.

The legislation I introduced in January 1977 is identical to the measure favorably reported out of the former Children and Youth Subcommittee—this panel's predecessor—in the 94th Congress. My bill clearly recognizes that the States "assume responsibility for the development and enforcement of effective youth camp safety standards."

Under this measure the Department of Health, Education and Welfare will establish minimum standards for the operation of safe and sanitary camp facilities. Such standards are to be developed in cooperation with an Advisory Council on Children and Youth Camp Safety and must be approved by both Houses of Congress. The regulations will go into effect 21 months after enactment. States have three choices—to enforce their own regulations which must be at least equal with the Federal guidelines, to accept and enforce the Federal standards, or to grant HEW authority to enforce the Federal requirements. Because the State should have the primary responsibility, financial incentives—up to 80 percent matching funds—will be available to States choosing to enforce the program themselves.

Is such a law redundant in those few, isolated instances where responsible State regulations exist? I think not. In my State of Connecticut, the camp safety law has worked rather well for the past nine years. We have a Camp Safety Advisory Council which reviews the camp inspection program and advises on policy. The State regulations are being constantly improved and upgraded. Even so, the Environmental Health Services Division of the State Health Department, which is responsible for carrying out the camp safety requirements, is anxious for a Federal statute. It believes a Federal law will lead to better interstate cooperation. It recognizes the need for the Federal Government to give guidance and direction, particularly in those areas where there are no State regulations or State enforcement.

Respectable and well-known groups such as the American Camping Association, the Association of Private Camps, scouting organizations, and a number of religious groups have endorsed a Federal camp safety law. They, too, recognize the need for proper camp safety standards. Some have had to develop and enforce their own standards because of inadequate or nonexistent State and Federal regulations. They know that parents must have some effective benchmark against which to judge the conditions of the camps to which they send their children.

Mr. Chairman, over six years ago the Senate passed legislation similar to my current bill. Unfortunately, it was seriously weakened by the House. The only outcome of youth camp safety legislation to date has been an HEW study which a recent House Education and Labor Committee report has characterized as "unreliable and ineffective." This HEW study—which effectively postponed substantive action on the issue for several years—did reveal that State youth camp safety laws mostly were nonexistent or grossly inadequate.

We can wait no longer! Had substantive youth camp safety legislation been enacted by this time I believe that many of the estimated one hundred deaths and more than a quarter of a million serious accidents which occur at camps each summer could have been avoided. I appreciate your consideration of this issue. I urge that prompt and favorable action be taken on pending camp safety legislation so that young campers can have the protection they need and deserve.●

AN AWARD TO THE ATLANTIC CEMENT CO.

● Mr. MOYNIHAN. Mr. President, it is my great pleasure to inform my colleagues that the Atlantic Cement Co. of Ravena, N.Y., is the recipient of the 1978 National Environmental Industry Award of Excellence in Overall Pollution Control. This award was presented jointly to Donald M. Halsted, Jr., president of Atlantic Cement, by Charles Warren, Chairman of the Council on Environmental Quality, and Richard Hoard, chairman of the Environmental Industry Award.

The award citation recognized Atlantic Cement's "complete environmental concern" and its capturing and reuse of pollutants from the cement manufacturing process.

I know my colleagues join me in congratulating the Atlantic Cement Co. for its outstanding accomplishments in pollution control.●

THE INDIAN TRUST INFORMATION PROTECTION ACT OF 1978—S. 2773

● Mr. ABOUREZK. Mr. President, on Tuesday, March 21, I introduced legislation to remedy the problem of the release of Indian trust information by various Federal agencies pursuant to the Freedom of Information Act. The proposed Indian Trust Information Protection Act of 1978, S. 2773, has a two-fold purpose: First, it would prevent the disclosure of Indian trust information in order to preserve the confidentiality required by the trust relationship between the Indian people and the Federal Government; second, it would authorize the disclosure of such information to Indian tribes, individual Indians, and others where limited disclosure is required to fulfill the trust responsibility. The information protected from release under the bill is not limited to information concerning the natural resources or other trust assets of Indians, but includes tribal enrollment records, financial or business records, and all other information held, obtained or prepared by the Federal Government in the discharge of its trust responsibility to Indian people.

Under the bill, nonrelease of Indian trust information would be the rule, and release of such information the exception, whereas under FOIA, disclosure of information is presumed, and withholding of information is the exception. The bill would, however, permit the release of trust information to the following:

(a) (1) in the case of information pertaining to an Indian tribe—to the chief executive officer or any tribal councilman or official of an Indian tribe authorized to receive such information by the tribe;

(2) in the case of information pertaining to an individual Indian—to the individual Indian to whom the information pertains;

(3) in the case of information pertaining to an Indian tribe—to any member of the tribe, provided the tribal member in requesting such information, has exhausted all tribal judicial and administrative remedies and the head of the respective Federal department or agency, after consultation with the Secretary of the Interior, finds that the release of the information is not inconsistent with the Federal trust responsibility;

(b) to either House of Congress or, to the extent the matter is within its jurisdiction, to any committee, joint committee, or subcommittee thereof;

(c) (1) in the case of information pertaining to an Indian tribe—to any person where the chief executive officer or tribal council by resolution authorizes the release of the information;

(2) in the case of information pertaining to an individual Indian—to any person where the individual Indian to whom the information pertains authorizes the release of the information;

(d) to any person where the information has previously been lawfully made public;

(e) to any person if the information concerns funds provided under a Federal grant or contract if such information is otherwise required by law, including but not limited to the Indian Self-Determination and Education Assistance Act (25 U.S.C. 450c(c)), to be provided to the person requesting the information;

(f) to any person as may be required by any court of competent jurisdiction under the rules of evidence or discovery; and

(g) to any Federal department, agency, or employee or agent thereof where the information is required in furtherance of official duties. The bill would also establish administrative and judicial review procedures and criminal penalties for unauthorized disclosure of Indian trust information.

Although the Department of the Interior has adopted the position that Indian trust information is not required to be disclosed under FOIA, this has not always been the case, and past experience has shown that the exemptions under FOIA are inadequate to protect this confidential information. This legislation is needed to resolve the dilemma facing Federal agencies who are forced to choose betwen fulfilling the mandates of FOIA and maintaining the confidentiality required by the trust relationship between Indian people and the Federal Government.

Mr. President, I submit the text of the bill, S. 2773 to be printed in the RECORD in its entirety.

The bill follows:

S. 2773

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Indian Trust Information Protection Act of 1978".

FINDINGS

SEC. 2. (a) The Congress finds—

(1) that the Federal Government has charged itself with a trust responsibility to Indian tribes and people;

(2) that in the discharge of the Federal trust responsibility, the Federal Government holds information pertaining to Indian tribes, indiivdual Indians, and their trust assets;

(3) that release of this information without the knowledge or consent of the tribe or individual Indian to whom the information pertains is inconsistent with the Federal trust obligation;

(b) The purpose of this Act is to prohibit the release of information held, obtained, or prepared by the Federal Government, its departments and agencies, as a consequence of the Federal trust relationship with the Indian people.

DEFINITIONS

SEC. 3. (a) For the purposes of this Act, the term "Indian tribe" means any Indian tribe, band, nation, pueblo, colony, or other organized group or community including any Alaska Native Villages or groups and regional or village corporations, as defined in the Alaska Native Claims Settlement Act, 85 Stat. 688, which is recognized as eligible for the special programs and services provided by the United States to Indians because of their status as Indians.

(b) For the purposes of this Act, "Indian" means any person who is a member of an Indian tribe as defined in subsection (a) or who otherwise qualifies for and is a recipient of benefits under a program administered by a Federal agency because of his status as an Indian as defined in the statute, regulations or administrative practices of the agency, and shall also include any Indian-owned corporation, association, or business enterprise.

PROTECTION OF TRUST INFORMATION

SEC. 4. (a) Notwithstanding the provisions of the Freedom of Information Act (5 U.S.C. 552) or any other Federal statute, no information held, obtained, or prepared by the Federal Government, its departments or agencies, in the discharge of the Federal trust responsibility to the Indian people shall be released to any person except as provided in this Act.

(b) Information held, obtained, or prepared in the discharge of the Federal trust responsibility includes, but is not limited to, the following:

(1) memoranda, records, tribal minutes, or other documentary material relating to the internal operations of an Indian tribal government;

(2) financial and business data submitted to the Federal Government in confidence by tribes, individual Indians, or persons doing business with Indians;

(3) leases of trust lands and royalty or rental statements from the leasing of trust lands;

(4) information, data, studies, or inventories of Indian mineral, timber, water, geophysical, geothermal, or other natural resources;

(5) tribal enrollment records and any information of a personal nature contained therein;

(6) information of a confidential nature the disclosure of which would constitute an invasion of privacy.

EXCEPTIONS

SEC. 5. Notwithstanding the provisions of this Act, the above-described information shall be released to the following:

(a)(1) in the case of information pertaining to an Indian tribe—to the chief executive officer or any tribal councilman or official of an Indian tribe authorized to receive such information by the tribe;

(2) in the case of information pertaining to an individual Indian—to the individual Indian to whom the information pertains;

(3) in the case of information pertaining to an Indian tribe—to any member of the tribe, provided the tribal member, in requesting such information, has exhausted all tribal judicial and administrative remedies and the head of the respective Federal department or agency, after consultation with the Secretary of the Interior, finds that the release of the information is not inconsistent with the Federal trust responsibility;

(b) to either House of Congress or, to the extent the matter is within its jurisdiction, to any committee, joint committee, or subcommittee thereof;

(c)(1) in the case of information pertaining to an Indian tribe—to any person where the chief executive officer or tribal council by resolution authorizes the release of the information;

(2) in the case of information pertaining to an individual Indian, to any person where the individual Indian to whom the information pertains authorizes the release of the information;

(d) to any person where the information has previous been lawfully made public;

(e) to any person if the information concerns funds provided under a Federal grant or contract if such information is otherwise required by law, including but not limited to the Indian Self-Determination and Education Assistance Act (25 U.S.C. 450c(c)), to be provided to the person requesting the information;

(f) to any person as may be required by any court of competent jurisdiction under the rules of evidence or discovery; and

(g) to any Federal department, agency, or employee or agent thereof where the information is required in furtherance of official duties.

ADMINISTRATIVE PROCEDURES

SEC. 6. (a) Persons seeking the release of information under this Act shall request the release of information from the Federal department or agency possessing the information, and shall notify the tribe or individual Indian to whom the information pertains of the request. The Federal Department or agency shall take into consideration objections to release of the information offered by the tribe or individual Indian to whom the information pertains, determine within 30 days of the request whether to release the information, and promptly notify all parties of the determination to release or withhold the information, of the reasons therefor, and of their right to appeal the decision to the head of the department or agency.

(b) Any party aggrieved by the decision may appeal the decision to the head of the department or agency within a reasonable period of time under regulations prescribed by the department or agency and by notifying all parties of the appeal. All parties shall be entitled to participate equally in the appeal and a determination of the appeal shall be made within 30 days and all parties notified of the decision, of the reasons therefore, and of their right to judicial review.

(c) No information may be released under the provisions of this Act by any department or agency during the course of the administrative proceeding provided for in this section or within the time allowed for the filing of an action for judicial review or pending judicial review as provided for under section 7.

JUDICIAL REVIEW

SEC. 7. (a) Any party aggrieved by a final agency determination to release or withhold information protected under this Act may, within 30 days of the final agency determination, seek judicial review of the agency determination in any United States district court of competent jurisdiction and such court shall either enjoin or order the release of such information in accordance with the provisions of this Act.

(b) Any party who participated in the administrative proceedings provided for in section 5 shall be accorded the right to intervene in the action. The party seeking judicial review shall serve a copy of the complaint on such party by registered mail along with a notice of their right to intervene.

(c) The court may assess against the United States reasonable attorney fees and other litigation costs reasonably incurred if the court finds that the release or withholding of information under this Act by the Federal department or agency was arbitrary, capricious, or in bad faith.

CRIMINAL PENALTIES

SEC. 8. (a) Any officer or employee of any department or agency of the United States, who has possession of, or access to, records of such a department or agency which contain information the disclosure of which is prohibited by this Act, and who knowing that disclosure of such information is so prohibited, willfully discloses the information in any manner to any person or entity not entitled to obtain it, shall be guilty of a misdemeanor and fined not more than $5,000, or subjected to imprisonment for not more than one year, or both.

(b) Any person who knowingly and willingly seeks and obtains in any manner from any officer, employees, agency, or department of the United States any information to which said person is not entitled and the disclosure of which is prohibited under this Act, shall be guilty of a misdemeanor and fined not more than $5,000, or subjected to imprisonment for not more than one year, or both.

CONSTRUCTION WITH OTHER STATUTES

SEC. 9. This Act shall not be construed as requiring the release of information which would otherwise be withheld from release under the provisions of the Freedom of Information Act, 5 U.S.C. 552(b) or the Privacy Act (5 U.S.C. 552a).●

FARM LEGISLATION

Mr. EAGLETON. Mr. President, yesterday the Senate passed a very significant farm bill. As a matter of fact, it really passed about three different farm bills—bills that are not exactly complementary either. In any event, at least two key parts of that legislation will cause sizable acreage of cropland to be diverted from food production to fallow or nonproductive uses. Mr. President, I find it both ironic and tragic that at the same time the U.S. Senate is voting to take a minimum of 30 million acres out of food production—and it is more likely to be 45 million acres or even more—the U.N. Food and Agriculture organization reported in a global survey that "the rich are getting fatter and the poor hungrier." According to an AP report dated March 13, the U.N. Food and Agriculture organization pointed out that:

The world food survey, based on reports from 161 countries, also estimated the world's undernourished at about 450 million, or a quarter of the underdeveloped world, and likely to increase. Firm evidence of any significant progress being made since 1974 in reducing the numbers affected by inadequate supplies of food is not yet available.

I submit the full text of the AP release for printing in the RECORD at the conclusions of my remarks.

Mr. President, I recognize that the United States cannot solve its agricultural problems by shipping free food all over the world. I merely wanted to bring to the attention of my colleagues the tragic situation that we find ourselves in at this time with respect to world hunger. People are starving, yet they have no purchasing power to buy the bountiful harvest of the American Farmer. I do not have a solution to offer—just a puzzled

comment, and a fervent hope that a solution can be found.

The material follows:

ROME.—The U.N. Food and Agriculture Organization reported in global survey today that the rich are getting fatter and the poor hungrier.

The World Food Survey, based on reports from 161 countries, also estimated the world's undernourished at about 450 million or a quarter of the underdeveloped world, and likely to increase.

"This review is disquieting," FAO said, "firm evidence of any significant progress being made since (1974) in reducing the numbers affected by inadequate supplies of food is not yet available."

In the rich and industrialized countries the FAO found "excessive food intake or improper diets" leading to "the steadily rising prevalance of diseases" as daily calorie intake per person soared to 3,380, in the 32 poorest countries, calorie consumption is on the decline with the figure now around 2,000, according to the study.

As a result, the percentage of the malnourished in the developing countries of Africa rose from 25 percent of the population in 1970 to 28 per cent four years later. A similar increase was noted in Asia.

The Food and Nutrition Board of the National Academy of Sciences in Washington estimates that the average U.S. male between the ages of 23 and 50 should consume 2,700 calories a day. American females of that age bracket should take in 2,000, according to the board's 1974 figures, the most recent. For U.S. residents older than 50, the figures are 2,400 calories daily for men and 1,800 for women.

American children between four and six years old should have 1,800 calories a day and those between seven and 10, 2,400 daily, the board said.

The FAO study found that in the poorest countries close to one-half of all children can be classified as underfed. It said about 22 million babies a year, one-sixth of all births, weigh less than 5.5 pounds at birth, 95 percent of them in developing areas.

Because of the malnourishment, the study said, about 40 percent of adult females in the developing countries are anemic, up to 100,000 children go blind each year and 200 million suffer from goiter. In Latin America, more than half of all deaths during the second year of life are attributed to nutritional deficiency.

"Many countries," the FAO report said, "would need to achieve growth rates in food supply over 4 percent per annum (until) 1990 if the average food supply is to reach 2,500 calories per capita per day by that year."

But the situation is likely to worsen and the food gap widen because, as the study reported, poor countries with low food production also have high birth rates.●

THE GREAT ADDRESS BY SENATOR McINTYRE ON PANAMA CANAL TREATIES

● Mr. MOYNIHAN. Mr. President, the Panama Canal treaties debate will remain memorable, if for no other reason that the great address made in support of ratification by Senator MCINTYRE of New Hampshire. I commented at the time that his courageous repudiation of the "politics of threat and vengence" reminded one of the granite of his native State, for surely that granite was there that day, in his honor and in his will. James Wechsler of the New York Post has written an especially insightful commentary on that event. He points out that Senator MCINTYRE rightfully equates the rhetoric and divisive politics of the radical new right with the similar efforts of the "purist left" of the 1960's.

I submit for the RECORD the text of Mr. Wechsler's column.

The column follows:

[From the New York Post, Mar. 9, 1978]

ONE MAN'S CRY OF CONSCIENCE AMID PANAMA PANIC

(By James A. Wechsler)

When he won a hard-fought election in 1962, Thomas James McIntyre became the first New Hampshire Democrat to achieve a Senate seat in 30 years. Now, facing a reelection challenge in November, he has placed his political life on the line by declaring his support for the Panama Canal treaties.

He did so the other day in a Senate speech that will merit remembrance long after the Panama panic promoted by frenzied opponents of the agreements is a footnote in the casebooks of ideological aberration.

McIntyre's address did not stop many presses or incite any brawls in our local taverns. But its echoes are being belatedly heard in many places. For McIntyre, a 62-year-old, self-described moderate, did more than take a stand on an issue that has been inexplicably inflated into a bellicose battle of the century.

He delivered an impassioned indictment of the "politics of threat and vengeance" practiced by the rabble-rousers of the New Right.

"The campaign waged by certain opponents of ratification in my state and across the nation," he said, "has impugned the loyalty and motives of too many honorable Americans to be ignored or suffered in silence a minute longer. . . .

"My political fate is not my concern here today. My concern is the desperate need for people of conscience and good will to stand up and face down the bully boys of the radical New Right before the politics of intimidation does to America what it has tried to do to New Hampshire."

For those who were around in the oppressive years of Joe McCarthy, McIntyre's speech inevitably stirred recollection of another great moment in the Senate's history. On a day in June, 1950, another New England Senator—Maine Republican Margaret Chase Smith—rose to recite her "declaration of conscience" and decry those who sought political gain "through the exploitation of real bigotry, ignorance and intolerance."

McIntyre's utterance may hardly seem a comparable valor to those who dwell in areas like New York where no high antitreaty fever is discernible. But New Hampshire is far more explosive territory. There William Loeb, the Neanderthal publisher of the state's largest newspaper, and Gov. Meldrim Thomson, national chairman of the so-called Conservative Caucus, have been feverishly depicting sponsors of the treaties as agents or dupes of subversion.

They and their allies mounted a concerted war of nerves against McIntyre many months ago. Last summer, as McIntyre told the Senate, Howard Phillips, national director of the Conservative Caucus, urged his adherents to make "a political sitting duck" of Tom McIntyre and "make it a political impossibility for McIntyre to vote for that treaty."

Last December, New Hampshire's branch of the caucus formally censured McIntyre for a speech in which he took no stand on the treaty but promised to weigh all conflicting testimony.

Angered by the "abrasive, threatening tone" of the censure verdict, McIntyre refused to appear for questioning before the caucus. The storm mounted.

Meanwhile, in another context, caucus director Phillips was quoted as saying:

"We must prove our ability to get revenge against people who vote against us. We'll be after them if they vote the wrong way."

And Paul Weyrich, director of the Committee for the Survival of a Free Congress, was declaring:

"We are different from previous generations of conservatives. We are no longer working to preserve the status quo. We are radicals working to overthrow the present power structure of this country."

Their rhetoric, McIntyre validly pointed out, bears remarkable resemblance to some of the manifestos of "the purist left." He had also suffered their taunts in the past. Indeed, Phillips' words might have been plagiarized from Mark Rudd and other fringe voices of the 1960s.

McIntyre shunned any plea for mercy from Thomson and Loeb. He recalled Thomson's charge that the Carter Administration was pursuing "a pro-Communist course," his attack on Martin Luther King as a man who "did great harm to the American way of life," and his tributes to South Africa's John Vorster as "one of the great statesmen of today"—a pronouncement warmly defended by Loeb's paper after it had been assailed by 14 New Hampshire clergymen.

"I cannot believe," McIntyre said, "that the loutish primitivism of Meldrim Thomson and William Loeb is what the American people want in their leaders, no more than I can believe that the American people want the divisive politics of the radical New Right to determine the course of the nation."

McIntyre's speech had begun with the sober statement that "after six months of hard study, I have concluded that on balance the new treaties are the surest means of keeping the Canal open, neutral and accessible to our use, and are in keeping with our historical commitment to deal justly and fairly with lesser powers."

But his message transcended the traumas of the Panama dispute. It was addressed more urgently to the poisonous tactics of the radical right in 1978 than to the disposition of the Canal in the year 2000.

"If you want to see the reputations of decent people sullied, stand aside and be silent," he said.

"If you want to see the fevered exploitation of a handful of highly emotional issues distract the nation from problems of great consequence, stand aside and be silent.

"If you want to see your government deadlocked by rigid intransigence, stand aside and be silent . . .

"In the long run, I am confident that the forces of decency and civility will prevail over the politics of intimidation . . .

"But if that does not occur in time to save the treaties—or those of us who support them—I for one will go home to Laconia, N.H., sad to leave this office but content in heart that I voted in what I truly believed were the best interests of my country."

The outcome of the campaign of fear and smear against Tom McIntyre may reveal a lot about the state of the nation.●

INDIAN MEDICAL SCHOOL: DELAYED

● Mr. ABOUREZK. Mr. President, the Indian Health Care Improvement Act, Public Law 94-437, marked a significant attempt by Congress to establish a much needed comprehensive program to improve the comparatively low health status of the American Indian and Alaska Native people.

However, our responsibility did not end with the passage of Public Law 94-437. Instead, a more important duty lies before us, and that is to insure that this act is sufficiently and meaningfully funded in the appropriation process. To

do otherwise would only be to repeat this Government's past practice toward Indians of promising much, but delivering little.

Public Law 94-437 attempted to establish a health program that took into account all the factors contributing to the low health status of Indians. One of these factors is the severe lack of trained Indian medical professionals. The act thus called for a study to be conducted by the Department of Health, Education, and Welfare to determine the need for and the feasibility of establishing an American Indian School of Medicine to train Indians and interested non-Indians in the unique medical and personal skills necessary to working among American Indian and Alaska Native people.

On Sunday, March 19, 1978, the Washington Post carried an article by Dave Goldberg on the American Indian School of Medicine, and one particular Tribe's attempts to see that it becomes a reality.

I would like to draw the attention of my colleagues to the fact that this special Indian Medical School was deemed one of the two most needed medical schools in the country by an independent Carnegie Commission on Higher Education in 1975. Today, 3 years after that study, 1½ years after the act was signed, and a half year after the feasibility study was to have been delivered to the Congress, the American Indian School of Medicine remains "snarled in red tape."

Mr. President, for the interest and information of my colleagues, I submit the attached article to be printed in the RECORD.

The article follows:

INDIAN MEDICAL SCHOOL SNARLED IN RED TAPE—NAVAJOS RESIGNED TO MORE STUDIES, LACK OF FUNDS

(By Dave Goldberg)

SHIPROCK, N.M.—The pain in the old Navajo's stomach would not subside, even after the medicine man's three-day sing. Now he would ride 75 miles over back-country dirt roads to seek the white man's medicine.

The old man spoke only Navajo, and his son translated the words of the young white doctor. You need an operation, the doctor said. Your gall bladder must come out.

But the old man's misunderstanding was deeper than just language. No, he would have to consult the medicine man again.

The doctor's lack of understanding was just as deep, a chasm of centuries and of cultures. Your father needs an operation, he insisted to the son. What is all this medicine man stuff?

Dr. Taylor McKenzie, a Navajo, may be the only man who can bridge the gap. In 1971, he decided the only way to upgrade medical care on the reservation would be to create an American Indian school of medicine to reconcile modern medicine with ancient Indian healing arts.

McKenzie, the only Navajo physician among the 104 Indian Health Service doctors who serve up to 150,000 Indians and the only Navajo among 79 American Indians who practice modern medicine, has worked on the reservation for 16 years. He is deputy director of the Indian Health Service on the reservation and prospective president of the medical school.

But his impact on the community is even greater. Though he no longer practices medicine regularly, many Navajos trust only him for their medical care, so he spends a good deal of time explaining to people why he can't treat them.

The clash of cultures is not the only thing holding up an Indian medical school; three government-sponsored reports have called the project feasible, but progress is delayed by jurisdictional problems, long-term funding, accreditation and red tape. Even if Congress would approve funds this year, it would be nearly a decade before the school would have significant impact on Navajo health care.

All that exists of the school now is a converted civic center with a medical library that overlooks Shiprock Peak on the 25,000-square-mile reservation.

UNIQUE HEALTH PROBLEMS

There are eight Indian Health Service centers on the reservation that spans rocks, canyons, buttes, mesas and mountains between High Point, N.M., and Tuba City, Ariz. A half-dozen state and federal highways crisscross the area, but most Navajos raise sheep and horses and do their weaving in solitude, miles from the nearest neighbor.

Many homes still are traditional one-room mud and stone hogans. More than half have no running water or toilets, and parts of the reservation are still without electricity.

That leads to health problems unique in North America. There are a half-dozen cases of bubonic plague reported on the reservation each year. There are occasional cases of diphtheria; dysentery and tuberculosis are common maladies, and the rate of gastroenteritis among Indians is 11 times the national average.

Many doctors on the reservation are simply serving time—a two-year stint with the Public Health Service. And their numbers have fallen since the Vietnam war, when a number of young doctors chose Indian service as an alternative to the draft. Most take a year or more to learn the subtleties of Navajo practices, then leave soon afterward.

In late 1971, McKenzie and other Navajo leaders decided an Indian medical school was the best way to train homegrown doctors and interested non-Indians. In March, 1972, the Department of Health, Education, and Welfare recommended that work begin to set up the school and that $150,000 be appropriated over three years for preliminary planning. But the money was never appropriated.

Four years later, a Carnegie Commission on Higher Education examined proposals for nine medical schools and recommended that priority be given to two: a school at Morehouse College in Atlanta that would train black doctors and the American Indian School of Medicine.

In the fall of 1976, Congress acted on an Indian health care bill, which originally contained a provision creating an American Indian school of medicine and appropriating $27 million over five years to finance it. The figure was amended to $16 million over three years; then the bill was amended again to delete the medical school and authorize another feasibility study.

The Navajos took matters into their own hands in February, 1977, when the Navajo Tribal Council approved a charter for the school under tribal auspices. The first step was to continue the search for accreditation begun after the first HEW study.

Among the many requirements for accreditation by the American Medical Association and the Association of American Medical Colleges, three are basic:

1. The college must have a source of long-term revenue.

2. It must be affiliated with a recognized university with a strong science program.

3. It must be affiliated with teaching hospitals.

The Indian school tentatively managed the second two. But it did not have the long-term financial guarantee. Pending that, all other things would have to wait.

So while awaiting the outcome of the HEW study, it sought funds from the Bureau of Indian Affairs. The reasoning was that while HEW handled health care, the BIA was responsible for Indian education. The school involved both.

"They were a little surprised when we chartered our own school," says Thomas Atcitty, the former president of Navajo Community College who heads the board of trustees of the Navajo foundation running the medical school.

The first request to the BIA was for $100,000. Atcitty says he assumed the money would be available because at the end of the 1976 fiscal year, the BIA returned $28 million in unappropriated funds to the Treasury. But the BIA replied there was no money available.

Subsequently, Atcitty was told BIA would coordinate with HEW "in determining which agency can best serve the interests of the American Indian School of Medicine." Nothing was said about money.

RESIGNED TO DELAY

The latest study was completed last Aug. 29 and sent up through channels in HEW. It is still being reviewed, although those involved with it say there is little question about this conclusion:

"Based upon all factors, an American Indian School of Medicine is needed."

The Navajos, meanwhile, make their plans. They already have about 10,000 volumes in the medical library and the Indian Health Service's Shiprock Hospital and clinic is about a quarter mile away.

There still is no school, and the Navajos are resigned to more delay. They have sought foundation funds, but the foundations want to see government money first.

Despite plans by the Navajos to locate the school at Shiprock, the HEW report deliberately avoids recommending any one site. And both congressional and HEW sources question whether the school should be run by one tribe, although the Navajos have support from other Indian groups and plan a board of trustees that represents the national Indian population.

Nonetheless, there is some optimism that McKenzie will get the job done.

"We think very highly of Taylor McKenzie," says Dr. James Schofield of the Association of American Medical Colleges, who heads the accreditation team. "He's no Michael DeBakey, but for the Navajos, he's just the right person."●

THE KIDNAPING OF ALDO MORO

● Mr. CASE. Mr. President, the kidnaping of former Prime Minister Aldo Moro of Italy is another and extremely disturbing manifestation of international terrorism.

An increasingly vicious campaign of terrorism has been carried out by Italian terrorists and the kidnaping of the distinguished Italian leader apparently is an attempt to strike at the very heart of that country's society.

The resolution, Senate Resolution 419, sponsored by Representatives RODINO in the House and passed 398 to 0, and Senator DECONCINI here, eloquently expresses our outrage at the action by the Red Brigade in Italy.

Not only is the action disturbing in itself, but it appears to be another sign of cooperation between various terrorist groups. According to specialists on anti-terrorism from various countries, the Italian group has been getting some assistance and money from groups and countries outside Italy. Therefore, I believe it is all the more important that the civilized governments of the world step up their efforts to counter terrorism,

both by making better use of the legal tools at hand and through improved cooperation and legislative measures.

The resolution I introduced last Thursday, Concurrent Resolution 72, which now has 26 cosponsors, is part of the effort to encourage the United States and other governments to intensify the campaign against terrorists.●

THE FEDERAL BUILDINGS ARTISTIC ENHANCEMENT ACT

● Mr. MOYNIHAN. Mr. President, I am delighted to join my distinguished colleague, the junior Senator from Rhode Island, in introducing the Federal Buildings Artistic Enhancement Act. The Senator from Rhode Island has put a great deal of effort into the development of this bill, and I congratulate him for his excellent work.

The fruits of this bill are legion. Public buildings up and down and across this land will become the setting for the finest works of art fashioned by the living artists of this and every succeeding generation. The bountiful talents of our American artists will be encouraged and displayed—once again they will be able to capture the public imagination. And our citizens will be delighted.

In 1962, while serving as Executive Assistant to the Secretary of Labor, I drafted the "Guiding Principles for Federal Architecture" at the request of President John F. Kennedy. The "Principles," which are still the guiding policy for Federal design and architecture, said in part that "the Federal Government * * * should take advantage of the increasingly fruitful collaboration between architecture and fine arts." To implement this principle, I recommended that "fine art should be incorporated in the design, with emphasis on the work of living American artists." To see this principle at last implemented is most exciting.

Our proposal is a companion bill to S. 2641, "The National Art Bank Act of 1978," introduced by the junior Senator from New Jersey on March 3. S. 2641 is modeled after the Canadian Art Bank, which was established in 1972 and has acquired 7,000 works of art since that time.

The art bank concept, which has met with much success and support in Canada, is a broader scheme within which our program could comfortably fit. The art bank establishes the Federal Government as a collector, with the National Endowment of the Arts as its agent. Our plan puts the emphasis on exhibition in public buildings, which is consistent with the broader proposal in S. 2641.●

THE CONTRIBUTIONS OF THE NATIONAL BURN VICTIM FOUNDATION

● Mr. WILLIAMS. Mr. President, on February 24, the Nation witnessed another tragedy, the explosion of a propane tanker in Waverly, Tenn., killing 11 persons and injuring some 50 others, many seriously burned.

All tragedies such as the Waverly accident are disheartening and regrettable. We as a nation, should begin to take the necessary steps to prevent any such incidents from occurring in the future.

But, on a positive note, I would like to bring to the attention of my colleagues and the Nation, the action of an organization that has been founded to deal with such tragedies. The organization is the National Burn Victim Foundation of Orange, N.J., headed by Mr. Harry Gaynor, its founder and president. The foundation, through its unique and successful national burn disaster system, was prepared to organize its 80 on-call volunteer specialists, from 23 States, and was on the scene in Waverly within hours of the explosion. Because burn victims are in need of immediate and very specialized care and treatment, the arrival of the specialists was gratefully welcomed by local officials and medical personnel in the Waverly area. They quickly went to work treating those victims who suffered so severely from the burn injuries.

I am extremely pleased with and proud of our New Jersey-based operation. In the years that the foundation has been in existence, I have had the privilege of working closely with Harry Gaynor and other officials in our efforts to provide for New Jersey, and now the Nation, a much-needed and effective burn treatment operation.

Mr. President, I wish to submit for the RECORD two newspaper articles that appeared immediately after the Waverly tragedy which highlighted the fine contribution of the National Burn Victim Foundation following that unfortunate accident:

The article follows:

[From The Tennessean, Feb. 26, 1978]

NATIONAL BURN MED TEAM AIDS VICTIMS

Shortly after the violent propane gas explosion roped through Waverly on Friday, the National Burn Victim Foundation started its wheels rolling.

The organization based in Orange, N.J., and comprised of 103 burn surgeons contacted several available doctors and a handful of nurses who dropped what they were doing and prepared to fly to the scene.

Response to the worst disaster in Waverly's history was "overwhelming and almost instantaneous," said Stephen Taylor, administrator of the town's Nautilus Memorial Hospital.

One ambulance after another pulled up to the hospital Friday with the dead and injured after a derailed tanker car blew up, sending bodies and debris flying.

"We have doctors and nurses flying in from all over," said Taylor. "They heard about the injuries on the radio and television and just came in on their own."

The hospital has about 105 employees, Taylor said, and "I looked around (Friday night) just trying to see who was here and I saw that about 100 of them showed up. It was fantastic."

A sister hospital in Trenton, Tenn., sent several doctors and nurses. Ten nurses and four doctors flew in from Ft. Campbell, Ky., and three doctors arrived from Martin, Tenn. Ambulances were driven from as far away as Memphis, 155 miles to the southwest of the town of 5,000.

By midnight Friday, four burn specialists, several nurses and a load of medical supplies from the burn victim foundation were on board an Air Force C-141 Transport at Newark International Airport headed for Tennessee. Another mercy mission had begun.

"They're on call 24 hours a day," said spokesman Dave Gulick. He noted that the most recent aid missions were to a fire at Providence College in Rhode Island in December, and a gum factory explosion in New York early last year.

With the cooperation of the American Burn Association, the foundation's network now extends to 34 states. Since Tennessee is not included, doctors had to be brought into the state.

"We know where the beds are for burn victims in all the states and we can move quickly to help people," Gulick said.

Medical personnel in Nashville Friday afternoon prepared to receive an unknown number of injured from the explosion site, as helicopters hummed in the skies.

"We don't know how many are coming," said one paramedic. "We've heard a hundred have been injured but we don't know for sure."

The explosion occurred at 2:59 p.m. and by 4 p.m., nine persons had been carried to an open field on the North side of Nashville. The helicopters left as quickly as they came, and the ambulances which transported the first group of victims to the hospitals were already back.

"I'd say eight of the nine were critical," said Larry Price, a paramedic who rode with two of the victims. "That means they had burns over 60, 70, 80% of their bodies."

As the sun went down, so did the temperature. A woman in a nearby office building wheeled out a table with some coffee. Police and newsmen joined the medics in line.

"I rode in with two men," said paramedic Floyd Murrell. "They were both in critical condition. They had burns over 75% of their bodies. Their skin was like jelly.

"One man said he was a crane operator. He said he was sitting in the crane when it happened," Murrell said. "The other man didn't say anything."

[From the Sunday Star-Ledger, Feb. 26, 1978]

BURN TEAM TREATS SURVIVORS

(By Kenneth Woody and Anthony F. Shannon)

NASHVILLE.—When the big Air Force jet touched down at Nashville Metropolitan Airport early yesterday morning, a moment of apprehension gripped the doctors and nurses still strapped in their seats—all specialists from the New Jersey-based National Burn Victim Foundation in Orange who had come to assist the survivors of the Waverly disaster.

Nashville police cars, waiting impatiently on the tarmac, rushed the group to nearby St. Thomas Hospital where nine of the victims of the propane explosion were receiving emergency treatment, pending arrival of the specialists.

"Thank God you're here," said Sister Mary Frances, the hospital administrator. "We have a very bad situation which we're really not equipped to handle."

The foundation's network of 103 physicians—80 on 24-hour call—encompasses 34 states. Tennessee is not one of them.

"I knew it would be bad," Phyllis Russo, an associate professor of nursing at Seton Hall University, said later in the day. "But I'd never experienced anything quite like this."

St. Thomas, an ultra-modern institution specializing in heart surgery, was gearing up for eight open heart operations tomorrow when the first badly-burned victims arrived by ambulance and helicopter from Waverly, 60 miles away.

"You've done a remarkable job," Harry Gaynor, president of the National Foundation, told Sister Mary Frances after inspecting the recovery room along with burn specialists Dr. John Stein and his wife, Dr. Beth Stein, both of Jacobi Hospital in New York City, and Dr. Anthony Luppino of West

Orange, a 46-year-old psychologist and former burn victim who directs the burn crisis intervention team at the NBVF.

Over the next seven hours, the Steins were at work in the recovery room, treating patients and assisting the hospital's team of physicians called in to help meet the emergency. Dr. Luppino, meanwhile, met with relatives and friends of the victims, attempting to relieve the strain during the extraordinary crisis.

"The main support system we use when there's real trouble is to keep the victim's family from falling apart," Luppino said later. "This group took it pretty well. They were very worried, of course, but they were reassured the victims were getting the best care possible."

Luppino, a pilot during the Korean War, was hospitalized for 10 months after his jet trainer crashed and burned in 1955.

"From my own experience, I know the victim worries as much about his family as the family worries about the victim," he said.

After a brief rest, the Steins, Luppino and Gaynor went to Baptist Hospital—also in this city—where they looked in on two other victims of the tragedy, including a 6-year-old girl.

"The situation was well in hand," Gaynor said. "We've seen other situations where this was not the case."

Phyllis Russo accompanied the group as did Kathy Murray of Summit, an instructor at Seton Hall where she received a master's degree, and a nurse for 10 years, along with three other nurses from Jacobi Hospital, Judith Grimaldi, Susan Schmid and Georgina Garrison.

"The hospital's nurses were extremely cooperative," Miss Murray said. "They said they were very happy to have us here. Everyone did a tremendous job."

The veteran nurse was called at her Summit home late Friday night by Harry Gaynor, who asked her to call Phyllis Russo.

"They call you and tell you to go to work—and you go," Miss Russo declared.

Both nurses had put in a full day earlier at Seton Hall.

Gaynor, meanwhile, checked with nine other hospitals between Waverly and Nashville where burn victims had been taken.

"All thanked us for offering help," he said, adding that "it appeared they'd be able to handle things without further assistance. They did a fine job, considering the fact they have no real facilities for treating burn victims."

Then Gaynor added somewhat philosophically: "The best response to a disaster is being prepared for it. This is what the foundation wants to accomplish. We want to see all the states working together so they can effectively and efficiently respond when disaster strikes."

As the weary burn specialists prepared to return home, Sister Mary Frances met with them in her office at St. Thomas Hospital.

"You've done a wonderful job, and we really don't know what we would have done without you."

Then she asked, "Have you had a chance to evaluate our performance here?

"Indeed we have," Gaynor replied. "It was excellent." ●

SOVIET SALT I VIOLATIONS

● Mr. PELL. Mr. President, there have been recent press reports that the Soviet Union is violating the 1972 Interim Agreement on strategic offensive arms by operating 64 ballistic missile submarines—two more than the agreement allows.

As a member of the Committee on Foreign Relations, and Chairman of the Subcommittee on Arms Control, Oceans and International Environment, I was very interested in determining the accuracy of this allegation, and I immediately asked the Department of State to comment on this charge. I have just received a response which I believe should be shared with my fellow Senators.

The Honorable Douglas J. Bennet, Jr., Assistant Secretary of State for Congressional Relations, informs me:

As you know, according to the terms of the Interim Agreement the Soviet Union is allowed to deploy no more than 62 modern nuclear powered ballistic submarines. Submarines are counted against these limits as soon as they have gone to sea trials.

All information available to the Administration indicates that those published reports are incorrect. The number of modern Soviet submarines currently deployed does not exceed the number allowed under the SALT I agreement.

I submit the full text of Mr. Bennet's letter for the RECORD following my remarks.

Mr. President, the allegation that the Soviets had exceeded the specified ceiling was the first major charge in regard to Soviet strategic weapons activities in the period since the Interim Agreement expired last October 3. Since the agreement was not extended, neither side is strictly bound to continue adhering to the SALT I limits. Accordingly, it would be incorrect to say that either we or the Soviet Union would be in "violation" of an expired agreement in this transition period before SALT II.

Fortunately, each side has declared that, in order to maintain the status quo pending a SALT II agreement, it intends not to take actions inconsistent with the interim agreement or the ongoing negotiations so long as the other side exercises similar restraint. The United States has been steadfastly adhering to this standard. Similarly, the evidence is that the Soviet Union is sticking to its stated intention.

Since we are in the period of transition in our efforts to achieve further limits, I find Mr. Bennet's letter and other information available to me very reassuring. Fortunately, Soviet submarine activities are adequately verifiable. We will have solid information upon which to judge their adherence to both the expired interim agreement and their statement of intention to maintain the status quo.

Adherence to the submarine limit will constrain the Soviet Union as their submarine construction program continues. Continued Soviet restraint should help create an atmosphere conducive to a new agreement at an early date and serve, in the meantime, as evidence of Soviet good faith in regard to SALT.

The Soviet submarine program is completely consistent with what the two sides are trying to achieve in SALT II. Since SALT II appears likely to limit the two sides to between 2,160 and 2,250 strategic delivery vehicles, the Soviet Union is going to have to reduce its land-based and sea-based ballistic missiles and heavy bombers by about 300. A vigorous submarine program within that lowered ceiling will necessarily mean a greater proportion of Soviet strategic forces at sea and a reduced force of land-based missiles—together with the threat those ICBM's could pose to us.

So long as there is a firm ceiling on the mix of forces, both sides gain from the deployment of greater portions of those forces at sea, since sea-based forces are far less vulnerable to attack and less provocative—thus reinforcing deterrence. Greater Soviet emphasis on sea-based forces within the framework of SALT will not give cause for concern. Their submarine program and our own active Trident missile programs should provide mutual reassurance by strengthening stability.

Mr. President, the letter follows:

DEPARTMENT OF STATE,
Washington, D.C., March 14, 1978.

HON. CLAIBORNE PELL,
Chairman, Subcommittee on Arms Control, Oceans and International Environment, U.S. Senate.

DEAR MR. CHAIRMAN: The Secretary has asked me to reply to your letter of March 2 regarding published reports that the Soviet Union is in violation of the SALT I agreement by virtue of having deployed 64 modern ballistic missile submarines.

As you know according to the terms of the Interim Agreement the Soviet Union is allowed to deploy no more than 950 submarine launched ballistic missiles on no more than 62 modern nuclear powered ballistic submarines. Submarines are counted against these limits as soon as they have gone to sea trials.

All information available to the Administration indicates that those published reports are incorrect. The number of modern Soviet submarines currently deployed does not exceed the number allowed under the SALT I agreement.

I hope this will be helpful to you and the members of the Committee.

Sincerely

DOUGLAS J. BENNET, Jr.,
Assistant Secretary for Congressional Relations. ●

THE 60TH ANNIVERSARY OF THE PROCLAMATION OF THE BYELORUSSIAN DEMOCRATIC REPUBLIC

● Mr. DOMENICI. Mr. President, on the occasion of the 60th anniversary of the proclamation of the Byelorussian Democratic Republic, I would like to commend the Americans of Byelorussian descent for their continuing vigil in remembrance of their brothers captive in the Soviet Union.

Let us all remember the fate of a nation which boldly decreed her right to self-determination and freedom. Liberty was the goal of these brave and proud people, tyranny their reward.

The hope and striving for freedom has not diminished and we here offer strength by holding high the principles of freedom and human rights.

On March 25 when the Byelorussian community in America commemorates their past and celebrates their heritage, I urge my colleagues to reflect and rededicate our support for the right of self-determination and freedom. ●

SENATOR BROOKE ON MIDEAST POLICY

● Mr. JAVITS. Mr. President, on February 27, 1978 Senator BROOKE addressed the United Jewish Appeal Youth League in Washington, D.C. As we have come

to expect of Senator BROOKE, his speech on Mideast policy is very cogent and eloquent. Over the years, Senator BROOKE has gained a reputation as being one of the best informed Senators on Mideast questions, and he is a proven friend of the best in United States-Israel relations. I believe that the insights contained in Senator BROOKE's speech on Mideast policy deserves the attention of the Senate. Accordingly, Mr. President, I submit the full text of Senator BROOKE's speech of February 27 be printed in the RECORD.

SPEECH BY SENATOR EDWARD W. BROOKE

I am deeply honored to be with you on this occasion. For so many years, we have shared an intense desire for an end to conflict in the Middle East that would free the energetic impulses of the Israeli people to concentrate on fulfilling the blessings and opportunities of the promised land.

During the past several months, we have witnessed what could still be the gateway to the peace we have longed for. In Jerusalem, after three decades of vituperation and four bloody wars, the leader of the most populous Arab state symbolically accepted Israel as a bona fide Middle East state. But, clearly, Israel's existence as a national Jewish homeland is not, and must not be, predicated upon the decisions of any Arab country. Nevertheless, the Egyptian gesture was important in shaping the psychological environment of the Middle East.

Yet, a false euphoria must be avoided. For, we know that the road to peace is not an easy one to travel. Nor, are the difficult issues which divide Israel and Egypt likely to be resolved in public debate. The klieg lights of the television cameras were useful in lighting the road to Jerusalem, but, as a Talmudic scholar once said, "Nothing is more precious than light; yet, too much light is blinding."

I am afraid it will take many months of arduous, private negotiations to determine whether the present fragile will to peace can be forced into acceptable binding agreements. America's hopes and fears are deeply intertwined with these historic negotiations. We have a deep and abiding commitment to the permanence of a secure Israel. Ours is a sacred obligation, to be ignored only at the sacrifice of our own ideals, and ultimately, at our own peril. For Israel is an island of stability in the sea of chaos that is the Middle East. And, no U.S. policy can be effective without that stability.

Many reasons can be offered for the U.S. interest in Israel. We are all aware and sensitive to them. Tonight, I do want to emphasize that undergirding and overarching this relationship is the fundamental reality that our commitment to Israel is a test of our own values, purposes and ideals. To lessen our commitment would be, in fact, to abandon our belief in the principles of democracy, freedom, and justice upon which our own self-esteem as a distinct nation is based. We cannot, we must not do so, either by degree or abrupt decision.

While our relationship with Israel is grounded in this fundamental identity of basic values, we all have come to realize that the relationship is multifaceted and extends in its implications, beyond the bilateral context. For instance, in the last few years, it has become apparent that it is in the interest of both Israel and the United States to establish effective working relations with moderate Arab states. The primary goal of such relations must be the establishment of an environment within which an acceptable peace can be pursued.

A return to the estrangement that so long characterized our relations with Egypt, or a deterioration in our relations with Jordan, would ill-serve Israel and our country. The chance for an early peace without further war would be forfeited and the negative consequences immeasurable. That is why so much effort has gone into inducing Jordan to join the negotiations in Cairo and Jerusalem.

But, there are other reasons for encouraging moderation in the Arab world. We have learned through past experience that each crisis in the Middle East places severe strains on the fabric of our alliances with Europe and Japan. At the time of the Yom Kippur War in 1973, Japan was 98 percent dependent on the Middle East for its petroleum supplies, and Western Europe 90 percent. Small wonder that they felt so vulnerable when the Arab states decided to use oil as a political weapon. The unfortunate consequence of this vulnerability was a fundamental divergence in views as to the proper response to the conflict. It is neither in the interest of Israel nor ourselves that our alliances with Europe and Japan be undermined. It is essential that the foundation of unity of the world's democracies be maintained. And, we must impress upon the moderate Arab states that their interests, too, are linked to the preservation and stability of these alliances. In doing so, we must take whatever measures are necessary to deny to anyone the capacity to blackmail the industrial democracies by use of the so-called "oil weapon."

Yet, while we pursue our interest in better relations with the Arab states, we cannot afford to be anything but realistic regarding the fragile nature of those relations. Instability continues to characterize much of the Arab world. What might be a firm basis for a relationship today, can disappear in the vortex of Arab politics overnight. Hence, the steps we take to improve our relations with the Arab moderates must be cautious and measured and predicated upon performance rather than mere promise.

It is in this regard that I am compelled by prudent realism to take issue with the wisdom of the Administration's decision to sell sophisticated lethal military equipment to Egypt and F-15's to Saudi Arabia at this time. Such a decision, in my opinion, is not in our interests and should only come, if at all, when there is substantive evidence that the achievement of an effective peace agreement between Israel and Egypt is in the offing. To enter into such agreements at this point appears premature and could very well weaken the movement toward peace.

Equally, it could not help but increase what I am convinced is the misperception in the Arab world that the United States relationship with Israel is weakening. It is the height of irresponsibility to allow such a misperception to exist and deepen. For the Arab states, believing this to be true, would be unlikely to make the compromises so clearly necessary for peace. Indeed, they might be tempted to use a time of counterfeit peace as a means to continue war. U.S. actions and statements should not increase that temptation.

It is also clear that Israel and the United States have an overriding interest in minimizing the influence of the Soviet Union in the Middle East. We have learned from sad experience that Soviet policies and actions tend to exacerbate tensions and, hence, increase the risk of war. And, Soviet behavior leading up to and during the 1973 Yom Kimpur War is illustrative of the Kremlin's intentions and long term policy in that area.

We must not forget that Moscow armed the Egyptians and the Syrians to the teeth with the most sophisticated military equipment available. They neither restrained their Arab clients nor warned of the impending attack. During the conflict they mounted one of the history's greatest airlifts to keep the war going. Finally, they even threatened to intervene physically, backing off only after the President called a worldwide military alert to demonstrate our intolerance for such behavior. Their's was hardly a policy of prudence and restraint.

If we are to limit the Kremlin's capacity to "fish in troubled waters," I am convinced that our goal must be a durable settlement in the Middle East. And, by durable, I mean a settlement that embodies "effective peace" and is arrived at by the decision of those in the Middle East who are committed to allowing a free exchange of people ideas, and trade between Israel and the Arab world. It cannot be imposed from without or require of Israel substantive compromises in return for paper promises.

We all know that such a durable peace may not be achieved on a comprehensive basis in the near future. But, Israel and Egypt have taken the first step toward it. And, our hopes and prayers must be that further progress will be made during the next year.

Ironically, the major issue which appears to divide the two parties is not the final border arrangements between Egypt and Israel; it is probable that an equitable solution to that problem could be worked out. Rather, it is the highly volatile issues of the future of the West Bank and the Gaza Strip which promises to be the most difficult to resolve.

While President Sadat seems to feel no responsibility to defer his pursuit of peace with Israel because of Syrian objection, he apparently does link his effort to his advocacy of a national Palestinian entity. At the very minimum, what this means is the creation of a Palestinian state on the West Bank of the Jordan and the Gaza Strip. Clearly, such a state would be a dagger pointed at the heart of Israel.

Prime Minister Begin has rightly rejected the idea of establishing an independent West Bank Palestinian state. He is only too painfully aware that President Sadat and other Arab leaders are unwilling to define what is meant by the "legitimate rights of the Palestinians," saying that it is for the Palestinians themselves to define those rights. And, we all know that as far as the PLO is concerned, its definition of such "right" includes the "right" to destroy the state of Israel and replace it with a secular state of Palestine. This is, and has been a central tenet of the PLO charter. Although there have been many attempts by the Carter Administration and moderate Arab leaders to induce the PLO to renounce this article of its charter, the PLO leadership has steadfastly rejected any moves in that direction.

Even while Israel has wisely rejected the concept of a PLO-dominated independent state on the West Bank, it has offered a legitimate proposal for negotiations. In doing so, it is clear that the current Israeli cabinet is understandably taking the position that every Israeli cabinet has taken since 1967—Israel is prepared to trade pieces of territory for incremental steps towards peace on the part of their adversaries. On the West Bank and the Gaza Strip, the Begin government has offered to abolish the military administration and replace it with an Arab administrative council. Residents of those territories would be offered the choice of Israeli or Jordanian citizenship, and those who opt for Israeli citizenship would be eligible to buy land and settle in Israel. Until the ultimate question of sovereignty is finally resolved, Israel would retain its present right to claim sovereignty over the West Bank and Gaza. Israel has adopted this approach ". . . in the knowledge that other claims exist and in the interests of peace," in the words of Prime Minister Begin.

The Israeli proposal is a meaningful contribution to the substantive negotiations. It is a bona fide effort to promote the search

for an equitable peace arrangement between Israel and her Arab neighbors

The United States must lend encouragement to these efforts. But, we must always remember that our proper role is as a mediator—not an initiator of proposals. An attempt to move us in the direction of dictating peace terms is apparently being made by President Sadat. He has warned the U.S. Government that unless pressure can be brought to bear on Israel to accept the idea of a Palestinian state in a prior declaration of principles, the stalled political talks cannot be successful.

President Sadat is well aware of the strategic dependence of Israel on the United States. We are, after all, Israel's only reliable ally. It is our sophisticated weaponry which enables Israel to maintain the strategic balance in the Middle East. Since the 1973 Yom Kippur War, the United States has supplied an annual military budget subsidy in grants and credits of almost a billion and a half dollars a year.

Moreover, it is our moral and emotional commitment to Israel which has served as the deterrent to keep the Soviet Union from actual physical intervention in the past three wars in which Israel has defeated Soviet clients.

Anwar Sadat is well aware of the crucial role which the United States has played in Israel's past victories and current strength. That may be why he chose to launch his peace offensive through the good offices of Walter Cronkite and Barbara Walters rather than through diplomatic channels. By seeking to capture the American news media, particularly the instantaneous satellite television audience, he has sought to project his image as the man of peace right into the living rooms of America, bypassing to a large extent, the filtering and opinion-forming effect of official government comments. Moreover, his careful and attentive handling of the American press corps has been designed to enhance the image he has tried to create among the American public.

Polls revealed a 20 percent point jump almost overnight in Sadat's popularity and in the American public's opinion that he was a sincere man of peace. In an unprecedented opinion change, the American public's opinion that Sadat sincerely desired peace leapfrogged that of his Israeli counterpart, with 58 percent of the public believing Sadat to be sincere in his desire for peace as against only 47 percent answering affirmatively when asked the same question about Prime Minister Begin. Hopefully, that misperception of Prime Minister Begin is being corrected.

Of course, the peak in Anwar Sadat's popularity has not been maintained since the dramatic days in November, while the deepfelt affection and respect for Israel has remained high among the American people, and I might add, the Congress. But, the lesson of the peace offensive should be clear. Anwar Sadat has staked his political future—and given the manner in which Middle East governments change, perhaps his very life—on the assumption that an acceptable peace agreement can be reached with Israel and that U.S. pressure is a key to that settlement.

The Egyptian President's expectations that the United States would put undue pressure on Israel, unfortunately, would appear to be well-grounded. We have become only too painfully aware that the Carter Administration appears bent upon pressure tactics. A few examples will suffice to illustrate the point.

In one of his first news conferences the President announced that a "stabilization" of the Middle East "would involve substantial withdrawal of Israel's present control over territories" and only "minor adjustments" of Israel's pre-1967 frontiers. A week later, speaking at a town meeting in Clinton, Massachusetts, the President alluded to the need for a "Palestinian Homeland." Administration spokesmen scrambled to explain away these apparent changes in policy. But, in a diplomatic arena where the presence or absence of the definite article "the" is considered to be fraught with meaning, this new rhetoric seemed to portend a major change in U.S. policy. The President's newness to the world of diplomacy was used to justify the new terms, but as one diplomat explained, "Half the people in the Carter Administration don't understand the language of the Middle East, and the other half are trying to change it."

When, at a May 26th news conference, the President again reiterated his belief that the Palestinians had a "right" to a "Homeland" I took to the Senate floor to question the wisdom of the Administration's approach. No satisfactory explanation was forthcoming. Indeed, the Administration compounded the problem when on October 1st, Secretary Vance unveiled a joint Soviet-American statement in which there was a reference to the "legitimate rights" of the Palestinians and the absence of any reference to "secure borders" for Israel. Again, I protested the Administration's insensitivity to the diplomatic problems caused for Israel. But once more, the Administration argued that there was really nothing new in this seemingly pro-Palestinian document. And a week later, in an attempt to offset its impact, strongly pro-Israel remarks were inserted into the President's address to the United Nations. This trial and error diplomacy has served the interests of no one.

It has made of the United States an "uncertain trumpet" in its mediation role.

Another weakness in the Administration's approach was its frantic attempts to arrange an ill-prepared-for Geneva Conference in December. This was particularly unfortunate in view of the delicate diplomatic position in which Israel found itself as a result of Administration rhetoric about the "legitimate rights of the Palestinians." As a consequence of that rhetoric, many in the Arab world appeared convinced that the United States would deliver to them the victories they had been unable to obtain by the clash of arms. That dangerous misperception persists and requires correction lest it become an insurmountable roadlock to peace efforts.

This need to convince the Arab countries that the United States will not apply onesided pressure on Israel has become even more important in light of President Sadat's recent visit to the United States and the Administration's most recent statements regarding the proposed transfer of sophisticated military equipment to Egypt and Saudi Arabia. It would be a blunder of immense proportion to mislead the Arabs into thinking that at some point in time the United States would deliver Israel bound hand and foot to the negotiations table to acknowledge a dictated settlement. This we cannot, we will not do.

We can, and must, of course, serve as an important communications channel between Israel and Egyptian leaders. We can also express our opinions or proffer friendly advice at the appropriate times. But, our role must be that of a midwife to any peace settlement. That settlement will, ultimately, be born out of Israeli-Arab efforts and they are the ones who will have to live with its joys and sorrows.

For as I have said, not too many months ago, peace seemed hopelessly beyond our reach. That is no longer the case, although the euphoria of November has been replaced by the sober realization that the road is still a long one, strewn with obstacles. The leaders of Israel and Egypt have taken halting but meaningful steps towards the goal. But in the end whether we attain an equitable peace in the Middle East, one that endures beyond the immediate joy of its proclamation, depends not only upon the mutual goodwill of the inhabitants of palaces and parliaments, but also those of the deserts and kibbutzim. Let us pray that God blesses them with the spirit of the peacemaker. For as it is written in the Book of Proverbs "Peace after emnity is sweeter than honey." ●

SUPPORT FOR CONFERENCE REPORT ON AGE DISCRIMINATION IN EMPLOYMENT ACT AMENDMENTS OF 1978

● Mr. CHURCH. Mr. President, I support the adoption of the conference report on H.R. 5383, the Age Discrimination in Employment Act Amendments of 1978.

There is one feature in the bill, though, which I do not favor. And, I shall have more to say about that provision in a moment.

But at this time, I would like to comment about other measures in this legislation—several of which I either sponsored or advanced.

First, H.R. 5383 would have the effect of raising the mandatory retirement age from 65 to 70.

This represents an important step toward the goal of employment based on merit.

As chairman of the Senate Committee on Aging, I have long maintained that functional capacity—not chronological age—should determine whether a person is hired, fired, promoted, or demoted.

Chronological age alone is a poor barometer of one's ability to perform on the job.

In fact, several studies make it clear beyond any doubt that older workers form as well on the job as their younger counterparts and quite often noticeably better. A New York State Division of Human Rights survey, for instance, found that persons 65 or older are generally equal to, and in some cases significantly better, than those under 65 in areas of attendance, punctuality, on-the-job safety, and work performance.

Administrators and personnel officers make judgments each day about the competence of employees under 65 years old. These same standards can and should be applied to persons 65 and above.

Older workers are not asking for any preferential treatment. All they want is a chance to compete on equal terms with others on the basis of ability and not chronological age. I strongly believe that they should have this opportunity.

Second, H.R. 5383 would abolish mandatory retirement, for the vast majority of Federal employees, effective September 30.

As the Nation's largest employer, the Federal Government is ideally suited to test out the feasibility of eliminating manadatory retirement completely.

If the experience proves successful, many private employers may want to adopt a similar practice. In that regard, Mr. President, I would like to ask unanimous consent to insert in the RECORD a press release I issued on March 21.

Third, the bill would modify the existing 180-day notice of intent to sue requirement, which has oftentimes proved to be a trap for the unsuspecting.

The Department of Labor estimates that the courts have dismissed nearly two-thirds of all private age discrimination suits without a hearing on the merits

because an individual failed to comply with the act's procedural requirements. One of the most troublesome is the 180-day notice of intent to sue requirement.

H.R. 5383 would simply require that an individual file a charge with the Department of Labor within 180 days after the alleged violation before commencing a suit, rather than comply with the more formal notice of intent of sue standard.

Moreover, the conference agreement makes it clear that the "charge" requirement is not a jurisdictional prerequisite to maintain a suit under the law. Courts would be permitted to excuse the failure to file a charge for equitable reasons.

Fourth, I am pleased that the conferees agreed to phase out the provision permitting tenured college and university faculty members to be mandatorily retired at 65. Under the conference agreement, the mandatory retirement age would be raised from 65 to 70 for them on July 1, 1982—or 2½ years after the effective date for other workers.

I would have preferred an earlier effective date for raising the mandatory retirement to 70 for tenured faculty members.

I do not support, though, the exemption in the bill, permitting high level executive or policymakers to be mandatorily retired at 65 if they have retirement benefits of $27,000 a year or more, exclusive of Social Security benefits.

One of the major purposes of the Age Discrimination in Employment Act is to promote employment on the basis of ability.

This goal is not well served by carving out exemptions in the law. An exception should be made only if compelling reasons exist. In my judgment, the compelling case for this exemption has not been made.

Fortunately, the number of persons affected is small. But the exemption is likely to be the source of much litigation or confusion.

Taken as a whole, though, I think the bill includes many beneficial—and perhaps landmark—provisions for older Americans.

For these reasons, I reaffirm my support for the conference report on H.R. 5383.

I submit a news release from my office for the RECORD.

The news release follows:

NEWS RELEASE FROM SENATOR FRANK CHURCH

WASHINGTON, D.C., March 21, 1978.—Senator Frank Church today urged the U.S. Civil Service Commission to prepare adequately for the probable end of mandatory retirement in the Federal service this autumn.

Church, Chairman of the Senate Committee on Aging, said it appears likely that legislation to end employment cutoffs at age 70 among Federal employees will soon receive final Congressional approval and go to President Carter for signature. The abolition of forced retirement would take effect in October.

"And," said Church, "this deadline is rushing toward us at just exactly the same time that President Carter has presented his plan for Civil Service reform."

In an address this morning before the American Personnel and Guidance Association (9:00 a.m., Sheraton-Park Hotel), the Senator said the President's proposals apparently do not deal with needs that will intensify with an end to mandatory retirement in the Federal government.

Church said:

"I'm thinking of such programs as:

"Mid-career training to prevent skill obsolescence;

"Development of objective tests of work capability;

"Flexible work arrangements for older workers who may care to change from one job or another, or to enter part-time work, or to make other changes which will make Federal service more attractive to them and more productive for the agencies they serve;

"And pre-retirement training programs with a decided emphasis on work options before retirement, as well as personal interests and concerns after retirement."

Church said that the Senate Committee on Aging has long urged the Civil Service Commission to become a model employer in its treatment of middle-aged and older workers.

"Now, with an end to mandatory retirement for Federal agencies within sight, it's time for the Commission to ask for help in dealing with an entirely new situation," he added.●

WATERWAY USER CHARGES AND THE TYRANNY OF THE BENEFIT-COST RATIO

● Mr. DOMENICI. Mr. President, the debate over the dollar impact and the form of my proposal to phase-in waterway user charges has obscured a related advantage of user charges. This would be a lessening of the life-or-death tyranny now imposed by the benefit-cost analysis of water projects.

Adoption of my amendment No. 1460 to H.R. 8309, or a similar provision linking costs to expenditures, will move the Nation closer toward the use of a more realistic assessment—a market test—of the worth and value of water resource projects which have commercial beneficiaries. A determination of the willingness of the users and beneficiaries to pay all or a portion of the costs of a project provides a far stronger guide to whether a project merits Federal assistance than any artificial calculation that the "benefits" exceed the "costs."

The Federal water resources effort is now the source of much public dissatisfaction. That is unfortunate. Much of this dissatisfaction grows from the fact that so much of the program is "free." It may be secondary that the project is really needed or that it provides the best solution.

Well, it is not "free". The American taxpayers are paying for it. And the only shroud of protection provided the taxpayer is the mythical benefit-cost computation.

The "benefit-cost ratio" stems from section 1 of the Flood Control Act of 1936. At that time, Congress determined that water resource projects could move forward if "the benefits to whomsoever they may accrue exceed the costs." No other type of Federal investment requires such an analysis.

There is certainly nothing theoretically wrong with this approach, but as a practical matter, the "B–C" ratio is sometimes worthless. It can depend on how games are played with the interest rates applied to the invested dollars. It allows a water resources agency to calculate a series of hyped-up benefits, and it is often subject to off-the-wall estimates on prices, totally unrelated to what a project will actually cost the public.

To cite one example, the benefit-cost analysis is distorted by the requirement of section 7(a) of the Department of Transportation Act (49 U.S.C. 1656(a)), which mandates the use of inflated "savings to shippers" figures in computing a benefit-cost ratio on inland navigation projects. Another myth involves so-called regional benefits, which many would like to graft onto the benefit-cost process as a way to bolster benefits. Regional benefits for a project are ones, which, in effect, are subtracted from other areas of the Nation.

Conversely, projects in many poor or lightly populated areas of the Nation never seem to come up with positive benefits. While local businesses desire the project, knowing it can provide long-term improvements to the area, and they would often be willing to repay much or all of the cost, the tyranny of the benefit-cost ratio kills the idea before it gets off the ground.

Personally, I believe we must find a better way to evaluate the need for water resource projects. One better alternative is a "user-pays" approach. This philosophy is embedded in programs for hydropower production, water supply, and irrigation. There is no reason why a market test cannot be extended across a broad range of projects, including those that benefit the big barge companies.

Thus, waterway user charges can and should move the Nation beyond the time where every new project is a battleground over some arbitrary benefit-cost ratio. It will move us into a discipline where the Congress and the President can act with greater assurance because the local industries, users, and other direct beneficiaries are willing to share in the cost.

Mr. President, the marketplace is a far better test of value than the computers in the offices of the Army Corps of Engineers. It is important that we focus the limited Federal dollars that are available on projects with a base stronger than any tenuous benefit-cost analysis.

And there is an additional factor. When the commercial users are paying, they have a direct and forceful interest in making certain that the Federal water agency brings in the project in the most cost-effective way for the benefit of the taxpayers and the users. It is time that we replace cost overruns with beneficiary responsibility.

Mr. President, as an indication of the vagaries of the cost-benefit ratio, I recently asked the Army Corps of Engineers for a list of those water resources projects in the President's 1979 budget that lack a positive benefit-cost ratio. I submit for the RECORD a copy of this list.

The resulting tables follow:

PROJECTS BELOW UNITY AT 6⅝ PERCENT INTEREST RATE

Q. At the present interest rate of 6⅝ percent, how many projects in the budget for construction funds have a benefit-to-cost ratio of less than unity? Please list the projects, the sum in the budget for each, the total remaining cost of each, as well as the benefit-cost ratio for each using 6⅝ percent.

A. There are 55 projects in the FY 1979 budget, that are under construction, that have a benefit-to-cost ratio of less than unity using 6⅝ percent interest rate. The list of projects and requested information are as follows:

[Dollar amounts in thousands]

Division/project	BCR at 6⅝	Fiscal year 1979 budget	Balance to complete after fiscal year 1979

HUMAN RIGHTS IN EAST GERMANY

Mr. HELMS. Mr. President, the sad state of human rights in Eastern Europe has been documented so many times that Americans seem to have become numbed to new charges that are raised. This is regrettable.

Indeed, I am concerned that we have become numbed to the existence of gross violations of human rights that exist in Europe. Meanwhile, elements of the major media never fail to seize upon every new allegation of rights violations supposedly occurring in those countries in Latin America, Asia, and Africa which happen to be friendly to the United States. It does not seem to matter to the media that these allegations so often prove to be unfounded rumors, or worse. Such selective outrage by the major media, too, is regrettable.

Therefore, when an authoritative document comes to light laying out human rights violations in detail, it is worthwhile to pay close attention to it.

Such a document is the "White Paper on the Human Rights Situation of the Germans in the German Democratic Republic (GDR) and East Berlin," published by the CDU/CSU group of the German Bundestag.

Mr. President, Germany is the only country in Europe divided between East and West. One of the most inhuman borders on Earth divides the people of one nation, separating thousands of families.

Almost daily, people die in their attempts to exercise a most fundamental human right, that of free movement. As they attempt to cross the border from East to West, they are shot, maimed or captured. The Berlin wall, and countless other border emplacements are mute reminders of the quality of human rights in East Germany.

As the report of the CDU/CSU group shows, basic human rights still do not exist in East Germany. Nor will they be observed as long as the United States and other nations which speak of freedom do nothing to put their words into action.

Mr. President, I commend to my colleagues this report. The CDU/CSU group is the largest single political group in the German Bundestag. Much time and labor went into this report. It is well worth considering as the United States proceeds into further negotiations with East Germany's soulmate in the observance of human rights—the Soviet Union.

Mr. President, I ask unanimous consent that the "White Paper on the Human Rights Situation of the Germans in the German Democratic Republic (GDR) and East Berlin" be printed at this point in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD as follows:

THE HUMAN RIGHTS SITUATION OF THE GERMANS IN THE GERMAN DEMOCRATIC REPUBLIC (GDR) AND EAST BERLIN

1. The inhuman border through Germany and Berlin:

Germany and the German people are divided by a border which the GDR Government has built up on its side with minefields and various other inhuman fortifications. The wall in Berlin and the barriers set up by the GDR along its border with the Federal Republic of Germany have become a symbol of the forceful division of a country and the division of a nation, a symbol of a policy irreconcilable with human rights.

In contravention of Principle VII of the CSCE Final Act and Article 12(2) of the International Covenant on Civil and Political Rights, the Government of the GDR denies its inhabitants the right to leave the territory of the GDR freely. In order to ensure that they cannot do so, the GDR Government has built a system of fortifications along the border with the Federal Republic of Germany and along the sectoral border in Berlin. A whole series of other measures have been introduced inside the GDR, likewise to prevent free movement.

Since the signing of the CSCE Final Act, those barriers and devices and the various other measures have not been removed; on the contrary, they have been increased and made more efficient. All these installations, ranging from mines and self-triggering firing devices, as well as the use of fully automatic weapons against people trying to escape, have claimed further victims and wounded others along the border. By keeping the people locked up within the State borders, the GDR Government is depriving them of an essential part of the basis on which to exercise their right to run their lives as they themselves see fit. This denial of free movement is a particularly grave encroachment upon their rights since its purpose is to separate the people of one nation and thus causes millionfold suffering.

1. The border through Germany and Berlin: The 1,393 km long border between the Federal Republic of Germany and the GDR, as well as the sectoral border in Berlin, more or less correspond to the border of the Soviet-occupied zone of Germany to the West laid down in the London Protocol of 12 September 1944. The demarcation line from Lübeck to Hof was first closed to traffic in both directions on 30 June 1946 by the Control Council for Germany at the request of the Soviet occupying power. Not until the Control Council issued Directive No. 63 on 29 October 1946 was traffic between the Soviet and the Western zones of occupation again possible, although subject to controls and with the introduction of the inter-zonal pass.

At first, the demarcation line was patrolled only by the Soviet army on the Eastern side,

then by units of the "Garrisoned People's Police" as well as from July 1948. Anyone who crossed the border illegally was usually detained for several days or weeks. It was not until two and a half years after the establishment of the German Democratic Republic that the situation along the demarcation line changed drastically. On 26 May, 1952, the Council of Ministers of the GDR issued an "ordinance on measures to be taken along the demarcation line". In that ordinance the Ministry for State Security was instructed to take steps to cut off the zonal border area completely. Since then the border right through the middle of Germany has been developed in various ways into an ever more perfect system of fortifications to prevent the free movement of the people in Germany.

2. The border fortifications today:

2.1 Restricted Area and Protective Strip: Along the whole of the border there is a Restricted Area which in parts is up to 5 km deep. People living in this area have a special entry to that effect in their identity cards. Special Police regulations apply in the Restricted Area. For instance, meetings, etc. and private celebrations must end at 10 p.m. The part of the Restricted Area adjacent to the border is the Protective Strip. In parts it is up to 500 m wide and even people who live in the Restricted Area may only enter it with special permission.

2.2 The actual installation and devices are as follows:

2.21. Metal trellis fence: As from the early seventies, the barbed-wire entanglements along the entire border were gradually replaced by fences made of prefabricated metal trellis sections fixed to concrete posts. There are two types. One is 2.40 m high and mounted in two rows with contact mines in between. The more recent type is 3.20 m high which is erected as a single fence and has "SM 70" automatic shooting devices attached to it. Both types of fence, depending on the terrain, are 30–70 m from the actual border line.

2.22. The vehicle ditch: In the open terrain immediately in front of the metal trellis fence seen from the GDR side a ditch about 1 m deep and 2 m wide has been dug to stop vehicles trying to crash through the border. The side of the ditch facing the Federal Republic of Germany is lined with concrete slabs which ordinary vehicles cannot cross.

2.23. The tracking strip: Immediately in front of the metal trellis fence or, where one exists, in front of the vehicle ditch, which all growth is removed. This strip shows up all tracks clearly and is checked every day by a special border control unit.

2.24. The relief road: In front of the tracking strip there is a road consisting of two rows of concrete slabs. Its purpose is to ensure the fast movement of border alarm groups and can be used by 16t lorries.

2.25. The protective Strip fence: The Protective Strip is marked off from the Restricted Area by a metal trellis fence only half the normal height but with electric contacts on top. If they are touched an optical signal is immediately flashed to the nearest command post of the guard company on duty. A siren may also be sounded. This enables the alarm groups to take action from two sides to stop the person trying to escape.

2.26. The observation towers: All along the border observation towers made of prefabricated concrete parts, steel or wood have been erected at irregular intervals. Usually they are in sight of one another. Some of them have bunkers as bases for the alarm groups. Others have command posts and the guards have rifles with telescopic sights.

2.27. The long-leash dog patrols: At points along the border that cannot so easily be kept under observation, dogs trained to attack humans are used for patrolling purposes. They are attached to a 200 m-long wire leash about 3 m high. This enables them to attack any escaper within their range. Nearly 1000 dogs are used in this way.

2.3. The "SM 70" automatic shooting and warning device: The "SM 70" automatic shooting devices are attached to every fourth concrete post of the metal trellis fence at different heights on the side facing the GDR. The "SM 70" consists of the firing apparatus with the cone-shaped shooting funnel, the ignition and reporting mechanism, and the fixture. They fire in a direction parallel to the fence. They are triggered if the wire is cut or moved about 2 cm. The trigger wire leads from one device to the fixture of the next at the same height. The funnel is filled with about 100 g trinitrotoluol (TNT). On top of this charge are about 110 sharp-edged pieces of steel roughly 4 mm long and weighing 0.5 g each. Up to a distance of 25 m they tear wounds in the victim similar to those caused by dum-dum bullets. And as the funnel, made of aluminum, is also shattered when the device goes off there is an added splinter effect.

The affect of the "SM 70" is exactly described by Dr. Werner Stoll of Wustrow, district of Lüchow-Dannenberg, in the Medical Report of 30 Juli 1976 on the death of the refugee Hans-Friedrich Franck of MeiBen, GDR, which reads:

"Hans-Friedrich Franck, who was injured by an automatic shooting device on the metal trellis fence along the GDR border within the Federal Republic of Germany, could not be kept alive in spite of the most intensive efforts by the doctors and all others helping to save his life. The irregularly shaped, jagged metal splinters, which have the same effect as a dum-dum bullet, if not worse, had shredded Franck's vascular structure below the groin to such an extent that suture was extremely difficult and slowed up the operation considerably." (See also the Pictoral Documentation, p. 99 seq.).

2.4. The orders to shoot: The GDR maintains 28 regiments along the intra-German border, including the border around West Berlin. Each border regiment usually has three battalions of four companies each. The frontier brigade "Coast" patrols the North Sea Coast. It consists of three groups of boats totalling 18 patrol vessels of the "Kondor" class.

The section of the Elbe between Schnackenburg and Lauenburg is guarded by frontier companies and the river itself by 24 patrol and long-range boats. Altogether the GDR border force comprises about 47,000 men. The use of fire-arms along the border is governed by Regulation "DV 30/10". The orders prescribed by this regulation are given orally only. Border guards are under orders to shoot to kill anyone in the immediate vicinity of the border fence or wall. They may only challenge or fire a warning shot if there are at least 50 yards between the metal trellis fence and the person trying to escape. If a person shot in this way is lying within the range of the border security installation he must be left there until the alarm group has been called.

2.5 Total length of the fortifications: The intra-German border—not counting the sea area in the Lübeck Bight—has fortifications of the kinds described above along its total length of 1,393 km. They can be broken down as follows:

As of July 15, 1977

[In kilometers]

Metal trellis fence	1,083
Protective strip fence	788
Minefields	491
SM 70 devices	248
Concrete walls/sight screens	8
Anti-vehicle ditches	739

Observation towers including treetop observation posts, 584.

Since the signing of the CSCE Final Act, the metal trellis fence has been lengthened by 93 km, the Protective Strip fence by 171 km, and the SM 70 firing devices have been installed along an additional length of 60 km.

2.6. The border around West Berlin: The border around West Berlin—including the sectoral border in Berlin—measures in all 165.7 km. Since 1961, its main element has been the Wall, which divides East and West Berlin over a distance of 46 km. In their present form, these border installations were for the most part put up between 1964 and 1970, viz., 55.2 km of metal fencing, 104 km of wall slabs topped with piping, 150 km of concrete wall, 123 km of fencing with electric signals (6—10 volts), 124 km of asphalt relief road. Situated along the wall are 251 observation towers, 144 bunkers with firing slits, 260 dog runs.

3. Victims of the border fortifications: Since 13 August 1961, members of the GDR border guard have fired at people trying to escape on 1509 occasions. Seventy people trying to escape and others helping them have been killed along the Wall. Sixty-six of them were shot. Ninety-one people have been seriously wounded. Over the past 16 years, 3,002 people have been arrested trying to escape over the Wall.

From 1949 to 1 August 1977, to the extent known to the Federal Republic of Germany, 182 people have been killed by mines, shot by guards or firing devices, or killed by other means along the entire intra-German border, including the border around West Berlin. Four of this number have been killed since the signing of the CSCE Final Act.

4. Penalties for attempting to exercise the right of free movement: The border fortifications also have as their equivalent the criminal law of the GDR, which imposes penalties on persons "guilty" of "unlawfully crossing the border" (section 213, GDR Penal Code). Under these provisions "anyone who obtains by devious means or for himself or another person a permit to enter or leave the German Democratic Republic or who leaves the territory of the GDR without government authorisation or fails to return to that territory" can expect a prison sentence of up to two years. Both preparation for and the actual attempt to escape are punishable. "In serious cases the offender may be sentenced to a term of imprisonment from one to five years" (Section 213 [2], GDR Penal Code). An example of a serious case is when a man and his wife together (i.e. a "group") intend to escape or the exit papers of another person are used or a "border security installation" is damaged.

Anyone who assists persons trying to leave the GDR without authorisation may be liable to prosecution for "anti-State trading in humans" (section 105, GDR Penal Code), almost a charge of slave trading, in spite of the fact that the inhabitant of the GDR concerned freely accepts such help. In April 1977—just as preparations were being made for the CSCE follow-up meeting—the GDR introduced stiffer penalties, so that now "particularly serious cases" may carry a life sentence.

For a good number of years there have been at least 2,500 people in custody in the GDR for attempting to "flee the Republic". Then there are a similar number of political prisoners who have been prosecuted for exercising the right of free speech and attempting to leave the country (see below II, 1.2; III, 1., 1.2).

The GDR uses some of these prisoners as a means of obtaining foreign exchange. For between 40,000 and 80,000 DM (German Marks) per person some are released after serving part of their sentence, usually to go to the Federal Republic of Germany.

From 1962 to 1976 inclusive, at least 720 million DM of budgetary funds of the Federal Republic of Germany alone was paid over

in this way. On top of this there are the special material concessions made to the GDR for this purpose within the scope of intra-German trade. But in spite of all these "purchases", the "reservoir" of prisoners shows no signs of drying up. It is kept full by making it a crime for people to escape from one part of Germany to the other, and even to make a lawful application for permission to leave the GDR or to voice critical opinions.

II. Other serious violations of human rights and disregard for the aims of the CSCE Final Act:

The GDR disregards the aims and the declarations of intent of Basket III of the Final Act with regard to "co-operation in humanitarian and other fields".

The underlying purpose of Basket III of the Final Act is to increase contacts between the people with a view to consolidating peace and understanding. The object is to bring families together and facilitate marriages between citizens of different States. It aims to improve travel, primarily on family grounds but also for business reasons and tourism. And Basket III says that no one should be placed at a disadvantage for submitting the appropriate application to the authorities of his country.

The law and practice of the GDR run contrary to this aim of the Final Act.

1. Separation of families and refusal to allow families to reunite: Part 1(b) of Basket III of the Final Act reads:

"The participating States will deal in a positive and humanitarian spirit with the applications of persons who wish to be reunited with members of their family, with special attention being given to requests of an urgent character—such as requests submitted by persons who are ill or old. They will deal with applications in this field as expeditiously as possible. They will lower where necessary the fees charged in connection with these applications to ensure that they are at a moderate level. Applications for the purpose of family reunification which are not granted may be renewed at the appropriate level. . . . .Until members of the same family are reunited meetings and contacts between them may take place in accordance with the modalities for contacts on the basis of family ties.

The participating States confirm that the presentation of an application concerning family reunification will not modify the rights and obligations of the applicant or of members of his family."

1.1. Since the signing of the Final Act there has been an increasing flow of complaints from GDR citizens and their relatives in the Federal Republic of Germany about the way applications for family reunion have been handled.

There is a close connection between applications for the reuniting of families and for permission to be able to visit relatives. Often a citizen of the GDR or a family will at first only submit an application for one visit to relatives in the Federal Republic. The application leads to reprisals (described later on) by the GDR authorities or personnel departments of "people's enterprises". The lasting disadvantages which result prompt the GDR citizens to apply for settlement in the Federal Republic of Germany because they see no further possibility of a secure livelihood in the GDR.

1.2. In order to prevent the reuniting of families the GDR authorities resort to the following means:

They have introduced a narrower definition of "family". It is usually equated with "family household", in other words only the husband, wife and legitimate children under 18 living with their parents are regarded as members of the family.

Parents, in-laws, grandparents, adult brothers and sisters, half brothers and sisters, or relatives of the third or fourth degree, are not recognized as members of the family.

In fact, exit visas are sometimes granted only to certain members of a family (e.g. only to the parents and children under age), which causes even more separation.

Time and again reports are received to the effect that the GDR authorities inform applicants that the United Nations Human Rights Conventions and the International Covenants on Human Rights, as well as the GDR's contractual commitments to respect human rights, as embodied in article 2 of the Basic Treaty between the GDR and the Federal Republic of Germany and in the Final Act of Helsinki, are not directly binding.

And there are growing numbers of reports that the GDR authorities treat applications for exit visas as a criminal offense and dismiss the applicants from their jobs; they are not given work by other "people's enterprises" or public administrations; they are then accused of being "shirkers" and in accordance with the provisions of the GDR's Labour Law, of "asocial behaviour", and sentenced to terms of imprisonment. The process of constraint and making criminal offenses out of applications also takes the following form: GDR inhabitants who apply for exit visas are immediately declared to be "persons in possession of secret information" and therefore forebidden to have "contacts with the West"; in many cases it is assumed that they have ignored this ban by maintaining relations with members of their families in the West; this automatically entails criminal proceedings.

Constraint by the GDR authorities is particularly common as regards families with children who apply for exit visas. The authorities threaten to deprive them of their parental rights and to have their children transferred to state homes because they have not brought them up to hate the West and hence their Western relatives. If they thereupon withdraw their applications they are promised leniency.

Even people who have not applied for exit visas but do not discriminate against those who have or send them to Coventry can also expect reprisals.

The GDR authorities are also in breach of human rights in that they infringe the privacy of applicants' mail and monitor all their communications with others.

But contempt for the spirit and letter of the Final Act is manifest in particular in the fact that renewed applications for permission to reunite with members of the family lead to a ban on contacts with relatives in the West altogether, i.e. no travel in either direction.

The number of pending applications for permission to join family members in the Federal Republic of Germany is estimated at 30,000. The fact that only 4,914 persons in this category were allowed to transfer to the Federal Republic of Germany in 1976 shows how far this deeply human problem still is from solution.

1:21. Particularly serious are those cases where one member of a family succeeds in escaping to the Federal Republic of Germany. His relatives are first advised to induce that person to return. If this fails pressure is put on the husband or wife to break off relations with the spouse in the Federal Republic of Germany and in particular to cease all correspondence. Then after a certain period the man or wife, who is not permitted to leave the country, is urged to seek divorce. If this person is in the public service, has an important job, or is otherwise a "possessor of secret information" (within the broad definition applied by the GDR) he is required to sever all contacts with relatives in the Federal Republic of Germany. He must undertake to discontinue all written or oral communications, and is not even permitted to meet his parents if they visit the GDR. The disadvantages both at work and otherwise for anyone breaking this ban are so grave that a young man who recently had a clandestine meeting with his parents who had travelled to the GDR from South Germany has said he will not see them again because the risks to himself and his family are too great. The mere fact that parents or a man or wife who have remained in the GDR apply for permission to transfer to the Federal Republic of Germany is enough to bring them personal and economic disadvantages and to expose them to chicanery and discrimination which may go so far as social degredation.

* * * * *

1.3. Persons engaged to be married kept apart: Paragraph 1 (c) of Basket III of the Final Act reads:

"The participating States will examine favourably and on the basis of humanitarian considerations requests for exit or entry permits from persons who have decided to marry a citizen from another participating State."

Whether it is a question of engaged couples or the reuniting of families, the attitude of the GDR authorities is the same.

Judging by reports from people who have been affected, the GDR authorities are if anything even quicker to arrest single persons, and with more ruthlessness than in the case of married people.

The reprisals are much the same as the ones described above:

No legal basis;

Off-handed treatment of applicants, the tedious, involved processing of applications;

Applicants are moved to another place of work and degraded;

They are dismissed on fictitious charges;

Fiance(e)s from the West are refused entry visas, as are other relatives or friends;

Isolation and discrimination in the local community, etc.;

Ultimately arrest and sentencing for asocial behaviour or "incitement against the State".

In many cases the fiance(e) in the West is recommended to come to marry in the GDR. They are told that they will have similar professional opportunities as in the West. In practice, however, these promises are not kept and there are three serious restrictions which deter engaged persons from moving to the GDR to marry.

Firstly, former citizens of the Federal Republic of Germany who transfer to the GDR are allocated to low-grade jobs on the grounds that this is in keeping with the GDR's internal security provisions; secondly, those with a university training are not allowed to take scientific or social literature, even fiction, with them to the GDR because such works are denounced as "inflammatory imperialistic literature"; thirdly, those coming from the West are treated in the same way as inhabitants of the GDR, which means that people of non-pensionable age are not allowed to travel to the West; but if they marry someone in the West they hope to be able to travel to the East.

In view of these main restrictions (but there are others resulting from the internal system of the GDR) of human rights and freedoms, young people in the West engaged to be married to someone in the GDR refuse to move there to get married.

The fact that the GDR authorities refuse to allow any inhabitant of the Federal Republic of Germany who is engaged to an inhabitant of the GDR to enter the GDR as a visitor is a particularly blatant obstacle to human contacts and a violation of the provision of Basket III, 1 (c), of the Final Act. Numerous West Germans and West Berliners have been turned back at the border for this reason, even though they have been in possession of an entry visa. Nor are the citizens of the GDR affected allowed to travel to socialist States, which means that they cannot meet their fiancé(e) anywhere in the world.

1.4. Inhuman deprivation of parental rights, compulsory adoptions: The GDR's policy of destroying family ties between Germans is particularly obvious from the way the children of persons who have left the GDR "illegally" are treated. In flagrant disregard of the natural right of parents to care for their children themselves and to decide where they should stay, the children are kept in the GDR and put in homes or given to other people to be looked after. Frequently, parents are even refused information as to the whereabouts of the child. After a time the parents are asked to agree to their child being adopted by a family they do not even know. If they refuse their approval is replaced by a court decision. The ground given for the adoption is either that it is for the child's well-being, that the child is better off with a socialist upbringing, or that the parents have allegedly not looked after the child and been indifferent to it. The court deliberately ignores the fact that because the child has been kept in the GDR the parents have had no chance to care for it.

Neither the Final Act of Helsinki nor the human rights conventions have deterred the GDR authorities from holding back the children of parents who want and are in a position to look after them and apply for permission for them to leave the GDR, from having them brought up by strangers and ultimately allowing them to be adopted.

* * * * *

2. Citizens of the GDR are prevented from visiting relatives in the Federal Republic of Germany or other Western countries:

2.1. Paragraph 1 (a) of Basket III of the CSCE Final Act reads:

"In order to promote further development of contacts on the basis of family ties the participating States will favourably consider applications for travel with the purpose of allowing persons to enter or leave their territory temporarily, and on a regular basis if desired, in order to visit members of their families.

Applications . . . will be dealt with without distinction as to the country of origin or destination . . . The issue of such documents and visas will be effected within reasonable time limits; cases of urgent necessity—such as serious illness or death—will be given priority treatment . . .

They confirm that the presentation of an application concerning contacts on the basis of family ties will not modify the rights and obligations of the applicant or of members of his family.

2.2. Inhabitants of the GDR have sent thousands of reports to the effect that this declaration of intent, which their leaders, by signing the Final Act, have adopted, has not been put into practice. The reports show that the procedures for dealing with applications for exit permits have not been simplified. As before the CSCE, the situation is one of arbitrary action.

Only GDR inhabitants who have reached the statutory retirement age, that is, women from the age of 60 and men from the age of 65, as well as invalids, may visit relatives in nonsocialist countries once or several times a year for a total of 30 days (to countries outside Europe, for up to three months). Pensioners have been permitted to leave the country since 1 November 1964.

2.3. With regard to other inhabitants of the GDR, that is, the great majority, formal rules have been published according to which travel to non-socialist countries may be allowed on urgent family grounds, which means for births, marriages, silver and golden wedding anniversaries, sixtieth, sixty-fifth, seventieth wedding anniversaries, serious illnesses and deaths. Entitled to apply are grandparents, parents, children and brothers and sisters (according to the GDR decree governing the travel of GDR citizens, dated 17 October 1972, as amended on 14 June 1973—Law Gazette I, p. 269).

But these regulations only say that permission "may" be granted; they do not concede any right to travel; it is entirely at the discretion of the authorities. Apparently, local GDR authorities are bound by restrictive instructions that have not been published. This explains the fact that every year only about 40,000 GDR citizens are allowed to travel to the Federal Republic of Germany on urgent family grounds, although there are very many such occasions within the meaning of the GDR decree because the Germans living in the Federal Republic of Germany, the GDR and Berlin together make up about 77 million people.

To prevent travel to non-socialist countries, the GDR again resorts to the method of declaring large sections of the working population to be "carriers of secret information" who may therefore not maintain contacts with people in the West. These include not only servicemen, police and teachers, but many other members of the party and state apparatus and "people's factories", and from the world of science and culture. Banned contacts with the West include, apart from travel to non-socialist countries, visits from such countries as well as contacts by telephone or correspondence with persons in "capitalist countries". The "illegal" maintenance of such contacts results in disadvantages both in the community and at work, for instance allocation to a lower grade and hence lower paid job.

Under GDR law, the authorities do not have to state any reasons for refusing applications for travel visas, so that the person concerned can do nothing about it.

Inhabitants of the GDR deplore in particular the fact that the final Section of paragraph 1(a) of Basket III of the CSCE Final Act has not been put into practice. With the exception of pensioners, people of working age who submit applications for exit visas must usually expect not only long periods of interrogation but also disadvantages at work and in the local community (downgrading, transfer to another place of work, eviction, refusal of holiday accommodation, etc.).

In almost every exceptional case where an exit visa is granted on urgent grounds (serious illness or death) only one person is allowed to travel. GDR citizens accuse the authorities of keeping either the husband or wife and children back as hostages. Single adults of working age are practically never granted a visa, even on the most urgent grounds.

Inhabitants of the GDR also report that permission to travel for family celebrations (birthdays, baptisms, weddings and jubilees) are almost never granted to persons under retirement age—not even to either husband or wife.

In general people complain mostly about the arbitrary and impolite treatment of the GDR authorities. Applications are handled very restrictively and the applicants themselves subjected to extensive interrogation to induce them to withdraw their applications. There are reports of close co-operation between the authorities and the "people's factories" and constant references to pressures and intimidations which completely reverse the purpose of Basket III of the CSCE Final Act.

In view of the large numbers from the Federal Republic of Germany—including West Berlin—who visit relatives in the East (1976: over seven million), the people in the GDR feel themselves degraded because in their case hardly anyone under retirement age is allowed to visit the Federal Republic of Germany. The intensity of the frustrated desire to visit the Federal Republic is indicated by the fact that for many years about a million pensioners have been visiting the Federal Republic every year. They are only permitted to travel when they have reached the age at which the GDR Government no longer regards them as vital to the State.

In the Federal Republic of Germany, too, there is mounting criticism of the fact that it is becoming increasingly difficult to visit relatives in East Germany. The main complaint is that the GDR authorities reject applications for entry visas if a member of the family to be visited has applied for a visa to travel to a Western country.

And finally there are many reports from people in the Federal Republic who have been asked by their relatives in the GDR not to visit them because the outcome (particularly for young people) could be discrimination at work and in other respects.

The attitude of the GDR authorities runs contrary to the postulate of the CSCE Final Act, which is that efforts will be made to intensify and improve family contacts.

2.4. Financial obstacles to travel: The financial obstacles put up by the GDR Government also militate against the Final Act, which calls for easier travel arrangements. Whereas GDR pensioners who have been given permission to travel to the Federal Republic are allowed to bring only 15 DM with them p.a., which means that their stay in the West must be paid for entirely by their relatives (with grants from public funds from the Federal Republic of Germany), Germans from the federal territory travelling to the GDR are charged 15 DM for the visa as well as a road toll for cars, depending on the length of the journey. In addition, each visitor must exchange 13 DM per day, the only exceptions being people of pensionable age, invalids, persons fully incapacitated and on full pension, and children under 16. Thus visits by or to relatives as between the two German States are considerable financial burdens.

3. Refusal to grant permission for contacts between people who are not relatives: Paragraphs 1 (d)—(h) of Basket III of the Final Act of Helsinki speak of improving and simplifying the procedures for "travel for personal or professional reasons", tourism, meetings among young people, sports and other contacts.

This is another intention which the GDR has failed to carry out in relation to the Federal Republic of Germany.

According to para 1 (h), participating States are supposed to develop contacts among governmental institutions and non-governmental organizations and associations.

On account of the negative attitude of the GDR Government, such communication between the two German States is very rare. That meetings between sports associations, youth groups and other clubs, etc., as well as meetings at communal level, help to foster peace is obvious; all attempts by the Federal Republic of Germany to establish such contacts with the appropriate institutions in the GDR have up to now—apart from a few cases where the GDR leadership has had a specific political interest—proved abortive.

4. Discrimination against and prosecution of people who, trusting in and invoking Basket III of the Final Act of Helsinki, apply for permission to settle in or travel to the Federal Republic of Germany; The GDR has omitted to establish unequivocal and generally applicable rules of law which set out the rights of its citizens. As in the days prior to the CSCE, ambiguous regulations hold out only a vague possibility of permission being granted; some of them have not even been published.

It is irreconcilable with the aims of the CSCE Final Act for the GDR to announce in its constitution and laws, and by publishing the CSCE Final Act, that its citizens "may" apply for a visa to leave the country or settle in the Federal Republic of Germany—only then to punish people who enquire about the administrative channels

they have to go through in order to avail themselves of the possibility, or if they submit applications. And it is also intolerable for citizens who, having submitted applications in conformity with the law, are not even told why their applications have been rejected. As a result of the attitude of the GDR leadership, countless inhabitants of the GDR—the number is put at 200,000—are now in personal difficulty or see their very livelihood threatened; they address urgent appeals to the signatories of the CSCE Final Act not to allow them to suffer for having believed in this document—and hence in the word given by the representatives of Europe and North America.

* * * * *

III. Free speech and freedom of information, as well as freedom of conscience and religion, are still not respected in the GDR:

1. No freedom of thought:

1.1. Contrary to the intentions of Principle VII of the Final Act and to Article 19(2) of the International Covenant on Civil and Political Rights, the people in the GDR are denied the right to express their views freely. As in the past, the dissemination of views unwelcome to the party and the leadership of the GDR carries the threat of prosecution and "social disadvantages". The persons concerned are prosecuted in particular under section 106 of the GDR Penal Code ("incitement against the State"). Any publicly or privately expressed criticism of the social situation, even criticism within the system, can easily be placed in this category. In recent times more and more persons have been prosecuted under this provision for standing up for human and civil rights, or for saying they were applying for permission to leave the GDR because the situation there was not to their liking. They can be sentenced to as much as 10 years' imprisonment. Since the signing of the Final Act, the provisions have been made more severe by the introduction of the second Penal Law Amendment Act of April 7, 1977. According to section 220 of the GDR Penal Code, for instance, anyone who "disparages" measures taken by government agencies or social organisations in public are prosecuted. People who criticise even subsidiary organs of the party and the State can also expect to be charged.

By applying these arbitrary provisions of criminal law, which can be given practically any interpretation, the right of free speech can be reduced to nil.

In fact the mere threat of such punishment creates an atmosphere of fear and lack of freedom. Even writers and artists who are generally in line with official ideology but have criticised certain aspects of the GDR regime have been isolated by the police, arrested, or forced to move from their local community against their will.

Professor Robert Havemann, for instance, the internationally known scholar, has been under strict house arrest in East Berlin since November 1976 on the strength of a court order for protesting to SED Secretary General Honecker against the decision to strip artists and writers of their citizenship, and for expressing critical views in the West German press about conditions in the GDR. Western journalists, and even the Swedish Foreign Minister, have been refused permission to speak to Havemann, who had incurred the displeasure of the GDR authorities as early as 1968 when he protested against the intervention in Czechoslovakia.

The East Berlin economist Rudolf Bahro, although a convinced Marxist and member of the SED, was arrested in August 1977 for criticising the GDR system.

Dr. Hellmuth Nitsche, professor of German, was arrested with his wife in April 1977 for writing to President Carter about violations of human rights in the GDR. He had already lost his chair at the East Berlin Humboldt University in 1974 for voicing criticism and been downgraded to the post of technical school teacher. In September 1977 he was allowed to go to the Federal Republic. In his letter to President Carter in March 1977 he wrote.

"The number of persons who have applied to be relieved of GDR citizenship, invoking the constitution, the United Nations Charter, the Declaration of Human Rights, and not least the Final Act of Helsinki, is estimated at over 200,000. The Government of the GDR cannot cope with this flood of applications. It therefore reacts with dismissals without notice, shameless defamation, interrogation, and other reprisals. Only a tiny few of the applications have been approved. The great majority of applicants have been deprived of their livelihood and attempts are made to "starve' them, in other words to force them to work as labourers for the communist regime by continually rejecting their applications without reason, or simply not dealing with them any more . . .

. . . The GDR's policy of walling itself off from the Federal Republic of Germany has been taken to the extreme. The communist rulers consider it a political crime for someone even to speak of the unity of the German nation. Anyone in the GDR who has the courage to express his own opinion (as 'guaranteed' in the constitution), anyone who invokes human rights or the Helsinki Final Act, is dismissed without notice. Applications to be relieved of GDR citizenship are refused without any reason being given or they are simply no longer processed; they disappear in the bureaucratic apparatus of this State. In fact even people who merely apply to be reunited with their families are forcibly deprived of their livelihood, irrespective of whether they are scholars, artists, or taxi drivers. Slander, outlawing and 'starring' of applicants, these are the methods used by the GDR Government for the past six months and more to stifle the demand by its people for the exercise of human rights . . ."

The Frankfurter Allgemeine Zeitung published in its 30 August 1977 edition a list—still incomplete—of writers and artists who have voluntarily left the GDR or have been deported; it includes for 1975 to 1977 alone:

Reinhardt, Andreas, stage designer.
Biermann, Wolf, writer.
Brasch, Thomas, writer.
Faust, Siegmar, writer.
Hagen, Nina, actress.
Jentzsch, Bernd, writer.
Renft, Klaus, musician.
Schleef, Einar, director, Berliner Ensemble.
Thalbach, Katharina, actress.
Cohrs, Eberhard, comedian.
Dresen, Adolf, director.
Graf, Dagmar, actress.
Hagen, Eva-Maria, actress.
Krug, Manfred, actor, singer.
Kunze, Reiner, lyric poet.
Medek, Tilo, composer.
Fuchs, Jürgen, writer.
Kunert, Christian, musician.
Pannach, Gerulf, writer of political songs.
Nitschke, Karl-Heinz, doctor.
Nitsche, Hellmuth, professor of German.
Kirsch, Sarah, writer.

1.2. Sentences passed on the basis of these penal provisions keep the number of political prisoners in the GDR at a consistently high level. There are at least 4000–5000 prison inmates and others held in custody pending trial, including the 2,500 or so imprisoned for attempting to flee or helping others to do so. Countless dissidents who express their views orally or in writing suffer professional or "social" discrimination. Of late there has been an increasing number of cases of people who support human rights and invoke the CSCE Final Act, the United Nations human rights conventions reaffirmed therein, and the provisions of the GDR constitution relating to basic rights, being prosecuted.

According to reports from many persons having been released from prison, prison treatment in the GDR, even after the signing of the CSCE Final Act, falls short of even the minimum guarantees endorsed in the Final Act and in particular Articles 7 and 10 of the International Covenant on Civil and Political Rights. Many cases have become known in which prisoners have been treated in a manner which grossly conflicts with the requirement of Articles 10, i.e. that "all persons deprived of their freedom shall be treated with humanity and with respect for the inherent dignity of the human person." This applies in particular to strict solitary confinement, usually in the cellar with no more than a plank bed and a blanket. In the daytime there is nothing to sit on; the heating in winter is inadequate. The daily ration consists merely of 200 g bread and a jug of malt coffee or tea, with warm soup without meat only every third day.

Former inmates of Cottbus hard labour prison, for instance, have described the completely overcrowded conditions as follows:

Cottbus prison, which was built for 600, was completely overcrowded in 1975/76. In each cell four beds were placed on top of one another to accommodate about 1,200 inmates. Eighty per cent of them are political prisoners and the last Church service held in the prison was in 1973. Since then there has been no ministerial work in the prison; the prisoners have even been refused a Bible.

Former prisoners of Brandenburg prison tell a similar story. There, too, the cells have three times as many occupants as originally intended. The inmates have to work three shifts round the clock. Their rest period is deliberately disturbed by number calls.

In the second half of 1976 alone, 91 cases of maltreatment in GDR prisons were reported to the Central Office of the Regional Judicial Authorities of the Federal Republic of Germany in Salzgitter, which keeps a record of such cases.

On 5 May 1977, in view of the approaching CSCE review meeting, the GDR introduced a new law on the prison regime. Whether the GDR will actually change its treatment of prisoners, which is known to be both severe and inhumane, remains to be seen.

2. No freedom of information:

2.1. Contrary to Principle VII of the Final Act and the human rights conventions reaffirmed therein, the GDR Government restricts the right to free information. Its laws and their practical application are in contravention of Article 19 (2) of the International Covenant on Civil and Political Rights, according to which everyone is free "to seek, receive and impart information and ideas of all kinds regardless of frontiers, either orally, in writing or in print, in the form of art or through any other media of his choice".

The GDR makes the statutory restriction permissible under paragraph 3 of this article the rule and thus reduces to nil the essence of the right to free information:

The purchase of Western literature is as good as forbidden since the GDR has placed an "Import ban" on

Newspapers and other periodicals not contained in the postal newspapers list of the GDR;

Calendars, almanachs, yearbooks and lists of addresses;

Records, in so far as they are not classical works or genuine modern works; magnetic tapes and other sound carriers;

Literature and other printed matter "the content of which is inimical to the preservation of peace or the import of which is in any other way inconsistent with the interests of the socialist State and its citizens".

The postal newspaper list of the GDR does not contain any non-communist newspapers. The last part of the above enumeration, which is taken from the GDR information bulletin "Information on Customs and For-

eign Exchange Regulations of the GDR" of November 1976, is used more or less as a general ban.

2.2. Contrary to the declaration of intent in Basket III of the Final Act on "improvement of working conditions for journalists" and of the exchange of letters of 8 November 1972 "on working possibilities for journalists" (in connection with the initialling of the Basic Treaty between the two German States), the GDR Government has even gone so far as to expel the West German journalists Mettke (1975) and Loewe (1976). In spite of complaints by the persons concerned and the Government of the Federal Republic of Germany, it has not given any reasons for their expulsion as required under part 2 (c) of Basket III of the Final Act. Again, the personal contacts between journalists and their sources of information envisaged in the same provision are severely restricted, if not prohibited altogether, as in the case of contacts with even communist writers like Professor Havemann, though they are critics of the regime.

3. Discrimination on account of the Christian faith; Principle VII of the CSCE Final Act reads in its paragraph 1: "The participating States will respect human rights and fundamental freedoms, including freedom of thought, religion or belief, for all without distinction as to race, sex, language or religion." Article 18 of the International Covenant on Civil and Political Rights, which was reaffirmed in the Final Act, guarantees the right to freedom of thought, conscience and religion, including religious worship, and the freedom of parents to ensure the religious and moral education of their children in conformity with their own convictions. Other articles prohibit discrimination on religious grounds (Articles 2, 24, 26). The actual situation in the GDR contrasts sharply with these guarantees of religious freedom. True, on the surface religious services and other rites appear to be subject to few restrictions, but on the outside, this being a strictly internal Church matter, government and party organs are very carefully and persistently striving to assert their atheist ideology absolutely. The struggle against Christianity is conducted in "an atmosphere of quiet determination", in the words of a Protestant regional bishop. From the cradle to the vocational school, children are exposed to an intensive atheist influence which is complemented by pressure on their parents. Teachers are committed to the educational principles of the official State ideology, which embrace active atheist, anti-religious propaganda.

Moreover, children are made to fear possible discrimination when they later start work. They are told that they are spoiling their future chances by professing Christianity and attending religious lessons, receiving Communion, or being confirmed. Moreover, Christian instruction, which is in any case only possible outside school hours, is made increasingly difficult because of the heavy physical strain on the children, who have to take part in "working groups" and other activities organised by the school or the party, precisely with the aim of excluding Church influence. In townships where all-day schools have already been introduced, regular Christian instruction is hardly possible. Parents who are considered prone to influence are put under pressure by teachers, on the instructions of the local party secretaries, not to allow their children to attend religious lessons or preparatory instruction for Confirmation; otherwise, they are told, their children would face serious disadvantages later. Parents are urged not to have their children baptised but to prepare them for their "dedication to a socialist way of life". Party and government departments work closely together in the fight against Christianity. The slogan drilled into members of the SED's children's organisations, the "Young Pioneers" and the "Thälmann Pioneers", is: "a pioneer does not attend Christian lessons".

At district level there is a "Youth Dedication Committee" which co-ordinates agitation against Christianity. Many cases are known of parents who have their children taught the Christian faith being called in by the works or group leader and having to undertake not to allow their children to be confirmed, on penalty of discrimination at work. They are told that the "dedication of the young" is the expression of a political attitude and that it alone conforms to the new type of "socialist personality". For some time now, assessments of school leavers (after the 10th year) have been supplemented by an internal remark: "took part in the youth dedication", or "took part in only the youth dedication". If they are confirmed they have little chance of obtaining one of the highly coveted apprenticeships. The children of Protestant pastors are in the worst position.

Further training is increasingly being made dependent on the person concerned leaving the Church; in the case of married persons, the next step is to insist that the whole family leave. And in some trades applicants must sever their ties with the Church before they can be appointed. The "decree on canditure, selection and admission to direct studies at universities and institutions of higher education", dated 14 July 1971, states as a prerequisite for admission "active participation in the development of the socialist society and a willingness to play an active part in the defence of socialism." Young persons with religious ties are not considered to have the ideological awareness necessary for this. Pressure on children is furthermore intensified by exposing them to ridicule.

* * * * *

The advantage to be gained by early withdrawal from the Church lies in better occupational opportunities and preferential treatment in the allocation of flats for young married couples. And by giving money and other gifts to those who dedicate themselves to the socialist way of life, the SED tries to make these socialist ceremonies popular.

Anti-Church activities are conducted with differing degrees of intensity. In the spring of 1976, the heads of the SED associations in districts that still have a relatively high proportion of Christians were reprimanded by the party central committee. Since then the fight against the Christian Church in those districts has been noticeably stepped up.

In August 1976, the Protestant Pastor Oskar Brüsewitz committed suicide by self-immolation in the market place of his home town of Zeitz and thus drew world public attention to the desperate situation and lonely martyrdom of many young Christians in the GDR in particular. On a placard he had written the words: "the Churches accuse communism of supressing the young".

IV. Bringing up young people to hate: In contrast to the Principles of the Final Act, which express the political will to improve relations between States, to foster the solidarity of peoples, and to overcome mistrust, the political leaders in the GDR have not desisted from their policy of educating young people to hate the "imperialist enemy". In GDR schools, during pre-military training, and in the political youth organisations, with the support of literature and statements by political leaders, young people are taught to hate the alleged "class enemy". Without regard for the demands embodied in the Final Act, the Chairman of the GDR Council of State, Erich Honecker, speaking at the 9th SED Congress on 18 May 1976, confirmed "irreconcilable hatred of the enemies of the people" as being the political guideline for the education of young people. The Chairman of the Council of State has thereby followed up his previous constant advocacy of teaching hatred, which he derives from the "irreconcilability of socialism and imperialism". The GDR's Minister of Defence, General Heinz Hoffmann, also disregarded the Principles of the Final Act when, at a ceremony to mark the 20th anniversary of the National People's Army on 28 February 1976 in East Berlin, he stressed that the result of this government policy was that the party (the SED) had taught millions of citizens "to hate the enemy". This was part of a sequence of guidelines for training, countless speeches, and routine orders to units of the National People's Army. Thus, for instance, addressing cadets about to leave the GDR military academy immediately before the initiating (8 November 1972) of the Treaty on the Basis of Relations between the Federal Republic of Germany and the German Democratic Republic, he underlined the need to teach young people "to hate imperialism and its rotting social system". To do so, he said, it was not sufficient "simply to reject and hate imperialism as a system; that hatred must be directed in particular against all those who stand ready to attack us under the command of imperialist generals and officers".

In teaching young people to hate in this way the GDR's leaders leave no doubt as to the object of their hatred. Since the social system is the State's substructure, the alleged "imperialist enemy"—though a more moderate tone appears expedient—are those States with a different social system, in other words the democratic States of the West who signed the Final Act. It is incompatible with the aim of fostering international friendship and solidarity as embodied in the Final Act to fill the hearts of young people with hatred of the people and the leaders of other States. Avowals of peace and security in the Final Act become mere lip service if the intransigent struggle remains part of the ideological concept.

The GDR has no serious intention of giving effect to the Final Act of Helsinki: The fortifications put up by the GDR running right through the middle of Germany and the use of the armed forces and military equipment against civilians trying to cross them are utterly incompatible with the principles of humanity and the aims of the CSCE Final Act. These inhuman fortifications and the instructions given to border guards to shoot to kill make nonsense of the notions of "security" and "co-operation" and block the path to the goals inherent in the name of the Helsinki Conference.

Only if the use of military weapons against civilians in the form of mines and shooting devices were discontinued and the "orders to shoot" cancelled could one take it as a sign that the GDR seriously intends to pursue these aims. The GDR Government would only give proof of such intention to meet the requirements of Principle VII of the Final Act and allow the exercise of the individual rights embodied in Article 12 of the International Covenant on Civil and Political Rights if its authorities were to take specific steps to grant free movement pursuant to Article 12(2) of the Covenant instead of making the exception contained in Article 12(3) the rule. The granting of permission to travel to the West only to people in retirement and the issue of exit visas in but a few cases conflict with the dictates of international law.

URBAN POLICY AND JOBS

Mr. DOLE. Mr. President, I invite the attention of my colleagues to a speech given by Jerry Wurf, president of the American Federation of State, County, and Municipal Employees, before the National Press Club yesterday.

Mr. Wurf's speech was on urban policy and related matters. I would like to highlight his statement rejecting the "concept of Government as the employer of last resort." He further notes that the Federal Government should concentrate on the creation of good jobs in the private sector—a view which I share.

Likewise, his other views on urban policy should be of interest to my colleagues. Mr. President, I ask unanimous consent that the speech be printed in the RECORD.

There being no objection, the speech was ordered to be printed in the RECORD, as follows:

URBAN AMERICA: THE CRISIS NEED NOT BE PERMANENT

Almost to the point of monotony, we have catalogued the details of America's urban miseries, talked about our insights, and debated our solutions. But on the whole we have approached the urban crisis as a permanent emergency. We have defined the problem as essentially one of poverty. Sometimes competently, and sometimes ineptly, we have tried to respond to the problems of the poor. To be sure, it's the poor who deserve our great and immediate attention. But the heart of the problem is not pain. It is comfort, and even affluence.

I am here to tell this audience that reasonable effort to help the dispossessed cannot succeed without reasonable effort to help and respond to the needs of the middle class.

From time to time, partial solutions and emergency measures have helped to assuage the pain of urban decay. Revenue sharing, countercyclical assistance, targeted community development grants, the CETA program and other federal initiatives have helped us fight important battles. But we are losing the war.

Funding has been inadequate. Inadequacy has been compounded by waste. Federal aid has not been targeted narrowly enough. Most importantly, we have not evolved a coherent program.

If these are truly united states, and not the semi-autonomous demi-nations which existed under the Articles of Confederation; if we are truly a nation and not a loose collection of loners; we must pursue a determined effort of national work for the revival of our hard-pressed cities.

The cross-cutting problems of urban blight are not only a cruel infliction on the urban poor. They are also a powerful force which is driving the moderate income-earner into the suburbs and carrying hopes for recovery with him. We can't repair the fabric of urban blight without unraveling and reweaving the whole cloth.

That kind of effort demands leadership, national coordination, rational planning, and prudent strategy.

As President of the nation's largest union of public employees, I reject the concept of government as the employer of last resort. This theory, this slogan, is a sure and proven loser.

Public jobs are vital; but public employment cannot work as a system of welfare.

This is a capitalist society. It is unreasonable to expect such a society to work without capital. The availability of private sector jobs is a prerequisite for the health of American cities as well as the foundation of a prosperous American society.

Do not misunderstand me. Our cities must deliver high quality, high volume public services which educate, house, provide safety, and recreation, and deliver all the other amenities which will keep the middle class in Metropolis or lure them back.

It is just that private sector employment must be the linchpin of true urban recovery and incentives for private investment are the key to a workable program of urban progress.

The cities are lacking two kinds of investment—investment in the physical capital of factories, equipment, and buildings; and investment in the human capital of job training, education, and health care.

We can aim for mere survival or we can work to rebuild a truly vital urban environment.

The present need for assistance to the indigent should not disguise the need for a long-range solution. In the long run, the present recipients of inadequate largesse must be integrated into the mainstream of our society.

By and large, we have taken a Ward-of-the-State approach to solving the urban crisis. If we choose, we can continue to follow that course. The city can be tethered to a federal life support machine. Food stamps and welfare payments can be funneled in through tubes. Artificially created public sector jobs can project the illusion of useful employment. Inadequate food, shelter, and clothing can be pumped in through the umbilical cord.

That kind of system may keep the cities breathing. But there will be no life there, no vitality, no share in the commerce, pride, and dignity of our national community.

The long-range solution demands more. It demands the revival of self-sufficiency in our once-great urban centers. Private investors have abandoned the cities in droves, taking jobs and opportunities with them. Government policy has encouraged and rewarded that trend.

It is a trend which must be diverted. That is why the stimulation of commerce, industry, jobs and a reasonable, safe environment in the hardship cities is crucial to urban recovery.

Not long ago, the citizens of Redding, Connecticut faced a terrible dilemma. Should $69,000 in revenue sharing funds be spent on a bridle path, tennis courts, or a new dog pound? I think Redding should be spared such painful decisions and Redding is not unique.

Every community would like a sizable share of the federal government's largesse. But the fact is that every American community, including Redding, will share in the rewards of federal urban investment.

The problem is not a regional one. Cleveland, New Orleans, and Boston have many things in common, but geography is not among them. An investment in urban recovery is a national investment, not a fragmented form of foreign aid.

Even in the Sunbelt, and the West's still prosperous cities and states, the ripple effects from outside and the signs of decay from within are beginning to appear.

So far, targeted federal aid and incentives for private investment in jobs have failed to dovetail in a seriously funded and wisely coordinated package.

In the 1960's many thousands of middle class Americans fled the cities. But from 1970 to 1975 alone, more than twice as many followed. It was urban blight in all its manifestations which drove them away.

Property taxes are fundamentally regressive; but property taxes account for 60 percent of all local government revenues. Moreover, a further portion of the local load is carried by other regressive taxes on sales and even wages. As moderate income earners flee such burdens, the tax base diminishes.

The cost of delivering public services actually increases. Taxes are hiked again. More taxpayers leave. More jobs disappear. The tragedy deepens.

From 1970 to 1975, Cleveland lost almost 30,000 manufacturing jobs. Saint Louis lost 69,000. Philadelphia lost 76,000.

Twenty years ago, the federal government sent Cleveland only two cents for every tax dollar raised locally. Today, Washington matches each of Cleveland's tax dollars with more than sixty cents. In 1957, Detroit got only a little more than one federal cent for every local tax dollar. Today, the figure is almost seventy-seven cents.

Through the growth of urban dependence on federal aid, and through the federal government's potential to make and influence policy, our national leaders have been given powerful leverage. That leverage must be used. The delivery of federal dollars must be matched by Washington's insistence on progressive state and local taxes. It must also be matched by sounder economic and political judgment than we have been getting.

In 1976, Mr. Carter castigated the Republicans for failing to devote sufficient funds and attention to the cities. He also made a precise, unequivocal, and certainly unprecedented campaign pledge: "I will never tell New York to drop dead."

The President has refrained from wishing death on that city, just as he has refrained from producing an effective long-range strategy for revitalizing it.

Mr. Carter made another campaign promise, a pledge to undertake a "massive effort" for the "revitalization of the cities." But after the votes were counted, the President's first State of the Union Address gave the cities one sentence.

In 1976, Mr. Carter sought votes by calling for more aid to state and local governments. But in 1978, the President proposed a meager 6 percent increase.

Under the Administration's own inflation estimates, that amounts to a real dollar increase of zero.

In 1976, Mr. Carter insisted that military spending should be cut by $7 billion. As President, he urged the Congress to increase military spending by $10 billion, arguing that Jerry Ford would have made it $17. That rationale is not convincing.

Barry Goldwater admires the President's frugality but I doubt that he voted for him. Millions of black people, poor people, unemployed people, and people who work at low-income jobs did.

They deserve his attention and compassion. Most importantly, they deserve his determination to bring them into the mainstream of our communities.

After eight years of ill-placed Republican parsimony, President Carter's budget calls for a real dollar domestic spending increase of only 2 percent. In a word, ladies and gentlemen, that is an absurd preparation for the "massive effort" we were promised.

It also appears that the President's thrift is unlikely to be mitigated by brilliant strategy.

He has called for a $25 billion tax cut; but he has failed to suggest that tax relief be targeted to families with unfair tax burdens.

He has courageously tackled the welfare fiasco and proposed some sound improvements. But the jobs portion of his reform package was unworkable and counterproductive.

He has argued that private sector jobs will blossom when his economic policies produce a magic 5.6 percent unemployment rate by 1981. But boosts in national employment are not evenly distributed, particularly in the hardship cities. Things won't change until federal funds and recovery programs are funded fully and targeted wisely.

I don't question the President's credibility, nor his intention to fulfill his promises. I question his timetable.

Let us not forget the responsibilities of the Congress. It takes statesmanship for a farmbelt Senator to vote appropriations which flow to distant cities.

It takes leadership for a Congressman from Oklahoma to sell his constituents on the need for investments in Newark; or even in Texas, for that matter.

Under Presidents Nixon and Ford, Congress increased aid to state and local governments by 16 percent each year. In the absence of sensitive leadership from Nixon and Ford, it appears that Members of Congress were willing to shoulder important burdens. Let's hope that some of this willingness survives.

The President's responsibilities for drawing up a workable urban agenda are clear. The need of Congress to respond is obvious—and it is utopian to ignore that there are real problems here.

I would argue that there are seven key elements to an effective urban agenda. Congress and the Administration must deal with each of them in order to respond effectively to the urban disaster.

First on the agenda is the need for federal tax policies capable of encouraging private, job-producing investments. Federal property tax relief can create a tax advantage for living and working and building in the city. A system of increased differential tax credits can stimulate commercial investment, encourage the influx of new business, and persuade existing businesses to stay. We need an investment tax credit of 20 percent for blighted urban locations. Special emphasis can be placed on the rehabilitation of old homes and businesses and on the generation of new urban jobs with training at all levels of skill and endeavor.

Second on the list is the need for new and more effective public manpower policies. The need for a beefed-up CETA program is an important corollary to the demand for private sector jobs.

In the largest 48 American cities, CETA accounts for more than 16 percent of the urban public workforce. The CETA program keeps many of those cities in business. That program should be expanded and targeted to address both the structural and cyclical elements of high urban unemployment. Now, if someone in this audience should get up and shout that this is nothing more than additional revenue sharing, I'd agree. It's also a far superior alternative to the barren life-support system I condemned a few minutes ago. CETA should put 300,000 permanent public sector jobs on line and target them to the cities most in need.

Third on the agenda is the need for more sharply focused federal aid to state and local governments.

General revenue sharing funds are spread too thin and targeted too broadly. Countercyclical assistance is funded too meagerly, but targeted very well. That program expires in the fall. It must be renewed and increased.

Fourth, federal grant formula must be constructed more carefully. State and local governments are ill-prepared to revise programs, plans, and tax systems without Washington's support and encouragement. Such revisions must be made. Federal grant formulas should reward progressive taxes and investment incentives which can help stem the hemorrhage of jobs from the hardship cities.

Fifth, the gross inefficiency of existing tax policy on state and local bonds must be corrected. Interest on those bonds is currently exempt from federal taxation. In the fiscal year 1978, that exemption will cost $6 billion.

Only two-thirds of this expenditure will actually go to the relief of states and cities. The rest will further enrich wealthy investors. To redress that injury, the federal government should institute a taxable bond option with direct subsidy from Washington back to the local or state jurisdictions for up to 40 percent of the cost of borrowing.

Sixth, President Carter's welfare program is seriously flawed and must be repaired. Welfare costs for many cities and states are enormous. On the campaign trail, Mr. Carter favored lifting that fiscal burden. But under the President's plan, no relief at all is due till 1981. Even then, Washington will pick up only a portion of the tab. Moreover, the smallest portion of relief is slated for states and cities with the heaviest welfare costs.

Seventh, and finally, the direct relationship between fouled-up city pension plans and declining fiscal solvency must be effectively treated.

State and local pension systems suffer a total unfunded liability of more than $300 billion. More than four years after the birth of ERISA, we still have no "governmental plan" of regulation. Four million state and local government workers have no Social Security coverage. Many of them rely on underfunded public pension plans which may ultimately fail the workers or bankrupt their communities.

The public pension fiasco demands strong federal oversight. It is a powerful argument for universal Social Security coverage.

These federal initiatives and others like them will not come cheap. The cost will be very high indeed. But a failure to make that investment will cost far more.

Our government has been prepared to prop up a community when the military abandons the local air field, or the Interior Department expands a National Park, or a defense contractor goes down the tube. We owe the cities and states no less. We owe them a chance to make it. The nation's future is tightly wrapped up in theirs.

When private corporations invest their money in South America, the Overseas Private Investment Corporation insures them against the loss of their property. That kind of protection is not available to those who risk their investments in the South Bronx. Are foreign earnings for a few entrepreneurs more important to this nation than the health of its own communities?

One of President Carter's recent initiatives has been the proposal of a $25 billion tax cut. One half of those revenues can serve as a down payment for repairing this nation's declining cities.

Whether we are city dwellers or suburbanites, the future of the cities will impact our future. Whether we live in New York or New Mexico, the fate of Harlem and Bedford-Stuyvesant will help determine our fate. Whether we are rich, poor, or part of that ubiquitous middle class, the health of America's urban communities will influence the health of our communities.

We can't close our eyes, seal our borders, roll up our windows when driving through the blight and expect that the cancer will not spread one day to our own doors. It must be stopped. It must be eradicated.

CAMBODIAN CARNAGE: AN ADMINISTRATION OVERSIGHT?

Mr. DOLE. Mr. President, when President Carter took office 14 months ago, there was a good deal of talk about a commitment to advance the cause of human rights throughout the world. In retrospect, it appears that the least attention by the Carter administration has been given to the worst offender: the Communist Government of Cambodia. Despite the fact that one of the most savage crimes against humanity in modern times is underway in Cambodia today, little attention or concern has been directed to the situation. The silence by our own Government regarding the brutal conditions is deplorable.

We have heard much about human rights violation in the Soviet Union and South Africa. The President has publicly deplored conditions in Chile and South Korea. We have even managed to focus a little attention on violations that exist within Panama, during the current treaty debate.

But where is the concern and the action that the Cambodian situation deserves?

A SAVAGE SOCIETY

In its overbearing efforts to restructure Cambodian society after the fall of the democratic regime in 1975, the Communist regime instituted a primitive and barbaric agrarian society that has no equal in the modern world. Literally millions of Cambodian people were driven from the cities into the countryside, to undertake forced labor at the behest of the regime. Schools and universities were closed, and cities became villages. According to State Department testimony before the House Foreign Relations Committee last year, "Tens if not hundreds of thousands" of Cambodians have perished under the Communist regime. Many have been slaughtered. Others have died of disease or malnutrition. The Cambodian situation has been appropriately compared to the death camps of Nazi Germany, and the excesses of Stalinist Russia.

I recall the widespread outrage that prevailed when President Nixon sent American troops into Cambodia in the spring of 1971, particularly among many of my colleagues who still sit in this body. Where is that righteous indignation today? We have heard much in recent months about the Indochina refugees—the destitute persons who have been able to flee the Communist brutality. Their situation deserves attention. But it is those who remain in Cambodia that need help most urgently. It is they who deserve the commitment of the free world to work for their relief.

Most of all, they need the commitment of the President of the United States. and of the Secretary General of the United Nations, to direct unrelenting attention to the atrocities which shock the sensitivities of mankind. Is it really possible for so brutal a situation to be virtually ignored by those in whom the conscience of the free world is vested? If human rights is to be anything more than a mere excuse for moral posturing, then certainly the Cambodian situation deserves whatever efforts President Carter and Secretary General Waldheim can muster for its relief.

DOLE RESOLUTION

Mr. President, last November I proposed Senate Resolution 323, denouncing the disregard for basic human rights by the Communist Cambodian regime, and calling upon the President to take effective measures to register the concern of the American people about the Cambodian repression. Twelve of my Senate colleagues joined in cosponsoring that resolution, including Senators McCLURE, GARN, HELMS, CASE, HAYAKAWA, GOLDWATER, GRIFFIN, PROXMIRE, HATCH, NUNN, LUGAR, and CRANSTON. I remain hopeful that the Senate Foreign Relations Committee will conduct hearings and favor-

ably report this resolution during this session of the 95th Congress. The House of Representatives has already approved a similar resolution, and I believe this action will effectively register the legitimate outrage of Congress and the American people over the carnage in Cambodia.

Recently, the former minister of information for Cambodia during the Lon Nol regime presented a series of lectures in Wichita, Kans., illustrating the seriousness of the barbaric conditions in Cambodia today. Mr. Chhang Song delivered a persuasive appeal for American attention to the matter, and was instrumental in the subsequent formation of a "council for human rights" in Wichita which will study the Cambodian situation, and the prospects for its relief, during the coming months. I believe Mr. Chhang's appeal deserves careful consideration by the President and by every Member of this Congress.

Mr. President, I ask unanimous consent that the text of Mr. Chhang Song's paper, "Human Rights and Cambodia," may appear in the CONGRESSIONAL RECORD at this point, along with a column by Mr. William F. Buckley, Jr., "Where Is Mr. Carter on Cambodia?," which appeared in the Washington Star on March 16, 1978.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

HUMAN RIGHTS AND CAMBODIA

The Preamble of the United Nations' Universal Declaration of Human Rights reads as follows:

"Whereas recognition of the inherent dignity and of the equal and inalienable rights of all members of the human family is the foundation of freedom, justice and peace in the world,

Whereas disregard and contempt for human rights have resulted in barbarous acts which have outraged the conscience of mankind, and the advent of a world in which human beings shall enjoy freedom of speech and belief and freedom from fear and want has been proclaimed as the highest aspiration of the common people.

Whereas it is essential, if man is not to be compelled to have recourse, as a last resort, to rebellion against tyranny and oppression, that human rights should be protected by the rule of law . . . and . . ."

We need go no further. In Cambodia, all these noble sentiments and lofty principles are flagrantly violated every hour and minute of every day. The new communist Cambodian national anthem sets the tone for today's Cambodia: "The red, red blood splatters the cities and plains of the Cambodian Fatherland . . ."

For almost three years, the terrible, heartrending cries for help from more than two million victims, men, women, and children in Cambodia have gone unheard. Let us examine some of the chief articles in this noble document, the United Nations Universal Declaration of Human Rights, and compare these with the facts of life in "the new Cambodia."

Article 3 states: "Everyone has the right to life, liberty and security of person." Among the several authoritative accounts of the events that have transpired during the first three years of the Khmer Rouge communist rule in Cambodia is a small book entitled "Murder of a Gentle Land" by Reader's Digest editors and authors, John Barron and Anthony Paul. Mr. Barron was also a witness at the Frazer Committee Hearings on Human Rights in Cambodia. Authors Barron and Paul interviewed, in great detail and depth, more than three hundred refugees from Cambodia who escaped to neighboring Thailand. These refugees all paint the same, terrible picture.

Immediately following the communist take-over in Cambodia, all the cities were emptied of their populations. Those who failed to heed this order were shot on the spot. If you can imagine the entire population of Kansas, some 2½ million persons, suddenly ordered into rural concentration camps, you have the picture. More than three million persons in Phnom Penh were forcibly evacuated in a brutal march under a scorching sun. And April is the hottest month in Cambodia. They had neither water, food, shelter nor medicines. Many children died along the crowded highways out of the city. Many others, especially the old and the sick, died. It was a brutal, primitive emigration and unnumbered thousands perished. It was a symbol of even worse things to come.

The explanation given by Khmer Rouge authorities for this act of cruelty was that the Americans were going to bomb Phnom Penh and the population would have to scatter into the countryside. However, everybody would be allowed to return to his home in three days. Thus, "life, liberty and security of person" were murdered within hours of the communist takeover in Cambodia. They have never been resurrected. Phnom Penh today is a ghost town of less than 20,000 persons. All the other cities in Cambodia are equally dead. Cambodia is a nation without cities! It is a nation where "culture" and "civilization" are dirty words. "Cities," to the new communist leadership in Cambodia, are considered "evil," "bourgeois" and "negative" influence.

Article 4 of the Universal Declaration of Human Rights states: "No one shall be held in slavery or servitude; slavery and slave trade shall be prohibited in all their forms." The entire Cambodian population lives in a state of servitude. The "new Cambodia" makes a mockery of this article. The yoke of the people in Cambodia is heavy. Work days begin at 5 A.M. and end, frequently, at 9 P.M. There are long indoctrination sessions that run late into the evening. Tiny children, the elderly, women, all work in the fields. Armed guards watch them labor. The simplest of medicines to relieve their suffering and pain are non-existent. Malnutrition and sickness is endemic to the entire population. Cambodians are slaves in the new, Twentieth Century model.

Article 5 states: "No one shall be subjected to torture or to cruel, inhuman or degrading treatment or punishment." All available evidence suggests that the new administration in Phnom Penh matches the worst excesses of Hitler's Germany and its treatment of the Jews. Let us look at the sorry record in Cambodia.

Evidence points to December 1975 as the date when a grim order went out from the Khmer Rouge high command. "Execute all army officers ranked lieutenant and above, and all civilian officials who held significant responsibilities in the old regime, together with the families of these enemies of the people."

Refugees from Battambang in western Cambodia describe hundreds of former officers of the government forces (F.A.N.K.) assembled in a school building under the pretext they were to greet Prince Sihanouk. There they were bound, loaded onto trucks and gunned down outside the city. These were fortunate. Most refugee accounts attest to the fact that, to conserve ammunition, Khmer Rouge executioners frequently switch to the more economical method of dispatching their victims by breaking the back of their skulls with a grubbing ax. Other refugee accounts describe victims tied together and buried alive by bulldozers, or executed through the device of plastic bags tied around their heads until they suffocated.

Other evidence points to January 1976, as the period when the new regime issued its most wide-reaching order for extermination. Anyone with an education, anyone from the grade of private on up in the old government forces, anybody connected in whatever way with the old regime, became a target for elimination. Doctors, engineers, technicians, teachers, students, disappeared in the new wave of retribution. Hunger and disease added to the staggering toll in suffering. It is a purge that has carried away wives, grandfathers, tiny infants. There are few parallels in modern history unless we return to the worst excesses of Stalin in Russia, Hitler in Germany, landlord trials in communist China or tribal genocides in Africa.

By mid-1977, two years after the onset of these disasters in Cambodia, the U.S. Congress issued a statement condemning these atrocities in Cambodia. The Department of State was equally delinquent in taking a position on the barbarism in Cambodia. And this in spite of the fact that the Department's "Cambodia watchers" in Bangkok had been continuously documenting the terrible excesses in Cambodia. In mid-1977, the Department's Richard Holbrooke, Assistant Secretary of State for East Asian and Pacific Affairs, acknowledged to the Frazer Committee on Human Rights in Cambodia that the number of Cambodians who have perished under the Khmer Rouge regime "appears to be in the tens if not the hundreds of thousands in Cambodia."

Article 6 of the Universal Declaration of Human Rights states: "Everyone has the right to recognition everywhere as a person before the law." Article 7 continues in the same vein. There is only one law in Cambodia today and it bears the name "Angkar." Angkar means "the organization." It is a word designed to strike fear in the hearts of Cambodians. Central authorities in Phnom Penh issue their directives in the name of "Angkar." The lowliest Khmer Rouge peasant soldier, as he leads an innocent victim to death, will inform him, "Angkar wants to re-educate you." "Angkar" is the power of life and death. "Angkar" is omniscient, omnipresent and "omnicruel." No one has rights before "Angkar." Nor is there further appeal. There are no prisons in Cambodia since all mistakes are fatal.

It would be possible to continue through each of the remaining articles of the Universal Declaration of Human Rights and catalogue the violations and sufferings of the Cambodian people. In the name of the long-suffering Cambodian people, I accuse the Government of Democratic Kampuchea of the grossest violations of each and every one of the thirty articles of the United Nations Universal Declaration of Human Rights. A misguided group of political fanatics have decided that their solution to the "purification" of Cambodia is to destroy every vestige of the Khmer civilization, both ancient and modern, and return Cambodia to a "native," agrarian state. The symbol of a "pure agrarian state" in Cambodia is a picture of an entire nation toiling from dawn to dusk under the guns of guards.

Religion is dead in today's Cambodia. Most religious leaders have been executed. These were accused of being "parasites" and "preaching the gospel of an imported God." Temples and churches are closed.

There are no schools in "the new Cambodia." There are no universities. Children are taught to sing revolutionary songs. They are "graded" according to their revolutionary zeal and their ability to uncover "individualistic tendencies" among their own family members.

Love is an alien word in the Khmer Rouge lexicon. Numerous refugee accounts cite examples of young people who have been executed for displaying signs of affection toward each other.

The market system and even the currency have been abolished in Cambodia. "Marketing" has been judged to be a "capitalistic, imperialistic" method of exploitation. Salaries might create class inequities since those able to set aside savings could become the future exploiters. The few factories still in operation are kept running by an estimated one thousand Chinese technicians.

There is no freedom of movement in Cambodia. Unnumbered thousands of Cambodian refugees have been killed either by Khmer Rouge patrols or mines, in their attempts to escape to Thailand. These unfortunate victims "voted with their feet." An escape attempt from Cambodia is one of the most hazardous undertakings in the world. The figures prove it. Of the 100,000 Indochinese refugees in camps in Thailand, only 10,000 of these are Cambodian.

There are refugee accounts of cannibalism in some of the most impoverished areas of Cambodia. Many mothers no longer have milk in their breasts for their children. Other Cambodian women no longer have their menstrual cycles. Based on some estimates, it is believed that there may be as few as ten percent males in the two-thirds of the population that came under communist control after the fall of Phnom Penh.

Most of the leadership of the "new Cambodia" is French educated. There is savage irony in the ideals of French and Marxist philosophical thought perverted to the genocide that has transpired in Cambodia! Khieu Samphan, Ieng Sary, Salot Sar alias Pol Pot, Son Sen . . . these are the men who must be held accountable for one of the worst crimes of the Twentieth Century.

It is a sorry reflection on the state of our world that, with all its lofty principles and noble objectives, the United Nations has chosen to remain silent on the terrible crimes committed in Democratic Kampuchea. And, the trials of the Cambodian people are now compounded by a new threat, this time to their national integrity. I refer to the invasion of Cambodia by Vietnam . . .

There are several theories on the origin of the Vietnamese-Cambodian border conflict.

1. It is a manifestation of the traditional ethnic rivalry between Khmer and Vietnamese. Since the Tenth Century the Vietnamese have been expanding south and west at the expense of the Khmer peoples, in a search for fertile land to feed an ever-growing population.

2. It is a "war by proxy" in which the Chinese and Russians are backing their Southeast Asian "clients." In this case, the Soviets have thrown their support to the Vietnamese while the Chinese support the Cambodians. Ultimately it is the Soviets or the Chinese who will dominate Southeast Asia and the strategic waterways of the area through the success or failure of their smaller surrogates.

3. It is a drive for hegemony and the final annexation of all Indochina by Vietnam. Either through military occupation or the installation of pliable, puppet regimes in Laos and Cambodia, the powerful, united Vietnamese state is now in a position to dominate the entire Indochina region.

While I hold that there are elements of arguments 1 and 2 in the present conflict, I lean strongly towards argument 3 as the essential explanation.

With more than one-third of the seven million population of Cambodia decimated by mass purges, disease and starvation, and the balance of the populace working at subhuman standards, any change that would mean liberation from the cruel and bloody grip of the Khmer Rouge would be welcomed by the people of Cambodia. While periodic reports from the hermetically-sealed Cambodian communist state have pointed to sporadic internal revolt and resistance, there is no evidence that the efforts of internal dissidents and rebels have met with any degree of success. At the same time, most Cambodians probably fear that the combination of disasters from within and without may spell the end of the Khmer civilization.

In his final testament to the Vietnamese people, Ho Chi Minh said, "We will take all Indochina." The present flag of Democratic Kampuchea is that which was handed to Khmer Rouge leaders Ieng Sary and Saloth Sar in Berlin in 1951 by the Vietminh. Ieng Sary, Vice Premier for Foreign Affairs, is himself a Vietnamese immigrant from South Vietnam. He has been quoted as saying, "What good is it to maintain borders between Cambodia and Vietnam? Why maintain an independent Cambodia within a socialist Indochina?"

If the present trend continues, the Cambodian people may soon become an extinct species. Those who do survive may find themselves identified merely as one of the several ethnic minorities in a "Greater Vietnam." Hanoi has forty years of experience in revolutionary warfare. When annexation is complete Vietnam will move into Cambodia not as a "conqueror," but as a "liberator" and demonstrate once again its skillful use of propaganda.

TOWARD A SOLUTION

I have a commitment with myself. I will not rest until the disasters that have befallen my people are well known and understood by the peoples and governments of our world. I am here in the United States because America still represents the last great hope for Justice and Fair Play in the World. America was built by peoples who themselves were fleeing tyranny and oppression.

I am thoroughly familiar with the divisions in American society that took place during the Vietnam War. Desperate though the situation is I am not suggesting a military action to free the enslaved people of Cambodia. On reflection, though, it does strike me that wars have been fought and military actions undertaken over far more trivial causes than the enslavement and genocide of a people. What I am now asking is that the American people join me in launching a peace offensive aimed at saving the pitiful remnant of the Khmer people, their culture and civilization, before these are totally destroyed by the barbarism from within and the new attacks from without.

I am urging the American Congress to enunciate a strong, unequivocal policy directed at ending the terrible suffering of the Cambodian people. I am asking individuals, organizations and governments of good will and dedication to the principles of Justice and Human Rights to join forces and find the means to ensure that the cry for help from the Cambodian people will not continue to go unheard.

Those organizations whose raison d'etre is to alleviate human suffering should have been the most vocal in their efforts to assist the people of Cambodia. Where were they? Why the deep silence of these and others towards the terrible three years of atrocities in Cambodia?

The United States has already demonstrated its devotion to the principles that have made it a great nation through the acceptance of one hundred and fifty thousand Indochinese refugees. I believe that these future citizens will prove their worth in the years ahead. They will add to the already-rich fabric that is part of the American civilization. But now it is time for the United States to play a more active role in seeking measures that will guarantee the survival of the people of Cambodia. In a real sense the lot of the people of Cambodia can be compared to that of the passengers on a hijacked airplane. The hijackers are a group of international criminals who have shown their utter contempt for any standards of decency and "normal" behavior.

An international conference to examine the horror and gross inhumanity in Cambodia would appear to be the very minimum effort required by the international community. Steps to end the Vietnamese incursion into Cambodia would be a by-product of such a conference.

Finally, I bring to you a message from the people of Cambodia. It was carried, at great risk, by a recent Cambodian escapee: "Save those of us who are still alive before it is too late."

[From the Washington Star, March 16, 1978]

(By William F. Buckley, Jr.)

WHERE IS MR. CARTER ON CAMBODIA?

BANGKOK.—In January, Mr. Leo Cherne of the International Rescue Committee brought together an impressive congregation of men and women concerned for the awful ravages of the diverse Communist victories in Southeast Asia, and, with William J. Casey, former under-secretary of State, headed out for Thailand. The investigators were of varied political inclinations, including John Richardson, the head of Freedom House; Albert Shanker, president of the American Federation of Teachers; James Michener; Rabbi Tannenbaum, and others. What they found turns the blood cold: Cambodia leads the list of criminal states, that is if you don't count the countries, the United States primarily, that have let it all happen.

About Cambodia, Mr. Cherne could only think to say: "The events which have taken place in Cambodia and which continue to make of that country a land so inhuman tempts one to wonder whether here, finally, is a place where the living envy the dead."

The litany becomes all the more horrible for its failure, over a period of three years now, to arouse attention. It is as though the daily figures were read out publicly for Rovensbruck, Buchenwald, and Auschwitz, to an assembly where everyone was engaged in playing gin rummy. Mr. Cherne, whose committee was founded in 1933 to help refugees from Nazi Germany, was blunt. "The fact that the various international institutions designed to assert and protect human rights, and even life itself, have been silent despite repeated appeals, adds to our emphasis. Just such an appeal and protest to the United Nations Commission on Human Rights in June of 1975 remained unanswered for months before the appeal was denied because the U.N. Commission insisted that it could not act on second-hand information."

The U.N. commission has never hesitated to act on second-hand reports when addressing itself to the (relative) peccadillos of Chile, South Africa, and Israel. Mr. Cherne pursued the point relentlessly: "The inhumanity which continues to exist in Cambodia is so beyond rational description that it is probably unlikely that evidences of world concern so long withheld will have any moderating effect upon the behavior of the Khmer Rouge . . . No circumstances since the death camps of Germany more nearly describe the circumstances which presently exist in Cambodia . . ."

Now then Mr. Cherne, Mr. Casey, Mr. Michener, Mr. Shanker and everybody addressed themselves, as was quite proper under their mandate, to the questions of the refugees. And of course they are correct: all the red tape that deprives them of succor should be brushed aside. It is the job of the International Rescue Committee by tradition to rescue those who have, in a sense, already been rescued.

The Cambodians who sit, desparingly, in

the great refugee camps of Thailand are objects of pity. But they have, by other standards, already been saved. It is those who are still in Cambodia that need help most urgently. The Jews who escaped the ovens of Germany and Poland deserved every consideration; but mostly, they deserved the resolve of the civil community to rescue those whose rendezvous with the ovens was fast approaching; and who, one wonders, is asking for action at this level? No doubt Messrs. Cherne et al would personally endorse such action, but they are confining themselves, quite properly, to the limit of their franchise.

But where are the others? For instance, where is Congressman Pete McCloskey, who made a career for months of bewailing the fate of Cambodian refugees forced to resettle as a result of allied bombing? Where is the encephalophonic lead editorial in the New Yorker Magazine that spoke about how with Mr. Nixon's incursion we had forever, ruined the pastoral life of the Cambodian? And—the biggest question of all—where in the name of God is President Jimmy Carter who elevated human rights to his right side on ascending the throne at the White House?

ORDER FOR HOUSE JOINT RESOLUTION 796 TO BE HELD AT THE DESK

Mr. MAGNUSON. Mr. President, I ask unanimous consent that House Joint Resolution 796 be held at the desk until tomorrow, when we will try to resolve the procedural matter.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MAGNUSON. Mr. President, this is a very important appropriation bill. It involves about $300 million for disaster relief in many parts of the country. They may run out of money by April 3.

The Senator from North Dakota and I and other members of the Appropriations Committee are now discussing whether we should refer the matter to the Appropriations Committee and have the full committee meet, because when you are talking about $300 million you should have a full committee meeting and pass on it. I am sure the committee would agree to it.

However, it may be that tomorrow we will not be able to obtain a quorum, I say to the majority leader, and this matter probably will have to be taken up by the Senate tomorrow. I just wanted to alert Senators that the matter, in all probability, will come up tomorrow. It involves $300 million. It is for disaster relief in many parts of the country—droughts, floods, and other things that happened this last winter.

The Senator from North Dakota and I are going to get together, prior to 11 o'clock, we hope, so that we might come to a decision on this matter. If and when we do, we will have to get it over to the House by 1 o'clock, because I understand they are leaving about 1 o'clock, and we want to get the matter to the White House.

I want to alert Senators that this matter will be brought up tomorrow. If it is held at the desk now, we will see what we can resolve about it tomorrow, because time is of the essence in this matter.

I yield to the Senator from North Dakota.

Mr. YOUNG. Mr. President, this is a matter that should be considered by the Appropriations Committee. Because of the emergency situation, I doubt that we should wait until Congress returns from the Easter recess, which will be about 2 weeks. I believe that this matter is of sufficient importance that we may want to consider bringing it up tomorrow.

Mr. MAGNUSON. I say to the Senator from North Dakota that the full Senate committee undoubtedly will approve this bill unanimously. But I want to alert the Senate, because it does involve $300 million, and we do not want to be accused of just slipping through a bill which involves that sum of money.

This has been gone over thoroughly by the House, and we all know the situation, and we will see what we can do tomorrow. We are going to try to do it right after 11 o'clock, in order to get it over to the House in time.

SENATE RESOLUTION 419—RESOLUTION CONDEMNING THE KIDNAPING OF FORMER ITALIAN PREMIER ALDO MORO

Mr. DECONCINI. Mr. President, I ask unanimous consent to have the Foreign Relations Committee discharged of any further consideration of Senate Resolution 419. I also ask unanimous consent that Senate Resolution 419, condemning the kidnaping of former Italian Premier, Aldo Moro, be considered by the Senate immediately as in legislative session.

Inasmuch as the House has already unanimously passed this identical resolution, I believe that the Senate should take a moment from its debate on Panama to demonstrate to the Italian people and to the world its concern over the fate of this fine man. We need, also, to again reaffirm our abhorrence of wanton acts of violence and terror in the political arena.

Mr. President, I ask that the Senate adopt this resolution unanimously.

Mr. ROBERT C. BYRD. Mr. President, in the absence of the distinguished senior Senator from Alabama (Mr. SPARKMAN), who is the chairman of the Committee on Foreign Relations, I am constrained to object; and I do so regretfully, I say to my friend from Arizona.

The PRESIDING OFFICER. Objection is heard.

Mr. DECONCINI. Mr. President, in that case, I ask unanimous consent that the names of the following Senators be added as cosponsors of Senate Resolution 419: Senator ABOUREZK, Senator SARBANES, Senator ALLEN, Senator PELL, Senator DOLE, Senator PACKWOOD, and Senator WILLIAMS.

The PRESIDING OFFICER. Without objection, it is so ordered.

PAYMENTS UNDER AGRICULTURAL ACT OF 1949

Mr. PACKWOOD. Mr. President, as in legislative session, I ask the Chair to lay before the Senate a message from the House on H.R. 11055.

The PRESIDING OFFICER (Mr. WILLIAMS) laid before the Senate H.R. 11055, an act relating to the year for including in income certain payments under the Agricultural Act of 1949 received in 1978 but attributable to 1977, and to extend for 1 year the existing treatment of State legislators' travel expenses away from home.

The PRESIDING OFFICER. Without objection, the bill will be considered as having been read twice by its title, and the Senate will proceed to its consideration.

Mr. PACKWOOD. Mr. President, this is a very simple bill. The Department of Agriculture made some unintentional late payments to farmers for crop supports and disaster relief. The payments fell in January 1978. They could not be declared on 1977 income. This measure, for this year only, would allow farmers who received those payments in 1978 to declare them as income on their 1977 income tax.

Mr. DOLE. Will the Senator yield?

Mr. PACKWOOD. Yes.

Mr. DOLE. I think it is an excellent bill and it does, as the Senator from Oregon has indicated, permit the farmer to treat disaster or deficiency payments attributable to a 1977 crop as 1977 income if, under ordinary circumstances, income from the crop, the deficiency payments could have been reported as income in 1977.

Mr. President, I support H.R. 11055.

This bill incorporates in modified form a proposal made by the Senator from Kansas last January.

Under the bill a farmer may elect to treat disaster or deficiency payments attributable to a 1977 crop as 1977 income if, under ordinary circumstances, income from the crop, or the deficiency payments, could have been reported as income in 1977.

DEFICIENCY PAYMENTS

Mr. President, the Food and Agriculture Act of 1977 extended authority for crop deficiency payments granted in the Agricultural Consumer Protection Act of 1973. Deficiency payments are made when the average price received by the farmer during the first 5 months of the marketing year for wheat and feed grains is below the target price set in the law. The payment is equal to the difference between the average price and the target price, but may not exceed the difference between the target price and the price support loan level.

Because of higher market prices in the first 3 years of the program, deficiency payments were not made until last year. However, the lack of experience administering the program until last year has delayed a needed correction.

TAX PROBLEM

Many farmers who are entitled to crop disaster payments for crops which they harvested (or would have harvested) in 1977 did not receive these payments from the Department of Agriculture until 1978. Under present law, farmers on the cash method of accounting would have to include these payments in income in 1978. Since income from crops sold in 1978 would also be reported in 1978, the income of these farmers would be bunched in

1978 rather than spread over 1977 and 1978, as would be the normal situation.

Also, a great many farmers who are entitled to deficiency payments on their 1977 crops, because of low crop prices did not receive these payments from the Department of Agriculture until 1978, although, under normal circumstances, these payments would have been received in 1977. The problem appears to be particularly crucial in the case of deficiency payments for wheat. Deficiency payments for the 1977 wheat crop would ordinarily be expected to be received in December of 1977 because, unlike most other crops, the period for which market price information is used to compute the amount of deficiency payments ends in 1977. Since deficiency payments for wheat harvested in 1978 would also be reported in 1978, the income of these farmers will be bunched in 1978 rather than spread over 1977 and 1978.

DOLE PROPOSAL

Mr. President, in early January, I wrote Secretary Blumenthal detailing the tax problems associated with these deficiency payments. On March 8, I introduced S. 2686, to alleviate this tax problem.

This bill is positive action on the part of the Congress to help our farmers when they need it most.

I also wish to announce the support of my colleague, Mr. MELCHER, in support of this legislation.

The Congress should be congratulated in taking this swift action.

Mr. PACKWOOD. I appreciate the statement from the Senator from Kansas.

The PRESIDING OFFICER. The bill is open to amendment. If there be no amendment to be proposed, the question is on the third reading of the bill.

The bill (H.R. 11055) was read the third time, and passed.

RESOLUTION OF THE JOINT COMMITTEE ON PRINTING

Mr. PELL. Mr. President, the Joint Committee on Printing, at its meeting on Thursday, March 16, 1978, adopted unanimously a resolution regarding the implication and effect of marking certain material in the CONGRESSIONAL RECORD with a "bullet."

The resolution makes it clear that the purpose of the "bullet" mark is simply to distinguish the manner of delivery of statements or insertions, and that the intent of the Joint Committee on Printing in prescribing the use of the "bullet" marking is in no way to limit the protection afforded Members of Congress under the speech and debate clause of the Constitution.

As chairman of the Joint Committee on Printing, and on behalf of the committee, I ask unanimous consent that the text of the resolution adopted by the Joint Committee be printed at this point in the RECORD.

There being no objection, the resolution was ordered to be printed in the RECORD, as follows:

RESOLUTION OF THE JOINT COMMITTEE ON PRINTING

Whereas, effective March 1, 1978, the Joint Committee on Printing amended the Rules for Publication of the CONGRESSIONAL RECORD to identify statements or insertions in the RECORD where no part of them was spoken;

Whereas, unspoken material in the CONGRESSIONAL RECORD will be preceded and followed by a "bullet" symbol, i.e., ●;

Whereas, the Joint Committee, after consulting with the leadership of both Houses, instituted these changes only to make the CONGRESSIONAL RECORD a more precise history of the actual proceedings taking place on the House and Senate floors;

Whereas, the Joint Committee determined that these changes are the most effective means to inform other Members of Congress of their colleagues' views and proposals;

Whereas, the Joint Committee made such changes knowing that delivered and inserted statements are part of the official record as Congressional Speech and Debate and are fully protected under Article I, Section 6 of the Constitution of the United States: Now, therefore, be it

Resolved, That paragraph 3 of the Rules for Publication of the CONGRESSIONAL RECORD is amended to read as follows:

"3. Only as an aid in distinguishing the manner of delivery in order to contribute to the historical accuracy of the RECORD, statements or insertions in the RECORD where no part of them was spoken will be preceded and followed with a 'bullet' symbol, i.e., ●.".

SEC. 2. The Joint Committee directs its Chairman and Vice-Chairman to insert copies of this resolution into the permanent record of the House and Senate.

Mr. ALLEN. Will the Senator yield for a moment?

Mr. PELL. Certainly.

Mr. ALLEN. I want to state that as a member of the Joint Committee on Printing, I am pleased that at our meeting the other day the distinguished Senator from Rhode Island (Mr. PELL) was elected as chairman of the Joint Committee. I look forward to working on that committee under his leadership.

Mr. PELL. I thank my friend from Alabama for those remarks.

TIME-LIMITATION AGREEMENT—CONFERENCE REPORT ON AGE-DISCRIMINATION BILL

The PRESIDING OFFICER. Is there further morning business?

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that at such time as the conference report on the age discrimination bill is called up before the Senate there be a time-limitation overall with respect to that conference report of 30 minutes, to be equally divided between Mr. JAVITS and Mr. WILLIAMS.

The PRESIDING OFFICER. Without objection, it is so ordered.

NEW YORK CITY AFFAIRS

Mr. PROXMIRE. Mr. President, whether New York City will make it or not, whether it will avoid bankruptcy in the long run, depends not simply on the Federal Government—not on what we may do between now and June the 30th; it depends fundamentally on the underlying economic strength and the growth of New York City in the next 5 or 10 or 20 years.

I think that many of those who have discussed the issue, both in the House committee and in the Senate committee itself have overlooked the plain simple arithmetic. They consider what New York City has to raise, what New York City faces in terms of balancing their budget, what they need for a capital budget, what is available from their pension fund, what is available from the banks following the line of credit there and what the city's instrument for borrowing back can borrow. I think that the report of the Senate Banking Committee will make a great deal of sense.

Mr. President, the fundamental issue is whether New York itself has the economic strength to survive and there are two remarkable analyses of New York City that are very hopeful in that respect.

I would like to quote from both the first, which is a study by Mr. Bienstok, made in December 1977, just 3 months ago, with regard to New York City's affairs.

Mr. Bienstok finds that—

New York City's loss of 650,000 jobs since 1969 is associated with a major shift of nonfarm jobs from the Northeast to the South and West and declines in other major urban centers. New York's 13.3 percent loss in employed residents from 1969 to 1976 was about in line with a 12.3 percent drop in Chicago and was more moderate than the declines of 17.7 percent in Baltimore, 20.9 percent in Philadelphia and 31.7 percent in Detroit.

Furthermore, he says, the city's underlying strengths and its changing demography suggest the possibility of an improved local economic environment by the early 1980's. The widespread economic and social impact of the baby boom of 1947 is about to end. That group will soon be the over-30 generation. But more significant for the years ahead is that the United States is about to be heavily influenced by a different cohort, the young men and women born since 1960.

Since 1960, the number of live births in America has dropped from about 4 million to about 3 million a year. This is close to the number in 1944, before the postwar baby boom, a number that, at that time, was added to a much smaller population than today's 215 million. Trends in New York City follow the same pattern.

Beginning from now, the number of people reaching 18 years of age should begin to decline significantly. In 1982 and in the years beyond, the number of college graduates can be expected to level off. In fact, the number of young people entering the labor market will begin to decline significantly as we get toward the end of this decade and move into the early 1980's.

This suggests a period in which the fierce competition for jobs that recent college graduates have experienced should moderate substantially. There will be relatively fewer college graduates entering the labor market all through the 1980's, and the demand for college-educated men and women will continue to rise. Even during the height of the last recession when the country lost almost 2 million jobs, the number of professional, technical, managerial, and administrative jobs, typically held by

college graduates, rose by 750,000. Peter Drucker's "knowledge society" is alive and well, and in this knowledge society, the key resources are people.

With regard to manpower and education in New York City, it was noted earlier that the substantial immigration of blacks and Puerto Ricans with below-average educational attainment may have contributed to the city's problems. During the last two decades, the city's goods-producing industries declined sharply. Service-producing activities increased, providing white-collar jobs which require more education. The pace of jobs loss in the city's goods-producing industries has moderated; in fact, factory employment actually edged up in 1976. Also, during the 1970's there has been a notable cutback in the number of persons migrating from the South or Puerto Rico to New York City.

Looking at the future of the New York City labor market, educational trends in the past decade may augur well for the city's development of its human resources. The number of Puerto Ricans and blacks entering the City University of New York tripled between 1967 and 1972. The number of whites entering CUNY rose by over one-fourth during the same period. In 1975, 79 percent of New York City's high school graduates went further with their education, primarily in college, while in the country as a whole the figure was 51 percent. This suggests that New York City, with its unique array of educational facilities and institutions, will be in a favorable position to strengthen its human resources as it approaches the year 2000.

New York City's talent pool will not only be sought by industry, but may attract industry to the city. Although the city has lost corporate headquarters employment, it is still the home base for more major industrial companies than any other city. Headquarters locate in New York, because it is the commercial, communications, and cultural center of the Nation, a major port, a center for financial, legal, educational, and health services and, although rarely heralded as such, a major manufacturing center. Many companies that left the city have moved only to nearby suburbs from where they are still able to draw upon the city's resources and services.

New York City's cultural activities are a bastion of the city's economy and provide many jobs for skilled and unskilled workers. The 1,500 cultural institutions and organizations in the city, while generating over $3 billion in expenditures and receipts annually, also contribute over $100 million in tax revenues. These institutions stimulate the tourist industry even as they draw businesses to New York and strengthen real estate development—and, as long been recognized, strengthen the city's social and economic life.

In conclusion, the current economic situation remains relatively tight, and job development must rank high among the challenges facing New York City. However, the declining birth levels since the early 1960's will provide a more favorable climate for the New York City labor market of the 1980's—given an appropriate level of economic activity. With the decline in the number of young people in the city's population, many of the city's current problems involving youth may stabilize and improve. In a labor market requiring "knowledge" workers, New York City may find that the high proportion of its youth continuing on to higher education may serve to stabilize and strengthen the city's economy.

It is now commonplace to view the situation in New York City as a total disaster—perhaps as commonplace as it was in the late 1950's and early 1960's to ignore the clear signals of impending crisis. Observers of long-term trends are, however, prepared to expect "quantum" shifts that current indicators may not clearly herald. In the late 1970's, H. R. Bienstok tends to be as optimistic about New York City's future as he was pessimistic in the early 1960's.

Now a very excellent analysis of the Corporate Headquarters Complex in New York City is prepared by the Conservation of Human Resources Project—Columbia University:

CORPORATE HEADQUARTERS COMPLEX

1. This complex accounts for over one-fifth of all wage and salaried workers (586,000) in New York City and a considerably higher proportion, over one-fourth, of total payroll ($8.7 billion). As such, it represents the largest aggregation of economic activity in the city, considerably larger in terms of jobs and income than manufacturing, municipal government, or nonprofit enterprises.

2. Corporate headquarters employment in New York City is the smallest of the three components of the complex accounting for 135,000 jobs. The largest element is the corporate service firms which provide 314,000 jobs. Employment in firms producing ancillary services is estimated at 137,000.

3. Employment in corporate service firms is around 2.5 times larger than in corporate headquarters. What is more, while employment in corporate headquarter is much lower now than in the early 1960's, the opposite is true with respect to corporate service firms.

THE CONCENTRATION OF CORPORATE SERVICE

12. As noted earlier corporate service firms continued to expand and more than compensated for the decline in corporate headquarters employment that occurred during the past two decades. The three most important sub-groups among corporate service firms are banking, legal services and accounting. The importance of each is underscored by the following:

(a) In banking, the 10 largest commercial banks in the nation accounted, at the end of 1976, for 45 percent of the deposits in the top 200 banks. Six of these top 10 are New York banks which account for $173 billion or 27 percent of the deposits of these 200 largest banks. When it comes to foreign deposits in U.S. banks, which totalled $161 billion at the end of 1976, the New York City banks are even more important: they held $86 billion or more than half of the total of these foreign deposits.

(b) In terms of the large law firms (over 81 members) that provide a wide range of specialized corporate services, New York has one-third of the nation's total, 16 out of 48, while Chicago has 7 and Philadelphia and Washington each have 5. If these data for the mid-1970s are compared with the mid-1950s one finds little change other than an increase of large law firms in Washington from 2 to 5. During this same period, New York also maintained a leadership role as a center of firms specializing in international law, the number of such firms in the City increasing from 54 to 131, the number of members from around 600 to about 2250. The other principal centers of firms specializing in international law are Washington, Chicago, Houston and Los Angeles. The New York law firms serve far more Fortune 500 headquarters, both in and out of the city, than do the big law firms located in any other city. Further, they serve almost all of the Fortune 500 firms' investment banks.

(c) In accounting, six of the big eight firms have their main office in New York City. The New York based firms have as clients 356 of the Fortune 500 list and 29 of the nation's 47 largest banks. Chicago is in second place, far behind New York, with 79 Fortune 500 corporations and 6 banks. The international offices of all eight major accounting firms are located in New York City, and they have a monopoly on it.

THE INTERNATIONAL DIMENSION

18. The last two decades have seen a substantial increase in economic relations between the U.S. and foreign countries with respect to financial transactions, trade, and investments in plant. Much of this expansion has been through firms located in New York. In the mid-1970s the foreign sales of the Fortune 500 firms in the top 50 Standard Metropolitan Statistical Areas totalled $213 billion. Corporations located in the New York area accounted for $99 billion or 46 percent of that total. Detroit was second with $21.5 billion followed by Pittsburgh, San Francisco and Chicago each with between $15 and $11 billion.

19. The more striking development, however, has been the growth of foreign economic activity in New York City reflecting in particular the location here of banks, branch headquarters, and increased activity in the real estate market as evidenced by the following:

(a) An analysis in the early 1970s of over 1,700 foreign firms operating in the U.S. disclosed that 60 percent were headquartered in New York City and another 15 percent in the suburban area. If the location of Canadian firms is disregarded, the concentration in New York City ranged between 98 percent for Italian firms to 68 percent for firms from the Netherlands.

(b) Between 1970 and 1976 the number of foreign banks in New York City increased from 47 to 84 and their assets increased from $10.6 billion to $40.3 billion or almost fourfold.

(c) Between the beginning of 1975 and 1977 foreign concerns leased 466,000 square feet of office space in New York City with an aggregate rental value of $88 million. From September 1975 to April 1977 there were 10 major purchases by foreigners of New York City properties.

The following sets forth the policy directions growing out of the indepth inquiry into agglomeration that hold promise of contributing to the continual growth and vitality of the corporate headquarters complex in New York City:

(a) With the corporate headquarters complex in New York greatly dependent on the City's primacy as a money center, the leaders of the financial community, together with the local political leadership, should be constantly alert to actions in New York, Albany and Washington that could strengthen the predominance of the City as the leading financial center of the world. The recent debacle over the bond transfer tax illustrates the need for continuing vigilance and cooperation. With the decline of London as an international money center and the increasing importance of the Middle East as a source of investment funds, the leadership of the financial community should explore how changes in the federal and state laws and administrative practices could make New York more attractive to foreign investors.

(b) Since corporate location decisions are greatly influenced by problems involving space utilization, the continued vitality of the corporate headquarters complex in New York requires a strong commercial construction industry. If the City is to maintain its position as the leading corporate headquarters complex new commercial office buildings must be erected at costs and rents that are reasonably competitive with alternative locations. The last years have seen substantial narrowing in the gap between the cost of prime space in New York and other competitive locations. The leaders of the construction industry, the construction unions, and local government should seek ways of cooperating to assure that the City's new office buildings are completed at a rental cost that will encourage corporate headquarters and corporate service firms to remain and expand in the City and that will help attract others here.

(c) A major spur to corporate relocation to the suburbs has been the desire of middle and upper management to rear their families in a conducive environment. The new trends to later marriages, lower births and the increased career interests of educated women provide the City with an opportunity to attract and retain professional couples both of whom hold good jobs and are career-oriented.

That kind of family situation, with husband and wife working, makes the city much more attractive than it is with the family in which the wife is at home and does not work.

To do so, the leaders of the real estate industry and the City officials should intensify actions aimed at neighborhood conversion and neighborhood rehabilitation to provide such couples with a wider range of desirable living accommodations.

(d) A major source of the City's strength has been its attraction to individuals who place a premium on a wide range of cultural activities including theatre, restaurants and concerts. Since this cultural-entertainment complex not only provides important ancillary services to the corporate sector but also much needed employment to many recent inmigrants, continuing efforts involving business and labor leaders and government officials should be directed to maintaining and strengthening this important sector. An expansion of the hotel industry should be high on the agenda.

(e) Another favorable opportunity that the City should seek to exploit is the potential for further increases in foreign banks, foreign headquarters, foreign investors and foreign visitors. Most foreigners find New York City attractive. The foreign business community should be an important target for the forthcoming public-private effort directed at placing before businessmen the multiple strengths of New York City in the hope of encouraging them to locate activities there.

(f) Special attention must be paid by business and government leaders to maintaining the excellent air transportation that has done so much to keep New York as the focal center of domestic and international economic activity. The maintenance and improvement of interurban and intraurban transportation can likewise contribute to strengthening the agglomeration process.

(g) In years past the estrangement between business and political leaders contributed to the exodus of corporate headquarters because many chief executives concluded that local government was at best uninterested and at worst hostile. Recent cooperative actions aimed at achieving and maintaining the fiscal viability of the City is a major step in the right direction. So too are efforts to put a lid on business and personal income taxes and where possible to reduce those which weaken the competitive position of New York City.

Mr. President, I make these points, because I think it is overlooked that New York has enormous strength and has a great potential for growth in the future, and that that element is what is going to permit New York to survive.

NOW IS THE TIME TO ACT ON THE GENOCIDE TREATY

Mr. PROXMIRE. Finally, Mr. President, on another subject, 30 years ago, the United Nations drafted the Genocide Treaty, which declared any act of genocide a crime under international law. The United States was instrumental in drafting that treaty and winning its unanimous support in the General Assembly.

For 30 years, the debate over the advisability of our ratifying the treaty has gone on. In this decade, there has been a growing sentiment in favor of such ratification. It is important to analyze the effectiveness of the treaty since its birth in order to understand this increasing support. Such an analysis will make it clear that we must give our complete support to this treaty, in the form of ratification.

It is true that we are unable to estimate how many lives have been saved because of the treaty. It is impossible to point to all participating countries and say with complete assurance that life has been made more civilized in every phase. But the benefits, however subtle, are undeniable.

In the same way that our Declaration of Independence inspired countless Americans to preserve the values under which this nation was founded, the Genocide Treaty has served as a standard of protection for human beings which has influenced many individuals throughout the world. Moreover, the treaty has provided more than moral persuasion; it created sanctions against genocide. These sanctions have not been used, but their deterrent effect should not be overlooked.

It is shameful that we have failed to ratify this treaty. We should have ratified it in 1948. Fortunately, we can turn this omission into something positive at this time. Our ratification would reemphasize the vigilance needed for the physical protection of minority groups throughout the world. It would also allow us to take a more forceful role in other areas of human rights.

We must not let this opportunity pass us by. The Genocide Treaty should be ratified, and promptly.

Mr. President, I yield the floor.

Mr. ALLEN. Mr. President, will the Senator yield?

Mr. PROXMIRE. I am happy to yield.

Mr. ALLEN. The Senator from Alabama has been waiting to hear the distinguished Senator from Wisconsin mention the Genocide Treaty again here and the reasons why we should approve it in the Senate. He waited until about the fifth item that he mentioned tonight, and I was somewhat apprehensive that he was not going to mention the Genocide Treaty, but I am glad that he did finally get around to it and express his views about the necessity to approve this treaty that has been before the Senate now for 30 years.

Mr. PROXMIRE. I want to thank the distinguished Senator from Alabama. He is a most patient man. He has been my best audience. He has been on the floor night after night after night when I have delivered the statements.

As he knows, I have been making statements like this for 11 years on the floor of the Senate. I intend to make them until it is passed, and if nothing else it will maybe help the Genocide Treaty to have me sit down, shut up.

Mr. ALLEN. As I say, the Senator has mentioned this matter almost daily for quite a long time. But I keep listening in the hope that I can find an argument that I agree with that would indicate the necessity for giving approval to this treaty.

Mr. PROXMIRE. Well, I am disappointed in that. But I think the Senator from Alabama is a very reasonable man, and I am sure that if he listens long enough, I hope it will not take another 30 years, that he will be persuaded.

Mr. ALLEN. I thank the distinguished Senator.

A PIONEER FAMILY IN ALASKA

Mr. STEVENS. Mr. President, in recent years the State of Alaska has risen from a position of relative obscurity to one of higher visibility in the eyes of the American public.

In an effort to educate the public and trace Alaska's history, the National Endowment for the Humanities has granted funds for production of an historical documentary entitled: "A Pioneer Family in Alaska." In addition to the production of this film, the National Endowment for the Humanities will be traveling to various localities in Alaska to gather necessary information to assist in the development and promotion of cultural programs within the State. I encourage these efforts wholeheartedly so all Americans can be more cognizant of the rich cultural heritage of Alaska.

Mr. President, I ask unanimous consent that an article appearing in the Alaska History News be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

NEH FUNDS "A PIONEER FAMILY IN ALASKA" FOR HOMER MUSEUM

The Museums and Historical Organizations Program of the National Endowment for the Humanities has funded the proposal of the Homer Society of Natural History to produce the historical documentary film entitled "A Pioneer Family in Alaska." The $41,783 grant was made to create from 30 years of film footage a 90-minute chronicle centering on the Yule Kilcher family homestead near Homer on the Kenai Peninsula. Yule describes the project: "The film starts in 1945 when I and my family moved at low tide 12 miles up the beach from Homer on Kachemak Bay in a military 4x4 truck, ascended the cliffs afoot, and settled in an abandoned trapper's cabin. There are scenes of cutting timber, haying on the rough, open meadows with six-foot-tall grass, and all the family at work. Hauling logs with horses in breast-deep snow and building a barn and

hand-hewn log cabin in winter, planting a garden the next summer . . . scenes of the last salmon fishing fleet to go out under sail in Bristol Bay in 1949, where I repaired to recoup the financial situation."

The new film will extend the time frame from before 1945 (with available film and photos of the family in Switzerland) to the present. There will be several segments, filmed at the same locations, showing how man has changed nature over a period of a third of a century, and how the 1964 earthquake has adversely affected the beaches. A spectacular shot shows the shrinkage of a glacier, filmed 30 years later."

Joining the Homer Museum in the project is the University of Alaska, Anchorage, Media Services Program and the Alaska State Library. When completed, "A Pioneer Family in Alaska" will convey to the general public an important segment of the history of the American West and that of the 49th State. With the dimensions of sight and sound, it will portray the economic, political, and social forces which shaped the attitudes of a homesteading family toward the land and themselves. When completed, prints of the film will be used by the Alaska State Library, public television, and the Homer Museum to enhance its permanent collection.

ORDER FOR RECESS UNTIL 9:30 TOMORROW MORNING

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that when the Senate completes its business tonight it stand in recess until the hour of 9:30 a.m. tomorrow.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR THE RECOGNITION OF MR. JAVITS AND MR. DANFORTH TOMORROW

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that on tomorrow, after the prayer, Mr. JAVITS and Mr. DANFORTH be recognized each for not to exceed 15 minutes, as in legislative session.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR THE CONSIDERATION OF CONFERENCE REPORT ON AGE DISCRIMINATION TOMORROW

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that upon the completion of the two aforementioned orders tomorrow the Senate proceed to the consideration of the conference report on age discrimination, as in legislative session.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER TO RESUME CONSIDERATION OF THE PANAMA CANAL TREATY TOMORROW

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that upon the disposition of the conference report on age discrimination in the morning, the Senate resume consideration of the Panama Canal Treaty.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR THE CONSIDERATION OF THE EMERGENCY SUPPLEMENTAL APPROPRIATION BILL TOMORROW

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that Mr. MAGNUSON be authorized to call up the emergency supplemental appropriation bill tomorrow if he and Mr. YOUNG are in agreement thereon at any point.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR THE RECOGNITION OF MR. PROXMIRE TOMORROW MORNING

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that Mr. PROXMIRE be recognized at some point tomorrow morning for not to exceed 30 minutes to speak on the Panama Canal Treaty.

The PRESIDING OFFICER. Without objection, it is so ordered.

FISHING VESSEL LOAN GUARANTEES

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of Calendar Order No. 644.

The PRESIDING OFFICER. The clerk will state the bill by title.

The legislative clerk read as follows:

Calendar Order 644 a bill, H.R. 9169, to amend Title XI of the Merchant Marine Act, 1936, to permit the guarantee of obligations for financing fishing vessels.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that further reading of the title be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senate proceeded to consider the bill.

The bill was considered, ordered to a third reading, read the third time, and passed.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 95-703), explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

PURPOSE OF THE LEGISLATION

The purpose of the legislation is to place fishing vessels in the same category as other vessels not receiving a construction differential subsidy, to qualify for Federal loan guarantees under title XI of the Merchant Marine Act of 1936. To accomplish this purpose, the legislation would amend the act to authorize the Secretary of Commerce to guarantee obligations up to 87½ percent of the cost of constructuring or reconstructing fishing vessels. The act currently authorizes an obligation guarantee of up to 75 percent.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the bill was passed; and, Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

HUBERT H. HUMPHREY INSTITUTE OF PUBLIC AFFAIRS AND THE EVERETT McKINLEY DIRKSEN CONGRESSIONAL LEADERSHIP RESEARCH CENTER

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of Calendar Order No. 647.

The PRESIDING OFFICER. The bill will be stated by title.

The legislative clerk read as follows:

A bill (S. 2452) to authorize funds for the Hubert H. Humphrey Institute of Public Affairs.

The PRESIDING OFFICER. Without objection, the Senate will proceed to its consideration.

The Senate proceeded to consider the bill (S. 2452), which had been reported from the Committee on Human Resources with amendments as follows:

On page 1, line 4, after "Affairs" insert "and the Everett McKinley Dirksen Congressional Leadership Research Center";

On page 2, beginning with line 3, insert the following:

(b) In recognition of the public service of Senator Everett McKinley Dirksen, the Commission is authorized to make grants in accordance with the provisions of this Act to assist in the development of the Everett McKinley Dirksen Congressional Leadership Research Center, located in Pekin, Illinois.

On page 2, line 14, after "$5,000,000" insert a comma;

On page 2, beginning with line 16, strike through and including line 17;

On page 2, beginning with line 18, insert the following:

(b) There are authorized to be appropriated such sums, not to exceed $2,500,000, as may be necessary to carry out the provisions of section 2(b) of this Act.

(c) Funds appropriated pursuant to this Act shall remain available until expended.

So as to make the bill read:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Hubert H. Humphrey Institute of Public Affairs and the Everett McKinley Dirksen Congressional Leadership Research Center Assistance Act".

SEC. 2. (a) In recognition of the public service of Senator Hubert H. Humphrey, the Commissioner of Education (hereafter in this Act referred to as the "Commissioner") is authorized to make grants in accordance with the provisions of this Act to assist in the development of the Hubert H. Humphrey Institute of Public Affairs, located at the University of Minnesota, Minneapolis-St. Paul.

(b) In recognition of the public service of Senator Everett McKinley Dirksen, the Commissioner is authorized to make grants in accordance with the provisions of this Act to assist in the development of the Everett McKinley Dirksen Congressional Leadership Research Center, located in Pekin, Illinois.

SEC. 3. No payment may be made under this Act except upon an application at such time, in such manner, and containing or accompanied by such information as the Commissioner may require.

SEC. 4. (a) There are authorized to be appropriated such sums, not to exceed $5,000,000, as may be necessary to carry out the provisions of section 2(a) of this Act.

(b) There are authorized to be appropriated such sums, not to exceed $2,500,000,

as may be necessary to carry out the provisions of section 2(b) of this Act.

(c) Funds appropriated pursuant to this Act shall remain available until expended.

Mr. BAKER. Mr. President, I am pleased to urge passage of S. 2452, a bill to authorize funds to develop the Hubert H. Humphrey Institute of Public Affairs at the University of Minnesota. The institute, which will support research in public policy and planning, will, at Senator Humphrey's request, be the main memorial to his memory. The strong bipartisan endorsement which this measure has received within both the House and Senate is further indication of the respect and affection with which he was regarded by his colleagues.

Mr. President, the Congress has, in the past, sought to honor distinguished colleagues following their deaths in various ways. In 1972, for example, we authorized the Allen Ellender fellowship program. In 1973, Federal aid was provided for the Sam Rayburn Library in Texas. In 1976, funds were made available to support the Wayne Morse Chair of Public Affairs at the University of Oregon. In addition, of course, Congress has traditionally provided funds to support libraries housing the papers of former Presidents, as well as Eisenhower College, the Harry S. Truman fellowship, and the John F. Kennedy Center for the Performing Arts.

In view of this tradition, I am particularly pleased that the Committee on Human Resources has included in S. 2452 an authorization for up to $2.5 million to assist the Everett McKinley Dirksen Congressional Leadership Research Center in Pekin, Ill.

While many of my colleagues, and especially those who knew and worked with Senator Dirksen, are familiar with the purpose and programs of the Dirksen Center, I would like to take this opportunity to summarize briefly the center's background and the work which it has undertaken.

Before his death in 1969, Senator Dirksen expressed his intention to create an endowment to establish a Center for Congressional Leadership in his home city of Pekin, Ill. It was his belief that "since the legislative branch of our Government is the heart of American democracy, a broadened understanding of its function would strengthen our country," and he hoped that "students of government, of political science, and of history, from here and abroad, would come to inquire, to learn, to understand, and, hopefully, to be inspired."

In 1975, construction of a joint facility to house the Dirksen Center and the Pekin Library was completed, and the building was dedicated by President Ford in August of that year. All of Senator Dirksen's papers and memorabilia were moved into the center, and work was begun on cataloging and organizing this vast collection of material so that it may be available for public study and research.

The long-range goal of the center is to become the Nation's recognized institution for congressional leadership education, research, and collections. It is hoped in the future that the center will be able to house or provide access to all collections and materials relating to congressional leadership.

The Dirksen Center has made significant progress toward that goal. It is known in historical, governmental, and archival circles in the Midwest and throughout the country, and I believe that with additional support provided in S. 2452, the center will thrive as a unique institution which will fulfill Senator Dirksen's hopes of stimulating study and promoting understanding of the important role of the Congress and its leadership in contemporary America.

Mr. President, the Humphrey Institute and the Dirksen Center are intended to stimulate study and improve understanding of public issues and the importance of public service. I can think of no finer tribute to these two great legislators, and I look forward to enactment of S. 2452 at the earliest possible time.

Mr. ALLEN. Mr. President, will the Senator from West Virginia yield?

Mr. ROBERT C. BYRD. Yes, I yield.

Mr. ALLEN. Would the Senator mind stating how much is authorized on this institute?

Mr. ROBERT. C. BYRD. Yes, if the Senator will allow me a moment to check.

The answer is $2.5 million for the Dirksen Institute, and $5 million for the Humphrey Institute.

Mr. ALLEN. I thank the Senator.

The PRESIDING OFFICER. The question is on agreeing to the committee amendments.

The amendments were agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

The title was amended so as to read:

A bill to authorize funds for the Hubert H. Humphrey Institute of Public Affairs and for the Everett McKinley Dirksen Congressional Leadership Research Center.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 95–706), explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

BRIEF SUMMARY OF THE COMMITTEE BILL

Section 2(a) of the bill authorizes the Commissioner of Education, in recognition of the public service of Senator Hubert H. Humphrey, to make grants to assist in the development of the Hubert H. Humphrey Institute of Public Affairs, located at the University of Minnesota, Minneapolis-Saint Paul.

Subsection (b) authorizes the Commissioner to make grants, in recognition of the public service of Senator Everett McKinley Dirksen, to assist in the development of the Everett McKinley Dirksen Congressional Leadership Research Center, located in Pekin, Ill.

Section 3 requires that payments be made upon applications containing such information as the Commissioner may desire.

Section 4(a) authorizes $5 million for grants to the Hubert Humphrey Institute of Public Affairs. Section 4(b) authorizes $2.5 million for grants to the Everett McKinley Dirksen Congressional Leadership Research Center. Section 4(c) provides that funds shall remain available until expended.

HUBERT H. HUMPHREY INSTITUTE OF PUBLIC AFFAIRS

One of the last requests of the late Senator Hubert H. Humphrey was that his primary memorial be the Hubert H. Humphrey Institute of Public Affairs at the University of Minnesota. Dedicated to the "education, stimulation and recruitment of bright young men and women for positions in public and community service," the Humphrey Institute will be a fitting tribute to a beloved teacher and public servant. In the spirit of Hubert Humphrey's leadership, the Institute will be structured so as to allow its programs to confront the social, technological, and environmental changes in our society and the emergence of new challenges in the public sector.

Senator Humphrey hoped that the central purpose of the Institute would be to attract into Government service bright young men and women. The best way to encourage excellent students to choose a particular graduate program is to offer substantial fellowships. The Senator expressed the hope that the resources of the Humphrey Institute would be used to assist financially students of high caliber during their graduate studies of government. At a press conference on July 27, 1977, he spoke of his own financial hardships during graduate school in the 1930's. It had often been necessary for him to take time off from his studies at the University of Minnesota to return to South Dakota and work in his father's drug store. He hoped that the Institute would be able to provide for some of its students so that they would not face the obstacles he himself had encountered as a student.

The Humphrey Institute was named on September 9, 1977, and will be officially dedicated on July 1, 1978. Fund raising efforts have been extremely successful, a testament to the fact that the long-time Senator and former Vice President touched the lives of millions during his years of public service.

National fund-raising efforts have raised $8.3 million to date. Extensive fund-raising activities are planned all over the Nation. For instance, in New York, Radio City Music Hall will be donated for an event May 18 which is expected to raise between $500,000 and $1 million for the Institute. A dinner in Washington, D.C., on December 2, 1977, raised $1,074,000.

Individual contributions have ranged from small unsolicited amounts to contributions of $1 million or more. Labor contributions have also been most generous: The AFL–CIO donated $30,000 and the UAW pledged $25,000 from its international union. In addition, gifts have come from individual State, local, and city labor organizations.

An International Committee headed by Dr. Henry Kissinger and Mr. Leonard Marks has raised $1,250,000 thus far through gifts from the Governments of Japan and Iran.

Though funds have been raised in substantial amounts for the Humphrey Institute, many of the donations are earmarked for a specific purpose. For instance, a gift of $1 million from Mr. Dwayne O. Andreas is to be used solely for preserving and organizing the late Senator's papers in the Humphrey Archives at the Institute. Another gift of $1 million, from Mr. Curtis L. Carlson, must be expended to support a distinguished lecturer series at the Institute. These generous gifts are of great help to the Institute, but cannot be used for fellowships. Thus the Director of the Humphrey Institute, Dr. John S. Adams, anticipates that there will be a lack of unencumbered funds to help support able students through prestigious fellowships, the very purpose of the Institute envisioned by Senator Humphrey himself.

S. 2452 addresses this need—for an endowment fund which can provide annual fellowships to attract the very best students to the Humphrey Institute. No part of the $5 mil-

lion provided by the Hubert H. Humphrey Institute of Public Affairs Assistance Act will be used for the Institute building or for other capital purposes. Instead, the funds will be handled with professional investment fund managers who will invest them with an eye toward growth of the endowment over the years. In this way, income from the fund will grow with inflation, so that fellowships can be provided which actually cover a student's living expenses.

It is planned that the congressional appropriation of $5 million will be invested in low-risk securities with an expected 5 percent rate of interest, so that the annual yield will be about $250,000. The Institute plans to use fully half of the annual income from the endowment for student fellowships.

Public Service Fellowships awarded by the Office of Education provide $7,800 in annual stipends for the calendar year—$3,900 for tuition and expenses, and $3,900 for living expenses. Using these figures as estimates of fellowship amounts, the Humphrey Institute anticipates that it will be able to provide about 15 or 16 fellowships to first year students, and the same number to second year students. With a total enrollment of between 50 and 60 students in each class, then, the Institute will be able to provide substantial financial assistance to over one fourth of its students as a result of the enactment of S. 2452.

It is expected that the income from the invested appropriation which is not used for fellowships will make up a general fund for the support of the Institute's programs. This money may be expended for such things as the Institute's weekly public television public policy forum, grants for research projects in public policy and planning to faculty and advanced students, and stipends for student public service internships.

The amount authorized by the Hubert H. Humphrey Institute of Public Affairs Assistance Act comprises about one quarter of the estimated $20 million necessary for the development of the Institute. The $5 million authorization will substantially help the Institute in reaching its July 1, 1978, goal of $20 million. It was thought that one quarter of the total necessary for the Institute's development was an appropriate amount for the United States to provide, especially in light of the large gifts received from governments of other nations.

The following letter in support of S. 2452 was received from Henry A. Kissinger, former Secretary of State:

HENRY A. KISSINGER,
March 16, 1978.

MISS ALLISON WOLF,
Office of Senator Wendell R. Anderson, U.S. Senate, 304 Russell Senate Office Building, Washington, D.C.

DEAR MISS WOLF: Thank you for your kind letter of March 3, 1978, on the subject of S. 2452, the bill introduced by Senator Wendell Anderson to authorize $5 million for the Hubert H. Humphrey Institute of Public Affairs, and its companion bill in the House. As Chairman of the Internal Committee for the Humphrey Institute, I am happy to declare my strong support of this legislation.

The Institute will be a fitting and living memorial to Hubert Humphrey. Its goal will be to insure that his example will continue to advance after his death the humane ideals that he so fully embodied during his lifetime. I know how proud and happy Hubert was to know before his death that an Institute in his name would be educating new generations of young men and women to his ideals of intellectual excellence, public service, and human decency.

For Hubert Humphrey set a standard of integrity and humane concern that enriched not only American public life but also the common endeavors of the democratic nations to build a better world for our children. It is no accident that this Institute has received generous financial support from so many friendly nations. For Hubert was a champion of international cooperation. He understood that the common enemies of mankind—war and famine, disease and illiteracy, inequality and racial hatred, fear and human suffering—ought to be the focus of redoubled international effort.

This is in the noblest tradition of the American people. It is certainly deserving of broad national support as S. 2452 would so well represent.

Best regards,

HENRY A. KISSINGER.

EVERETT MCKINLEY DIRKSEN CONGRESSIONAL LEADERSHIP RESEARCH CENTER

The estate of the late Honorable Everett McKinley Dirksen, U.S. Senator from the State of Illinois and Senate Republican Leader, created an endowment to establish a Center for Congressional Leadership in his home city of Pekin, Ill.

Senator Dirksen meant for this Center to house his papers and memorabilia plus related materials as his friends and heirs might deem appropriate. He further hoped that this Center would give the subject of congressional leadership the attention it deserved. The Senator believed that "since the legislative branch of our government is the heart of American democracy, a broadened understanding of its function would strengthen our country." He hoped that "students of government, of political science, and of history, from here and abroad, would come to inquire, to learn, to understand, and, hopefully, to be inspired."

The Dirksen Center's Board of Directors has determined the Center's long-range goals:

"To serve as an educational institution * * * for the art and science of American politics and American government, in particular the role of the United States Congressional Leadership.

The Center plans to establish both an Advisory Board, to consist of leaders in business, labor, and the Congress itself, and a Research Council, to consist of experts in economics, political science, international affairs, history, and related fields.

The Dirksen Center will serve the Nation as a unique educational institution, devoted to the study of Congress and Congressional leadership. It is a nonpartisan entity functioning in the field of civic education.

The Center has an adequate facility, with ample space for additional collections. It has acquired several collections and is seeking more. The building, which houses both the Dirksen Center and the Pekin Library, was dedicated in 1975.

The Dirksen Center's initial endowment was $30,000. Approximately $1,500,000 has been raised by private fund-raising. To augment the Center's present endowment, the fund-raising activities are being maintained very vigorously. Gifts from private sources built the Center, provided for professional Staff and archives, supported the initial public programs, and funded current operations.

The purpose of the Committee bill is to assist in the development of the Dirksen Center. The intention is to contribute to the Center's endowment. An increase in endowment income will be used to develop an outreach capability on a nonpartisan basis to inform the citizenry on the functions and leadership of the United States Congress. More specifically, current activities and planning are devoted to:

"Educational programs for all levels, from secondary to postgraduate, including the American public at large;

"Timely seminars throughout the United States on current public policy issues;

"Publications and other projects to encourage an understanding of the Congress; and

"Expansion of research materials available at the Center for the study of Congress and Congressional leadership."

Just as Presidential libraries invite interest in the executive branch, the Dirksen Congressional Center exists to stimulate inquiry and to educate the citizenry on the crucially important role of Congress and congressional leadership in contemporary America.

Legislation to fund educational institutions in the name of former congressional and executive branch leaders is not without precedent. For instance, grants to Eisenhower College of a total $14 million were authorized in 1968 and 1974. The 94th Congress established an endowed chair at the University of Oregon in the name of Senator Wayne Morse, with an authorization of $500,000. In 1972, Congress established the Ellender fellowship program, with authorizations of up to $1 million, to ensure the participation of low income students in the closeup program. The Sam Rayburn Library received Federal aid up to a total of $1 million, as a result of legislation passed in 1974, the same year that a total of $30 million was authorized for the Harry S Truman scholarship program.

The committee, while unanimous in supporting the two grants proposed in this bill, expressed concern about the proliferation of this type of award.

To maintain the integrity of such awards, and to assure an orderly process in evaluating future award proposals, the Committee accepted two guidelines:

"First, that the project intended for funding show evidence of substantial popular support through successful fund-raising activities or through public subscription;

"Second, that the amount authorized by the Committee be no greater than 50 percent of the project's total funding."

For future awards, the committee will take these criteria into consideration.

SENATORS' PAPERS

The committee recognizes the unique and extraordinary contributions of Hubert Humphrey and Everett Dirksen during their service in the Senate, and that such accomplishments obviously merit the proposed Federal support. It is notable that significant private support has been manifest in these two examples. The committee wishes to point out that any person who serves in the Senate, particularly Members who serve for long periods and undertake substantial legislative activities, will amass records and documents of particular value to scholars, lawyers, and public officials. Appropriate preservation and archival organization of such papers present a difficult problem to many members.

Under the present circumstances, each member must make his own arrangements, often with a university in his home State. This leads to an irregular and uncoordinated outcome. Often the private resources available, and not the historical value of the material, determines the way in which papers are preserved or lost.

Any mechanism covering the papers of individual members and their preservation and organization is outside the jurisdiction of the Committee on Human Resources. However, the committee does have jurisdiction over legislation for libraries, universities, and educational institutions in general, and would be pleased to assist other committees in their deliberations. It is hoped that the consideration of S. 2452 will serve as a catalyst for the appropriate committee or committees to review the appropriate preservation of papers of Members of the State.

VOTES IN COMMITTEE

Pursuant to section 133(b) of the Legislative Reorganization Act of 1946, as amended, the following is a tabulation of votes cast in committee.

1. Motion by Senator Stafford to accept amendment relating to the Everett Dirksen Congressional Leadership Research Center. Adopted by voice vote.

2. Motion by Senator Javits to report S. 2452, as amended. Adopted by voice vote.

CONGRESSIONAL BUDGET OFFICE
U.S. CONGRESS,
Washington, D.C., March 15, 1978.

Hon. HARRISON A. WILLIAMS, Jr.,
Chairman, Committee on Human Resources, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: Pursuant to section 403 of the Congressional Budget Act of 1974, the Congressional Budget Office has prepared the attached cost estimate for S. 2452, the Hubert H. Humphrey Institute of Public Affairs and the Everett McKinley Dirksen Congressional Leadership Research Center Assistance Act.

Should the committee so desire, we would be pleased to provide further details on the attached cost estimate.

Sincerely,

ALICE M. RIVLIN, *Director.*

CONGRESSIONAL BUDGET OFFICE—COST ESTIMATE, MARCH 15, 1978

1. Bill number: S. 2452.

2. Bill title: Hubert H. Humphrey Institute of Public Affairs and the Everett McKinley Dirksen Congressional Leadership Research Center Assistance Act.

3. Bill status: Ordered reported from the Senate Human Resources Committee, February 28, 1978.

Bill purpose: The purpose of this bill is to authorize funds for the Hubert H. Humphrey Institute of Public Affairs and the Everett McKinley Dirksen Congressional Leadership Research Center. The funds are subject to subsequent appropriation action.

5. Cost estimate:

[By fiscal years, in millions of dollars]

	1978	1979	1980	1981	1982	1983
Authorization level:						
Hubert Humphrey Institute		5.0				
Everett Dirksen Center		2.5				
Total		7.5				
Estimated net cost:						
Hubert Humphrey Institute		5.0				
Everett Dirksen Center		2.5				
Total		7.5				

6. Basis for estimate: The cost estimate for S. 2452 is based on the maximum authorization levels stated in the bill. Although the authorizations are not designated for a particular fiscal year, the Human Resources Committee staff has indicated that this item would, if possible, be included in the fiscal year 1979 appropriation bill. It was further assumed by the Committee staff that a lump sum payment would be made to each of the institutes. Thus, a hundred percent spend-out rate was applied.

7. Estimate comparison: On February 16, 1978, CBO prepared a cost estimate on H.R. 10606, the Hubert H. Humphrey Institute of Public Affairs Memorial Act. That bill only authorized funds for the Hubert H. Humphrey Institute.

8. Previous CBO estimate: None.

9. Estimate prepared by: Deborah Kalcevic.

10. Estimate approved by:

C. G. NUCKOLS,
(For James L. Blum,
Assistant Director for Budget Analysis).

REGULATORY IMPACT

In accordance with paragraph V of rule XXIX of the Standing Rules of the Senate, the following statement of the regulatory impact of the bill is made.

The basic purpose of S. 2452 is to authorize the Commissioner of Education to make grants to the Hubert H. Humphrey Institute of Public Affairs and the Everett McKinley Dirksen Congressional Leadership Research Center.

Since these grants would be made to educational institutions already in existence, no additional individuals or businesses would be subject to regulation. There would, therefore, be no additional economic impact due to increased regulation. There would be impact on the personal privacy of any individuals involved, and the only additional paperwork which would be required would be that necessary for grants to be received by the institutions specified in the legislation.

SECTION-BY-SECTION ANALYSIS

Section 2(a) of S. 2452 authorizes the Commissioner of Education to make grants to assist in the development of the Hubert H. Humphrey Institute of Public Affairs, located at the University of Minnesota, Minneapolis-St. Paul.

Section 2(b) of the bill authorizes the Commissioner to make grants to assist in the development of the Everett McKinley Dirksen Congressional Leadership Research Center, located in Pekin, Ill.

Section 3 provides that payments shall be made upon application at such time, in such manner, and containing or accompanied by such information as the Commissioner may require.

Section 4(a) authorizes the appropriation of $5 million for the Hubert H. Humphrey Institute of Public Affairs.

Section 4(b) authorizes the appropriation of $2.5 million for the Everett McKinley Dirksen Congressional Leadership Research Center.

Section 4(c) provides that funds appropriated shall remain available until expended.

The title is amended to reflect the amendment adopted by the committee.

CHANGES IN EXISTING LAW

Since S. 2452 does not amend existing law, no changes need to be shown in order to comply with subsection (4) of Rule XXIX of the Standing Rules of the Senate.

PROGRAM

Mr. ROBERT C. BYRD. Mr. President, the Senate will convene tomorrow morning at 9:30. After the prayer, the Senator from Missouri (Mr. DANFORTH) and the Senator from New York (Mr. JAVITS) will be recognized, each for not to exceed 15 minutes. At the conclusion of those two orders, the Senate will proceed, under a time agreement, to the consideration of the conference report on H.R. 5383, the Age Discrimination bill. Upon the disposition of that conference report, the Senate will resume its consideration of the Panama Canal Treaty.

There may be rollcall votes tomorrow, and at some point during the day it is anticipated that the urgent supplemental appropriation bill will be called up.

That is about it. I would anticipate that the Senate will be in session possibly until around 3 or 4 o'clock tomorrow afternoon.

RECESS UNTIL 9:30 A.M. TOMORROW

Mr. ROBERT C. BYRD. With that, Mr. President, and with a cheerful good night to everyone, I move that the Senate, as in executive session, stand in recess until the hour of 9:30 tomorrow morning.

The motion was agreed to; and at 6:44 p.m. the Senate, as in executive session, recessed until tomorrow, Thursday, March 23, 1978, at 9:30 a.m.

NOMINATIONS

Executive nominations received by the Senate March 22, 1978:

DEPARTMENT OF STATE

David D. Newsom, of California, a Foreign Service officer of the class of Career Minister, to be Under Secretary of State for Political Affairs.

U.S. ADVISORY COMMISSION ON INTERNATIONAL COMMUNICATION, CULTURAL AND EDUCATIONAL AFFAIRS

Olin C. Robinson, of Vermont, to be a member of the U S. Advisory Commission on International Communication, Cultural and Educational Affairs for a term of 1 year (new position).

SECURITIES INVESTOR PROTECTION CORPORATION

The following-named persons to be directors of the Securities Investor Protection Corporation for the terms indicated:

Ralph D. DeNunzio, of Connecticut, for a term expiring December 31, 1979 (reappointment).

Brenton H. Rupple, of Wisconsin, for a term expiring December 31, 1978, vice Glenn E. Anderson, term expired.

Michael A. Taylor, of New York, for a term expiring December 31, 1980, vice Henry W. Meers, term expired.

THE JUDICIARY

Daniel M. Friedman, of the District of Columbia, to be chief judge of the U.S. Court of Claims, vice Wilson Cowen, retired.

Harold H. Greene, of the District of Columbia, to be U.S. district judge for the District of Columbia, vice John J. Sirica, retired.

Gustave Diamond, of Pennsylvania, to be U.S. district judge for the western district of Pennsylvania, vice Edward Dumbauld, retired.

Donald E. Ziegler, of Pennsylvania, to be U.S. district judge for the western district of Pennsylvania, vice Rabe F. Marsh, retired.

IN THE COAST GUARD

The following graduates of the Coast Guard Academy to be permanent commissioned officers in the Coast Guard in the grade of ensign:

Will Daniel Agen
Gene Raymond Allard
David W. Alley
Iain Anderson
Timothy Teall Arthur
Mark Edward Ashley
Charles Francis Barker
Jon Michael Bechtle
Keith Marshall Belanger

IN THE ARMY

The following-named Army Medical Department officer for temporary appointment in the Army of the United States, to the grade indicated, under the provisions of title 10, United States Code, sections 3442 and 3447:

To be major general, Medical Corps

Brig. Gen. Raymond Holmes Bishop, Jr., [redacted], Army of the United States (colonel, Medical Corps, U.S. Army).

The following-named Army Medical Department officers for appointment in the Regular Army of the United States, to the grade indicated, under the provisions of title 10, United States Code, sections 3284 and 3306.

To be brigadier general, Medical Corps

Brig. Gen. Raymond Holmes Bishop, Jr., [redacted], Army of the United States (colonel, Medical Corps, U.S. Army).

Maj. Gen. Enrique Mendez, Jr., [redacted], Army of the United States (colonel, Medical Corps, U.S. Army).

IN THE AIR FORCE

The following Air National Guard of the United States officers for promotion in the Reserve of the Air Force under the provisions of section 593(a), title 10 of the United States Code, as amended:

LINE OF THE AIR FORCE

To be lieutenant colonel

Maj. David L. Ahrens, [redacted].
Maj. John Anderson Jr., [redacted].
Maj. David T. Arendts, [redacted].
Maj. Armando Arvizu, [redacted].
Maj. Donald E. Barnhart, [redacted].
Maj. Frederick L. Bonney, [redacted].
Maj. Joseph M. Byrne, [redacted].
Maj. Enos N. Chabot, [redacted].
Maj. Willis I. Crumpler, [redacted].
Maj. David R. Cummock, [redacted].
Maj. George A. Duncan, [redacted].
Maj. Thomas R. Emmett Jr., [redacted].
Maj. George A. Fisher Jr., [redacted].
Maj. James D. Flick, [redacted].
Maj. Charles P. Ford, [redacted].
Maj. Richard L. George, [redacted].
Maj. Jule V. Goehring, [redacted].
Maj. William R. Greer, [redacted].
Maj. Joe K. Griffin, [redacted].
Maj. Harold L. Gustafson, [redacted].
Maj. John M. Hubbard, [redacted].
Maj. Fred N. Larson, [redacted].
Maj. James D. McKay, [redacted].
Maj. Dan R. McKinney, [redacted].
Maj. Jon M. McMahon, [redacted].
Maj. Frederick A. Moore, [redacted].
Maj. Irtalis Negron, [redacted].
Maj. James W. Piercy, [redacted].
Maj. Raymond A. Prince, [redacted].
Maj. Neal T. Reavely, [redacted].
Maj. John F. Ruby, [redacted].
Maj. Ralph W. Sirek, [redacted].
Maj. Nicholas C. Sivo, [redacted].
Maj. William H. Snead, [redacted].
Maj. Carleton B. Waldrop, [redacted].
Maj. Stanley F. Wied, [redacted].
Maj. Robert Wilbur, [redacted].
Maj. John F. Williams, Jr., [redacted].
Maj. Charles F. Wood, [redacted].
Maj. Howard A. Zike, [redacted].

JUDGE ADVOCATE

Maj. Bennett W. Cervin, [redacted].
Maj. Harry Lee, [redacted].

IN THE AIR FORCE

The following Air National Guard of the United States officers for promotion in the Reserve of the Air Force under the provisions of section 593(a) title 10 of the United States Code, as amended:

LINE OF THE AIR FORCE

To be lieutenant colonel

Maj. William J. Austin, [redacted].
Maj. Edward L. Bailey, [redacted].
Maj. James C. Bergholt, [redacted].
Maj. Kenneth L. Brandt, [redacted].
Maj. James F. Brown, [redacted].
Maj. Alfred W. Clark, [redacted].
Maj. Gervase L. Connor, [redacted].
Maj. Jesse T. Cantrill, [redacted].
Maj. Gerald R. Corvey, [redacted].
Maj. Dean W. Crowder, [redacted].
Maj. George B. Doty, [redacted].
Maj. James K. Ehni, [redacted].
Maj. John H. Fenimore V, [redacted].
Maj. William E. Galt, [redacted].
Maj. Raymond J. McGeechan, [redacted].
Maj. Dennis O. Hugg, [redacted].
Maj. John K. Ianuzzi, [redacted].
Maj. Ralph J. King, [redacted].
Maj. Clifton F. Landis, [redacted].

Maj. Franklin J. Lane, [redacted].
Maj. William J. Lofink, [redacted].
Maj. Thomas N. McLean, [redacted].
Maj. Ralph E. Meade, [redacted].
Maj. John A. Molini, [redacted].
Maj. John R. Rees, [redacted].
Maj. Carlos G. Rodriquez, [redacted].
Maj. Pere W. Saltzgiver, [redacted].
Maj. Henry A. Simmons, [redacted].
Maj. Joe T. Strow, [redacted].
Maj. Frederic L. Symmes, [redacted].
Maj. Howard E. Travis, [redacted].

JUDGE ADVOCATE

Maj. Robert E. Dastin, [redacted].
Maj. Edward L. Fanucchi, [redacted].

IN THE AIR FORCE

The following officers for appointment in the Regular Air Force, in the grades indicated, under the provisions of section 8284, title 10, United States Code, with dates of rank to be determined by the Secretary of the Air Force:

To be first lieutenant

Aboe, Errol S., [redacted].

EXTENSIONS OF REMARKS

URANIUM MILL SITE RESTORATION ACT OF 1978

HON. DAN MARRIOTT

OF UTAH

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 22, 1978

● Mr. MARRIOTT. Mr. Speaker, yesterday I introduced H.R. 11698, the Uranium Mill Site Restoration Act of 1978. This bill would provide grants to States to carry out a restoration plan for abandoned uranium mill tailings.

This is necessary because of preliminary studies by ERDA in 1974 which identified 19 sites in the States of Arizona, Colorado, Idaho, New Mexico, Oregon, Texas, Utah, and Wyoming, where there existed large quantities of radioactive uranium mill tailings at the sites of inactive mills.

Comprehensive studies were completed by DOE on these sites last November. They are all mill sites which produced by far the greatest part of their output of uranium under contracts with the U.S. Atomic Energy Commission during the period 1947 through 1970.

In recent years there has developed a growing concern about the possible adverse effects to the public from long-term exposure to low-level sources of radiation from these tailings at the sites of the inactive mills.

I feel very strongly that the Congress needs to address this serious problem. Action has already been taken by the 92d Congress and again by the 95th to address this problem in Grand Junction, Colo. However, this was only a beginning, and now action is necessary to resolve it at the remaining 19 sites.

The problem is particularly acute in my State because of the large unstabilized mill tailings located in downtown Salt Lake City.

This covers a 128-acre area, which is clearly a threat to the health and welfare of those Utahans who live, work, or travel near them. These tailings were left there by the Vitro Chemical Co., which processed uranium ore under contract to the Federal Government between 1951 and 1964, and vanadium between 1965 and 1968.

In addition to the Salt Lake site, there are two other sites in Utah located at Green River and Mexican Hat.

The other sites are located in Monument Valley, Ariz.; Tuba City, Ariz.; Durango, Colo.; Maybelle, Colo.; Naturita, Colo.; Rifle, Colo.; Slick Rock, Colo.; Lowan, Idaho; Ambrosia Lake, N. Mex.; Shiprock, N. Mex.; Lakeview, Oreg.; Falls City, Tex.; Ray Pointe, Tex.; Riverton, Wyo., and Spook, Wyo.

This comprehensive piece of legislation deals with the problem of the tailings and calls for a federally funded program to be carried out by the individual States. In order to participate, the State makes application to the Department of Energy within 3 years. Should a State not wish to participate, then the DOE would undertake this restoration project.

In addition, it calls for a pilot study in Salt Lake City to determine to what extent, if any, radiation from uranium mill tailings at abandoned sites contaminates structures located within a 10-mile radius and to what extent it poses a health hazard to individuals living or working in the area. The Salt Lake site was chosen because of the location of the tailings within a large metropolitan area.

I urge my colleagues to carefully consider this legislation as a solution to the serious threat these abandoned uranium mill tailings pose to many of our citizens.●

MAZZOLI RENEWS SUPPORT FOR PUBLIC FINANCING OF CONGRESSIONAL RACES

HON. ROMANO L. MAZZOLI

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 22, 1978

● Mr. MAZZOLI. Mr. Speaker, as one who has long advocated public financing of congressional campaigns—and twice voted for public financing—I am appalled over the bill which comes before us today which is supposed to serve as the vehicle for public financing.

I strongly oppose the rule providing for the consideration of H.R. 11315.

This bill, which would cut by 70 percent what political parties can spend on House races and by 50 percent what political action fund-raising committees of business, labor, and other groups can

spend, is severely lopsided in favor of my own party.

I am a good Democrat and I am in favor of keeping the Republican Party the minority party. But, I want to accomplish this mission by fairly fought, fairly financed elections—not be undermining the two-party system which has served our Republic well over the years.

The purpose of providing public financing for congressional campaigns is to take big money and its influence out of the election process—to further restore the public's confidence in the objectivity of their elected officials.

How can we justify supporting a bill in the name of restoring the public's confidence when the bill is, at heart, a partisan exercise directed at dealing a hard, if not lethal, blow to the Republican Party.

Efforts may be made to establish that a vote against the rule to take up H.R. 11315 is tantamount to a vote against public financing. But that is, of course, Mr. Speaker, far removed from the fact.

The actual fact for me—and for at least some of my colleagues—is that I cannot in good conscience vote to undermine the two-party system in order to be able to take a vote on public financing.

If this rule is rejected, as I hope it will be, then House leadership on both sides of the aisle should take that as a signal to send to the floor a straight, uncluttered public financing bill so the House can work its will on this vital reform.●

CRAMER HILLS BOYS CLUB

HON. JAMES J. FLORIO

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 22, 1978

● Mr. FLORIO. Mr. Speaker, back in November 1953, 12 boys from Cramer Hill, who wanted so desperately to play basketball in an organized league but had no sponsor or uniforms, needed franchise money and a place to play, asked several of their fathers for assistance to make their dream a reality. All within a matter of days, uniforms were purchased for $35, the franchise money of $25 was arranged to enter the Junior Moose League and they were meeting competition for the first time in their young lives. They won the league championship the first year.

Things worked out well for these 12 boys. They wanted to continue their athletic efforts and enthusiastically talked of entering a baseball league in the spring of 1954. By this time several of their fathers were equally enthused and proud of this small group of kids and agreed that they would try to get the new organization underway so that they could compete in another sport.

The first meeting was called for January 6, 1954, at the Ablett Village Community Hall with 14 adults in attendance.

Weekly meetings were held and money was being raised immediately to pay for referees and janitor fees at Veteran Memorial Junior High School.

The adult membership continued to grow weekly and one money making project after another made it possible to field six teams in the Cramer Hill Boys Club Little League, and one team in this Junior Moose League in the spring of 1954, and a senior football team was also fielded in first year of the newly organized Boys Club.

In early 1955, a small building that was formerly a toy factory, located near 29th and Pierce Avenue, was purchased for $5,000. It was completely reconstructed by the adult members who worked nights and weekends. The finished building was beautiful and many many adults who helped in the reconstruction were justly proud of their work. The club now had their own clubhouse for meetings that included a kitchen which was put to good use in raising funds with suppers, cake sales, and socials. A finished basement accommodated shuffle boards, ping-pong tables, pool tables, storage rooms, facilities, for wrestling, boxing, and weight lifting.

The first ladies auxiliary to the Cramer Hill Boys Club consisted of a grcup of active mothers who organized in 1955 and deserve much credit for their accomplishments through the early years of the Boys Club development.

In 1957, the Boys Club became an associate member of the National Boys Club of America, the first affiliation in south Jersey.

In 1963, growing pains became the topic of conversation at the weekly meetings and when the Rio Theater was offered for sale, some of the more aggressive members suggested that it be purchased and converted into a full gymnasium. Again the adult members went into action reconstructing the former movie house into what is now the present River Avenue Boys Club, one of the few self-sponsored Boys Club in the State of New Jersey.

In the past 24 years, hundreds and hundreds of boys and girls have been given the opportunity to have a clubhouse to engage in recreational and athletic activities in an organized fashion. Many of the young adults, formerly participants in the youth program, are now married with children of their own and are still active in the Boys Club—and this is the sign of progress and success.

Credit for the success of the Cramer Hill Boys Club most certainly belongs to each and every adult, both male and female and young men who have contributed to curbing juvenile delinquency in their community.●

HIGHWAY OF FLAGS SERVICEMEN'S MEMORIAL

HON. ADAM BENJAMIN, JR.

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 22, 1978

● Mr. BENJAMIN. Mr. Speaker, today I am proud to reintroduce a bill to establish the Highway of Flags Servicemen's Memorial in Highland, Ind., as a national monument.

This monument, which stands on proud display at the intersection of U.S. Highway 41 and Route 6, is an outstanding tribute to those servicemen who fought for their country in time of need. Since each of the U.S. military service organizations are represented here, it is truly a symbol of American pride and patriotism.

This legislation was prompted by the untiring efforts of Mrs. Mary Lou Kieswetter from Munster, Ind., and the National Council for the Encouragement of Patriotism, of which she is the founder.

The council was founded on January 17, 1968, in an effort to instill a better sense of patriotism among our citizens. Its accomplishments symbolize what citizens can do when endowed with a firm dedication of purpose and unyielding determination. In the few short years of existence, the council has had all of U.S. 41 from Michigan to Florida proclaimed as the Highway of Flags—a tribute to our Nation's banner and to our servicemen and women.

In addition, the National Council for the Encouragement of Patriotism, under the guidance of Mrs. Kieswetter, built the Highway of Flags Servicemen's Memorial strictly through the donations and volunteer efforts of citizens who share the same flame of patriotism.

I hope that you will join me in support of this measure in an effort to further the goals of the council; that is, to stimulate all citizens to rededicate themselves to the American heritage; to remember and honor our heroes, our institutions, and our national achievements, and to strengthen and perpetuate the American way of life by involving all citizens.●

IF TOBACCO, WHY NOT BEETS?

HON. STEPHEN L. NEAL

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 22, 1978

● Mr. NEAL. Mr. Speaker, our distinguished colleague, Mr. JOHNSON of Colorado, has advised us that he is continuing his "legislative efforts to end Federal assistance which serves to promote the production and marketing of tobacco for human consumption." The gentleman says he is reintroducing a bill calling for a Department of Agriculture study to determine the probable economic effects of a cessation of Federal assistance which "serves to promote tobacco production and the manufacturing and marketing of tobacco products for human consumption." The bill also contains a "sense of the Congress" provision which supports an end to Federal assistance for tobacco, while taking into account family farmers who earn part or all of their income by growing tobacco.

Mr. Speaker, in his zeal to protect us from our own personal choices, the gentleman has selected a commodity which is neither grown nor manufactured in his State. He conveniently has overlooked the fact that his district produces at least two other agricultural commodities, sugar beets and grain, which can be detrimental to the health when used

abusively as refined sugar and grain alcohol. If the gentleman is sincere in his concern for protecting the public health by ending Federal involvement in potentially hazardous commodities, he ought to be willing to amend his bill so as to eliminate Federal supports for sugar beets and grain.

Using the same arguments that the gentleman applied to tobacco, we might propose an end to Federal assistance for sugar beets, contending that refined sugar can be harmful to the health. Mr. Speaker, the following paraphrases the gentleman's own letter:

I believe there is no justification for continuing Federal support for sugar beets once the government recognizes that the consumption of sugar is a serious health problem. The enormity of this problem was reaffirmed recently in a report of the Senate Select Committee on Nutrition, which called for a 45 percent reduction in sugar consumption.

Sugar consumption has a known relationship to tooth decay, obesity, and diabetes. As a major cause of overweight, it is suspected of being a factor in heart disease. The National Center for Health Statistics recently released results of a weight study of 13,600 people, checked from 1971 to 1974. Women under age 45 weighed an average of 4.7 pounds more than women of equivalent height checked in a 1960 to 1962 study. Men under age 45 were 3.8 pounds heavier than their counterparts of a decade earlier and those older than 45 were 4.8 pounds heftier. The Consumers Union reported earlier this month that obesity usually is detrimental to the health. It increases the possibility that disorders such as heart disease, high blood pressure, diabetes, gallstones, varicose veins, back ailments and arthritis might develop or become more severe.

While the federal government is committed to educating the public about proper nutrition and Congress has enacted legislation supportive of such efforts, we have continued to foster the production and marketing of sugar beets by guaranteeing farmers they will receive a good price for sugar beets. It is estimated that in FY 1978 the government will spend $2.28 million for various activities to support sugar beets, and that year will hold $545 million worth of outstanding price support loans made to sugar beet farmers. This dichotomous attitude toward sugar beets is self-defeating and confusing to the public. Certainly, it challenges the sincerity of our commitment to protect public health.

Mr. Speaker, that is the substance of the gentleman's argument. It is no less logical applied to sugar beets than to tobacco. It could be used with equal validity against grain for alcohol, or meats containing saturated fats. Frankly, however, it does not make good sense in any of these cases, because the proper role of Government in these instances is to inform, and not to impose its own choices upon the personal lives of the citizens of this free society.●

JACK HAMMETT'S SERVICE TO COSTA MESA TO BE HONORED

HON. ROBERT E. BADHAM

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 22, 1978

● Mr. BADHAM. Mr. Speaker, I would like to call the attention of my colleagues to the distinguished service of Jack Hammett to the city of Costa Mesa in the 40th Congressional District of California, whose service will be recognized at a banquet in his honor on March 30, 1978.

Jack Hammett has retired this year after serving 8 years as a member of the Costa Mesa City Council, including 2 years as mayor. And may the record show that his retirement was voluntary.

Jack is a retired Navy Warrant Officer, who came to Costa Mesa a number of years ago to take the city by storm. He served 2 terms as president of the chamber of commerce; served 7 years on the city's planning commission, including 2 years as chairman; served as a director of the Rotary Club, as vice-chairman of the California Aeronautics Board and as a member of the California State Department Transportation Advisory Committee and chairman of the Costa Mesa Transportation Committee.

In addition, Jack has served on several statewide boards, has been a reserve police officer, and last year received a government service award from the Orange County Bar Association.

As it is easy for the Members to see, Jack Hammett has kept busy during the years he has been in Costa Mesa and at the same time, with his wife, Mary Jo, raised a family which includes four children, Bruce, Debbie, Mark, and Jill.

It is my pleasure to rise today to pay tribute to a fine community leader such as Jack Hammett, and I join all of Jack's friends from Costa Mesa and all of Orange County in wishing him well in the years ahead and give him hearty thanks for his long and faithful service to his city.●

NEW YORK STATE SENATE OPPOSES SALE OF ADVANCED MILITARY AIRCRAFT TO SAUDI ARABIA AND EGYPT

HON. JACK F. KEMP

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 22, 1978

● Mr. KEMP. Mr. Speaker, the President has proposed to sell advanced military combat aircraft to Egypt and Saudi Arabia in advance of the conclusion of a peace settlement in the Middle East. This proposed arms sale has been offered as a "package deal" to include Israel in the same transaction. The lesson of the past 2 weeks of anti-Israel terrorism should persuade the elements of the administration who have thus far favored the sale, that it would be imprudent to risk a change in the military balance in the region until the fundamental issues of peace are resolved.

As one who has consistently supported the "special relationship" between the United States and Israel, I was pleased to see the New York State Senate recently go on record in this matter when it passed resolution No. 116 memorializing the Congress to "veto and annul the decision of President Jimmy Carter to sell fighter planes to Egypt and Saudi Arabia." The resolution, in my view, speaks for itself in its forthright condemnation of the sale, and I am including the complete text of that resolution at the conclusion of my remarks, and I congratulate these Senators from the State of New York for their leadership:

LEGISLATIVE RESOLUTION MEMORIALIZING THE CONGRESS OF THE UNITED STATES TO VETO AND ANNUL THE DECISION OF PRESIDENT CARTER TO SELL FIGHTER PLANES TO EGYPT AND SAUDI ARABIA

Whereas, President Jimmy Carter during his 1976 campaign for the Presidency uttered scathing attacks against then-President Ford's alleged lack of full support for Israel and vowed that, if elected, he would exert the influence of his office and his personal and full support and effort to the survival and perpetuation of the democratic Government of Israel; and

Whereas, President Carter, at this point in time, apparently marches to a different drummer as manifested by his recent decision to sell fifty short-range fighters to Egypt and sixty F-15 fighters to Saudi Arabia which decision is an affront, indeed, to the principle that Israel's integrity as a free democratic nation must not be imperiled; and

Whereas, This paradoxical decision of the President, a chilling one, indeed, bodes no good for the nations of the Middle East, particularly Israel and is an embarrassment which will outrage a large proportion of the people of this State of every political persuasion; and

Whereas, It is the sense of this Legislative Body that it ought to express its outrage at this decision of President Carter which this Body feels is an expression of the mind of the great majority of the people of this State and urge the President to overrule his judgment in making such an improvident and dangerous decision to arm the avowed and ancient enemies of a friendly nation; now, therefore, be it

Resolved, That this Legislative Body memorializes the Congress of the United States to veto the decision of President Jimmy Carter to sell fifty short-range fighter planes to Egypt and sixty F-15 fighters to Saudi Arabia thereby eliminating the clear and present danger that this decision creates to the sovereign State of Israel; and be it further

Resolved, That copies of this resolution, suitably engrossed, be transmitted to the President Pro Tempore of the Senate of the United States; to the Speaker of the House of Representatives of the United States; and to each member of the Congress of the United States from the State of New York.●

TRIBUTE TO MILTON BERLE, "MR. TELEVISION"

HON. JAMES C. CORMAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 22, 1978

● Mr. CORMAN. Mr. Speaker, this Sunday, March 26, the television industry will salute one of our greatest comedians, Milton Berle, with a 1-hour "Tribute to Mr. Television."

A pioneer of show business, Milton Berle's talents run the gamut of the entertainment world. He began as a child actor in vaudeville and silent films, and later charmed audiences in night clubs, movies, and legitimate theater with his song, dance, and relentless humor and antics.

In 1928 he made his first radio debut with the great Rudy Vallee and 20 years

later was the first individual to accept the challenge of an as yet unperfected medium, television.

Within 4 months of launching the "Texaco Star Theatre" Milton Berle became a giant in the industry receiving the highest rating ever reported for a regularly scheduled radio or television show. Yet, far more impressive and important was Mr. Berle's ability to win the hearts of the public for his ability to make people laugh. It gained for him the permanent and endearing nickname, Uncle Miltie.

Milton Berle has touched each of us somewhere along the way of his 50 years of entertaining. His success has been our good fortune. He has made us smile or laugh, and many times when we least thought it possible. He has had a full, active, and successful career, and deserves every best wish for continued success and good health. I join the television industry in honoring Mr. Berle and thank him for the happiness he has brought to so many.●

IMPACT OF REGULATION ON BUSINESS DEVELOPMENT

HON. HENRY J. NOWAK

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 22, 1978

● Mr. NOWAK. Mr. Speaker, with the social and economic costs of Government regulation becoming very great, the question is no longer whether reform is needed, but rather, identifying what steps to take to insure that the cost of compliance does not outweigh the public benefit.

Government alone cannot remedy the problem. For as Alec Flamm, senior vice president of Union Carbide Corp., points out—business must do its part before any meaningful reform is possible. Adds Mr. Flamm in his recent address to the Commercial Development Association:

> The ability of American business to gain the trust and confidence of the American people will greatly determine the course of government regulation and control.

The gentleman's remarks merit serious consideration in the ongoing debate. That is why I am inserting excerpts from his speech in today's RECORD:

THE IMPACT OF REGULATION ON BUSINESS DEVELOPMENT

I would like to examine the impact business has on regulation—the impact we may have on the regulatory climate as a result of the way we do business.

Let me begin by noting some changes in that climate that have already occurred. I think it's fair to say that we can begin to see the emergence of some shared perceptions with the public and with government about the enormous growth of regulation in recent years. Hardly any segment of our population is satisfied with the results. Both Congress and the executive branch have regulatory reform on the agenda. The public believes it has not been well served by the regulatory agencies. And business, of course, has long regarded the headlong rush to regulation as an inefficient means of achieving social and economic goals.

There are hopeful signs of a changing attitude toward regulation, which may signal opportunities for further changes. But we need to keep such hopeful signs in perspective.

The Department of Labor's decision to reduce and simplify OSHA regulations certainly does not mean it has forsaken any interest in worker health and safety. I hope the move to streamline OSHA regulations suggests a growing awareness that much of the business community has come to accept its goals. And that business can, if permitted, be counted on to display its own initiative and imagination in the drive to achieve them. If that's true, perhaps we'll find other opportunities to encourage the application of reason to regulation, and to build the momentum for constructive change.

But that will mean a meeting of minds as well as a changing of minds. We must make clear some fundamental facts about business and the economy. And we in business must do more to let people know that we acknowledge and accept a role in helping society advance its goals.

For a start, we can make it clear that we understand the need for regulation; that while we may seek to modify the shape and thrust of regulation, we know that in a complex society and economy, in which we are all living downstream from someone else, business autonomy is bound to be at least partly circumscribed by government.

We also understand the limitations of the market with respect to meeting social goals. Some things Americans want and need cannot be found in the marketplace. Individuals cannot purchase clean air and clean rivers. They cannot purchase expanded job opportunities for the disadvantaged, or equal rights for women and minorities. Individual market decisions cannot always ensure wise use of scarce resources.

Clearly the government and regulatory agencies must articulate those objectives and values in national policy. And the policies must be implemented through law and regulation.

Thus, most businessmen are not asking how we can rid ourselves of regulation, but rather, how much do we need, and what form should it take? We have reached the point where nearly every aspect of our business operations is subject to some form of regulation. The cost to business and to the public is astronomical . . . but do we get our money's worth? Or do some of these costs simply fuel inflation, and thereby limit our ability to achieve needed economic growth? And now that an awareness is building about the social and economic costs of regulation, where do we go from here?

Many are still convinced that the answer when regulation fails is more regulation. Their way out of the hole is to dig even deeper. Despite the current reaction against that approach, we cannot be sure it won't be tried if the public sees no reasonable alternative. We in business must make a more convincing case about our commitment to accept and advance the legitimate goals of regulation before the rules are written.

That commitment is there. I can document it in my own company and industry in a dozen ways. You can do the same in yours. But business has a checkered history, and we continue to labor under a legacy of mistrust. That mistrust, I believe, is the most serious obstacle in the way of reducing the burden of regulation.

The fact is, that few are willing to believe business can be counted on to do what is right . . . unless pressured to do so. Surveys continue to show that most Americans believe that business puts profits ahead of morality. They feel business cares little about the consumer. That we care little about the environment. In sum, says one research group, most Americans feel that business needs more watching over.

So while Americans have been saying they have no taste for further government intrusion in business, they are unlikely to signal a halt unless they trust business to do what is right without it.

We therefore have at least two parallel concerns with respect to regulation. We must restore public trust in businesses, so that when new problems and concerns arise, as they surely will, the public does not feel impelled to seek solutions from government. We must also address the damage already done to the economy by unwise regulation, and help regulators and lawmakers understand the problems and find reasonable and acceptable solutions which serve the public interest.

There are a number of legislators and regulators who are deeply concerned about the extent to which unreasonable regulation has been a brake on business development. Let's examine a few of the ways in which it has.

One problem is that regulation is a moving target. There's a substantial risk associated with every large-scale business venture. Our forecasting tools can help us anticipate market shifts and changing economic conditions. But how can be know what regulations we will be dealing with when the new venture comes on-stream in four or five years? That uncertainty simply adds to the risk, and it may, and often does, consign the already high-risk projects to the shelf.

Changes in the regulatory process made in the interest of easing business planning problems, could no doubt offer some help. But I'm convinced that a stable regulatory situation will elude us until the public believes that business operates in a way that makes new and more elaborate restrictions unnecessary.

Those of you who have new product responsibility may have faced another variety of regulatory roadblock. It's one combined of delay by regulators in reaching decisions about new products, and inconsistency in the determinations once they are made. When management is unable to tell from one day to the next whether a product will be pulled off the market, there is no great eagerness to risk resources on producing it in the first place.

Here again, we can seek relief through revamping of agency procedures. But a more fundamental solution will become available only when the public believes that manufacturers have done their own homework before the regulators get into the act. It is only a climate of public trust that, in the long run, will encourage regulators to remove unnecessary obstacles to the introduction of new and useful products.

That word "useful" raises another point I'd like to make about public attitudes. Opinion research we've commissioned at Union Carbide shows the public makes a clear distinction between products with real benefits, and those it regards as having none. When people do perceive a benefit, as in the case of saccharin, they are quite willing to make up their own minds about whether the risk a product may pose is worth the benefit derived from using it. On the other hand, if the product has no perceived benefit, as was the case with red dye, they are quite willing to have it banned if it poses any risk at all.

The message is very clear: the public wants to know more about the products its offered, and it will increasingly reject the doubtful ones that serve no useful purpose. I don't know how we could ask for a more sensible attitude, or why any business should fail to respond.

Failure will simply mean further confrontation with regulators and the public, and new, more restrictive regulation. Let's take a look at some of the larger economic consequences of a regulatory system that makes

business the adversary of those we are supposed to serve.

One is the deadening effect on innovation. In the current climate, companies are doubtful about the chances of getting even thoroughly tested products to market. As a result, many look for new markets via the safer route of modifying old products and product development efforts are delayed or abandoned. Pesticides are a good example. We have a situation now where growers may well have to wait an unreasonably long time for the ecologically sound pesticides they need to replace the ones discovered to be dangerous. And a wide range of other useful products may never be produced because an excessively heavy regulatory burden will make them uneconomic.

The pace of technology growth is also affected by excessive regulation. Other factors are involved in the technology slowdown, but the burden of regulation and regulatory costs is certainly a large part of the problem.

You may have seen some of the data in the Department of Commerce study of technology policy.

The study observed that technology intensive industries grew 45 percent faster than others. That employment in such industries grew 88 percent faster. That productivity grew 38 percent faster. And that the rate of increase in the price to unit output ratio was 44 percent slower. Who can say those achievements are not in the public interest?

So it is something more than business hyperbole to claim that our technology has made a tremendous contribution to our very advanced condition of material prosperity, that it has more than kept pace with the growing needs of an expanding population. That it has given us a preeminent position in world markets, and has brought considerable benefits to those with whom we trade.

But if current trends continue, the heyday of U.S. technology may be passing. Some say it has already passed. Our share of worldwide patent awards is declining. Fewer technology-based companies are starting us. Our lead in productivity has narrowed by 50 percent since the 1950's and its current growth is below the historical trend. Right now a favorable balance of trade for our technology-based industries exists only with the developing countries and with Canada.

Plainly, we are now playing catch-up ball with much of the rest of the world . . . under rules that favor the competition. In other advanced countries, industry can count on rewards for developing technology, with a wide variety of incentives designed to make their products more competitive in world trade.

But American companies face anti-trust laws that discourage long-range cooperative technical programs, tax disincentives, and export restrictions on technology-intensive products.

I wish there were some quick solutions to propose. But there is no quick fix.

Regulators must be made to assess broader economic implications of the regulations they propose. To what extent will increasing regulatory costs curtail business expansion? And if business activity is curtailed, what are the effects on inflation and unemployment? Such considerations would make it plain that regulation can work against the public interest as well as for it, and that we are obliged to understand the total impact of regulation before we regulate.

Only when government is fully aware of that impact will it really work to eliminate needless regulation. And only then will it appreciate the need to look to other public policy areas to balance the nation's economic interests with the interests served by regulation.

Tax policy is certainly one place to look for that balance.

But even commonsense tax measures are difficult for Congress to approve when so many of their constituents regard a vote for business as a vote against the public interest.

Unless that attitude can be changed in the months and years ahead, we will get only partial solutions to problems that will grow more serious for business and the nation.

How shall we proceed with the task of restoring public trust?

First, it seems to me that we need to accept valid criticism, change the conditions that brought it on, and make the public aware of the changes. Only when our standing improves will we be in a position to deflect the criticism that is undeserved. And much of it is.

The chemical industry is a case in point. Opinion surveys continue to show that the public rates us poorly with respect to environmental concerns. But our record offers a very different picture.

With few exceptions, chemical companies have met the July 1977 deadline for applying the best practicable technology to water pollution control. The job was a costly one. My company alone has spent some $95 million to bring us into complete compliance with the "best practicable" standards. When everyone meets that standard, including the 60 percent or so of municipalities that aren't there yet, we'll be well on the way to meeting the national goals for fishable, swimmable water in 1983.

I think we can show that business supports the nation's social goals. Moreover, we know that helping to reach them is not only right, but can provide opportunities for commercial development as well . . . .

We have a good story to tell about our commitment to social goals, and the role we have played and must be allowed to play if the nation is to reach them.

Let's communicate that to the public, and let's be more attentive to what it's telling us. What I hear is a growing public concern about business operations, and business products, particularly, although not exclusively, with regard to employee and consumer health and safety.

There is no mystery about addressing those concerns. The fears grow when the public feels ill-informed. They will subside when business is seen to be more open and candid.

Are we prepared to go all the way in spelling out what hazards may exist in handling certain materials in the workplace, rather than simply asking our employees to take it on faith that we know what they are and have provided adequate safeguards?

Are we prepared to deal as openly with the people who buy our products?

With the communities in which we operate our plants?

The penalties for doing anything less can be enormous. They are being assessed in the court of public opinion, in the form of punitive regulation that drives up the cost of doing business. And they are being assessed in courts of law, where juries are returning astonishing awards to injured plaintiffs.

We are not dealing with an irrational public, in my judgment. No one is asking that we make machines so safe they can't be started. Or pesticides so safe that they kill no insects. Or to idle our plants because there is some small risk involved when they're running.

So in the long run, if we want less regulation, we can take no more certain approach than to convince Americans that less is needed. Regulation is costing us billions. Some of that expenditure buys real benefits. But much of it buys few or none, and should more properly be funding new products and new ventures. Companies have begun to document the cost of regulation, and the figures are staggering. Dow Chemical, for example, reported that complying with federal regulation cost the company $186 million in 1976, up 25 percent from the year before. General Motors spent $943 million in 1975 to comply with government regulation, about $2,000 for each of the company's U.S. employees, and about $300 for every car GM sold in America.

That is a situation that simply must be turned around. It's in the public interest and in our interest. Because if we don't serve the public well, we can count on being coerced to serve it poorly.●

THERE IS NOTHING "REVERSE" ABOUT DISCRIMINATION

HON. JOHN M. ASHBROOK

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 22, 1978

● Mr. ASHBROOK. Mr. Speaker, like other liberals, President Carter refuses to believe that there can be such a thing as discrimination against white people. By using the term "reverse discrimination," leftists make it sound as if the only real discrimination is that practiced by whites against nonwhites. When Mr. Carter threw the force of his administration against Alan Bakke, its spokesmen say, it was not using the evil quota system against someone with a brown skin, which would be bad, but rather against a white, which is the essence of liberal morality.

The fact is that the policy of California in the Bakke case is racist. This California racism backed by Carter is no different from that which was advocated by the Governor of Georgia whom Mr. Carter succeeded in 1971. The only apparent difference, in fact, is that the Carter racism does not even give the pretense of affording Alan Bakke "separate but equal" treatment. Liberals state openly that they plan to hurt Mr. Bakke, and as many other young white people as possible, to make up for the alleged sins of earlier generations of white people.

Liberals have created a new "peculiar institution" in America. Our ancestors called slavery the "peculiar institution" because it existed in a country founded on and dedicated to the principles of freedom. It took the Civil War to get us to face the fact that slavery was not "peculiar." It was simply slavery. What about today's liberals, who use governmental force to back up racial quotas in the teeth of both laws and clear constitutional prohibitions to the contrary? What will it take before they recognize their racist practices for what they are?

Mr. Carter's is the first openly racist administration this country has had in over a century. There is nothing "peculiar" about Mr. Carter's personal order to his attorney general to support the racist university administration before the Supreme Court. It is not "reverse racism." It is not "peculiar racism." It is plain, old fashioned bigotry in action, aimed at picking up votes.

Bigotry always has an excuse. Whites excused discrimination by saying that, since white people founded and built the country, its benefits should accrue first to their race. Leftism racism excuses itself by insisting that we must make up for yesterday's evils by punishing white

people for them today and tomorrow. How long is this to go on? One hundred years from now it can be correctly alleged that blacks are descendants of those who were slaves in our earlier history. That crutch will be used by some forever. The only figure liberals give is "350 years of oppression and exploitation of black Americans." Does this mean that true equality of opportunity will be considered respectable in liberal circles a third of a millenium from now? This is, as I have said, the only solid figure I have seen them give.

Of course, Mr. Carter's racism is not actually motivated by a concern for past oppression. The reasons for Jimmy Carter's policy of racism are the same as those of Theodore Bilbo and Idi Amin: he has been given power and the groups he depends on for that power favor discrimination. Discrimination, consequently, is the administration's policy. Like Bilbo, like Amin, and like others of their kind down through history, the liberals will use their power to set race against race until that power is taken away from them by popular will. Hopefully, that time is soon.●

A PRESUMPTION OF DEATH

HON. BENJAMIN A. GILMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 22, 1978

● Mr. GILMAN. Mr. Speaker, the conflict in Vietnam has still not ended for the families of our MIA's.

The family of one serviceman, Lt. Cmdr. James B. Mills, still remains in the dark on his status, almost 12 years after his disappearance on a reconnaissance mission over Vietnam.

Most recently the U.S. Navy held a formal hearing over the issue of the presumption of Lieutenant Commander Mills' death on that fateful air patrol. I have consistently opposed the procedures by the Defense Department which would presumptively declare our missing in action dead, based on presumptive findings. A finding of death in this case, and in others, could be accomplished only upon presumed evidence. There is nothing in the record to show that this officer is deceased.

By declaring Lieutenant Commander Mills dead, based on hunches, guesswork, and probability, is extremely unfair to this flier and his family. We would, in fact, be denying him the due process of law.

I should also point out, under Navy regulations, the burden of proof of life and death falls hardest on the families of the men. The families of our missing do not have the means that the Government enjoys in proving the life or death status of these individuals.

The Government, I contend, cannot prove beyond a shadow of a doubt that Lieutenant Commander Mills is deceased, and because there remains a possibility that he is alive, I strongly urge the Secretary of the Navy to decline to declare Lieutenant Commander Mills and other MIA's as KIA, based upon presumptive evidence.●

HUMAN RIGHTS IN IRELAND PROCLAMATION SIGNED IN NEW YORK STATE

HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 22, 1978

● Mr. BIAGGI. Mr. Speaker, St. Patrick's Day 1978 took on special significance this year in the State of New York when Governor Carey signed a proclamation declaring it "Human Rights Day in Northern Ireland." This came following passage by the New York State Senate and Assembly of resolutions calling on the Governor to issue such a statement.

The significance of this proclamation rests in the fact that the issue of human rights in Ireland, once not even a point of discussion, has become a central concern of many Americans who support peace and justice in Ireland. New York joins a growing list of States and localties which have passed resolutions or proclamations condemning human rights violations in Ireland.

The charges of human rights violations and deprivations in Ireland are well documented. Yet the time is not for recriminations but rather rectification. There cannot be peace in Ireland while there are ongoing human rights violations. Respect for law and life are fundamental to English common law. Modern-day Britain must reaffirm this respect in their dealings in Ireland.

I commend the sponsors of the respective New York State Senate and Assembly resolutions. Senators Winikow and Flynn as well as Assemblymen Sullivan and Ryan. In an earlier statement I submitted the list of senate cosponsors I now wish to do the same with the assembly cosponsors.

LIST OF ASSEMBLY COSPONSORS

Assemblymen Boyland, Butler, Connor, Conners, Fink, Finneran, Goldstein, Gottfried, Graber, Greco, Griffith, Keane, Koppell, Lafayette, Marchiselli, McCabe, Orazio, Schumer, Tallon, Walsh, D. B., Walsh, S. P., and Yevoli.

I also commend the Governor for taking this important iniative. The issue of human rights has been of deep concern to the Irish-Americans community and this proclamation is of great significance to them.

The remain committed as chairman of the 103-member Ad Hoc Congressional Committee for Irish Affairs to congressional hearings on Ireland to focus on human rights and all other facets of the Irish question. We must work for peace and justice. I urge my colleagues to join me in this effort.

The New York State proclamation follows:

PROCLAMATION

The people of New York State have long joined with freedom-loving people the world over to condemn violations of human rights. New Yorkers have, for centuries, condemned the persecution and discrimination that have been such a large part of the sad history of Northern Ireland.

Recently the European Court of Human Rights denounced the maltreatment by Britain of prisoners in Northern Ireland, a condemnation we trust will end such outrageous abuses. Much still remains to be accomplished in securing basic human rights in Northern Ireland. Blatant inequities in employment, housing, religious tolerance, and political freedom still exist. The problem is complex and violence is not the answer.

Human rights can only be secured by groups and individuals who work through the rule of law with mutual respect. Appropriate action can be taken by reinstituting a democratic form of government and providing for a just sharing of power among the different communities in Northern Ireland. The persuasion of public opinion towards a just and peaceful settlement in that troubled land must include the reestablishment of fundamental civil rights.

Now, as the feast of Ireland's patron saint, St. Patrick, approaches, I once again condemn the pattern of oppression and violation of human rights. I call upon all New York citizens to add their voices to the millions who demand peace and justice in Northern Ireland now

THEREFORE, I, Hugh L. Carey, Governor of the State of New York, do hereby proclaim March 17, 1978, as "Human Rights Day in Northern Ireland" in New York State.

Given under my hand and the Privy Seal of the State at the Capitol in the City of Albany this fifteenth day of March in the year of our Lord one thousand nine hundred and seventy-eight.

HUGH L. CAREY,
Governor.

BYELORUSSIAN INDEPENDENCE DAY

HON. THOMAS P. O'NEILL, JR.

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 22, 1978

● Mr. O'NEILL. Mr. Speaker, on March 25, 1918, people of Byelorussia in declaring their freedom from the tyrannical Czarist rule exercised the principle of self-determination for national independence and sovereignty as set forth by President Woodrow Wilson. Within a year their expression of the human cry to be free and to determine one's own destiny was suppressed by the oppressive rule of the Bolsheviks. Although 60 years have passed since the people of Byelorussia made their attempt to be a free and separate nation, their spirit for freedom has not waned. The glow of this spirit still shines brilliantly as a hopeful beacon to all other captive nations throughout the world.

On this anniversary date of Byelorussian's remarkable demonstration for freedom and her people's unrelenting desire to be a sovereign nation, I would like to join with my distinguished colleagues to commemorate Byelorussian cultural and historical achievements, both in their motherland and in the rest of the world.

In the continuous and universal quest of all people for liberty and justice, we are fortunate to have a President who champions the cause of human rights throughout the world. Thus, it is appropriate on March 25, 1978, to pause not only to reassure the people of Byelorussia and Americans of Byelorussian descent of our resolute suport but also to remind all people of the free world we must maintain a constant vigil until that day when all people will be free to decide their own political destiny.●

RURAL STUDY NEEDED

HON. JAMES ABDNOR

OF SOUTH DAKOTA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 22, 1978

● Mr. ABDNOR. Mr. Speaker, on Monday it was my privilege to join my colleague, the Honorable CLAUDE PEPPER, and other members of the House Select Committee on Aging in testifying before the Select Subcommittee on Education of the House Education and Labor Committee.

The Select Committee on Aging was making its recommendations for improvements to the Older Americans Act which this Congress will be called upon to reauthorize this spring.

Some of those recommendations resulted from a hearing the Aging Committee held in my home district in South Dakota last December. Of particular interest to South Dakota, and indeed to all of truly rural America, is a recommendation calling for a study of the needs of the elderly who live in our Nation's wide open spaces.

My testimony follows:

STATEMENT OF REPRESENTATIVE JAMES ABDNOR

Mr. Chairman. Thank you for the opportunity to appear before your committee today.

I do not need to tell this committee of the growing importance of the Older Americans Act since it was first enacted in 1965. If the Act had not already proved its worth in the 13 years it has been in operation, we would not be here today. The main question before the committee is not reauthorization, but improvement of the Older Americans Act.

While programs under the Older Americans Act have been quite successful in fulfilling objectives set out by Congress, there are some areas where it has not been as effective as it can or should be.

Mr. Chairman, in the Select Committee on Aging's oversight of the Older Americans Act, it has become abundantly clear that the programs have had their best results in metropolitan areas. It also is quite clear that while the programs are functioning in rural America, their successes were achieved under many handicaps and are largely due to the determination and versatility of the rural elderly who are involved.

In both the manner in which the programs have been designed and in the manner in which they are administered, there is a wholesome lack of rural perspective. This can be expected, considering the urban makeup of the Congress. Even on the Select Committee on Aging, nearly a third of our membership comes from the predominantly urban states of New York, New Jersey, and Pennsylvania.

Urban domination, however, does not negate rural qualification or need for these programs. The Older Americans Act was written for all the nation's elderly, not just those whom it is easiest to reach and to serve.

Metropolitan domination is not the only factor at work. As I have repeatedly pointed out to the Aging Committee, where many national policies are concerned "rural" means any community of 50,000 persons or less, regardless of location. In South Dakota, 50,000 people represents our second largest city, and the largest city located in my 46-county Congressional district.

When I speak of a wholesale absence of rural perspective I speak from a viewpoint which is "truly rural."

"Truly rural" America is something we know very little about. It is very easy to overlook.

Yet "truly rural" America has unique problems—not the least of which are a disproportionate share of the nation's substandard housing inadequate health care thanks to a severe shortage of physicians and other health care personnel, and very limited public transportation with which to cover the great distances.

As one of the few representatives from "truly rural" America on the Aging Committee, it is my responsibility to speak to the problems of the truly rural elderly who are trying to work with the programs of the Older Americans Act.

To ensure "truly rural" input into our oversight of OAA, I asked that one of the Aging Committee's hearings be scheduled in my district of South Dakota. In the years I have served in Congress my office has become well acquainted with the experiences South Dakota has had in working with OAA. In many instances our people have made the programs successful despite OAA program restrictions. I felt our experiences were comparable to those of other "truly rural" states,

Chairman Pepper graciously agreed to my request.

The hearing in Huron, South Dakota, December 9, 1977, demonstrated not only some problems with existing provisions of the Older Americans Act but also some fine opportunities for more effective programs should the provisions be amended.

Since that time we have sought means to remedy the problems and take advantage of the opportunities.

We started looking for hard data to justify a weighted formula—a rural factor, if you will—which, when added to other information, would take into account distance, population density and other qualities found only in "truly rural" America. This factor would recognize the needs of older people living in widely separated small towns.

What we have found—more than anything else—is that we really don't know very much about "truly rural" Amerca.

To be sure, we have some general statistics: about seven million people 65 years and over live in rural America mostly in nonfarm communities. Over half the substandard housing is located in non-metropolitan areas and a third of these are occupied by older persons. Rural people aged 65 years and older comprise 31% of the nation's elderly, but they account for 44% of the elderly who are considered poor.

General data on population, housing, health, etc., is there.

What is almost totally lacking, however, is the hard data needed for specific recommendations. Not only is it lacking, there has been a singular lack of response to past and current efforts to obtain this data.

Thus, we have the recommendation for a rural study. We need to delineate rural needs and costs; to determine the severity of inflation, service access and delivery problems, the energy crisis and other factors affecting the elderly living in truly rural America.

Mr. Chairman, the Select Committee on Aging includes the following among its recommendations:

We recommend, therefore, that the Administration on Aging, under title IV research and development projects, undertake a comprehensive study of the plight of America's rural elderly:

(1) To determine the needs of rural elderly with special attention given to housing, health, income, transportation and employment;

(2) to determine the problems of service access and delivery for those rural elderly at risk;

(3) to determine the unit cost of service differential between services delivered in a rural area vs. those in an urban area.

We recommend further that the Administration on Aging, under title III model projects, contract with at least two rural States to design a comprehensive service system for the rural elderly, including utilization of approaches, methods and techniques especially suited to rural areas, and the AoA disseminate to the relevant States through the National Information and Resource Clearinghouse for the Aging information related to comprehensive rural service delivery systems.

Mr. Chairman, if we are to make the Older Americans Act function effectively in "truly rural" America it is urgent we obtain the hard data we need.

With other members of the House Select Committee on Aging, I urge inclusion of this study in your reauthorization of the Older Americans Act.

Thank you.●

TRIBUTE TO AMBASSADOR ARTHUR GOLDBERG

HON. WILLIAM S. BROOMFIELD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 22, 1978

● Mr. BROOMFIELD. Mr. Speaker, today I would like to commend a distinguished American, Ambassador Arthur J. Goldberg, for his courageous leadership in behalf of human rights and humanitarian issues at the recently concluded Belgrade Conference on Security and Cooperation in Europe.

Our country is extremely fortunate to have a man of his caliber serve as head of the U.S. delegation to the Belgrade Conference, and I was especially pleased when President Carter announced his appointment. This well-known American, a former Supreme Court Justice and Ambassador to the United Nations, is among our most famous civil libertarians. It was, in fact, my pleasure to serve with him and Congressman L. H. FOUNTAIN as delegates to the 22d General Assembly of the United Nations. Throughout his illustrious career, Mr. Goldberg, to say the very least, has been most sensitive to the issue of individual human rights.

As for individual rights, Belgrade was the first multilateral meeting at which cases of individual human rights violations had been raised. Under Ambassador Goldberg's leadership, the U.S. delegation established that individual human rights are a legitimate matter of inquiry—an inquiry relevant to the implementation of the Helsinki Declaration.

From Belgrade's beginning to end, Ambassador Goldberg emphasized the importance of the implementation of all aspects of the accords and repeatedly called attention to the lack of compliance of the Soviet Union and certain other signatories in relation to human rights. Throughout the conference, Mr. Goldberg delivered sweeping indictments of East European failures to live up to the pledges on human rights made several years ago at Helsinki. In particular, Mr. Goldberg condemned the practice of imprisoning or exiling persons for making their thoughts known as well as restrictions on the right of individuals to travel or emigrate.

Despite the strong warnings by Mr. Goldberg and the West, however, the Soviet Union continues to disregard the outcries for human rights and proceeds to efficiently silence dissent. The Soviets, for example, have arrested and exiled many members of a citizens' group formed to monitor Soviet compliance with the human rights provisions of the Helsinki agreement. These arrests, as well as exiles, have become indicative of the continued Communist harassment of dissidents and in particular, the persistent Soviet repression of stubborn opposition to "Russification".

More recently, the illusion of individual freedom was dramatically broken when the Soviet Union labeled Rostropovich, director of our National Symphony, as an idealogical degenerate and stripped him of his citizenship. For people like Rostropovich, it was simply one more in a series of blows to those who have dedicated themselves to freedom and individual rights. In March alone, of this year, the Soviet Union banished Rostropovich, Pyotr Grigorenko, a Red Army major in the United States for medical treatment and Galina Vishnevskaya, the famous soprano and wife of Rostropovich. Moreover, the Soviets have continued to boast about their so-called success in thwarting Western efforts to raise substantive questions at Belgrade.

Despite these setbacks, however, Mr. Goldberg has nevertheless been a persistent leader—a forthright spokesman—the kind of spokesman we need who will hold out hope for human rights and insist upon Soviet compliance to the Helsinki accords. Arthur Goldberg is an American leader who has the United States squarely speaking out for human rights.

In his final speech at the European Security Conference, Ambassador Goldberg deplored the lack of agreement on new confidence-building measures to improve East-West relations stating that:

Efforts to squelch the truth at Belgrade or at home will not change the truth. And they will not deflect the United States from insisting that candor is as important to the healthy development of international confidence as is respect for sovereign equality and individuality.

Arthur Goldberg is indeed an individual concerned about other individuals—a true confidence builder—for all people throughout our world.●

INVESTMENTS OVERSEAS AND UNEMPLOYMENT AT HOME

HON. DANIEL K. AKAKA

OF HAWAII

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 22, 1978

● Mr. AKAKA. Mr. Speaker, I recently had the pleasure of listening to Mr. William H. Ryan, legislative director of the International Association of Machinists and Aerospace Workers, address the Hawaii Federal Lodge No. 1998 at their installation of officers luau.

I was singularly impressed by his remarks, because they address the problem of unemployment from the perspective of foreign investment. In this Congress, we have devoted a great deal of legislative energy to seeking solutions for unemployment, and I feel that Mr. Ryan's remarks highlight an area that we are not always cognizant of. While the expansion of business must certainly be encouraged, it should not do so at the expense of the American worker.

I urge my colleagues to consider Mr. Ryan's views and insert his statement at this point in the RECORD:

INVESTMENTS OVERSEAS AND UNEMPLOYMENT AT HOME

I welcome this opportunity to meet with you today because I mean to use it to tell you how workingmen and women many who are our members are faring under this nation's trade, tariff, tax and foreign investment policies. The news I bring is not good. So far as the working people of America are concerned their jobs (and thus their stake in the private enterprise system) are being destroyed by policies of unrestricted overseas investment and trade. Though these policies are deeply embedded in both tradition and law, they are slowly but surely transforming the United States from a highly developed to an industrially underdeveloped nation.

If you think this is an overstatement, let me refer you to a definitive study of multinational corporations which was written a couple of years ago and which is entitled "Global Reach." In it the authors, Ron Muller and Richard Barnet, defined an underdeveloped country as "one that exports raw materials to maintain its balance of payments while it imports finished goods to maintain its standard of living."

That is a good description of what's happening to the United States. The 200 largest corporations that control two-thirds of this nation's productive capacity have been steadily transferring production and jobs to low-wage areas of the world. And because of unthinking acceptance and reverence for the economic dogmas of 19th century economists, our government has done absolutely nothing to prevent this internal subversion of the nation's industrial base. In fact, it has done just the opposite.

The wholesale export of American jobs and technology has been actively encouraged by tax, trade, tariff and investment policies that make it more profitable for a U.S. company to operate in Indonesia than in Illinois.

As a result, the United States must not export its grain, cotton, timber, wool, coal and other raw materials in order to pay for cameras, TV sets, radios, tools, shoes, clothing, glassware, textiles, typewriters and a host of other finished products. Between 1960 and 1970, the annual rate at which American capital was invested overseas rose by 400%. And this outflow continues. While the business community demands new and bigger investment tax breaks to encourage capital expansion, last year U.S. companies made 25% of their total capital investments overseas.

This investment is not only being made in places like Taiwan, Hong Kong, Malaysia, Singapore, Haiti and the Dominican Republic. After 30 years of cold war, during which American workers were conditioned to view communism as the devil incarnate, American corporations are now rushing to build factories, complete with advanced American technology, behind the Iron Curtain. American capitalists can hardly wait to get at all that good, cheap, state-controlled Communist labor.

These corporations that are destroying America's industrial base, by closing down factories here and opening them overseas—include some of America's largest employers and defense contractors.

They include American Can, Chrysler, Firestone, General Foods, Honeywell, IT&T, Singer, Union Carbide, Warner-Lambert, General Electric and Westinghouse.

To visit one of America's major centers of industrial production, you no longer have to confine your travels to the United States. You can go to Taiwan and find American-owned firms producing pharmaceuticals, electrical equipment, textiles, toys, chemicals, machinery, food, clothing and scores of other products for American markets. Even a partial list of the companies that have gone to this dictator-controlled island, in order to exploit women and children with 30 cents an hour wages and 12-hour workdays, reads like a who's who of American industry. It includes such good old American brands names as Admiral, Bendix, RCA, Arrow Shirts, Mattel Toys, Dow Chemical, Dupont and Singer.

Anyone who doubts the connection between the export of capital and the export of jobs need only look at the extent to which the electronics work force has been decimated in recent years.

Zenith is only the latest to give up on an attempt to compete against foreign, low-wage imports. Zenith was the last of the U.S.-based TV manufacturers, and I give them a lot of credit for trying. The Machinists Union represents many of the thousands of workers whose jobs are now going to be exported. And Zenith made it clear to us that they were not leaving because of any lack of productivity and workmanship. They found they simply could not compete against companies taking full advantage of every tax, tariff, trade and investment incentive that our Government gives corporations who produce overseas for resale back into American markets. Zenith can save itself by leaving. As every economist knows capital is mobile but labor is not. Thus thousands of skilled workers in Sioux City, Chicago, Philadelphia and elsewhere will be reduced from economic assets to social liabilities.

Unfortunately the electronics industry is only the tip of a very large iceberg. Between 1962 and 1970, the ratio of exports to imports in rubber manufacturing went from a 100% surplus to a 10% deficit. In the apparel industry, the ratio of imports to sales has doubled in recent years. In one four-year period, from 1969 to 1973, a $22 billion rise in manufactured imports caused a direct decline of 346,000 jobs in U.S. factories.

Today 20% of all cars, 40% of all glassware, 60% of all sewing machines, calculators and cassettes, 95% of all radios and a high proportion of shoes, clothing and other manufactured goods sold in the United States are produced abroad, mostly by American-owned factories.

Unrestricted overseas investment is not only eroding the jobs of American workers but their rights under the law of the land. Specifically, I am referring to the right to bargain collectively.

American workers gained this right over forty-two years ago when Congress recognized that the best way to give workers a stake in the free enterprise system was to establish a mechanism through which they could negotiate a fair share of the wealth produced by their labor. U.S.-based multinationals are systematically destroying that stake by exporting the jobs that workers need to support their families.

A further effect of unrestricted overseas investment is the draining away of the nation's technology for the greater profit of a relatively small number of multinational corporations.

Some years back the government solicited organized labors support for trade policies which would make it even easier for other countries to sell in the United States. I might say, incidentally, that ever since the end of World War II we have had the most liberal trade policies in the world. But this liberality has not been reciprocated. Other-

countries seem to be able to erect all kinds of barriers against our products. When workers questioned further liberalization, they were assured that American labor would not be undercut by cheap labor because of our long lead in technology.

A fact to note about this technology, which is now being sold out from under us, is that it results from research and education which are mainly supported by the taxes of the American people. Between two-thirds and three-fourths of all basic research and development is publicly funded. The engineers, scientists, craftsmen and other personnel that industry needs are all trained at public expense. What I am saying, in essence, is that America's technology has really been bought and paid for by the Tax dollars of the American people. That includes the working people. Therefore, this technology really belongs to all of us. But multinational corporations have expropriated it to themselves and have been exporting it as fast as its been developed. Moreover, in their pursuit of the fast buck, they've been selling off our technology at fire sale prices. During the 1960's Japan alone got $10 billion worth of America's industrial know-how, including advanced steel-making and aerospace technology, for which they paid only $1 billion. For 10 cents on the dollar, they got one of the greatest bargains in history.

When we go to Congress to protest corporate exploitation and profiteering on resources that properly belongs to all of us, the experts come in from the other side and piously proclaim that there must always be a free flow of technology between nations. Unfortunately, during the debate on the latest trade bill passed in 1974. Congress bought this free flow of technology argument. In rejecting the Burke-Hartke bill, which labor supported, they left multi-national corporations free to loot the nation's technological resources.

Some day our government may wake up and realize that technology is a commodity of commercial value with an investment cost that can be measured, a dollar value that can be computed and a clear market value for those who possess it. I agree that everyone benefits from the free flow of technology. Everybody would also benefit if Saudi Arabia gave away its oil and Japan gave away transistor radios. But the fact is they don't. Those who denounce labor for suggesting that the U.S. Government has a responsibility to its own work force conveniently overlook the fact that in other nations, whether industrialized or underdeveloped, the first priority of economic policy is the protection and maintenance of job opportunities for their own work force.

In the 1974 trade legislation, Congress not only refused to consider even minimal safeguards against further export of technology and investment, but, at the urging of the business community, made it even easier and more attractive for American firms to move overseas. They did this by setting lower tariffs on goods produced in underdeveloped countries. This is, of course, and open invitation to American corporations to go to these underdeveloped countries and produce solely for sale in U.S. markets. Because so many are accepting this invitation, city after city in the United States are becoming littered with empty factories.

To the extent that overseas investment generates unemployment at home, it also contributes to the skyrocketing costs of social welfare. Because Americans cannot get jobs we are spending $40 billion a year for public assistance and $20 billion a year for unemployment benefits. If national policies were designed to discourage, rather than encourage the export of technology, capital investment and jobs. Americans would be cashing more paychecks and fewer welfare checks.

By creating high levels of unemployment here at home, multinational corporations have harmed America in still another way. Sociological studies in areas of high unemployment show that the rising tide of joblessness has been paralleled by rising levels of violence, family breakups, child abuse, crime, alcoholism and suicide.

Many of the problems that afflict our society have been caused or aggravated by companies that take every advantage America has to offer but which no longer identify themselves with America's future. A few years ago, a Vice President of the Ford Motor Company stated, and I quote, "We . . . look at a world map without any boundaries. We don't consider ourselves basically an American company. We are a multinational company." If the Ford Motor Company doesn't consider itself American, who does? Certainly not the President of the Motorola Corporation when he was asked why he was abandoning plants in the United States while opening them in South Korea. He said, and again I quote, "We can train Korean girls to do the same job as American workers. They are hungrier and more motivated. They will work harder for less."

Of course these hungry Korean girls can't afford to buy the products they are making. Those products are aimed straight at the American market. Forgotten is the fact that as more and more jobs are exported, fewer and fewer consumers will be left to buy Motorolas or Fords or anything else in the United States. You simply can't go on milking a cow indefinitely without feeding it.

But instead of recognizing this elementary fact of economic life most of our political, business and academic leaders seem to believe that the fault lies not in our trade, tax, tariff and foreign investment policies but in our work force.

Fortunately a few Congressmen, especially in areas that have been hardest hit, are beginning to question the validity of 19th century economic doctrines in a 20th century world.

One of these is Congressman Joseph Gaydos of Pennsylvania. As he so aptly pointed out in a speech to the House of Representatives, "The unschooled girls of Taiwan can do just as well assembling complex TV components as the high school graduates of New Jersey. The untrained workers of Africa and Asia can be taught to produce complex products ranging from tiny transistors to giant turbines, as readily as the skilled workers of Pennsylvania and the West Coast. The depressed inhabitants of the most squalid slums of the Far East can be taught to make specialty steel products just as well as the experienced workers of Pittsburgh."

The point is we are no longer talking about unskilled jobs in low wage industries. We may have started out by exporting the jobs of shoe, textile, leather and electronic workers. But now we are losing out in high technology industries. I can best illustrate the point by describing an example that directly affects members of our union. We happen to be the largest union of aerospace workers in the world. In addition to those employed in the manufacture of the big commercial and military planes, thousands of our members produce light aircraft for companies like Beech, Cessna and Piper. For many years Brazil was the number one importer of these light planes. But then, some years ago, the Brazilian Government decided to create more jobs for their own work force by developing their own light aircraft industry. They did this in two steps. First they levied prohibitive taxes on the importation of light planes. Second, since they had no light aircraft industry of their own, they invited an American manufacturer, Piper, to come down there and produce with Brazilian workers. As a result Brazil is not only taking care of its own markets, with the help of American capital and technology, but is now taking over traditionally American markets throughout the rest of South America. And to add insult to injury they are even selling Brazilian-made planes back into the United States.

While more Brazilians now have jobs, more Americans have joined the ranks of the unemployed. We can chalk up one more casualty to our government's devotion to 19th century doctrines of free trade. We contend there is nothing free about trade when other countries close their markets to us, import our industry, and then demand open access to our markets. There is nothing free about trade in which Brazil can sell planes to us. But we cannot sell planes to Brazil.

The proponents of our free and easy trade, tax, tariff and investment policies admit that while these policies may hurt workers, they benefit consumers. And this is one of the biggest fallacies of all. In the first place workers are consumers. But more significantly, the lower cost of foreign production are not necessarily reflected in the market place. They are more likely to be diverted into bigger profits for the manufacturers and middlemen. A few years ago, for example, the Washington Post carried a report on two pairs of shoes. They were identical in every way except that one pair was made in Italy and one pair in Mississippi. The labor cost of the Italian shoes was less than half that of the Mississippi shoes. And God knows in Mississippi wages are low enough. But in the stores, the retail price was exactly the same. Since the difference went to higher profit margins, the wholesalers and retailers quite naturally pushed the Italian-made shoes over the American-made brand.

The proponents of our present policies also claim that when American workers are hurt, the answer is not to restrict overseas investment, but to compensate such workers with what they call "adjustment assistance." This is a form of supplemental unemployment benefits which neither adjusts nor assists. After this concept was adopted, in the early 1960's, we took cases to the Tariff Commission. But it took us seven years to finally get them to agree that a group of our members had lost their jobs not because of an act of God but because of an act of Congress. Our experience since then has convinced us that adjustment assistance is one of the biggest frauds ever perpetrated on the American work force.

Finally, the advocates of unrestrained overseas investment say it really doesn't matter if we lose our manufacturing base because we'll become what economists call a "rentier" economy. That means most people will live off overseas investments while the rest go into service trades. Quite frankly, it's my opinion that anyone who believes this also believes in the "tooth fairy." The fact is that 60% of all corporate stocks and virtually all corporate bonds are owned by a small and wealthy elite consisting of no more than 4.4% of the population.

That 4.4% can live off investments. But the rest of us have to work for a living. And because we do, policies that make it more profitable for U.S. firms to operate in Malaysia than in Maryland, can only end in tragedy for the work force and thus for the Nation.

We are already well down a perilous path. Chronic unemployment has been growing decade by decade. In the 1950's anything over a 4% rate of joblessness was considered unacceptable. By the end of the 1960's it was 5%. For the past few years it has been ranging between 7 and 8% and there are signs it is going to get worse.

In demanding that this Nation's trade, tariff, tax and investment policies be brought in line with economic realities, the labor movement is not seeking a retreat to economic isolationism. We only ask that we be allowed to play by the same rules that others have adopted. If other countries want to sell to us, that's fine. But they should be willing to let us sell to them. If American corporations want to go to Taiwan and

South Korea, fine. But they should not be allowed to take advantage of incentives that have been set up to help so-called underdeveloped nations. They should not be permitted to take out technology, largely developed at the expense of American taxpayers, out of the country and then use it to beat the American work force into poverty. As long as a shortage of investment capital exists in the U.S., they should not be permitted to make 25% of all their new investments overseas.

In conclusion let me say that perhaps none of you are included in that fortunate 4.4% who can live off their investments. But if so, you may think you don't have to worry about what happens to the American work force, at least not until the overseas holdings of American companies are expropriated. But let me suggest that you look around at the rest of the world. Look at those countries in which a fortunate few at the top live in the lap of luxury while the overwhelming majority suffer the squalor of horrendous poverty. These are the countries in which the long term outlook for investment is most unfavorable. These are the countries in which terrorism and communism can barely be held at bay by even the most brutal repression. A nation cannot build nor maintain a stable society upon a foundation of "trickle down" economics. Prosperity must begin with that overwhelming majority that works for wages. To sum it up investors cannot prosper unless America prospers. And America cannot prosper unless working people prosper.●

DOT EMBRACES RACIST QUOTA SYSTEM

HON. JOHN M. ASHBROOK

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 22, 1978

● Mr. ASHBROOK. Mr. Speaker, I was disturbed to read that the U.S. Department of Transportation has embraced a racist quota system in awarding Government contracts. Although Secretary of Transportation Brock Adams refused to specify any percentage, one DOT official suggested that, as a goal, 15 percent of its contracts would be set aside for minority business firms.

According to the Washington Star—

Each agency will have to maintain mailing lists that identify minority business firms and will be required to screen all outside procurements for possible awards to minority firms through a form of bidding under which only minority enterprises would be allowed to submit bids.

It is ridiculous for DOT to reserve 15 percent of its contracts which only minority enterprises can bid upon. This is unfair to all the other contractors who are excluded from the bidding process. Why should a contractor be denied the opportunity to bid competitively on a Government contract simply because of the color of his skin?

Such a procedure is also unfair to the taxpayers of our Nation. Since as much as 15 percent of the contracts will not be open to normal competitive bidding, more tax dollars will be needed to pay for DOT projects.

Following is the article on this subject which appeared in the March 6 Washington Star:

ADAMS ORDERS DOT EFFORT ON MINORITY CONTRACTORS

(By Stephen M. Aug)

Secretary of Transportation Brock Adams today ordered the Department of Transportation to set aside an unspecified percentage of contracts for minority business firms.

Although Adams declined to set any absolute percentages, one DOT official, Kenneth E. Bolton, suggested the goal would be 15 percent.

Bolton is director of the Minority Business Resource Center, a section of the Federal Railroad Administration which was created under federal law to help minority businesses participate in a $6.4 billion federally funded program to improve the nation's railroads.

DOT during the current year has about $1.3 billion that it expects to use on outside contracts. One DOT official said it is difficult to set a percentage of this to go to minority businessmen because in some instances the contracts would be very large and no guarantees could be given as to how much a subcontractor might set aside for minorities.

He pointed out that the Coast Guard, for example, is expected to order $190 million worth of helicopters this year, and the contract would go to a single firm. Just how much of that business the helicopter manufacturer could or would set aside for minority business firms is difficult to calculate, he suggested.

Adams' order, issued today, requires the head of each of DOT's operating administrations—such as the Federal Aviation Administration, Federal Highway Administration, and Coast Guard—to establish an annual goal for minority businesses in its direct contracting. The goal would be expressed as a percentage of the operating administration's contracting dollars.

Further, each agency will have to maintain mailing lists that identify minority business firms and will be required to screen all outside procurements for possible awards to minority firms through a form of bidding under which only minority enterprises would be allowed to submit bids.●

Q. AND A.: AID TO NEW YORK

HON. BENJAMIN S. ROSENTHAL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 22, 1978

● Mr. ROSENTHAL. Mr. Speaker, as the time for decision nears on aid to New York City, it is particularly important to have access to the views of all the parties involved. The judgments that this body must make will be difficult enough without having to penetrate the clouds of misinformation.

For this reason, I am inserting in the RECORD today an important series of questions and answers which should serve to introduce the principal issues which confront Congress in considering extension of aid to New York City:

1. Why does the City of New York need a long-term guarantee of its bonds?

The guarantee is needed because the City does not have access to the public credit markets, as was demonstrated by the failure of the Note Offering in November and reinforced by the difficulties encountered by the Municipal Assistance Corporation issue in January. For that reason, the City cannot obtain short-term funds or long-term capital from private sources. Even an extension of the Seasonal Financing Act will not enable the City to secure the long-term capital necessary to renovate the physical plant because lenders do not have confidence in the City's ability to meet its financing obligations.

2. Aren't there more than enough funds within New York to meet the City's financial needs?

While there are more than ample financial resources within the City, the ability to lend and the willingness to lend are unfortunately not the same thing. Lenders lack confidence in the City's ability to repay—they think the risk is too high. To reduce the risk to a level that even the most prudent fiduciary can accept, the City requested Federal guarantees of its bonds.

3. What will be the cost to the Government?

It is expected that the guarantee will, like the Seasonal Financing Act, produce a profit for the Treasury. The profit will come from the guarantee fee the City is offering to pay the Federal government. While the size of the profit will depend on the level of the fee and the amount of bonds guaranteed, the Federal Government will have made over forty million dollars from the Seasonal Loan Act by June 30, 1978 as a result of the premium the City has paid for this facility over the Government's interest cost.

4. What has New York City done to justify the guarantee?

The City has taken the following actions to justify a Federal guarantee of its securities:

A reduction in the work force by 21%, or 61,000 positions, since 1975;

The imposition of tuition at City University;

The reduction of the welfare rolls to the lowest level in eight years;

A 40% increase in the subway fare;

A reduction in fringe benefits for City employees by $41 million;

The closing of 25 fire companies;

The elimination of 77 day care centers;

The retention of independent accountants to audit City's financial statements;

The imposition of a new financial management and control system; and

Perhaps most important, the prospect of a balanced budget for the current fiscal year, ending June 30.

In addition, during the four year period, the City will take the following actions:

A further reduction in the municipal work force through attrition—4% in fiscal 1979, 3% in 1980, 2% in 1981 and 1 percent in 1982 for a total employment drop of 10% or nearly 20,000 employees;

A cost control program in materials and supplies that will force a decline in real purchases of 12% over the four year period;

Management improvements based on audits compiled by the City Comptroller;

Changes in health service delivery; and

The elimination of unnecessary programs.

5. What has the State done to help the City?

As Secretary Blumenthal said in his testimony, New York State has taken major steps to help. It now advances $800 million annually to finance seasonal short-time needs. It funds 75% of the costs of the City University senior colleges. It is assuming responsibility for funding the City's courts. It established the Emergency Financial Control Board to oversee the City's budgets and borrowings. Most recently, Governor Carey has stated his willingness to provide the City with $200 million in additional aid in fiscal 1979 to help the City balance its budget.

6. Why can't the State guarantee the City's bonds?

The State of New York is constitutionally prohibited from lending its credit in this way.

7. Why has the State proposed a $700 million tax cut if the City needs more help?

The tax cut is designed to stimulate eco-

nomic activity within the State. In the past, businesses left the State because of the heavy tax burden but it is believed that the tax cut will stop or at least reduce the overflow. To the extent this happens, it will benefit the City. However, Mayor Koch has said that if the State cannot provide the City with enough funds to balance its budget from other sources, the tax cut should be reduced.

8. What has the Federal Government proposed?

On March 1, Secretary of the Treasury Blumenthal testified before the Moorhead Committee and in his testimony he called for the Federal Government to guarantee up to $2 billion of City bonds to be sold to City and State pension funds. The guarantee would last for up to fifteen years, with the length to be determined by the Secretary. As a condition of the guarantee, the City would have to secure additional commitments for $2 billion from private sources and it would have to make its "best efforts" to sell its bonds in the public market. In addition, the City would have to accept continuation of outside review of its finances.

9. Does the Secretary's proposal address the City's seasonal financing needs?

In his testimony, the Secretary said that he believed that with the long-term guarantee in place the City would be able to meet its seasonal needs from other sources. These sources include: City and MAC public note sales, a bank line of credit, the pension funds and the State of New York. While the City hopes to be able to meet its short-term needs from these sources, it believes that it would be more prudent if the Federal Government provided a seasonal back-up.

10. Will the City accept continuation of outside review of its finances?

In his campaign, Mayor Koch called for continuation of outside review. The Administration is currently working on a proposal that it will submit to the Federal Government and the financial institutions.

11. Why does the City need a guarantee in view of its cash surplus?

Because the fiscal 1977 deficit was lower than expected and because it has been spending at a slower rate than projected this year, the City has excess cash. However, the City still expects to need outside funds early in the next fiscal year as a result of the imbalance between its spending and revenue patterns. To the extent that the City continues to generate more cash than anticipated, the outside need for seasonal financing will be reduced but the City will still need to borrow nearly $300 million in July. Unless the City has outside financing assistance, it will probably not be able to obtain these funds in view of the failure of the November Note Offering.

12. When will the City obtain a truly balanced budget?

As mentioned, the City has taken many steps to obtain an equilibrium between its revenues and its expenses and it expects to have a balanced budget in the current fiscal year on the basis of the Municipal Assistance Corporation legislation. As outlined in the Four Year Financial Plan submitted to the Secretary of the Treasury on January 20, the City expects to have a budget balanced in accordance with generally accepted accounting principles in fiscal 1982.

13. Won't a high labor contract make a balanced budget difficult to achieve?

The Mayor has, like the Secretary of the Treasury, said that any wage increases must come out of productivity and other savings so that there is no additional cost to the City.

14. In 1975, the City said the Seasonal Financing Act would be the only financing help it needed from the Federal Government. Are there any assurances that the guarantee program is the last Federal financing help the City needs?

In 1975, City and State officials believed that the Seasonal Financing Act would be sufficient to enable the City to balance its budget in accordance with the MAC Act and thereby regain access to the credit markets. Although the City expects such a balanced budget for the fiscal year ending June 30, 1978, the market problems were more severe than anyone realized and the City has not been able to sell its securities publicly, as seen in the failure of its Note Offering in November. In addition, the seasonal facility did not enable the City to make the capital improvements necessary to attain long-term vitality. Without that vitality, investors lack assurance that the balance between revenues and expenses can be maintained. While no one can predict the future with certainty, City officials believe that a continuation of the seasonal program combined with a long-term guarantee will give the City time to achieve a record of balanced budgets while reducing past financing pressures so that it can enter the market on its own strength at the expiration of the proposed program four years from now.●

INFLATION: THE WORST IS YET TO COME

HON. JAMES J. BLANCHARD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 22, 1978

● Mr. BLANCHARD. Mr. Speaker, last fall when the House of Representatives debated renewing the existence of the Council on Wage and Price Stability, a large number of Representatives and private organizations argued that the agency was not needed. I argued on this floor that the Council was the only Federal agency which could objectively monitor inflation and its multitude of causes. I also pointed out that this function was needed, especially in view of the fact that so many people and their Representatives here in Congress would prefer the easy road of finding some convenient scapegoat for inflation, rather than having to face the reality of the numerous causes of inflation.

I suspect this attitude is precisely why the Carter administration finds it difficult to discuss inflation or develop a comprehensive plan for dealing with this difficult and persistent issue. Too many groups and interests, including the Congress, want to avoid whatever scrutiny they may receive if the Government zeros in on a specific anti-inflation proposal.

In this context, I think a recent column by Hobart Rowen in the Washington Post should be called to the attention of my colleagues. This March 16 item reads as follows:

INFLATION: THE WORST IS YET TO COME

"Inflation," says the nation's chief wage-price watchdog, Barry Bosworth, "just will not take care of itself." That may prove a fitting epitaph to the Carter administration's moribund anti-inflation program.

If there is a single dramatic failure of the Carter administration so far, it has been its inability to grapple with rising prices. Perhaps more than anything else—more than the absence of a believable energy program—Carter's lackluster leadership on the anti-inflation front has been responsible for the tumbling U.S. dollar.

At the final pre-Inaugural meeting of his economic advisers in Plains, Ga., in December 1976, Carter may have given away the ball game by abandoning the notion of anything as mild as voluntary wage-price guideposts. The paranoiac fear, then, was that even a gentle hand to moderate wage and price increases would shatter "business confidence."

Bert Lance was ruling the roost at that time, espousing the philosophy "If it ain't broke, don't fix it." Even liberal economic adviser Charles L. Schultze thought the economy could be pushed forward for a year or so without rekindling inflation.

Bosworth, frustrated by an endless list of Carter administration actions actually boosting inflation, has presented his colleagues with a shopping list of actions the government itself could take to curb inflation.

Treasury Secretary W. Michael Blumenthal, who has done little behind the scenes to get Carter onto a tougher anti-inflation stance, now labels inflation instead of unemployment the nation's No. 1 economic problem. G. William Miller, the new chairman of the Federal Reserve Board, has hinted broadly that unless he gets some help from the administration in fighting inflation, the burden of the battle will continue to fall on the Fed through high interest rates.

The key fact that Carter must come to grips with is that in his administration the declining trend of inflation from 1975 to 1976 was reversed in 1977, and threatens to go higher.

And unless Carter takes some decisive action now to slow rising prices in 1978, the nation will enter a highly active collective-bargaining year in 1979 with an inflationary spiral at high momentum. It could be another disastrous double-digit experience.

Anxiety has been heightened by the consumer price index for January, already at an annualized rate of 9.9 percent. True, just one month, but a bad one. The wholesale price index jumped 1.1 percentage points in February, more than it used to rise in some whole years. And while some of the wholesale price rise is traceable to food costs, which may come down later, it doesn't bode well. To talk about an "underlying" inflation rate of 6 percent, as Schultze insists on doing, is to ignore what is actually going on.

And just look at what lies ahead: There is the prospect of ever higher energy prices, including coal after the current strike is over, and natural gas, which now has the Carter blessing for deregulation.

Dollar depreciation raises the costs of a whole range of imported goods. Moreover, inflationary pressures are touched off by restrictive trade quotas, minimum prices for steel, the cargo preference system, new minimum wages, farm-support legislation and last, but not least, by sharply higher Social Security taxes—all actions initiated or supported by Carter.

The times cry out for a stronger antiinflationary guide to the private sector than Carter has been willing to risk. The Federal Reserve Bank of New York—surely no radical institution—recently observed that some means of breaking the deeply entrenched wage-price spiral is needed, adding: "It is the basic appeal of incomes policies that they might provide a means of doing so."

A half-dozen noted economists ranging from liberal James Tobin of Yale to Henry Wallich, conservative governor of the Federal Reserve, have suggested using tax credits or penalties to induce business and labor to comply with numerical guideposts.

The idea may have bugs in it, but the Carter White House, still reflecting Bert Lance's prejudices, has peremptorily ruled it out as politically unwieldy. "We've got enough problems with Congress, business and labor without looking for more on this thing," says an influential White House advisor.

So all we've got left is the administration's plea to business and labor to decelerate wage and price increases by one-half point a year. The only new thing on the horizon, in-

siders say, is "better advertising" of this wet-noodle initiative. So batten down the hatches, folks—the worst is yet to come.●

THE 60TH ANNIVERSARY OF BYELORUSSIAN INDEPENDENCE

HON. JOHN G. FARY

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 22, 1978

● Mr. FARY. Mr. Speaker, I would like to take this opportunity to remind my colleagues that March 25 marks the 60th anniversary of the declaration of independence of the Byelorussian Democratic Republic. It is, indeed, a shame that this independence was so short-lived.

In March of 1917, czarist rule in Russia came to an end and the people of Byelorussia, long a victim of Russian imperialism, had an opportunity to restore their national sovereignty. Later that year, the First All-Byelorussian Congress, consisting of 1,872 democratically elected representatives, choose independence and on March 25, 1918, the Council of Congress proclaimed the creation of the Byelorussian Democratic Republic. This freedom, however, was only temporary, for in December of 1918, divisions of the Soviet Red Army swarmed into this new nation, thus reducing it to the mere status of a union-republic of the Soviet Union. Since then, the Byelorussian people have come to know the oppression of Communist tyranny.

For instance, in 1929, the forced collectivization of agriculture was accompanied by the arrest and deportation of 1.5 million Byelorussian peasants. The terror tactics, mass arrests, shootings, and deportations continued into the 1930's. In 1933–31, many intellectuals were arrested; in 1933–34, all the Byelorussian members of the Polish Parliament were arrested; and in 1936–37, over 90 poets, writers, composers, dramatists, artists, and professors were arrested and many were shot.

Even becoming a member of the Communist Party was not enough to spare Byelorussians from Stalin's atrocities. In 1938, many high Byelorussian Communist Party officials were arrested and many thousands of their government officials liquidated. Their replacements were non-Byelorussians.

Furthermore, these people have been subjected to intensive Russification by their Russian masters, who are the ruling segment of the population in Byelorussia and who represent these people before the world, giving the impression that Russians are the same as Byelorussians.

As a result of the Russian presence, the Byelorussian people are deprived of the use of their language in the government, in scientific and cultural institutions, and in the schools, with the exception of some rural areas where the Byelorussian language is still allowed.

Mr. Speaker, it is very popular to speak of détente in this day and age, and while we must continue to seek an easing of international tensions, we also must not forget that there are many in the world who do not enjoy the fruits of freedom and therefore, are at the mercy of their oppressors. Such is the case in Byelorussia.

This day of commemoration should remind us that this yoke of oppression still binds many people of the world. As a nation that knows how precious freedom is, we extend our compassion and understanding to the Byelorussian people who must still struggle to be free.●

THE NEW YORK CITY FINANCIAL ASSISTANCE ACT

HON. STEWART B. McKINNEY

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 22, 1978

● Mr. McKINNEY. Mr. Speaker, the New York City Financial Assistance Act of 1978 was introduced today with cosponsorship by a majority of the members of the Economic Stabilization Subcommittee of the Banking Committee. As ranking minority member of this subcommittee, I am pleased that we can say the proposal has bipartisan support.

As Secretary Blumenthal said when he testified on the issue of assisting New York, most immigrants arriving in this country still believe that New York City is America's capital. Most of our ancestors probably had that belief long before arriving on our shores because New York is our premier city throughout the world.

Continuing a program of Federal assistance to New York should not be a partisan issue. The accumulation of fiscal programs goes back 10, 20, or 30 years—depending on your perspective—and includes city and State administrations of both persuasions. Who should be blamed for the city's fiscal condition is not the major issue. What has been done to correct the abuses and how much more has to be done to finish the job are the points that must be addressed by all of us.

Our recent hearings illustrated the importance of a continued Federal role in New York. The city has made a great deal of progress since 1975, but the job is only half done. Without our participation the gains will be lost and, before long, Congress will be asked again to respond to an imminent bankruptcy.

Therefore, I think it is a positive sign that the Economic Stabilization Subcommittee has taken this initiative now and in this form.

I hope that we will hold markup sessions on this bill immediately after the district work period. I expect that some of my colleagues may have amendments to today's language. None of us who are sponsoring this bill feel that it represents perfection. But it does embody our basic belief that the Secretary of the Treasury should be authorized to extend assistance to the city under extreme conditions and severe controls.

This bill does not represent a threat to our federalist system but it does allow for strong oversight by Federal authorities. It does not establish a precedent for other cities because New York City is, in fact, unique among all American cities. I, for one, feel that we should be prepared to offer other cities assistance because existing Federal and local actions will only lead to more urban disaster areas. But since Congress only deals with existing cases, and never anticipates future problems, I am willing to concede this point and make this assistance available only to New York.

The chairman of my subcommittee, Mr. MOORHEAD of Pennsylvania, is including in today's RECORD a copy of the bill and explanatory language. I do not intend to be repetitive so I am using this time simply to add my strong endorsement for this proposal and the intent behind it. We have recognized New York's condition and now I am proud that we are acting responsibly to correct it.

Time is a critical factor and we must move quickly. Not only in the Banking Committee but in this Chamber as well as in the other body. I can tell you now that this committee will bring a bill to the floor that will complete New York City's fiscal recovery and terminate our periodic involvement. I urge my colleagues to give us their support when we present our finished package.●

STATEMENT ON CONFERENCE REPORT TO CURTAIL MANDATORY RETIREMENT

HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 22, 1978

● Mr. BIAGGI. Mr. Speaker, we are on the threshold of achieving another legislative milestone in the history of this Nation. Passage of this conference report will mean the curtailment of one of the most vicious and unjustified forms of discrimination practiced against any group in these United States—namely the practice of mandatory retirement on the basis of age. I am personally proud to have been so closely associated with this legislation by being a member of the two committees which were the foremost advocates of this bill, the House Education and Labor Committee and the House Select Committee on Aging.

The legislative history of H.R. 5383 is replete with both commonsense and practical compromises. The end result is a good bill which should gain easy House and Senate approval as well as a certain Presidential signature.

The justification for this legislation are abundant and clear. There has never been shown one rational reason why persons solely on the basis of age should be forced to retire. Conversely a whole host of reasons ranging from economic to humanitarian exist for abolishing this travesty.

I have conducted hearings as a member of the House Select Committee on Aging and have learned firsthand from both victims of and exceptions to mandatory retirement that the elderly person of today wants to work. They want competency, not chronology, as the criteria for continued employment. They

want their value measured by their experience, not demeaned by their age.

There are compelling medical reasons to do away with mandatory retirement. An American Medical Association study stated that forcing people to retire against their will accelerates the aging process and is a direct threat to the health and life expectancy of the persons affected.

In no area are the harsh consequences of mandatory retirement felt more than economically. Retirement income is just one-half that of preretirement. This results in more senior citizens sliding into poverty and a life filled with despair.

I also cite the relationship between lifting the mandatory retirement age and the future of the social security system. The trust fund's depletion was due in large part to a decreasing number of younger workers and an increasing number of elderly beneficiaries. We know statistically that allowing persons to work past 65 and continue contributing to the system could result in savings for the system of $600 million in 5 years.

We are undertaking an important first step here today. I would prefer, and have cosponsored legislation, to bar mandatory retirement entirely. The realities are that this concept is not acceptable yet. I would expect nonetheless to sponsor legislation, once this bill is signed, to remove all remaining exemptions and to have this practice abolished entirely.

This Nation is overwhelmingly in favor of this legislation. Eighty-six percent of those surveyed in a Harris poll expressed their opposition to mandatory retirement. Another 4 million elderly were identified by the National Council on Aging as being willing to work if an opportunity were available.

In 1964, Congress passed the landmark Civil Rights Act. In 1965, Congress passed the equally significant Voting Rights Act. In 1978, Congress will pass H.R. 5383. The parallels are obvious. All these bills were sponsored and passed to rid this Nation of an injustice, a practice, which violated the principles of democracy. All came after strong advocacy by the affected groups. All had strong leaders in the Congress pushing for passage. In the case of H.R. 5383, the driving forces and inspirations are Chairman CLAUDE PEPPER of the House Select Committee on Aging and Congressman GUS HAWKINS, Chairman of the Subcommittee on Employment Opportunity.

Discrimination is an evil which must be expunged from this Nation. It must be destroyed wherever and against whomever it is directed. We are taking a major step in removing the stigma of age discrimination in employment today. It is a step long overdue which cannot wait a day longer to be completed.●

CONGRESSIONAL LONGEVITY

HON. CHARLES E. BENNETT

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 22, 1978

● Mr. BENNETT. Mr Speaker, the March 18 edition of the Washington Post carried a very interesting editorial entitled "Congressional Longevity." For many years I have looked at the longevity situation and made studies about it and the conclusion I have come to is that it is the basic right of all communities to send whatever Congressman they want to send to the House of Representatives regardless of age, race, sex, et cetera, and this should not be tampered with. However, to say that there is no difficulty about the present longevity or seniority system in Congress is to play the ostrich. There are committees in Congress in which the incoming chairman from time to time, more likely than not, will be in his late sixties or early seventies or even older because whoever preceded him as chairman either came to the chairmanship about the same age and then stayed on or came to the chairmanship at a much earlier age and stayed on through decades or at least many years.

A much better system would be to have some sort of limit on the length of terms of chairmen. I have suggested in legislation I have introduced a limit of three terms of 6 years; but 10 years might be a good compromise. Having a definite period toward which one could look for the chairmanship would allow preparation for the work to be done; and having a limited term would give a sense of fulfillment of using those years of chairmanship for the very best results. More important, the opportunity for fresh leadership would be available by such a system. The editorial in the Washington Post is included hereunder and it supports the idea for which I have been working for a long, long time:

CONGRESSIONAL LONGEVITY

One of those perennial attempts to reform Congress by limiting the terms of its members was trotted out again this week before a Senate Judiciary subcommittee. Under consideration are two constitutional amendments that would limit the service of future senators and representatives to 12 or 15 years. Proposals like these have been floating around at least since 1951, when the Constitution was changed to restrict presidents to two full terms. We hope they continue merely to float and don't light.

It needs to be conceded that proponents of amendments like these, introduced by Sens. Dennis DeConcini (D-Ariz.) and John C. Danforth (R-Mo.) are focusing on a real problem: the stagnation that prolonged terms in high office can produce. The seniority system, even though it is not so strong now as it once was, places enormous power in the hands of longtime members of Congress solely because they have been there so long. That, coupled with the political advantages that incumbency generates, makes it increasingly difficult for new blood to fight its way to Washington. Even when a veteran member has dropped out of touch philosophically with his constituents, he is often able to stay in office because party officials prefer power to issues.

Sen. DeConcini also argues that this distribution of power operates to deny equal representation to voters in states and districts where hot political competition makes is difficult for any person to stay long in Congress; the representatives of those areas are never able to stand on an equal footing with those from districts that send back the same legislator election after election.

Those are valid and appealing arguments. They make the proposed limits on congressional terms seem attractive. But the senators have traced the problems to the wrong source and are thus prescribing the wrong cure. The evils—and they are that—of which they speak grow not out of unlimited service but out of the way in which Congress itself has chosen to treat that service. The cure, then, is not to keep particular people out of Congress, but rather to limit the power and prerogatives that Congress grants to those members who win reelection repeatedly. For example, restricting the length of time a member could be a committee chairman or, even, serve on one committee might not change the situation as much as would the proposed amendment, but it would certainly reduce the advantages of long service.

To attack this problem the other way, as the proposed constitutional amendments do, is to place an additional restriction on the right of voters to choose whomever they want to represent them in Washington. That right of choice is so fundamental that it should not be tampered with. Voters should be allowed to elect—and reelect—to Congress whom they please.●

INDIAN POLICY

HON. JOSEPH L. FISHER

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 22, 1978

● Mr. FISHER. Mr. Speaker, the following is the text of a speech recently given by one of my constituents, Theodore W. Taylor, before the Interstate Congress for Equal Rights and Responsibilities in Denver, Colo. The speech is entitled, "Indian Policy with Respect to Rights and Responsibilities."

Mr. Taylor is a former Deputy Commissioner of Indian Affairs and I believe his remarks will prove beneficial to my colleagues as the debate on Indian policy continues.

The speech follows:

INDIAN POLICY WITH RESPECT TO RIGHTS AND RESPONSIBILITIES

(Remarks by Theodore W. Taylor, formerly Deputy Commissioner of Indian Affairs, prepared for the meeting of the Interstate Congress for Equal Rights and Responsibilities, Denver, Colorado, February 24, 1978.)

One of the most challenging issues facing us as a nation is the eroding linkage between (1) rights and services received and (2) responsibility to support and work for such rights and services. Rufus Miles in his book "Awakening From the American Dream" (Universe Books, 1976) points to this problem for our society as a whole. Here, however, we will consider only the situation of the American Indian, which has unique aspects which tend to intensify the problem.

Beginning in the 1800s Indians became citizens through treaties or statutes, and in 1924 all Indians not already citizens became citizens. They are citizens of the United States and of the states in which they reside. How are the "rights" and "responsibilities" of state citizenship being carried out by the state's reservation Indian citizens?

GOALS OF INDIAN POLICY

We cannot examine the history of Indian policy here, but will briefly discuss the current aims of Indians, state governments, and the federal government.

Indian leaders look toward self-sufficiency. Responses to a questionnaire in 1971 indicated that Indian leaders desired to build up individual and tribal competence, increase economic resources and payroll, and look to the day when Indians can support themselves and their governmental institutions. (Theodore W. Taylor, "The States and Their

Indian Citizens," GPO, 1972, hereafter referred to as The States, p. 256 ff.)

States look toward self-sufficiency. For example, Montana indicates ". . . it is the legislative policy of this state that the best interests of the Indians will be served by the fostering of a program which is designed to establish and place our Indian citizens in a position whereby they will be able to take their rightful place in our society, and assume the rights, duties and privileges of full citizenship. . . ." Florida's Indian legislation ". . . is to protect the Seminole Indians of Florida against undue and unnecessary hardship during these difficult years of transition from their ancestral culture . . . and to aid said Indians to obtain independence as a tribe and as individuals."

States also recognize that Indian culture has to be respected and that progress in adjustment to the surrounding culture will require Indian desire and participation. The Minnesota Commission on Indian Affairs recommeded that state officials in law enforcement, welfare, education and other functions "place emphasis on outreach programs that recognize the Indian as an Indian and that facilitate his participation and achievement." A former Deputy Commissioner of the Maine Department of Indian Affairs stated: "There should be no unilateral action on the part of non-Indians to improve Indian conditions. The situation will be changed only through determined efforts on the part of Maine Indians." (The States, pp. 202, 203)

Indians recognize the states as important in achieving the goal of self-sufficiency. Former Chairman of Arizona's Commission on Indian Affairs, Bill Alcaida, a member of the Colorado River Tribe, hoped the Commission's report of working with state and federal agencies, tribal councils, and legislators would "bring about circumstances that will definitely include the cooperation of the Indian citizens of Arizona as an important part of the state's future." The Oklahoma commission voiced similar objectives.

Federal policy looks toward self-sufficiency. As Commissioner Louis Bruce put it in 1971: "Most everyone will claim the same goals for Indians—economic self-sufficiency, the fulfillment of promises made by the Federal Government, and a standard of living comparable to that of other American communities." (The States, p. 122)

Thus, the policy goal of self-sufficiency—the ability of Indian people to stand on their own feet—seems to be the same on the part of many Indian leaders and state and federal leaders.

FACTS AND MYTHS

Before turning to possible policies for achieving the goal of self-sufficiency let us review some current facts that bear on what approach may yield the greatest promise.

1. "Where" do Indians Live?

When we talk about Indians we tend to picture a homogenous tribal group on contiguous trust land within a reservation boundary. Often this is not the case. There may be 10 million persons with some Indian blood in the United States (Nancy O. Lurie, "The Enduring Indian", Natural History Magazine, Nov., 1966), yet the 1970 census showed only 827,000 identifying as Indians. Of these, only 477,000 had some connection with the Bureau of Indian Affairs (BIA) in 1970 (638,000 today), the others being scattered through the rest of the population along with the 9 million who did not identify as Indians. In 1970, 37 percent of those identifying as Indians lived in metropolitan areas such as Los Angeles, with 25,000.

Thus, Indians are widely dispersed and many do not live on reservations or under tribal governments.

2. "Who" is an Indian?

The Indian Reorganization Act (IRA) of 1934 provided that Indians who were descendants of enrollees in federally recognized tribes in 1934, or who had at least 50 percent blood could qualify for Indian preference under the terms of that act. Federally recognized tribes may set any degree of blood quantum they wish; some members have minute quantities of Indian blood. Federal statutes defining eligibility for Indian education prescribe a minimum of 25 percent Indian blood. BIA decides who qualifies for Indian claims awards. The Meeds' Bill (H.R. 9950) defines an Indian member of a tribe as one domiciled on the reservation, while the Abourezk Bill (S. 2502) does not require domicile on the reservation.

As indicated above, many people with Indian blood no longer identify as Indians. There is a great deal of movement, too, of federally recognized Indians between their reservations and outside communities—for work, for visiting, and for greater or lesser periods of time. Many non-Indians live on fee land within reservations, work for the tribes or business enterprises on the reservation, and inter-marry with Indians.

3. Adequacy of Indian Land and Physical Resources

It is recognized by most that the Indian land base cannot adequately support Indians that are members of tribes with reservations. Although Indian and BIA efforts to use resources available for maximum results are to applauded, they cannot support all of the tribal membership in most instances. Nor can sufficient land be acquired to provide a land-based economy for most Indian tribes. Self-sufficiency will require other solutions in addition to maximum use of physical resources.

4. Trust Land

It should be remembered that the trust concept was applied to Indian land to protect it, on the assumption that Indians were not competent to manage the land themselves in the context of the larger society by which they had been engulfed. The American Indian Policy Review Commission (AIPRC) report recommends expanding the trust concept to all federal activities to assist Indians, thus legislating a moral obligation for a broad scope of government services. The Commission stated that "the concept of sovereignty and trust are imperative to the continuation of the Federal-Indian relationship." As we have seen there is not enough Indian land to support most Indian groups.

Rather than expanding the trust concept, a close look at current trust operations might be more appropriate. If the Indian on an allotment wants to use his land (rather than lease it) he receives very little supervision. The same is largely true of tribes, eg. Navajo grazing. If a lease or use of non-renewable resources such as oil or coal is contemplated, the BIA must approve. Even here the tribes often take the initiative and argue "self-determination" if the BIA proposes to interfere with their desires. AIPRC recommended that tribes have the right to override government exercise of the trust, with the proviso that the government not be liable for the results in such a situation.

The fact is that Indians are more and more making their own decisions with regard to their land and physical resources, though the trustee is still liable for any miscalculations. The formation of the Council of Energy Resource Tribes (CERT) and Peter MacDonald's recent discussions with James R. Schlesinger and President Carter are indicative of this Indian initiative in the management of their resources. The sophistication of tribes and their leadership have changed markedly in the last 15 years.

The actual practice of the trust responsibility should be reviewed to see if it is applicable to today's reality.

5. Responsibility for Indian Condition

If Indian income is low, health poor, or Indians suffer some other disadvantage, the tendency is to blame BIA, IHS, or "the government". To some extent this may be merited, but not entirely. Progress on the part of an individual or a group depends on their desire, their will, and the discipline exercised to achieve a goal. The best administered, amply funded program cannot change individuals or a group if they do not desire the change, work for the change, and become involved in the change. As Black Elk said "We often blame the white man for our lack of progress but we must also shoulder a large part of the blame." (The States, p. 130)

This nation has a responsibility to help Indians adjust. But if they do not wish to adjust, so be it. We do not have a perpetual obligation to provide a special Indian subsidy.

In this connection the "guilt complex" of many citizens for the past treatment of Indians should be assessed. The Iroquois decimated the Hurons. Our ancestors invaded North America. None of us alive today were responsible for either event. We need to resolve today's problems without the myopia of "guilt" on the one hand or the myth of an "eternal obligation" on the other.

6. Indian "Sovereignty"

It is easy to see how the concept of Indian sovereignty developed. It used to be true. Indian groups were independent when the Europeans invaded America. Our negotiating tools were treaties and the army.

Many changes have occurred. Game was slaughtered and Indians forced onto reservations. They could not support themselves. Many were issued rations, including the Sioux, in order to survive. Treaty making stopped in 1871. Indian agents became the "government" for many tribes.

In 1924 all Indians became citizens of the U.S. and of the states in which they resided. Sovereignty under our constitution rests with the people, and they have designated two levels of government to act on their behalf—the federal government and the state governments. The Indians are now a part of "the people".

The courts still say that Indian tribes possess full sovereign powers except in foreign relations and to the extent they are limited by Congress. Most tribes are limited by Congress. The courts almost have to take this posture in the case of tribes who have no statutory base for their governments. But this statement is used to build up the myth that Indian groups are still sovereign and semi-independent.

Lets look at some of the facts that do not fit into the concept of sovereignty:

a. Congress, not Indian groups, has supreme legislative authority on Indian matters.

b. Major crimes on Indian reservations are tried by U.S. attorneys in federal courts, not by Indian tribal members in tribal courts.

c. Many civil cases are processed in state courts for some reservations rather than tribal courts.

d. Most tribal land, as well as individual Indian land, is under government trusteeship—which means the federal government, not Indian government, has final approval of the use of the land.

e. Many tribal governing documents are based on the IRA or other statutory authority, not on inherent sovereignty of the tribe.

f. The federal Indian Civil Rights Act controls Indian tribal governments.

g. Seventy percent (70 percent) of reservation Indian children are educated in state public schools, not tribal schools; they are under state school law, curriculum, and procedures. Practically all non-reservation Indian children are in state public schools.

h. The categorical aid programs under Social Security (Old Age Assistance, Aid to the Blind, Aid to Families with Dependent Chil-

dren, Aid to the Permanently and Totally Disabled) are administered through the states for all of their citizens, including Indian citizens both on and off the reservation.

i. Reservation roads, for the most part, are built and maintained by the state, county, or federal governments, not tribal governments.

j. Most hospital and medical services on reservations are provided and operated by HEW; normally they are not funded and operated by tribes or tribal governments.

k. Most tribal governments do not tax tribal members to support governmental services; they are subsidized by the general taxpayer through BIA and HEW and/or use income from the sale of tribal resources. Over one billion dollars in special Indian subsidies are appropriated by the Congress for programs for federally recognized Indians each year. The states also, in varying degree, provide funds and services for their Indian citizens, including those on federal reservations (courts, child welfare services, schools, universities, penitentiaries, roads, and many others).

It is obvious that Indian governments and Indian citizens on federal reservations may be more dependent on the state and federal governments than the rest of us. They receive many services for which they do not pay. They are not self-supporting. This is a condition that could better be described as "dependency" rather than "sovereignty".

Yet the concept of Indian "sovereignty" misleads many Indians and non-Indians. Congress should legislate statutory authority for Indian governments not now having such authority and flatly state that there remains no vestige of tribal sovereignty.

REPRESENTATION WITHOUT TAXATION

Indians are not taxed on trust land, nor on the proceeds from trust land. Yet they vote (and hold offices) in county and state elections which affect every citizen in the county and the state, except Indians residing on trust land within a federal reservation in some instances.

On the other hand, non-Indians within a reservation boundary, even though they own their land in fee, may be taxed or regulated by the tribal government, some Indians and others claim (See AIPRC report). These non-Indians do not generally have the right to vote in tribal elections. So there is also the possibility of "taxation and regulation" without "representation" of non-Indians as illustrated by the Oliphant case (Susquamish).

RIGHTS WITHOUT RESPONSIBILITIES

Indians recognized by the federal government living on trust land within federal reservations.

Have the right to a free education (from the state or federal government) without having to pay for it.

Have the right to medical and hospital services without having to pay for them.

Have the right to many services extended by the state—police, courts, child welfare, institutional care, and the like—without having to pay for them.

Can vote in local and state elections which will primarily affect other citizens, not themselves.

Can be elected to local and state office and take action affecting local or state citizens, but which they and other Indian citizens may not be subject to.

Have the right to have their land managed by federal employees without cost to them, and to receive the proceeds of the land.

Have the right to damages if the federal managers of their assets make a mistake.

Have the right to be free of taxes on their land and trust assets, yet receive the income from them and other governmental services without cost.

Have the right to fish and hunt on Indian land and some non-Indian land without regard to state conservation measures, thus in some cases jeopardizing the wildlife supply for themselves and other citizens.

These "rights", it seems to me, are not balanced by related "responsibilities".

ALTERNATIVE POLICIES FOR REACHING GOALS

One approach is that proposed by the AIPRC: development and entrenchment of the concept of Indian sovereignty and covering all services by the federal government under the aura of "trust responsibility". Thus the proposed "Tribal—State Compact Act of 1978" provides for putting into statutory language: "The policy of this Nation is premised on the status of tribal governments as a continuing part of the American political fabric". The forwarding of the social and economic development of Indians would be provided in this framework. The bill also makes it difficult for the Secretary of Interior to carry out his trust responsibility in a flexible manner. This approach hampers the matching of rights and responsibilities because of the institutional conflict built into it. This view is most likely to prevail, although I believe it is unnecessarily cumbersome. It has not been chosen as a process by all tribes in the past. I suspect other tribes and states will want to modify current relations in the future if the evolution of events makes it logical and desirable to do so.

Another approach is that presented by Lewis Meriam in his landmark study of 1928, and which underlay much Indian policy up through most of the 1950s. (The Problem of Indian Administration, edited by Lewis Meriam, Institute for Government Research, Johns Hopkins Press, 1928.) Meriam saw the dangers of rights without responsibilities. He believed the primary task of the federal government to be education—to forward the social and economic development of Indians—so that they could either (1) be absorbed into the prevailing civilization or (2) "be fitted to live in the presence of that civilization at least in accordance with a minimal standard of health and decency." The States, p. 123; Meriam p. 21.) He went on to say "It is essential that the Indians be educated to utilize the services furnished by local and state governments and that they learn the obligation to contribute to the support of these activities." (Meriam, p. 43) Further he stressed that the process must be gradual, must build on Indian culture, and must be related to ability to pay. It should be done in such a way that the "relationship between benefits received and tax payments therefor should be obvious." (Meriam, p. 43)

The above illustrates two different policy approaches. There certainly are other possibilities, but these illustrate alternatives in procedural and policy emphasis to meet the mutually agreed on goal of self-sufficiency.

POLICY ISSUES REQUIRING ACTION

The preceding discussion indicates the need for certain legislation:

1. Legislation specifying that since Indians are citizens of their states and the U.S. that neither Indians nor Indian groups have any unique sovereignty because of their Indianness. Indians without a statutory charter for their governmental powers should be subject to such legislation.

2. Legislation that will encourage local self-government of Indian groups under state legislation, such as for counties and cities, and provide federal assistance to make this possible for at least as long as trust land cannot be taxed.

The Tribal State Compact Act of 1978 (S. 2502) should be adopted as it would provide a flexible framework for negotiation and agreement between tribal and state governments. However, S. 2502 should be modified to eliminate (1) the premise of "tribal governments as a continuing part of the American political fabric" and (2) the limitations on the tribal and state governments and the Secretary of the Interior in carrying out the Secretary's trust responsibility provided in the bill as proposed.

If S. 2502 is not acceptable, then the specific division of jurisdictional responsibility between tribes and state should be considered along the lines of the Meeds Bill, H.R. 9950. If the S. 2502 or H.R. 9950 approaches are not seriously considered, there may be increasing sentiment for the Cunningham approach, H.R. 9054.

3. Legislation to establish a commission of Indian and non-Indian members to study the actual operation of the current trust responsibility to determine if it is still needed for all groups or whether it should be modified.

There are three other areas requiring legislation but which were not discussed in the body of these remarks:

1. Adequate appropriations to facilitate and speed up resolution of reservation boundaries, water rights, and heirship problems. These are clearly federal responsibilities.

2. Legislation to provide for a statute of limitations in Indian law.

3. Adequate appropriations by state legislatures are essential for any functions or services to be provided reservation-based Indians by the state. The lack of funds was a serious flaw in state performance in many instances under P.L. 280. Fortunately, S. 2502 recognizes the importance of funding to adequate performance. It provides authorization for the federal government to fund states and tribal governments in carrying out the provisions of compacts or agreements negotiated if local resources are not sufficient.

If the above can be accomplished, I believe the foundation will have been laid on which citizens of good will—Indian and non-Indian—can build to achieve self-sufficiency and a balance between "rights" and "responsibilities".●

HUMAN RIGHTS VIOLATIONS CONTINUE IN CYPRUS

HON. JOSHUA EILBERG

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 22, 1978

● Mr. EILBERG. Mr. Speaker, as a body which is committed to the defense of human rights wherever they are endangered, we should be aware that a grave violation of freedom and human dignity is still taking place in Cyprus.

The Nation of Turkey continues to occupy more than 40 percent of Cypriot territory. Right now, there are some 30,000 Turkish troops on the island of Cyprus, as well as Turks who have been sent to Cyprus as illegal colonizers by the Turkish Government.

These troops and settlers have been given Greek-Cypriot homes and land in the Turkish-occupied territory, in defiance of international law.

Mr. Speaker, I share the concern of many of the citizens of Philadelphia who are outraged by the continued Turkish occupation of Greek-Cypriot land, and who vigorously oppose the lifting of the U.S. embargo against the sale of arms to Turkey.

Recently, the Senate of Pennsylvania adopted a resolution which demonstrates the deep concern felt by residents of our city and State. I commend the text of this resolution to my colleagues, because it is an eloquent commentary on the humanitarian crisis which now exists in Cyprus because of the refusal of Turkey to remove its troops:

Whereas, For over six decades through two world wars and an intense civil war to hold back communism, Greece has been a fighting ally and friend of the United States, and is now an indispensable ally and the symbol of democratic government in Eastern Europe; and

Whereas, Greece is essential to the security of the United States and the Free World in the Mediterranean area and is essential for the safeguarding of the Sixth Fleet in the Mediterranean; and

Whereas, Turkey has attacked, seized and continues to occupy the independent island nation of Cyprus, by illegal use of United States supplied military weapons in violation of the United States Foreign Military Assistance and Sales Acts, and in violation of four United Nation Resolutions; and

Whereas, The humanitarian crisis on Cyprus, involving 200,000 Cypriot refugees, grows increasingly more desperate, as the prospects for a negotiated settlement appear dim; and

Whereas, President Carter has declared that the United States foreign policy shall be committed to the protection of human rights, and he has proceeded to withdraw United States aid from nations which have persisted in violation of human rights, such as Turkey has committed, and is continuing to commit, against the people and the nation of Cyprus; now therefore be it

Resolved, That the Senate of the Commonwealth of Pennsylvania urges the President and the Congress of the United States to exert their best efforts towards a just resolution of the Cyprus conflict, to effectuate a removal of all foreign troops from Cyprus, to restore the 200,000 suffering Cypriot refugees to their homes, and to restore to the people of Cyprus the right of self-determination; and be it further

Resolved, That the Senate of the Commonwealth of Pennsylvania urges the President and the Congress of the United States to give generous support to the Cypriot refugees, and to continue to support Greece by annual aid authorizations and to continue the embargo on arms to Turkey until such time as Turkey acts to resolve the Cyprus conflict; and be it further

Resolved, That copies of this resolution be transmitted to the President of the United States and to the presiding officer of each House of Congress of the United States and to each Senator and Representative from Pennsylvania in the Congress of the United States.

CAMPAIGN REFORM OR POLITICAL POWER PLAY

HON. BENJAMIN A. GILMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 22, 1978

● Mr. GILMAN. Mr. Speaker, I have long been a supporter of public financing of election campaigns, and have both publicly enunciated my support for the concept in general, and have also cosponsored public financing legislation—H.R. 10536 (93d Congress) and H.R. 5159 (95th Congress)—bills to improve the conduct and regulation of Federal election campaign activities and to provide public financing for such campaigns. I have consistently embraced campaign reform and responsible measures to assure that election practices are conducted within well defined boundaries of probity.

Thus, it is with some regret that I was forced yesterday to vote against the rule making it an order for the House to consider H.R. 11315, Federal Election Campaign Act Amendments of 1978. However, the procedures used to bring this bill to the floor reflect a most blatant attempt by the majority party to circumvent established rules governing the consideration of legislation by the House.

While the majority leadership would have us believe that their concern is with assuring that House candidiates enjoy an equitable sharing of contributions, in effect the House Administration Committee has reported out a bill which if passed would have electively begun the process of shaking the foundation out from under the feet of this Nation's cherished two-party system.

Others, besides the Republican Party and a sizable number of Democrats voting against consideration of H.R. 11315, were quick to point out the unconcealable partisan provisions of this legislation. In a March 10, 1978, editorial entitled "In Front of God and Everybody," the Los Angeles Times pointed out that Democratic Party maneuvering to undercut successful GOP fundraising has produced a bill conceived of the principle that "All shall be equal—except that the Democrats, already in power, shall be a little more equal." The Times branded the Democratic maneuver as an "attempt to mug the opposition in broad daylight in front of the Capitol."

The Washington Star, also in a March 10, 1978, editorial, queried, "What are the Democrats afraid of?" The Star asserts that, "A more partisan maneuver hasn't come along in a long time." Describing Democratic efforts to "cut down the other guy," the editorial states that, "The Democratic Party, because of inefficiency or other reasons, can't seem to raise as much money as the Republican Party." As to the measure of campaign reform involved, the Star points out that, "The Democrats won't even answer Republican questions as to what public interest their (the Democrat's) proposal is supposed to serve."

Moreover, according to a Washington Post article of March 22, 1978:

Fred Wertheimer, vice president of Common Cause, the chief lobby supporting public financing, said, "Opponents of public financing could not have had better allies than House Administration Chairman Frank Thompson and Majority Whip John Brademas.

Their legislative proposal to drastically cut political party limits completely sabotaged this effort to enact congressional public financing.

In effect a coalition of majority members of the House Administration Committee, alarmed that Republican Party financial support continued to outpace Democratic Party resources, voted to drastically reduce the availability of Republican funds raised according to the provisions of previous legislation and Federal Election Commission guidelines. The motivating factor in this partisan maneuver: The Republican Party raised $18.5 million in 1977, while the Democratic total for the same period amounted to only $5.6 million. The Republican Party has been able to financially support its members more vigorously than its Democratic counterpart; however, under the terms of the proposed legislation the Republican Party's efforts would be devastated while the funding capabilities of the Democrats would emerge only minimally disturbed. The legislation would have drastically reduced the political effectiveness of 1.3 million Americans who contribute an average of less than $25 to Republican candidates through party contributions.

Consideration of H.R. 11315 was characterized by secretive maneuvers denying open hearings and the timely consideration of key provisions of the legislation.

The minority members of the House were gratified by the significant number of Democrats who joined their Republican colleagues in defeating the motion to consider this ill-conceived legislation. The minority, and indeed all citizens concerned with protecting minority rights and preserving the long respected tradition of a two party system, were vindicated by the defeat of power politics.

Just prior to floor consideration of this legislation, several last ditch movements appeared to patch up the bill so as to compensate for the inequities Republican Members would suffer at the hands of H.R. 11315 as introduced. However, the history of partisan shenanigans associated with the measure gave little assurance to those Republicans wishing to support public financing that the debate on H.R. 11315 would be free of strong-arm parliamentary maneuvering which in the end might reinstate those provisions of the bill deliberately designed to favor Democrats and severely undercut legitimate Republican fundraising efforts.

True campaign reform does not arbitrarily shift the rules of the game in favor of one political party. A vote against considering this legislation was not a vote against public financing of political campaigns. Rather, a negative vote registered the indignation of those alarmed by the blatant partisan maneuvers circumventing established rules of the House. While one's concern might lie in supporting responsible public financing legislation, a vote in favor of the rule to consider H.R. 11315, was a vote to ratify the dubious and deceptive process by which this bill came to the floor.

After the debacle surrounding the consideration of this legislation, we in the House of Representatives who are still sincerely concerned about campaign finance reform are in the process of drafting new, responsible legislation devoid of any partisan considerations.●

RETIREMENT CREDIT FOR CERTAIN CONTRACTOR-FURNISHED TECHNICIANS

HON. HENRY B. GONZALEZ

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 22, 1978

● Mr. GONZALEZ. Mr. Speaker, I am introducing a bill, identical to S. 2447, to provide civil service retirement credit to certain contractor-furnished technicians who have been unfairly denied their

benefits because of adverse Civil Service Commission rulings.

Let me take a few minutes to review the history behind this legislation. Because of the shortage of technicians in the years following World War II, the Federal Government secured the services of skilled technical personnel through contracts with private companies. While these technicians were paid by the Government, they were recruited by these private contractors. They were known as contract technician service personnel (CTSP) and did most of their work for the Armed Forces. The Government then continued this practice through the 1950's and into the 1960's.

Then in 1963 the House Post Office and Civil Service Committee questioned the legality of CTSP contracts, and a decision issued by the Comptroller General's office in 1965 held that the contracts were in fact illegal. Thus, the CTSP jobs were illegal.

This decision resulted in CTSP being given the opportunity to convert to Federal service along with their jobs. There was no problem in the change-over and the last conversion took place in 1967. The problem has developed, however, since a number of these personnel have reached retirement age. They have discovered that the Civil Service Commission refuses to count their service as CTSP in determining their retirement benefits.

The circumstances of their hiring and the nature of the jobs, combined with the conflicting and confusing policies of the Federal Government, all point to the fact that these personnel have been denied their retirement benefits. Plus the fact that precedents have been set in several court cases which make this denial inconsistent.

Turning to the human side of this picture, the fact remains that the denial of retirement benefits has had a serious impact on the retirement income of individuals who have spent their entire careers in service to the Federal Government. These personnel were unable to transport their private pension plans to the Federal retirement system and they could only accrue the minimum amount of civil service retirement credit after they made the switch. I believe that these people have been placed in a very unfair position and deserve to have this situation rectified.

The bill I am proposing would allow only those under contract before March 4, 1965, to receive additional civil service credit for the years they spent as CTSP. Those wishing to receive this additional benefit would have to buy into the system paying the amounts they would have paid into the system had they been eligible for Federal retirement annuities in the first place. Those who chose to have complete Federal coverage would have to forfeit their social security benefits for that period of coverage, and the amounts the individual paid into the social security system would be transferred to the Federal retirement fund to reduce the contributions that former CTSP would be obligated to make to receive their additional credit. Another important provision calls for a dollar-for-dollar reduction for any amount CTSP receive from private pension plans based on their CTSP service. This is to assure that the legislation provides benefits only to those for whom CTSP service has resulted in hardship and to prevent anyone from receiving more generous retirement benefits than those available to Federal workers.

I am not sure exactly what the cost would be, but I understand that only about 2,000 personnel are involved; so it appears that the cost would be small.

Mr. Speaker, the intent of this legislation is in no way designed to open up the doors of the civil service retirement system to those who in some way, shape, or form, worked for the Government in the past. But it is intended to right a wrong that has penalized a small group of people who have served the Federal Government and the American people.●

THE 157TH ANNIVERSARY OF THE INDEPENDENCE OF GREECE

HON. JOHN G. FARY

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 22, 1978

● Mr. FARY. Mr. Speaker, it is truly a pleasure for me to inform my colleagues that on March 25, millions of Greeks and Greek-Americans will celebrate the 157th anniversary of Greek Independence Day. It is a fitting opportunity for us to reflect back on their rich history that has left its mark on the people of that great nation and the world.

One hundred and fifty seven years ago, a band of Greek patriots, led by Prince Alexandros Ypsilantis and sparked by their love of freedom, initiated a series of uprisings in Greece that openly defied 400 years of oppression at the hands of the Ottoman Turks. Against overwhelming odds and constant pursuit, this initial band of patriots had swelled its ranks and soon become an army. In the face of political factionalism and the inclusion of Egyptian mercenaries, this dedicated Greek force withstood the merciless onslaught which was thrust against them. With the assistance of their American and European friends, the Greek Army stood resolute in their passion for independence and on September 14, 1829, the Treaty of Adrianople was signed, ending the hostilities and establishing the independence of Greece. Three years later, in 1832, Turkey also recognized Greece as an independent nation.

During the next century, the Greeks devoted their efforts to extending their boundaries to include Greeks still under foreign rule, and to establishing a stable government. When they were threatened anew with the opening of World War II, they again showed their fierce devotion to freedom and independence. Their stubborn resistance to the German invasion of 1941 delayed the opening of the German campaign against Russia by several crucial weeks.

The post World War II period was a turbulent one in Greek history. Communist insurgents waged guerrilla war from 1947 to 1949 but were thwarted thanks to the efforts of the United States, who saw the Soviet Union as the instigator in the rebellion. Proclaiming the right to self-determination for all nations, the United States poured massive amounts of aid into Greece, providing the Greeks with the opportunity to successfully prevent a Communist takeover.

As Greece approaches the last quarter of the 20th century, the flame of freedom again burns brightly. In 1975, Greece was able to finally overthrow their oppressive military dictatorship that had been in command of the nation since 1967. The return of now Prime Minister Constantine Karamanlis in 1975 and the ensuing parliamentary elections represented a blow against the tyranny of the past and offered a real hope for freedom in the future.

Mr. Speaker, although I am not of Greek blood, I am of Greek heart and therefore, it is with great pride and honor that, on this day, I join with Greek-Americans and their Hellenic compatriots in the observance of their independence.●

MANDATORY RETIREMENT

HON. RICHARD A. GEPHARDT

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 22, 1978

● Mr. GEPHARDT. Mr. Speaker, I rise to express my deep concern about passage of H.R. 5383, amending the Age Discrimination in Employment Act to raise the mandatory retirement age to 70 and eliminate it altogether for Federal employees. While there is substantial merit to the argument that considerable benefits can be derived from insuring senior citizens remain productive members of society, the bill we have passed could have far broader and possibly damaging implications.

First, I am not convinced we have sufficient data to support setting the mandatory age at 70 as opposed to a different age. I think the age 70 is as convenient for us as the age 65 was for Bismarck. Second, it cannot be denied that the mandatory retirement issue is inextricably tied to the social security system. Any change in retirement policies will have a significant impact on the country's major pension program. Nevertheless, while the Congress continues to grapple with the difficult mission of finding an adequate and acceptable means of financing social security, we have passed a bill which will affect this effort, but in a way that has not yet been determined.

Furthermore, we cannot anticipate how the Nation's economy, and particularly the employment market, will be affected. Would the bill discourage early retirement or have little effect on current custom? Will it reduce opportunities for younger workers or minority workers? Will it raise unemployment?

In conclusion, I believe the House has acted hastily and prematurely in passing this bill to change retirement policies. Its goal is admirable but its effect could have serious repercussions for workers of all ages.

A recent column in the Washington Post by David Broder offered an excellent

commentary on the need for a closer look at this legislation. I ask that the article be inserted in the RECORD at this point.

THE RETIREMENT-AGE BILL: 'I'M ALL RIGHT, JACK'

(By David S. Broder)

With little public notice, Congress is about to pass a bill that will affect the future work opportunities of almost every American. It is a measure opposed by most business organizations and viewed with skepticism by the AFL–CIO, and yet there is hardly a politician ready to raise a word of caution about it.

It is the bill that would ban any mandatory retirement age for federal workers and give almost all private-sector employees protection against involuntary retirement up to the age of 70, instead of the present ceiling of 65.

The political appeal of the measure is indicated by the fact that it passed the House last year with only four dissenting votes. And it was approved in slightly different form, by the Senate, with only seven "nays."

A conference committee of the two bodies now has agreed on a compromise version of the bill, which may be up for approval in the House as early as this week.

It is a politically appealing measure, described by proponents as an answer to the evils of "age discrimination." But, from another perspective, it can also be called an "I'm all right, Jack" bill. For if it becomes law, it means that those of us who have jobs already can hold onto them longer, if we wish, while younger people, scrambling for a foothold on the employment ladder, wait still longer in the cold.

The hearings on this measure, which whisked through Congress with extraordinary speed, are full of noble sentiment about the rights of senior citizens. But they are conspicuously lacking in anything that can be called a solid estimate of the legislation's impact on a job market where teenagers are having a tough time finding entry-level opportunities, and minority youth unemployment rates in some cities run up to 40 percent.

It is known that voluntary early retirement before the traditional age of 65 has become more and more popular in the past decade.

Relying on that trend, the Department of Labor told Congress that it estimates that only 150,000 to 200,000 older workers would take advantage of the bill's protection against forced retirement at age 65. Even a shift of 200,000 jobs from the young to the normally retired is a social decision of some consequence. But there are indications the effects may be much larger than that.

A personnel officer of Sears, Roebuck Company said he thought that the law would cut new hiring by 7 percent in his firm and eliminate 20,000 "job-change opportunities" (hirings and promotions) in the first five years of application to that one company alone.

Arthur C. Prine Jr., testifying for the U.S. Chamber of Commerce, said it was "very clear to us that if this legislation goes through, it is going to undermine in many companies the affirmative-action programs, which provide for improved opportunities for young and minority workers." Vernon Jordan of the National Urban League expressed the same fear, and so did Bert Seidman, director of the Social Security department of the AFL–CIO.

"It may be unjust to force retirement on those who are healthy and want to continue working," Seidman said. But it is "equally unjust to lay off younger workers with families to support and retain at work elderly workers who are eligible for Social Security benefits, a good private pension and health care."

Despite Seidman's reasoned objections, the AFL–CIO has now adopted a position of neutrality toward the legislation, after winning a provision "grand-fathering in" all existing union contracts that have mandatory-retirement provisions at an age younger than 70. "We decided," said one AFL–CIO lobbyist, "just to let Congres go its way."

The Carter administration, no more eager than Congress to affront the elderly and their lobbies, is giving the bill its blessing. So there is little to halt its progress.

Questioning benefits for the elderly is dangerous for politicians—and even for reporters, like this one, who are on the downward side of their own graceful slump toward retirement. A previous column on the subject of the exponential growth of federal payments to the retired, a few years back, gave ample warning that any discussion of such questions is likely to invite the charges of ingratitude toward one's elders.

But the issue is there—whether we like it or not. There are hard choices involved. Every elderly third-grade teacher who decides to stay in the classroom an extra five years means that five more classes will be taught by a 1935 college graduate, rather than a 1975 graduate.

Every federal employee who decides to hold onto his job indefinitely means that much less change in the bureaucracy.

These issues deserve more debate than they have received in the legislation about to become law.●

SIX MONTHS AND STILL WAITING FOR DOL

HON. JOHN M. ASHBROOK

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 22, 1978

● Mr. ASHBROOK. Mr. Speaker, after being in Washington, D.C., for a number of years, I have become somewhat accustomed to governmental delays, inertia, and a general lack of responsiveness. The Carter administration, however, seems determined to carry these traits to new extremes.

Last summer Secretary of Labor Ray Marshall testified before the Labor-Management Relations Subcommittee on which I serve regarding the labor reform bill. At that time he offered to reply to any written questions that I might have. Pursuant to his offer, I wrote a letter with my questions dated August 5, 1977.

Over 6 months passed. In that time the House of Representatives passed the labor reform bill. The Senate, meanwhile, is expected to take up the bill within the next several weeks.

On February 23, 1978, I finally received a "response" from Secretary Marshall. According to the letter, the Department of Labor is "currently addressing the questions raised" and is "hopeful that a response will be forthcoming in the near future . . ."

At the rate DOL is going, it won't make much difference what the letter says. The Senate as well as the House will probably have taken final action before I ever receive Secretary Marshall's response.

Oh, well. What can you expect from the Carter administration?

I am including Secretary Marshall's letter so you will all know what to expect when you wait over half a year for a response:

U.S. DEPARTMENT OF LABOR,
OFFICE OF THE SECRETARY,

Hon. JOHN M. ASHBROOK,
U.S. House of Representatives,
Washington, D.C.

Washington, D.C., February 23, 1978.

DEAR CONGRESSMAN ASHBROOK: This is to advise you that we are currently addressing the questions raised in your letter of August 5, 1977, concerning the labor law reform legislation now pending in Congress. I am hopeful that a response will be forthcoming in the near future, and it is certainly my intention to transmit the response just as soon as it has been completed.

I regret the delay and apologize for any inconvenience occasioned thereby.

Sincerely,

RAY MARSHALL,
Secretary of Labor.

FOREIGN AID AND HUMAN RIGHTS

HON. JONATHAN B. BINGHAM

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 22, 1978

● Mr. BINGHAM. Mr. Speaker, recent remarks made by Ambassador Edwin M. Martin provide a realistic, down-to-earth approach to the question of linking human rights observance with U.S. foreign aid programs. An economist and diplomat of the highest rank (career ambassador), Edwin Martin has served his country long and well—as coordinator for U.S. participation to the World Food Conference (1974), senior advisor to the Secretary of State, U.S. Ambassador to Argentina, chief U.S. representative to the OECD in Paris, Assistant Secretary of State for Economic Affairs, Minister Counselor at the U.S. Embassy in London, director of European regional affairs at the State Department and Assistant Secretary of State for Inter-American Affairs.

Ambassador Martin's extensive experience in dealing with foreign governments lends weight to the points of view he expresses on foreign aid. It is interesting to note that he favors a flexible approach on the question of linking aid to human rights. He draws a clear distinction between military and economic aid. In his remarks, quoted in full below, he notes that most foreign societies differ from ours in terms of conditions of life and concepts of law, that U.S. observance of human rights performance should be applied equally abroad, with exceptions justified only on the basis of major national security considerations, that the denial of U.S. aid for human rights reasons has seldom had sufficient impact to force a foreign government to change its ways, and that America needs a sense of humility in seeking the universal observance of human rights, for "our knowledge of the chemistry of international dealings is still in its infancy."

Ambassador Martin's remarks, entitled "Should Observance of Basic Human Rights Be a Prerequisite for Aid?" and delivered February 8 at the 25th Annual International Development Conference, follow:

I'd like to propose a positive statement of what I think U.S. policy should be with respect to aid and human rights.

"Aid should be given to an LDC when doing so is more likely to improve the observance of basic human rights in the future than withholding it."

I want to make half-a-dozen general comments on this policy and its implementation and then talk about handling aid specifically.

It is a pragmatic criteria—how can we effect what happens elsewhere?—how we feel about ourselves is irrelevant; there is no room for actions to soothe our consciences or vent our anger at violations.

We are dealing with societies in various stages of progress toward modernization. Most of them have ancient and strongly held cultural patterns and institutional arrangements which more often than not are quite different in the fields covered by human rights from those of the English common law or the Napoleonic civil code. Moreover, the conditions of life with which these institutions and value systems have to deal are quite different from our own, not only economically but also politically, as many of them find themselves in a no-man's land between traditional and modern societies.

What are the basic human rights to be observed? It is not a phrase that is self-defining, glibly as we are accustomed to using it. For Americans the most familiar summary of what we hold dear is in the Declaration of Independence—"all men are created equal, that they are endowed by their creator with certain inalienable rights, that among these are life, liberty and the pursuit of happiness."

Starting from this statement, I identify five types of human rights as deserving U.S. support:

(1) Laws protecting rights such as movement, speech, political organization, etc.

(2) Methods of enforcement of all laws which ensure a rational process for the fair and prompt determination of guilt or innocence.

(3) Institutional arrangements which permit adult citizens to play a role, directly or indirectly, in policymaking by their government.

(4) Absence of discrimination for reasons of race, religion, wealth, sex, etc., in the formulation and application of laws or public programs, or in significant human relationships of a non-governmental character.

(5) Provision of basic human needs without which "life" is endangered, "liberty" is a fraud, and "happiness" cannot be pursued but only starvation and disease postponed a bit.

Since economic aid has a direct relation to point (5), economic human rights, I'd like to say a little more about them. First, I wish to read a quote:

"Human needs are inseparable from human rights—that while civil and political liberties are good in themselves, they are much more useful and much more meaningful in the lives of people to whom physical survival is not a matter of daily anxiety.

"To have sufficient food to live and work, to be adequately sheltered and clothed, to live in a healthy environment and be healed when sick, to learn and be taught these rights, too, must be the concerns of our governments. To meet these needs, orderly economic growth is crucial. And if the benefits of growth are to reach those whose need is greatest, social justice is crucial as well."

This quote is from the address of President Carter to the Indian Congress last month. I endorse all of it but would add two basic needs. The first is that all parents have the effective capacity to have the number and spacing of children they want. The second is that a job which will provide a decent living for oneself and those for whom one is responsible is a central economic right, basic to self-respect. It is also usually the most efficient way to meet other basic needs. Since first writing this paragraph, I was pleased to hear President Carter refer in his State of the Union message to a job as a human right.

"Observance" of human rights means, of course, "observance" in practice, not just in theory of law. The most basic right is the right to enjoy one's rights. A perfect legal and judicial system is no protection if one is unable to know what one's rights are or doesn't have the money to defend them. Economic rights are even more dependent on availability of resources.

"Observance" also should follow the rule established in our quote from the Declaration of Independence that "all men are created equal." Violations of the human rights of any person—the tortures endured by a starving infant in an Asian village or inflicted by the political police on a distinguished scientist—are equal, abhorrent crimes which should be of equal concern to us.

Sticking to the rule of the equality of all humans precludes the application of a double observance standard in choosing countries as targets for our human rights efforts. Exceptions should have to be justified fully on major U.S. national security grounds, with the burden of proof clearly as those who would make exceptions.

One may have to seek observance of some rights while accepting stagnation with respect to others. Particularly difficult is the trade off between freedom and order. I suspect a good many Americans living in our cities would give up a few legal freedoms to feel able to take a walk around the block after dark without fear of being mugged; for them it would be a not inconsiderable freedom. The potential for conflict between order and economic progress in many LDCs is even more serious, hard for us at our level of income to appreciate.

When human rights and their observance are so defined it is clear that what we need are changed attitudes toward them throughout a society. Otherwise we may get favorable public actions from government leaders from time to time but not the constant vigilance at every level in public and private actions, which is necessary to assure their observance.

If one accepts this emphasis on attitudes rather than merely legal rules, one must look for the best means to motivate people to want to improve human rights conditions in their community and country. I feel that punishment can often produce compliance but seldom believers and what we need are more true believers. Converts are made by communication, not by iron curtains.

I would, therefore, put no limit on what we say publicly or privately, except that public statements should be designed solely to promote observance of human rights, not to boost our pride in ourselves.

We need a strong dose of humility in our approaches to this issue. There will surely be many surprises, pleasant and unpleasant, no matter what we or other outsiders may do—the Nazi and Fascist regimes in our century are prime examples of the latter and India last year of the former. But we must keep trying, evaluate the results continuously and alter our tactics accordingly. Our knowledge of the chemistry of international dealings is still in its infancy.

What are the tools given us by foreign aid to pursue our human rights goals? I see foreign aid as falling logically into two quite different categories for this purpose. First, there is that designed to do our share in cooperative programs with developing countries to improve the economic, social and political conditions of their peoples. In this category, I put bilateral and multilateral economic aid and food aid. Second, there are those activities designed to strengthen, directly or indirectly, the military power or foreign governments. In this category, I put military assistance and our related programs of supporting assistance. I realize that these compartments are not watertight in either direction, but the differences are deep enough to justify separate treatment for our purposes.

Let me treat military assistance first. As a general principle, I am against giving it to countries with poor human rights records. Adding to the military strength of such a government can only help it to keep the lid on its opponents and block change. There would rarely be any compensating benefit for human rights from such aid which could outweigh the encouragement given to human rights violators by the close political friendship which military cooperation inevitably implies, going far beyond the significance of economic aid cooperation.

The only rational exceptions to this rule that I can think of would be situations in which the receipt of military assistance from the U.S. would strengthen the position of a government threatened by external or internal enemies from the right or left whose accession to power would be likely to make the human rights situation appreciably worse. But the threat and the need for our help must be clear and success probable. Even in such cases I would like to believe that the government being helped was prepared to make an honest effort to improve human rights conditions, either on its own or as a condition for receiving such aid from us.

It is also particularly likely to be the case with military assistance that other foreign policy considerations will be thought to outweigh those of human rights. But I would put the burden of proof squarely on those who would seek such an exception to the policy I have advocated.

When it comes to economic aid, I would reverse the U.S. position, putting the burden of proof very much on those who would withhold it for human rights reasons, even though there is no doubt that the usual effect of giving economic aid to a country is to strengthen the position of the government in power. If it is a government with a record for violating human rights, that is bad. But it isn't the whole story. It is not inevitable that a stronger government will be more repressive. It sometimes turns out to be the reverse. And quiet talks associated with our aid transaction can sometimes make sure that conditions improve.

Moreover, if wisely chosen and supervised, the aid can bring about improvements in the short term in the basic needs aspect of human rights, as the Congress has recognized. This may outweigh lack of progress in other human rights areas. To enable aid to do so we must accept several guidelines for our aid activities. First, help must go most generously to those countries most in need of our aid to meet such needs, and prepared to use the total resources available to them in ways which give a proper priority to meeting the needs of their poorest citizens.

We must also recognize that a new road or power line, seed, fertilizer or food aid for poor rural areas cannot be restricted as to use to just the poor in the foreign region served. We can only select areas in which the poor predominate and make a special effort to encourage and facilitate their use of them.

It is essential too, that we recognize that it is not rational to seek virtue for ourselves alone by requiring that all our aid go directly to the poor and that other donors do the rest. For there is an essential rest—just meeting human needs even depends on infrastructure investments as well as direct help for the poor.

Giving reality to the right to a job depends heavily on that "overall economic growth," which President Carter endorsed in his New Delhi speech. Of course, it is also necessary to stress labor-intensive technology and open export markets for labor-intensive products, the latter a problem about which I need say no more to this audience.

More important, however, is the effect that the right aid programs can have on the long-term evolution of the attitudes of society. Development is change and, if the situation is bad, what is needed is change. No doubt it will be slow, even zig-zag, as it has been and still is in some fields in the U.S. Let us not become impatient if, despite our aid, there appears to be backsliding here and there.

As an example of the long-term potential of aid, support for democratic principles has almost invariably in the past come from people above the poverty line and with some education. And governments selected democratically have generally improved the observance of other types of human rights. There is no guarantee, of course, of this outcome, especially in the short run, but progress has seldom been made without this contribution of "overall economic growth." Slums, urban or rural, can produce only mobs, not democratic political parties.

Finally, my NO vote rests on the ineffectiveness of the only alternative to giving aid in the way I have urged, namely, denying it to regimes with poor human rights records. Unfortunately, U.S. economic aid is seldom important enough to a country that denying it will force a government to change its basic policies. These policies have usually been chosen because they are considered necessary to stay in power. And survival is just as fundamental a goal for governments as for people.

If, however, U.S. economic aid should be large enough that denial would cause trouble—unlikely as long as U.S. aid appropriations are so small for so great and rich a country—let us remember that all our experience suggests that democratic societies, devoted to human rights, have never been nourished on the soil of economic depression and cannot be constructed overnight by dictatorial fiat. The more likely result will be even greater political repression to maintain order in the face of a worsening condition of economic human rights, made inevitable by the aid denial. An already bad government is likely to find this their only answer.

To summarize, at base what is required in repressive societies is change, changes in value systems and changes in power structures. Development aid, wisely given, can change current attitudes only slowly, but it can open a few windows, widen opportunities for some people, create communities capable of doing more things for themselves and proud of it. All these are steps toward increased respect for themselves and for others as human beings, steps which inevitably undermine that blind acceptance of centralized authority which is the antithesis of respect for human rights.

Let us then seek in every way we can for pragmatic levers which will improve human rights abroad, political and economic, and think hard about what will work, never substituting high moral fervor for action that will accelerate the process of change. And above all, let us never forget that the most effective instrument we have is very probably the example we present to the world of a society which respects the human rights of all and in which the result is an enhanced quality of life for all, a better opportunity to enjoy "life, liberty and the pursuit of happiness." For obserance of basic human rights is a valid goal only so long as we use it to improve this quality of life.●

BRUCELLOSIS RELIEF ACT

HON. ALBERT GORE, JR.

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 22, 1978

● Mr. GORE. Mr. Speaker, today I am introducing legislation entitled the Brucellosis Relief Act. Brucellosis is a disease of the bovine reproductive system, causing premature abortion of cattle fetuses and ultimately death. The purpose of this act is to make certain improvements in the present brucellosis eradication program. These adjustments will ease the destructive impact that this disease has on dairymen and cattlemen, and will promote greater cooperative efforts between Government and farmers.

In many of the 300 open meetings that I have held since taking office in 1977 I have heard of how brucellosis, or Bang's disease as it is often called, has infected herds and caused terrific hardship. But I have also been told of the even harsher burden imposed by the eradication program. This program monitors the spread of the disease by testing at the market terminals and in area-wide surveillance programs. When a member of a herd is found to have brucellosis, that animal must be slaughtered and the entire herd placed under quarantine.

These measures are necessary. There is no known cure and the disease is highly contagious. Last year brucellosis caused $30 million in damages. It has been estimated that if left unchecked, the resulting damage would be in the neighborhood of $850 million per year.

However, these control measures have not resulted in wiping out the disease, even after 30 years of hard work by USDA. These measures have, instead, resulted in wiping out many farmers. When a cow is slaughtered, the owner receives the salvage value plus a Federal indemnity—$50 for grade cattle, $100 for registered breed cattle. No distinction is made for dairy cattle. This combined indemnity is usually adequate for beef cattle; however, a milk-producing cow may be worth up to $1,500 or more. It is not unusual for the difference between the sum paid to the dairyman and the actual value of the animal to be over $600. And this is not the only loss. During the quarantine the dairyman's flow of income is disrupted while his expenses continue for feeding and maintaining his herd.

There are also complicating factors. At present, testing procedures are not completely reliable. It is easy to understand the reluctance of a dairyman to give his full cooperation when it is conceivable that his whole herd might be destroyed on the basis of a series of testing errors. There is also some uncertainty about the vaccines. There is no generally accepted adult vaccine. The only viable alternative at present is calfhood vaccination. However, calf hood vaccination is an expensive and time-consuming task. Unless it is conducted uniformly and universally it may be less than futile in any long-range sense.

In my district there are several dairymen who despite their best efforts—including vaccination, new barns, and sophisticated sanitation systems—have had herds under quarantine for 7 years. I know of cases where a dairyman tried to clean up his herd, yet despite, or because of his efforts went bankrupt or lost the farm, sometimes a farm that had been in the family for generations. Still, we are nowhere close to eradication of the disease. Unless something is done, these cases will continue to multiply, and the eradication program may falter from lack of cooperation.

EXPLANATION OF THE RELIEF ACT

Title I of the act requires that the indemnity make up the difference between slaughter price and 95 percent of the fair market value as a dairy cow. Title II will make available vaccine for free distribution by cooperating States, and directs that research and development be directed toward new vaccines and new testing methods. Title III allows dairymen who have Farmers Home Administration loans on their dairy operations to defer payments during the period of quarantine.

I believe that this program will receive the support of all dairymen. In a survey I conducted late last year among 4,400 dairymen in my district, 48 percent of those who responded reported that they had experienced brucellosis in their herd, with the majority (79 percent) reporting low and medium levels of infection. Of those with infected herds, the median range of income loss during the quarantine period including the loss of slaughtered animals was recorded at from 55 percent to 65 percent. The most frequent financial loss per slaughtered head was in the $500 to $600 range (43 percent). The most frequently criticized portions of the program were the testing procedures (69 percent opposed), the indemnity level (63 percent), and the vaccination (62 percent). When asked about proposals similar to those contained within the bill I am introducing, 95 percent favored a higher indemnity, 99 percent favored calfhood vaccination and indicated they would participate, and 98 percent favored allowing deferment of Farmers Home Administration loans.

This survey demonstrates two things: First, the present program is a heavy burden on those who are affected, and second, there is overwhelming support for the provisions of the act. The burden of eradicating brucellosis should not fall entirely on those whose sad luck it is to be stricken by the disease. Often the disease is contracted from a neighboring farm or from infected replacement stock. All cattlemen and all consumers will eventually benefit from the eradication of brucellosis.

A bill follows:

H.R. 11729

A bill to direct the Secretary of Agriculture to establish as program for the purpose of indemnifying owners of dairy cattle which, under any Federal law, are destroyed in order to control or eradicate brucellosis, and for other purposes

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE

SECTION 1. This Act may be cited as the "Brucellosis Relief Act".

TITLE I—BRUCELLOSIS INDEMNIFICATION PROGRAM

COMPENSATION

SEC. 101. (a) Except as provided in section 102, the Secretary of Agriculture shall compensate any farmer or rancher residing in any State, who the Secretary certifies owns any dairy cow which, under any Federal law, is destroyed in order to control or eradicate brucellosis.

(b) The amount of compensation a farmer or rancher receives under this section with respect to a dairy cow destroyed in order to control or eradicate brucellosis shall be equal to the greater of—

(1) the amount which the Secretary determines to be the difference between—

(A) 95 percent of the fair market value of such animal as a dairy cow at the time of its destruction; and

(B) the total amount of compensation the farmer or rancher receives in connection with the destruction of such animal from one or more of the following: the Federal Government under any other provision of law, any State, any other source; or (2) two hundred dollars.

RESTRICTION ON PAYMENT OF COMPENSATION IN CASES OF VIOLATION OF LAW OR REGULATION

SEC. 102. No payment shall be made by the Secretary under section 101—

(1) with respect to any dairy cow which has been moved or handled by the owner thereof or his agent knowingly in violation—

(A) of a law or regulation administered by the Secretary for the prevention of the dissemination of any communicable disease of livestock for which such cow was destroyed, or

(B) of a law or regulation for the enforcement of which the Secretary enters or has entered into a cooperative agreement for the control or eradication of any communicable disease of livestock for which such cow was destroyed, or

(2) with respect to any dairy cow which has moved into the United States contrary to a law or regulation administered by the Secretary for the prevention of the introduction of a communicable disease of livestock for which such cow was destroyed.

TITLE II—VACCINATION PROGRAM; RESEARCH PROGRAM

GRANTS TO THE STATES

SEC. 201. (a) The Secretary, through grants made under contracts or other arrangements with the States, shall undertake and conduct each of the following:

(1) a program for purchasing, and distributing without charge to farmers and ranchers who own cattle, vaccine against contraction of brucellosis by cattle;

(2) a program for notifying farmers and ranchers of the vaccination program conducted under paragraph (1) and for encouraging them to participate in such vaccination program; and

(3) intensive research and studies concerning methods of testing for, and identifying, brucellosis and concerning development of improved vaccines against contraction of brucellosis by cattle.

(b) Any contract or other arrangement made with any State for the conduct of a program under subsection (a)(1) or (a)(2) or research or study under subsection (a)(3) shall contain or be subject to such conditions and requirements (including such fiscal control and fund accounting procedures) as the Secretary may determine to be reasonable and consistent with the objectives of this title.

TITLE III—DEFERRAL OF CERTAIN PAYMENTS ON OPERATING AND EMERGENCY LOANS MADE UNDER THE CONSOLIDATED FARM AND RURAL DEVELOPMENT ACT

OPERATING LOANS

SEC. 301. Section 316 of the Consolidated Farm and Rural Development Act (7 U.S.C. 1946) is amended—

(1) by inserting "(a)" before "The Secretary" in the first sentence of such section;

(2) by striking out "Such" in the second sentence of such section and inserting in lieu thereof "Subject to the provisions of subsection (b), such"; and

(3) by adding at the end of such section the following new subsection:

"(b)(1) Upon the written request of a farmer or rancher—

"(A) who owns dairy cattle which, under any Federal law, are subject to a quarantine imposed in order to control or eradicate brucellosis, and

"(B) who is repaying under this title a loan related to his dairy operation or operations,

the Secretary, under a contract or other arrangement made with such farmer or rancher, shall make all payments of principal and interest which become due on such loan during the period for which such quarantine is in effect and for 60 days thereafter.

"(2) Any contract or other arrangement made with a farmer or rancher under this subsection shall contain or be subject to such conditions and requirements as the Secretary considers necessary to assure that, within a repayment period which the Secretary determines to be reasonable taking into consideration the needs of such farmer or rancher, such farmer or rancher will repay without interest the total amount of all payments made by the Secretary under such contract or other arrangement.

"(3) As used in this subsection, the term 'dairy cattle' means—

"(A) cattle raised for the purpose of producing milk or other dairy products, and

"(B) cattle raised for the purpose of establishing or maintaining a breeding stock of cattle referred to in subparagraph (A).".

EMERGENCY LOANS

SEC. 302. Section 324 of the Consolidated Farm and Rural Development Act (7 U.S.C. 1964) is amended—

(1) by striking out "All" in the second sentence of subsection (a) of such section and inserting in lieu thereof "Subject to the provisions of subsection (d), all"; and

(2) by adding at the end of such section the following new subsection:

"(d)(1) Upon the written request of a farmer or rancher—

"(A) who owns dairy cattle which, under any Federal law, are subject to a quarantine imposed in order to control or eradicate brucellosis, and

(B) who is repaying under this title a loan related to his dairy operation or operations,

the Secretary, under a contract or other arrangement made with such farmer or rancher, shall make all payments of principal and interest which become due on such loan during the period for which such quarantine is in effect and for 60 days thereafter.

"(2) Any contract or other arrangement made with a farmer or rancher under this subsection shall contain or be subject to such conditions and requirements as the Secretary considers necessary to assure that, within a repayment period which the Secretary determines to be reasonable taking into consideration the needs of such farmer or rancher, such framer or rancher will repay without interest the total amount of all payments made by the Secretary under such contract or arrangement.

"(3) As used in this subsection, the term 'dairy cattle' has the same meaning such term has under section 316(b)(3) of this Act.".

TITLE IV—GENERAL PROVISIONS

REGULATIONS

SEC. 401. The Secretary may issue such regulations as he considers necessary to carry out the provisions of this Act.

DEFINITIONS

SEC. 402. As used in this Act, the term—

(1) "dairy cow" or "dairy cattle" means—

(A) any cow or cattle raised for the purpose of producing milk or other dairy products, and

(B) any cow or cattle raised for the purpose of establishing or maintaining a breeding stock of cattle referred to in subparagraph (A); and

(2) "State" means any of the 50 States or the District of Columbia.

EFFECTIVE DATE

SEC. 403. The provisions of this Act shall become effective on October 1, 1978.

POLICY NEEDED TO SOLVE UNEMPLOYMENT PROBLEM

HON. JOHN J. RHODES

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 22, 1978

● Mr. RHODES. Mr. Speaker, I insert the following article for the interest and benfit of my colleagues. It demonstrates the need for the United States to adopt an economic policy which will solve our unemployment problem:

[From Business Week, Mar. 13, 1978]

INVESTING TO UPGRADE THE LABOR FORCE

(By Herbert E. Striner)

This nation's dismal unemployment rate is inexcusable, politically and economically. While successive U.S. Administrations wring their hands over the problem, another major industrial country has rolled up its sleeves and dealt with it. Over the last decade, West Germany has outperformed us on employment, productivity, and inflation control, and we steadfastly refuse to learn the lesson. The West Germans, like most of the West European countries, view their work force as a form of "capital." They assume that this capital must be trained and retrained on a continuing basis to supply the changing spectrum of sophisticated skills needed by a high-technology nation. To do so requires a labor force "investment policy."

Beginning in 1964, West Germany has provided, as a right to every adult, whether employed or unemployed, up to two years of full-time training or retraining. All training costs plus an income subsidy, which can be as high as 90 percent of the last wage, are covered. The income subsidy varies inversely with the last wage. Thus, a low-wage employee loses little income in upgrading his or her skills and increasing productivity. A higher-paid worker will lose proportionately in income, thus guaranteeing there are no frivolous decisions to leave a job. The psychology works. Most people want to make more money rather than less. If they are given help to achieve this goal they will do so. Those needing the most help, but with the most to gain, are the low-paid workers. Hence, they are subsidized the most. But the economy gains the most by their becoming higher-skilled workers. Moving allowances and short-term rental allowances to encourage moving where the good jobs are located are all included.

Because of the success of the West German approach, the French passed similar legislation in 1971, and the British followed in 1975. But even before the German legislation of 1963, the Danes and Swedes had already proven the efficacy of the "investment" approach.

RESISTING AN EFFECTIVE IDEA

Meanwhile, the U.S. has continued to nibble around the edges of the unemployment problem, seeing it as a sort of disguised welfare problem involving people who should be urged to use their bootstraps with minimal help from unemployment payments. We view workers as an asset as long as they are employed. They become a liability when un-

employed, and we are reluctant to spend too much money on them, hoping instead that the economy will improve or they will somehow find some sort of job.

We have had some training programs, of course, but our expenditures have been slight when compared with the relative efforts of West German, French, and, since 1975, British programs. We have not, since the GI bill following World War II, provided both an adequate income supplement and a long enough period of training to do the job of maintaining a work force capable of supplying our advanced industrial and service sector needs. No U.S. Administration has really considered the European experience. Our key policymakers are most often "educated" by economic advisers about the inevitability of the Phillips curve and its trade-off between low unemployment rates and higher inflation. But these economic advisers seldom make the point that each country has a different Phillips curve, with our being one of the worst.

THE WRONG EMPHASIS

We continue to spend money during the hot summers to cool off human tinder. We spend money for public service jobs that can be done by functional illiterates or by workers who can read and write but have too few skills for the better jobs that are vacant in both the public and the private sectors. We urge businessmen to design jobs for low-skilled workers. What a travesty! We perpetuate economic fraud in these efforts. In November, 1977, when the U.S. unemployment rate was about 7 percent, the Conference Board's index of help-wanted advertising reached an all-time peak. The jobs are there, but the trained people are not.

Until we adopt an investment approach to our labor force and spend funds that are really adequate for a continuing upgrading of this key resource, our unemployment rate will remain above acceptable levels. Our $2,000 billion economy probably needs an ongoing training program that covers about 2 percent of our work force each year.

Even when European unemployment rates are adjusted for U.S. data collection methods, the West German rate is around 4 percent, and the French is around 5 percent. Scandinavian rates are, of course, well below 3 percent.

Such a program should be modeled on the German system, which in turn follows the pattern set by our own GI program. It would provide payments and counseling to unskilled workers, but it would let them decide what sort of training they wanted and where they would get it. Private schools, public schools, and on-the-job training programs could then compete on the basis of efficiency.

It will cost a great deal more than we are accustomed to spending for education and training to deal adequately with the problem of an effective work force. But, as every successful businessman knows, you have to spend money to make money. Many of the industrial countries in Western Europe have learned that lesson with respect to their work forces, and their high economic performance has shown it. We have refused to learn from what they have done, especially the West Germans, and our low economic performance has shown it.●

VFW VOICE OF DEMOCRACY CONTEST WINNER IN TEXAS

HON. OMAR BURLESON

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 22, 1978

● Mr. BURLESON of Texas. Mr. Speaker, I am pleased and proud to offer for the RECORD the speech and poem written by my young constituent, Matt Nanny, of Graham, Tex. Matt has received the first place award in the VFW Voice of Democracy Contest for our State of Texas. I commend Matt and offer hearty congratulations on this fine work.

Matt delivered this speech before the annual meeting of the VFW in Washington, D.C., in a most forceful and effective manner and deeply impressed the vast audience who heard him:

AMERICA: NOW

I have written a poem that perhaps depicts what I see as the greatest responsibility that young people of today can know. The poem is narrative in style. It sends a youth of today back to a scene in the Revolutionary War to show him what a soldier that was preparing to die for his country might say to the youth. The soldier's name you will not recognize, for he is many.

The title of the poem is "Americae Amor" which is translated "A Longing for America."

In the dark and gray of twilight,
My mind from hence doth wonder away,
And upon a wintery day I see
An American in quest of liberty.

As my mind wonders yet still,
I gaze beyond the realms of chill—
In times, now past, I fully see
A man with a scarred and bended knee.

Who is this man? Who could he be?
His name is Patrick O'Riley?
Even still, so what?
What good is a man that's about to be shot?

At that very moment, he looked up at me
With a tear that would tear the hardest of hearts.
The words from then on I could not fain forget
As he said, "Son, just sit with me a bit."

As down I sat, he looked me in my eye
And he said, "It shall NEVER be a shame to die!
For though I'm not much, I'm giving my all
To a country whose ears hear liberty call!

"For my children, you see, are going to be free.
They can do what they want, with no king's decree.
This flower, my son, is destined to bloom,
And God's own mighty hand shall protect it from doom!

"So, you see, my lad, death cometh not in vain!
Just look to America and do not disdain,
This land, oh, hold on, and it WILL be free;
The treasure's at hand and you hold the key."

Then a shot sounded out from just behind,
And Patrick O'Riley met death, but mind,
That it was from such people, America was born,
So we could have hope and never be forlorn.

Now, of Our Country 'Tis of Thee,
Our Sweet Land of Liberty,
May we always in unison sing—
And evermore listen as freedom shall ring.

Who is Patrick O'Riley? Well, he is every person that has given his life for America. He is rich and poor, old and young, well-educated and ignorant. He welcomes the chance to talk to the young person. He realizes that the key to the treasure, for which he is dying, is held by the youth. The treasure is to know freedom.

What must the young people of today do to know freedom? There are four easy steps to fulfilling this desire.

First of all, he must listen to those who have "been around awhile." They may seem not to be with it, maybe even a bit senile, but they've lived through problems that the young person is yet to face. Experience is the best teacher, and from listening to them, the young people can better understand the price of freedom.

Secondly, the young person of today must discover his own self. He must ask the questions that bother him the most, and he must be willing to be hurt by the answers. He must search for his deepest convictions. When he finds them, he will have found the Truth. "To thine own self be true" for in this way, we can be true to those around us, our fellow Americans.

Thirdly, in the words of Abraham Lincoln, "United we stand; divided we fall." The young person alone is very small, but as an American, he is a mighty fortress with a wonderful heritage, ready to face the world with pride and dignity.

Finally, as young people have listened to others, searched themselves, and found their role in America, they must meet the biggest and most frightening responsibility growing up and taking control of the America of tomorrow. Many problems will face them. No one ever said it would be easy and it may even call for fighting to preserve these freedoms that we have.

I believe that the majority of the youth today recognize their responsibilities. As I look around, it is evident that the spirit of Patrick O'Riley lives on in today's youth. Tomorrow is an exciting challenge and with a realistic thought and revived belief in God and America, we can exceed the greatest hopes of those who have preserved liberty for us. The feelings of apathy and concern are finally giving way to Americanism!

Tomorrow can be the greatest era that freedom has ever known. It can be—it can be—it will be!●

THE 60TH ANNIVERSARY OF THE BYELORUSSIAN NATIONAL REPUBLIC

HON. FRANK ANNUNZIO

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 22, 1978

● Mr. ANNUNZIO. Mr. Speaker, March 25 marks the 60th anniversary of the independence of the Byelorussian National Republic, and I am glad to have the opportunity today to join my colleagues in the Congress in commemorating this important date in the distinguished history of Bielarus.

The Byelorussian people have been known under most confusing and improper terminology in English as Byelorussians and White Russians. That terminology is incorrect and offensive to Byelorussian national pride, because it was taken from the Russian language and not the Byelorussian language. The Byelorussian Coordinating Committee of Chicago has informed me that the people of their country prefer to be called Byelorussians and prefer the country of their ancestry be called Bielarus.

Mr. Speaker, excerpts from a statement on the occupation and oppression of Bielarus by Soviet Russia issued by the Byelorussian Congress Committee of America follows:

MARCH 3, 1978.

Hon. FRANK ANNUNZIO,
U.S. House of Representatives,
Washington, D.C.

DEAR SIR: March 25, 1978 will be of great significance for American citizens of Byelorussian descent. This will be the 60th anni-

versary of the proclamation of independence for the Byelorussian Democratic Republic. In occupied Byelorussia, this national observance is not allowed by the Soviet Russian Government.

The following events took place in Byelorussia 60 years ago. On December 15, 1917 the First All-Byelorussian Congress assembled in Mensk. It consisted of 1,872 representatives, elected by the people of all ethnographical territories of Byelorussia. Bolchevik-Russian delegates were in a small minority and were not able to influence the Congressional decisions. After the Congress had chosen independence for the Byelorussian State, the Soviet Russian Army dispersed this national representation.

However, on March 25, 1918 the Council of this Congress proclaimed the independence of the Byelorussian Democratic Republic. A new Byelorussian Government organized the administration in the country and started the formation of military forces, schools, cultural activity, and the revitalization of economy devastated by the war.

Ignoring the right of self-determination of nations, Soviet Russia created a fictitious state, the Byelorussian Soviet Socialist Republic (BSSR) on January 1, 1919 and invaded Byelorussia with its own Red Army, and subsequently conquered most of Byelorussia.

All policy of the Soviet Russian Government toward Byelorussia was directed to exploitation of its natural resources and population. At the same time Russia tried to destroy all ethnic and cultural distinctions of Byelorussia. It strove to assimilate Byelorussians transforming them into unified Soviet Russian nation.

Soviet Russian Government, during 60 years of domination, has accomplished a great destruction of the national Byelorussian heritage. Starting in 1927 thousands of Byelorussian intelligentsia were annihilated. The main segment of Byelorussian peasantry, about 2 million, were shot or deported to the concentration camps of Siberia at the time of collectivization of agriculture. Waves of mass terror passed through Byelorussia. They annihilated a new, growing, nationally conscious generation. After World War 2, Russian detachments of political police, called "Smersh", investigated the entire population of Byelorussia. They annihilated around one million "unreliable" Byelorussians.

In reality, the Soviet Russian Government uses a policy of genocide toward the Byelorussian nation. Presently it is intensifying change of city population in Byelorussia into Russian, by sending many Russians there for permanent settlement. Simultaneously, many Byelorussians, mostly educated youth, are transferred to Siberia and other ethnic territories of the USSR.

The Russian language was introduced in the BSSR for use by the government, cultural institutions and schools. Only a small part of the rural schools is allowed to use the Byelorussian language.

85% of the newspapers published in BSSR are in Russian, and only some 10% in Byelorussian. The same relationship exists for magazines and literary books. All scientific and technical literature in the BSSR is printed in Russian only.

In BSSR, the schools, institutions, farms (colkhozes), museums, libraries, cities, streets, etc., are named in honor of Russian communist and tsarist dignitaries, writers, etc.

Russians in Byelorussia are the ruling part of the population. They represent Byelorussia before foreigners, giving the false impression that Byelorussians are the same as Russians. Those Russians are organizing in the entire Byelorussia their own clubs, choirs, folklore entertainments, pushing aside Byelorussian ethnic culture.

Buildings in the BSSR are erected in typical Russian pseudo-classical style. But ancient Byelorussian buildings and monuments of independent style of architecture are destroyed.

The eastern part of Byelorussia, with cities of Smalensk, Bransk, Roslaul, Nevel, etc., annexed to the Russian SFSR, is treated as an eternal part of Russia. Nothing of Byelorussian is allowed in this part.

Despite the huge devastations and severe oppression by Russian Government, the Byelorussian people are preserving their own national character. Byelorussians fought for their independence during World War 1. During World War 2, the Second All-Byelorussian Congress convened in Mensk on June 27, 1944. This Congress annulled all ties of Byelorussia with Russia, and approved a proclamation of independence for Byelorussian Democratic Republic, according to the declaration of 1918. The Byelorussian National Guard fought for the liberation and independence of Byelorussia.

The new Constitution of the USSR, approved in 1977, has changed nothing in the formal and real situation of Byelorussia. The new national anthem of the USSR. approved in 1977, accentuated openly the conqueror's character for the Great Russian nation in the USSR.

We are sure that in the future, when a favorable situation will appear, Byelorussians will fight again with arms in hand for their liberation from Soviet Russian colonialism.

Very respectfully yours,

JOHN KOSIAK,
President.
MICHAEL SIENKO,
Secretary.

Mr. Speaker, I am honored to join Americans of Bielarusian heritage in Chicago and all over this Nation as they celebrate this 60th anniversary of Bielarusian independence and I extend to them my warmest best wishes as they continue to contribute mightily to the United States and its ideals of freedom and human dignity.●

BURYING NUCLEAR WASTE

HON. BOB WILSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 22, 1978

● Mr. BOB WILSON. Mr. Speaker, I recently made a speech about "The New El Dorado—By-Products From Processed Nuclear Fuel" in which I pointed out the costlines of trying to get rid of nuclear powerplant waste by burying it instead of reprocessing it. I want to add some further thoughts.

About half of the oil in the United States is in abandoned wells, too thick to extract without a wasteful expenditure of energy—heat—to make it less viscous. Yet, there is a nuclear fuel processing byproduct, strontium, which could supply a good portion of the needed heat to liquify those trapped oils. The strontium could be almost "for free" if and when the processing of commercial powerplant fuel waste starts. The Government plant at Richland, Wash., has been extracting strontium for years from the wastes of the plutonium production reactors used in the national security program. The strontium was encapsulated in titanium and sold on the commercial market as heat sources. So it can be done.

A multitude of other useful isotopes are also available. The following report by George P. Dix of the Department of Energy—formerly the Energy Research and Development Administration—on "Beneficial Utilization of Nuclear Waste—1977" covers a number of applications. These are not fairy tales like purses out of sows' ears, or gold from straw. Instead of spending $20 billion figuring out how to bury this energy, let's use it.

The report follows:

BENEFICIAL UTILIZATION OF NUCLEAR WASTE—1977

(By George P. Dix)

ABSTRACT

High level waste from the nuclear energy cycle is currently considered to be a national liability, but in the future it could well become a needed asset. The fission product and transuranium ashes of the nuclear fuel cycle contain large and potentially valuable sources of metals, special purpose energy sources, industrial radiation sources, and other unique materials whose intrinsic value is measured in the billions of dollars and whose strategic potential has not yet been realized. This paper elucidates some of the potentials for high level nuclear waste and discusses some of the programs underway today to convert much of this waste from a national liability to a national asset.

I. INTRODUCTION

High level waste from the nuclear energy cycle is currently considered to be a national liability, but in the future it could well become a needed asset. The fission product and transuranium ashes of the nuclear fuel cycle contain large and potentially valuable sources of metals, special purpose energy sources, industrial radiation sources, and other unique materials whose intrinsic value is measured in the billions of dollars and whose strategic potential has not yet been realized. This article will elucidate some of the potentials for high level nuclear waste and discuss some of the programs underway today to convert much of this waste from a national liability to a national asset and reduce the magnitude of the waste management problem.

II. NUCLEAR FUEL CYCLE STATUS

Late in 1976 it was stated that the U.S. should no longer regard reprocessing of used nuclear fuel to produce plutonium as a necessary and inevitable step in the nuclear fuel cycle, and that we should pursue reprocessing and recycling in the future only if they are found to be consistent with our international objectives. With respect to nuclear fuel reprocessing, the agencies of the Executive Branch were asked to implement the decision to delay commercialization of reprocessing activities in the U.S. until uncertainties were resolved. This caused a rather significant effort to reevaluate the nuclear fuel cycle.

Prior to this statement, a vigorous effort was underway to close the nuclear fuel cycle for the dozens of light water reactors operating in the U.S. This effort was to get on with the recovery and recycling of uranium and at some future date, plutonium, and the demonstration of a viable means for disposing of high level nuclear wastes. After extraction of uranium, the waste stream would be vitrified and placed in a geologic formation. This relegated waste byproduct extraction and utilization to a parallel, non-interference, future opportunity. In addition, once the wastes were vitrified and placed in permanent geologic storage, it appeared that the extraction of byproducts would not be economical.

This reexamination of nuclear fuel reprocessing may possibly reopen the issue of

byproduct extraction and utilization. However, it does appear that future economic and strategic resource patterns will evolve and new reprocessing and extraction methods are evolving which may allow this potential to be realized some day. This may not occur until the 1990's, and only if sufficient research and development is done in the interim to provide for the opportunity to separate and utilize byproducts.

III. WASTE BYPRODUCT INVENTORIES

Table I gives an estimate of inventories of selected materials contained in spent nuclear fuel in 1980 and 1990 (in grams). Table II gives the cumulative inventory of selected isotopes in units of radiation (megacuries) and thermal energy (megawatts) at the turn of the century. These estimates are only for U.S. civilian reactors and do not include military reactors. Worldwide inventories could be several times higher. Inventory calculations of this type are dependent upon assumptions of the installed nuclear electrical capacity, the reactor and fuel cycles, and other factors and generally vary by a factor of 2 or 3 depending upon the assumptions.

It is clear that a large inventory of various strategic materials will be present in the spent fuel elements. It is not clear whether or not they will be extracted and utilized.

TABLE I.—ESTIMATED AVAILABILITY OF SELECTED MATERIALS IN GRAMS

	Year[1]	
	1980	1990
Stable krypton	3.0×10^{6}	2.5×10^{7}
Stable xenon	4.4×10^{7}	3.6×10^{8}
Stable palladium	1.1×10^{7}	6.0×10^{7}
Stable ruthenium	1.8×10^{7}	1.6×10^{8}
Krypton-85	2.0×10^{5}	1.3×10^{6}
Strontium-90	4.1×10^{6}	3.4×10^{7}
Cesium-137	9.5×10^{6}	8.0×10^{7}
Promethium-147	5.1×10^{5}	2.7×10^{6}
Technetium-99	6.8×10^{6}	6.1×10^{7}
Ruthenium-106	3.3×10^{5}	2.0×10^{6}
Rhodium-103	3.2×10^{6}	3.3×10^{7}
Neptunium-237	3.9×10^{5}	3.6×10^{7}
Plutonium-238	5.2×10^{4}	8.5×10^{5}
Curium-244	3.3×10^{5}	2.0×10^{6}
Americium-241	4.2×10^{5}	6.5×10^{6}

[1] Installed nuclear generating capacity 1980 (85 GWe), 1990 (400 GWe).

TABLE II.—NUCLEAR WASTE INVENTORIES BY THE YEAR 2000† (SELECTED NUCLIDES

Nuclides	Inventory‡ (megacuries)	Annual generation rate (megacuries)	Thermal inventory (megawatts)	T-1/2 (years)	Thermal output (megawatt-hours)*
^{90}Sr	10,000	770.0	67.0	28.6	12,500,000
^{137}Cs	15,600	1,500.0	74.0	30.0	14,600,000
^{85}Kr	1,200	150.0	1.8	10.0	118,000
^{238}Pu	31	.2	1.0	87.8	576,000
^{244}Cm	260	23.0	8.9	18.1	1,057,000
^{147}Pm	8	1.1	2.9	2.6	64,000

†See the following table:

	Year	10^{3}W(e)
Installed Capacity	1980	153
	1990	368
	2000	735

‡LWR fuel processing inventory 90 days and LMFBR 30 days after discharge from reactor.
*Computed over 1 half-life of the radioisotope.

IV. WASTE BYPRODUCT EXTRACTION

The inventories listed in Tables I and II are inventories contained in the high level wastes. Chemical or physical separation processes are required to extract individual elements and more exotic processes are required in some cases to separate or enrich a given isotope within an element to facilitate its use. The chemical separation processes for all elements have already been demonstrated. Certain isotope separation processes, such as centrifuge, laser and other methods, are under intensive development for uranium enrichment and will be applicable to enriching or segregating specific by-product isotopes.

Extraction costs are uncertain at this time although it is clear that it will be more cost-effective to extract suites of elements or multiple by-products than to extract one product (e.g., uranium) in a reprocessing plant. In addition, subsequent nuclear waste management could be facilitated by removal for use of the majority of the heat-producing nuclides, those with penetrating radiation, and those having extremely long half-lives. Trade-offs of how by-product extraction could facilitate waste management or enhance the economics of nuclear fuel reprocessing have not been updated. A 1965 paper by Rohrmann of PNL indicated a by-product net value of $232,538 per tonne of spent fuel equivalent to a net of $232 per kilogram or 1.055 mills per electrical kilowatt-hour for nuclear electricity.

Strontium fluoride and cesium chloride are currently being separated from the military high level wastes at Hanford, Washington. Strontium and cesium capsules are now being produced at the Hanford Waste Encapsulation and Storage Facility. Hundreds of these capsules are being produced and stored in a pool there to dissipate their heat, which is about 1 KW(t) for the strontium capsules and 300 W(t) for the cesium capsules. Unfortunately, the capsules were designed for pool storage, and studies are underway to determine the modifications required for their utilization in irradiators and special-purpose thermal and thermoelectric devices. One of the problems is to obtain by-products for demonstrating their various applications. The only resource of separated nuclear waste is from the government production and military reactor operations and these are waste management-oriented. As such, it is difficult to obtain most by-products in sufficient amounts and suitable form to perform the requisite experiments to demonstrate applications which in turn will drive the requirements to separate by-products and, ultimately, to affect their utilization.

V. APPLICATIONS FOR WASTE BY-PRODUCTS

ERDA has a modest but active program to explore the utilization of nuclear waste by-products. This program is to evolve an applications base and explore factors including societal benefit, identification of those applications utilizing large quantities of by-products, safety, environmental compatibility, and cost effectivity.

Several applications have been identified which have multibillion dollar potentials. These include the use of radiocesium to convert sewage sludge to fertilizer, use of platinum family metals for catalytic processes or corrosion-resistant materials, and transuranium elements for special-purpose energy sources and detection or metering devices. Other applications of lesser economic value have been demonstrated including self-luminous light sources, food irradiation, and remote power supplies.

A number of other applications for waste by-products will be studied as time and resources permit. Although new applications will ultimately be found, it is not expected that a consummate scenario, wherein all the wastes can be ultimately utilized, will evolve. Thus, disposal of some nuclear waste (e.g., radioiodine) may always be required although high level waste disposal should be facilitated if the primary heat and radiation-producing nuclides are extracted. For example, radiostrontium constitutes about 8% and radiocesium about 9% of the thermal energy in nuclear wastes initially and much higher percentages as wastes age. Therefore, if they are utilized in beneficial applications, such as those discussed herein, heat management of the residual wastes should be facilitated.

VI. PLATINUM-GROUP METALS

The Platinum-group of metals consists of platinum, palladium, rhodium, iridium, ruthenium, and osmium. Nearly all of the world production of these metals is in South Africa (49%), U.S.S.R. (44%), and Canada (6%). They serve primarily as catalysts and corrosion-resistant materials. Although the U.S. recycles these metals to the extent of 10% of our needs, 90% of our needs are met by imports. Our heavy import dependence for these critically important industrial metals has strategic implications and the outflow of dollars ($503 million in 1974) will continue to adversely affect the U.S. balance of payments in the future. From now to the year 2000 the U.S. will require 1.7 billion grams and the entire world will consume greater than 6.2 billion grams of these metals. By comparison U.S. mines are forecast to supply only a fraction of one percent of our domestic reserves estimated to be about 30 million grams. Some of the platinum-group metals may substitute for one another in industrial applications.

The nuclear wastes contain large amounts of palladium, rhodium, ruthenium, and the transitional element, technetium, which in large measure could serve our industrial needs. Although, they vary from slightly radioactive to sufficiently radioactive to delay from use for 20–25 year periods, they could be used, as is, in closed systems, and new methods are now being developed to separate the radioactive isotope from the metal element.

In the light of mounting balance of payments problems, our total dependence on foreign suppliers with regard to availability and cost of these metals, the rising U.S. need for catalysts and exotic metals, and uncertain supply scenarios, the extraction of these metals from the nuclear wastes should be carefully considered.

The cumulative U.S. demand for palladium from 1973–2000 is given as 746 million to 1 billion grams. Our domestic reserves of palladium are thought to be 300,000 to 600,000 grams. By comparison, in 1990 the nuclear wastes are estimated to contain 60 million grams of fission product palladium, with a factor of 5–10 more by the year 2000. Fission product palladium contains six palladium isotopes (^{104}Pd, ^{105}Pd, ^{106}Pd, ^{107}Pd, ^{108}Pd, and ^{110}Pd). Of these only Palladium-107 is very slightly radioactive, and could have restricted use in industrial applications without creating a health hazard. Over 80 percent of the fission palladium is non-radioactive.

The cumulative U.S. demand for rhodium from 1973 to 2000 is 59 million to 87 million grams. Domestic production of rhodium never exceeded 62,000 grams per year and it ceased in 1967. There will be about 31 million grams of rhodium in the wastes by

1990 and the quantities available in 2000 should be sufficient to meet our domestic needs. Unless radioactive species are removed from the fission product rhodium by advanced isotope separation means; it must be stored or used only in closed systems for 20 years before its radioactivity reaches levels suitable for unrestricted use.

Ruthenium has applications in electronics, superconductivity, and oxidation resistance. It costs approximately $2 per gram and is imported from abroad. There will be approximately 93 million grams of ruthenium in the nuclear wastes by the year 1990 and 5 to 10 times more by 2000. Ruthenium-106 produces 33 thermal watts per gram and must either be removed from the ruthenium or be held up for 25 years for radioactive decay to permit unrestricted use of the remaining ruthenium metal.

Technetium does not occur in nature but is a substitute for platinum in the production of anti-knock fuels and in antifouling and corrosion resistant surfaces. The inventory of fission product technetium by 1990 will be about 62 million grams. As the needs for catalysts to produce liquid fuels, without additive, increase this may become a vital resource.

In summary, in gross terms our U.S. resources of fission product platinum-family metals will approximate our domestic needs before the year 2000. We are essentially dependent upon imported supplies of these materials and possess less than 31 million grams of natural domestic reserves of these materials versus requirements of 1.7 billion grams from now until 2000.●

PRESIDENT'S INFLATION PROGRAM

HON. JOHN J. RHODES

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 22, 1978

Mr. RHODES. Mr. Speaker, I understand that tomorrow the President will at long last announce a program to control inflation. In anticipation of this long overdue event, I want to welcome the President to the club. This club is a large one, comprising the 82 percent of the American people who believe, according to a just-released Harris Poll, that inflation is the most serious domestic problem we face. There is still room for Mr. Carter, however, even if it did take him the 427 days he has been in office to come to the conclusion that inflation was a big and real problem.

Now newspaper reports indicate that the centerpiece of the Carter anti-inflation program will be the requirement that Federal agencies assess the inflationary effects of proposed rules and regulations. I expect every Member of the Congress will join me in applauding this proposal. But what Mr. Carter may neglect to tell the American people is that the requirement for inflation impact statements for regulations was originated by President Ford in 1974. While the requirement brought howls of pain from OSHA and EPA and all the other regulatory agencies, the last Republican administration was able to stop some very inflationary regulations by firmly enforcing the requirements through the cabinet-level Economic Policy Board. What Mr. Carter is highly unikely to mention is that just before leaving office in January of 1977, President Ford extended the Inflation Impact program for another year, but the requirements were not enforced by the Carter administration, and therefore very few regulatory agencies prepared inflation impact statements. What Mr. Carter will never admit to is that when the Executive Order mandating inflation impact statements came up for renewal in January 1978, he let it expire. That's right, he let all the regulatory agencies off the inflation-hook by letting the program expire.

So tomorrow, when the President announces his anti-inflationary program, he ought to be asked to explain why he let the inflation impact program expire. He should explain why in the future the requirements of the program will be enforced not by a cabinet-level working group but instead by a collection of subcabinet officials. Indeed, I hope the President will be able to explain why it has taken him over a year to show any movement whatsoever in fighting inflation.

UNICO AWARDS

HON. PETER W. RODINO, JR.

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 22, 1978

● Mr. RODINO. Mr. Speaker, on Sunday, March 12, I attended the third annual achievement awards breakfast of the Newark Chapter of UNICO National. This organization of Americans of Italian descent is well known for its service to the community and its furthering of the Italian heritage in America. The UNICO awards go to those who have distinguished themselves in a particular area and who exemplify high moral standards. The five people who have been honored by Newark UNICO were all familiar faces, having spent most or all of their lives in the Newark area, and their achievements have not gone unnoticed.

Mrs. Anne Pannullo is active in several church organizations, and spends much time at St. Mary's Orphanage and teaching Christian doctrine at St. Joseph's School. Mr. Anthony Verducci has dedicated the last 22 years of his life to encouraging young athletes at Seton Hall Preparatory School. As a physical education teacher and football coach, Tony is known as one of the most successful coaches in the State, as is his brother Frank, another award winner. Frank, who is now chairman of the department of health and physical education at Barringer High School, has brought Barringer five city championship teams and was named 1977 High School Football Coach of the Year by the Newark Star-Ledger. The fourth honoree, Chester Parlavecchio, is a young man who has distinguished himself at Seton Hall Prep as an all-State football player and a member of the all-American high school football team. He plans to attend Penn State University and I am sure he will continue to make his family and friends very proud of him. The last award winner is someone I know very well because we have worked together to improve Newark's housing situation ever since he began working for the Newark Redevelopment and Housing Authority in 1965. Robert Notte, now executive director of that organization, is one of the most dedicated—and extremely effective—public servants I have ever known in my long career in the Congress. The citizens of Newark are lucky to have him, and I am very proud to call him my friend.

Mr. Speaker, all of these award winners, Anne Panullo, Tony Verducci, Frank Verducci, Chet Parlavecchio, and Bob Notte, are all recognized as distinguished members of our community. I was happy to be with the UNICO members to honor these fine citizens and I salute their achievements.●

FEDERALLY CHARTERED SAVINGS AND LOAN ASSOCIATION LENDING POWERS

HON. FERNAND J. ST GERMAIN

OF RHODE ISLAND

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 22, 1978

● Mr. ST GERMAIN. Mr. Speaker, on March 2, 1978, Chairman REUSS and I introduced the Urban Lending Act of 1978. That bill was proposed by Chairman Robert H. McKinney of the Federal Home Loan Bank Board to pave the way for increased participation by the Nation's savings and loan associations in redeveloping our cities. This would be accomplished by granting savings and loans authority to:

First, invest in urban areas participating in community development block grant or other Federal dollars city aid programs;

Second, have substantially increased investments in rehabilitation and home improvement loans; and

Third, invest in State and local sponsored housing finance agencies.

These changes, however, will be more understandable as a result of a simplification of 5(c) of the Home Owners' Loan Act.

Presently, the language in 5(c) is unnecessarily complex. This often results in misunderstanding by legal as well as lay minds. Straightforward English rather than legal mumbo jumbo is needed in this and other sections of our banking codes. To that end I am joined in the cosponsorship today of this bill by a number of my colleagues who serve on the House Committee on Banking, Finance and Urban Affairs.

The bill represents an effort to streamline the statute which governs the general lending and investment authority of Federal savings and loan associations. The new section is shorter and clearer. The only substantive changes in savings and loan authority are those contained in the Urban Lending Act of 1978—which are incorporated into this proposal.●

THE OLIN E. TEAGUE VETERANS HOSPITAL

HON. RONALD M. MOTTL

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 22, 1978

● Mr. MOTTL. Mr. Speaker, one of the priority goals of the Veterans of Foreign Wars' current legislative program is the enactment of legislation to designate the Washington, D.C., Veterans' Administration Hospital, the "Olin E. Teague Veterans Hospital."

In accordance with that organization's request, I am introducing a bill today that would accomplish that goal.

Legislation is already pending to name the VA hospital at Temple, Tex., after the distinguished former chairman of the Committee on Veterans' Affairs. I am sure there will be others. The accomplishments of the gentleman are such that it would be appropriate for any VA facility to bear his name.

Mr. Speaker, the membership of the Veterans of Foreign Wars is limited to veterans who have served overseas on active duty in our Armed Forces during a period of war or national peril for which a badge or medal was authorized. It is logical that an organization with so many of its members having experienced combat action against the enemy would automatically identify with TIGER TEAGUE. TIGER TEAGUE has a war record which has earned him the tribute all the years he has been in the Congress as the Member with the most military decorations.

It was the third Purple Heart decoration for gunshot wounds inflicted by the enemy in Europe that eventually sent TIGER TEAGUE back to the United States for a long period of convalescence. As a patient recovering from extensive wounds, TIGER was to gain an insight into the desires, concerns, and needs of veterans that was to be extremely helpful in the years ahead as a Member of this great body.

Perhaps it was fate that TIGER TEAGUE was elected to serve on the Veteran's Affairs Committee, and in a few years to become its chairman. During his years in Congress he has successfully championed the causes of veterans and was the leader in building a structure of veterans' rights and benefits unparalleled throughout the world. TIGER has authored more veterans' legislation than any other Member of Congress since the founding of this Republic. More importantly, he provided the leadership necessary to get the legislation enacted into law.

It is only fitting and proper that the VFW would urge Congress to name a VA facility in honor of TIGER TEAGUE. By choosing the VA hospital in the Nation's Capital, the VFW has chosen the one hospital which perhaps is symbolic of all VA hospitals because of its location.

Mr. Speaker, I am sure other bills will be introduced to name various VA hospitals in TIGER'S honor. As I indicated before, any one of the existing hospitals would be appropriate. Therefore, I am pleased and honored to introduce this bill today for the VFW which proposes to honor the one Member of this body who respectfully deserves the title "Mr. Veteran."●

GREEK INDEPENDENCE DAY

HON. RONALD A. SARASIN

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 22, 1978

● Mr. SARASIN. Mr. Speaker, March 25 marking the 157th anniversary of the Greek war for independence, it is with great pleasure that I give tribute to that nation whose contributions and influence transcend the boundaries of time and history to inspire and bear fruitful consequences for modern civilization. The Greeks earn the respect, admiration, and appreciation of all of us who have come to love and cherish the very principles of democracy: The dignity of the individual, the sovereignty of the State, and the primacy of freedom, virtue, and integrity. These are the pillars of our Nation—pillars that have their foundation in the Golden Age of Classical Greece and around which have flowered our own American tradition and law.

If Greek influence had merely been political, they would have been long remembered in the annals of world history. However, their talents have touched and embellished every aspect of life—from art and architecture, to athletics, mathematics, science, and law, to mention only a few. Indeed, a short tour of our Nation's Capital betrays not a mild touch of Greek heritage as it is immortalized in the architecture of the Lincoln Memorial, the Treasury Building, and the Capitol itself.

The benefits that our Nation has shared with the heritage of Greece are not only derived from its classical period, however, and the innumerable contributions of both contemporary Greeks and Greek-Americans are deserving of their due tribute. The continual efforts of Greece in preserving peace and freedom whenever imperiled—as in World War II against the Fascists, or in the more recent battle against communism—are ready reminders to us all that Greece is at our side to keep the spirit of freedom and liberty forever alive.

Greek-Americans do much to strengthen this noble heritage in the society of 20th century America. Since their first settlement in North America in New Smyrna to the present day, they have continually made invaluable contributions to their community, their nation, and the betterment of life for all. As educators, humanitarians, scientists, and politicians, they have stepped to the forefront in preserving a heritage and a philosophy of life on which the very foundation of America has been built.

It is, then, with great pride that I applaud this nation and its people on an occasion that serves as a reminder to all Americans of their very own principles that will hopefully one day become a reality for all—independence, freedom, and liberty for all peoples everywhere. It is with best wishes that I join them in celebrating the Independence of their homeland—the ancient motherland of American ideals.

CLASSIFYING PCP AS A SCHEDULE I DRUG AND ESTABLISHING MANDATORY MINIMUM PRISON SENTENCES FOR ITS ILLICIT MANUFACTURE OR SALE

HON. BENJAMIN A. GILMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 22, 1978

● Mr. GILMAN. Mr. Speaker, within the past few years, phencyclidine (PCP) has become the major hallucinatory drug of abuse, supplanting the mind-altering LSD that was popular among this Nation's youth during the mid-1960's and early 1970's. Some experts, including NIDA's Director Dr. Robert DuPont, regard PCP as "the most dangerous drug to hit the streets" and to be consumed by our youngsters.

Effective February 24, 1978, phencyclidine was transferred by an administrative ruling (43 F.R. 3359) from schedule III to schedule II of the Controlled Substances Act, thereby upgrading the warning to the public that consumption of this hallucinatory drug "may lead to severe psychological or physical dependence," but also acknowledging that despite its "severe restrictions" this dangerous drug, under schedule II standards, has "a currently accepted medical use in treatment in the United States."

PCP, commonly known as "angel dust," "hog," "tic," "tac," "PeaCe Pill," and other street names was originally developed in the 1950's by Parke, Davis & Co. as an anesthetic but was discontinued when many patients developed severe postoperative reactions that proved unacceptable for human use. Although PCP has not been approved for medical use in humans, it has been medically approved for veterinarian use as an animal tranquilizer, and accordingly was not placed as a schedule I controlled substance as recommended by the National Institute on Drug Abuse (NIDA).

According to some medical scholars, PCP "has no equal in its ability to produce psychoses nearly indistinguishable from schizophrenia." In a paper entitled, "The PCP Psychoses: A Hidden Epidemic," Dr. Paul V. Luisada, a leading medical authority on PCP at Saint Elizabeths Hospital here in the Nation's Capital, has characterized PCP psychosis as follows:

> The PCP psychosis may be defined as a schizophreniform psychosis which occurs in some individuals after phencyclidine use and which persists for more than a day. The psychosis may last for days or weeks despite abstinence, and it characteristically becomes more severe during the first few days of its course.
>
> The psychosis is characterized by the appearance of the cardinal signs of schizo-

phrenia and unpredictable aggressive or withdrawn behavior. Characteristically, there is autistic and delusional thinking, commonly including global paranoia, delusions of superhuman strength and invulnerability, as well as delusions of persecution and grandiosity. A formal thought disorder, with loosening of associations, blocking and auditory hallucinations can be demonstrated. Affect is generally blunted, with periods of suspiciousness often alternating with extreme anger or terror. Patients are ambivalent and unpredictable even toward their close friends and relatives.

Behavior is extremely unpredictable. These patients may be reluctantly cooperative one minute and violently assaultive the next. Some carry lethal weapons to protect themselves from their imagined persecuters. Bystanders have often been furiously, unpredictably and unremittingly attacked without provocation because the psychosis may include both extreme global paranoia and delusions of superhuman strength.

An estimated 7 million individuals mostly between ages 12 and 25, have reportedly tried this mind-crippling drug. Data gathered by the Drug Enforcement Administration (DEA) from hospital emergency rooms, medical examiners, and crisis centers indicate that between 1975 and 1976 the number of PCP patients rose from 2,431 to 3,283, or an alarming 35-percent increase within the 2 years. Unfortunately, these figures do not reveal the depth and magnitude of the PCP problem, since not all cases of PCP abuse are reported, and since this hallucinatory drug produces symptoms that mimic schizophrenia, cases of PCP usage are frequently misdiagnosed by medical personnel.

However, the amount of PCP dosage units removed from this Nation's streets by the DEA and DEA task forces clearly demonstrate the national significance of this drug abuse problem. In 1974, DEA agents seized 1,597,000 PCP dosage units; in 1975, the seizure of PCP dosage units escalated to 1,844,000 and declined in 1976 to 1,713,000 (but an increase of 116,000 dosage units from the 1975 seizure). Last year, PCP abuse reached epidemic proportions. In 1977, the amount of PCP dosage units removed from our streets by DEA agents rocketed to 3,518,000, or more than twice the amount of PCP removed the previous year. During this same 4-year period, the number of DEA arrests for the illicit manufacture or sale of PCP rose by nearly 59 percent; from 176 arrests in 1974 to 279 arrests in 1977.

PCP abuse has become a drug crisis for this Nation. It has reached epidemic proportions among teenagers who are the primary users of this pernicious drug, and New York, Chicago, Detroit, San Francisco, Los Angeles, and this Nation's Capital are currently the major illicit manufacturing and distributing centers for this dangerous substance. Law enforcement authorities have attributed hundreds of murders, suicides, accidental deaths, and bizarre, self-inflicted injuries, to PCP intoxication. New York State Police, Troop F, which is headquartered in Middletown, N.Y., in my congressional district, have stated that arrests resulting from PCP are increasing in Orange, Ulster, and Sullivan counties. Nearly one-third of San Diego's 126 deaths by drug overdose have been attributed to PCP abuse.

Dr. Luisada, who has examined more than 100 PCP patients in the last 3 years, has stated that during some months between 1975 and 1976, admissions for PCP intoxication reached epidemic proportions at Saint Elizabeths Hospital and that "PCP psychosis became our leading inpatient psychiatric admissions, surpassing both schizophrenia and alcoholism." He also maintains that "PCP presently remains the major drug abuse in the Washington Metropolitan area." Richard L. Hamilton, Director of Maryland's Drug Abuse Administration, recently stated that 32 percent of the patients enrolled in drug-treatment programs in Maryland "have had some problems with PCP."

Mr. Speaker, unlike heroin, cocaine, and some other dangerous drugs that involve intricate cultivation processes grown only in certain regions of the world and then manufactured, transshipped and distributed internationally by organized criminal syndicates, PCP is a nonnarcotic, synthetic drug that can be manufactured in any part of the world. Anyone with an elementary knowledge of chemistry can turn out this hallucinatory drug from over-the-counter chemicals. The manufacturing process is easy. The chemicals are readily available and inexpensive. An estimated $100 worth of chemicals can produce PCP worth a street value in the United States of about $100,000.

PCP is also easy to market. It can be sprayed as a liquid or sprinkled as a crystal on marihuana, tobacco, or parsley; it can appear in the form of a tablet, capsule, or powder. The PCP user can smoke, inhale, swallow, or inject this hallucinatory product and its more than 30 analogues, the effects of which cause unpredictable behavior to the user—producing irrational and violent behavior, delusions of grandeur and superhuman strength, and delusions of persecution. Under the influence of PCP, the user is clearly a danger to himself and to those around him. With these dangers in mind, it is puzzling as to why anyone, particularly youngsters, would want to take this deadly drug.

Mr. Speaker, because of the direct and immediate danger that PCP presents to both the user and to society, I am today introducing legislation that (1) would place phencyclidine into schedule I of the Controlled Substances Act and (2) would establish within section 401(b)(1)(B) of that act, which governs penalties for nonnarcotic schedule I and schedule II drugs, mandatory minimum prison sentences for those who unlawfully manufacture, dispense or distribute PCP or any of its analogues, derivatives or variants.

The criteria for placing a drug into schedule I of the Controlled Substances Act are threefold: First, the drug must have "a high potential for abuse"; second, the drug must not have "a currently accepted medical use in treatment in the United States"; and third, "there is a lack of accepted safety for use of the drug or other substance under medical supervision."

PCP meets all three criteria for being classified as a schedule I drug. The record is clear with regard to the abuse and danger that this hallucinatory, psychoses-schizophrenia producing drug presents to the user and to those around him, and because of these dangers, PCP has not been medically approved for treatment in humans with assurances that the patient, under medical supervision, would be safe from the postoperative effects of this dangerous drug.

Unlike heroin, a narcotic, addictive-causing pain killer, some thought has been given as to whether this drug should be used for terminally inoperative cancer patients, thereby minimizing the pain and suffering that these patients undergo. Mr. Speaker, PCP does not possess this redeeming quality. It is a pernicious drug and accordingly should receive the most stringent warning and control available under the Controlled Substances Act.

Under the leadership of the distinguished Senator from Illinois (Senator PERCY), the Senate overwhelmingly adopted his amendment to place PCP as a schedule I drug in S. 1437, the Federal Criminal Code, that passed the Senate on January 30, 1978. In my view, it is now time for the House to act to classify PCP as a schedule I drug and also to provide stiff mandatory minimum prison sentences for the unlawful manufacture or distribution of this horror drug.

With regard to the second aspect of my measure—the unlawful manufacture, distribution or dispensing of PCP—anyone convicted of violating this proposed legislation, which differs from S. 1437, would be subject to a mandatory minimum sentence of 3 years in prison with no parole eligibility. A convicted felon, regardless of whether the first conviction was drug-related, who subsequently is convicted of violating this measure, as a two-time offender, would be subject to a mandatory minimum sentence of not less than 7 years in prison with parole eligibility after serving a prison sentence of 5 years.

With regard to an individual who unlawfully distributes or dispenses PCP or any of its derivatives to a person under 21 years of age, the convicted violator would be subject to a mandatory minimum sentence of 8 years in prison with no eligibility for parole. An individual convicted of a felony, regardless of whether the prior conviction is drug-related, would be subject, as a two-time offender, to an imprisonment of not less than 11 years with parole eligibility after serving a prison sentence of 9 years.

Any sentence imposed under my proposal would not be suspended and probation would not be granted.

A court of competent jurisdiction would, however, have discretion and flexibility to reduce the term of parole ineligibility or imprisonment, to provide a term of imprisonment with no term of parole ineligibility, to place the violator on probation, or to suspend the sentence if the court found that (1) the individual's mental capacity was significantly impaired, (2) the individual was under unusual duress, (3) the individual was an accomplice whose participation in the prohibited offense was relatively minor,

or (4) if the court found that after the arrest, the individual supplied law enforcement officials with information useful in the apprehension of anyone who violated this proposed measure.

Mr. Speaker, transferring PCP from schedule II to schedule I without providing stiff, mandatory minimum prison penalties for its unlawful manufacture or distribution would amount to cosmetic legislation, since the penalty for violating section 401(b)(1)(B) of the Controlled Substances Act includes, among other penalties, a sentence of not more than 5 years in prison, which, in my view, is not very stringent considering the devastating mind-crippling effects that PCP can cause to its user. Commenting on the relatively lenient Federal and State penalties for the unlawful manufacture and distribution of PCP and several Maryland proposals to increase its penalties, The Washington Post, in an editorial entitled, "PCP: Infernal 'Angel Dust'" (Feb. 27, 1978, stated:

We suspect that as the terrifying effects of PCP become better known, more states will want to consider the thinking behind the Maryland proposals: That is, that given the ease with which PCP can be illegally produced and the profits that can be realized from its sale, it's important now to up the stakes for those who are either now in or considering this illegal line of work.

Mr. Speaker, in the interest of providing the most stringent Federal warning to the public regarding PCP abuse by classifying it as a schedule I drug and in the interest of clamping down on those who illicitly manufacture or distribute this horror drug to our teenagers, I am at this point in the RECORD inserting the complete text of my bill and will welcome the support of my colleagues to provide stiff, mandatory minimum penalties to those merchants of human suffering:

H.R. —

A bill to place phencyclidine in Schedule I of the Controlled Substances Act, to amend the Controlled Substances Act to increase the criminal penalties under that Act for the unlawful manufacture, distribution, or dispensing of, or the possession with intent to distribute or dispense, phencyclidine and to increase the penalties under that Act for illegal distribution of phencyclidine to persons under 21 years of age, and for other purposes

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 202 of the Controlled Substances Act (21 U.S.C. 812) is amended—

(1) by repealing "(7) Phencyclidine." in Schedule III(b);

(2) by deleting the numbers "(8)", "(9)", and "(10)" in Schedule III(b) and inserting in lieu thereof the numbers "(7)", "(8)", and "(9)"; and

(3) by adding "(18) Phencyclidine." at the end of Schedule I(c).

SEC. 2. Section 401(b) of the Controlled Substances Act (21 U.S.C. 841(b)) is amended by inserting after "such person shall" in the first sentence of paragraph (1)(B) the following: ", except as provided in paragraphs (4) and (5) of this subsection,", and (2) by adding after paragraph (4) the following new paragraph:

"(5)(A) Except as provided in subparagraph (B), in the case of a violation involving phencyclidine or any analogue, derivative, or variant of phencyclidine that is in a schedule under this title, such person shall be sentenced to a term of imprisonment of not less than 3 years. In imposing a sentence of imprisonment under this subparagraph a court shall, notwithstanding section 4205 of title 18, United States Code, designate in such sentence a minimum term of 3 years which must be served before the person subject to such sentence would become eligible for parole.

"(B) If any person commits a violation of subsection (a) with respect to phencyclidine or any analogue, derivative, or variant of phencyclidine that is in a schedule under this title after one or more prior convictions for an offense punishable under this paragraph or for any other felony under any other provision of law, such person shall be sentenced to a term of imprisonment of not less than 7 years. In imposing a sentence of imprisonment under this subparagraph a court shall, notwithstanding section 4205 of title 18 United States Code, designate in such sentence a minimum term of 5 years which must be served before the person subject to such sentence would become eligible for parole.

"(C) In the case of any sentence imposed under subparagraph (A) or (B), imposition or execution of such sentence shall not be suspended and probation shall not be granted. A term of imprisonment imposed on a person under subparagraph (A) or (B) shall run consecutively to any other term of imprisonment imposed on such person, and a term of parole ineligibility imposed on a person under subparagraph (A) or (B) shall run consecutively to any other term of parole ineligibility imposed on such person.

"(D) Notwithstanding the provisions of subparagraph (A) or (B), the court may sentence any person who violated section 401(a)(1) by manufacturing, distributing, or dispensing phencyclidine or any of its analogues, derivatives, or variants to a shorter term of parole ineligibility or imprisonment than required under subparagraph (A) or (B), to a term of imprisonment with no term of parole ineligibility, or to probation, or may suspend imposition or execution of the sentence, if the courts finds that, at the time of the violation—

"(1) such person's mental capacity was significantly impaired, although not so impaired as to constitute a defense to prosecution.

"(2) such person was under unusual and substantial duress, although not such duress as would constitute a defense to prosecution, or

"(3) such person was an accomplice, the conduct constituting the offense was principally the conduct of another person, and such person's participation was relatively minor,

or if the court finds that after the arrest of such person such person supplied law enforcement officials with information useful in the apprehension of any other person who violated this title.".

Sec. 3. Section 405 of the Controlled Substances Act (21 U.S.C. 485) is amended—

(1) in subsections (a) and (b) by striking out "at least eighteen years of age" wherever it appears in such subsections; and

(2) by adding at the end of such section the following new subsection:

"(c)(1) Except as provided in paragraph (2), the court, in setting the sentence under section 401(b)(1)(B) of any person who violated section 401(a)(1) by distributing or dispensing phencyclidine or any analogue, derivative, or variant of phencyclidine that is in a schedule under this title to a person under twenty-one years of age, shall not sentence such person to probation or suspend imposition or execution of the sentence, or sentence the person pursuant to chapter 402 of title 18, United States Code, but shall—

"(A) except as provided in subparagraph (B), sentence such person to a term of imprisonment of not less than eight years and shall designate a term of parole ineligibility of not less than eight years; or

"(B) sentence such person to a term of imprisonment of not less than eleven years and shall designate a term or parole ineligibility of not less than nine years, if such person committed such violation after such person had been convicted of a felony.

A term of imprisonment imposed on a person under this subsection shall run consecutively to any other term of imprisonment imposed on such person, and a term of parole ineligibility imposed on a person under this subsection shall run consecutively to any other term of parole ineligibility imposed on such person.

"(2) Notwithstanding the provisions of paragraph (1), the court may sentence any person who violated section 401(a)(1) by distributing or dispensing phencyclidine or any analogue, derivative, or variant of phencyclidine that is in a schedule under this title to a person under twenty-one years of age to a shorter term of parole ineligibility or imprisonment than required under paragraph (1), to a term of imprisonment with no term of parole ineligibility, or to probation, or may suspend imposition or execution of the sentence, if the court finds that, at the time of the violation—

"(A) such person's mental capacity was significantly impaired, although not so impaired as to constitute a defense to prosecution,

"(E) such person was under unusual and substantial duress, although not such duress as would constitute a defense to prosecution, or

"(C) such person was an accomplice, the conduct constituting the offense was principally the conduct of another person, and such person's participation was relatively minor,

or if the court finds that after the arrest of such person such person supplied law enforcement officials with information useful in the apprehension of any other person who violated this title.".●

FARM BILL

HON. LARRY PRESSLER

OF SOUTH DAKOTA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 22, 1978

● Mr. PRESSLER. Mr. Speaker, I am extremely disappointed that we have not addressed the farm bills today or tomorrow. We are going into recess. It is tragic that our farmers have not had a chance to plan their spring planting. If a farm bill is revised in early April, by the time the Agriculture Department issues regulations on set-asides it will be at least mid-April. Much of the planting will be underway throughout our Nation by that time.

Already much of the South has planted its crops. And in the upper midwestern area, we are in a situation that finds us wtih farmers planning, buying fertilizer and seeds. It is almost impossible for them to respond to a farm program that is not adopted until April 15.

Mr. Speaker, my reasons for voting no on the motion to table by Mr. FOLEY was that I feel strongly, as I said on the floor, that we should stay in session and discuss this farm bill here today.●

VIGIL FOR FREEDOM: HILLEL BUTMAN

HON. NORMAN F. LENT

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 22, 1978

● Mr. LENT. Mr. Speaker, I welcome this opportunity to participate in the Vigil of Freedom organized by my distinguished colleague from Michigan, Representative BRODHEAD and the Union of Councils for Soviet Jews. I am pleased to again call the world's attention to the plight of my adopted prisoner of conscience, Hillel Butman, a victim of Soviet repression.

In 1970 Hillel was charged with participating in a plot by several desperate Jews to hijack an airplane to Sweden because their emigration applications had repeatedly been turned down. Not only was Hillel hundreds of miles away from the scene, but he had consistently tried to dissuade the participants. Nonetheless, the Soviet justice system sentenced him to 10 years in prison. His sentence runs through June 1980.

Due to the well known harshness of Soviet prisons, I am deeply concerned for Hillel's survival. His first 5 years of the sentence were spent in the most dreaded prison in Russia, Vladimir, whose cells once held prisoners of the Czar. Conditions at Vladimir are inhumane. For example, according to a letter Hillel managed to smuggle to his wife, the Ministry of the Interior designates a prisoner's first month as a "hungry month." After this month, the food ration is increased to 800 calories per day. Six prisoners are now crammed into cells which held three in the days of the Czar. For 5 years, Hillel was kept in solitary confinement in a cell with a plank bed, no plumbing, one visit a year, one letter a month, the 800 calories a day, and no food parcels. When he was finally transferred from Vladimir, we hoped the worst was over. However, Hillel has recently been reassigned to Vladimir with the stipulation that he serve the remainder of his sentence there. The inhumanity of it all.

In addition to the heavy toll such circumstances take on a man over 40 years old, the impact on his family is incalculable. His wife and two daughters live in Israel, having emigrated from the U.S.S.R. in 1973. The youngest has never even seen Hillel.

This inhumanity must not be allowed to continue. Together with Hillel's many friends the world over, I am continuing to keep up the pressure on the Soviets to end this mockery of justice and let Hillel be reunited with his family and loved ones. As Hillel said at his trial—

> I am asking for just one thing—justice! Injustice is more terrible for me than a prison. Injustice kills better than a bullet.

Since 1970, Hillel Butman has endured the bondage of Soviet repression which strikes like a cold dagger to the heart of this freedom-loving, compassionate man. In the name of basic human rights, in the name of the accords signed in Helsinki, in the name of common, human compassion, I say to the Soviet Union, "Free Hillel Butman" ●

DEVELOPMENT DISABILITIES LEGISLATION

HON. PAUL G. ROGERS

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 22, 1978

● Mr. ROGERS. Mr. Speaker, I am introducing today legislation to extend the Development Disabilities Act, and to make various improvements in it. I am pleased to be joined in sponsoring this legislation by my esteemed colleague from Kentucky, the ranking minority member of the Subcommittee on Health and the Environment, Dr. Tim Lee Carter.

The proposed legislation is based on recommendations for changes in the Developmental Disabilities Act which were carefully formulated and endorsed by a number of groups who have long been active in this field, including the National Association for Retarded Citizens, the Epilepsy Foundation, the United Cerebral Palsy Association, Inc., the National Society for Autistic Children, the American Association of University Affiliated Programs, the American Association on Mental Deficiency, the National Association of State Mental Retardation Program Directors, the National Association of Private Residential Facilities for the Mentally Retarded, the Kennedy Foundation, and many others. While introduction of legislation incorporating their basic suggestions does not represent my personal endorsement of every change they have proposed, I do believe the thrust of the changes is a good one, and that they should be the starting point for consideration by the Congress and the public as we move to extend the developmental disabilities legislation this year. I look forward to receiving testimony on the proposal in early April.

I should note one additional point. When we last considered the Developmental Disabilities Act, some groups suggested changes in the definition of what constituted a developmental disability. In order to provide us with better information on which to base our decision, we authorized an independent study of that issue. As part of that study, a National Task Force on the Definition of Developmental Disabilities was established. The report is now in; the majority recommended a relatively significant expansion of the definition, while a sizeable minority recommended a definition closer to that of the current law. Members will note that the bill I am introducing today does not propose a change in the existing definition. I preferred to receive direct testimony from representatives of both the majority and minority of the task force, as well as from the administration and other interested parties, before formulating my own views on appropriate changes. Again, I believe the testimony we receive during hearings on the proposed legislation will be most helpful to the committee as we develop recommendations to the Congress on this issue.●

THE NATIONAL CONSUMER NUTRITION INFORMATION ACT

HON. FREDERICK W. RICHMOND

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 22, 1978

● Mr. RICHMOND. Mr. Speaker, today it is my privilege to introduce a bill entitled "The National Consumer Nutrition Information Act of 1978." As you will note by the list of cosponsors, the bill is nonpartisan in its support. This is especially fitting since providing the public with accurate and useful information about the relation of diet to health and the coordination of Federal programs to achieve this worthwhile goal are not the province of any one political party or any one sector of our society.

One year ago the House Agriculture Subcommittee on Domestic Marketing, Consumer Relations, and Nutrition, which I chair published a report by the Congressional Research Service of the Library of Congress titled "The Role of the Federal Government in Nutrition Education." According to that study the Federal Government spends almost $70 million a year on a patchwork of more than 30 uncoordinated and unfocused programs administered by 11 different agencies located primarily in the U.S. Department of Agriculture and the Department of Health, Education, and Welfare.

Despite the existence of this array of programs, consumers report they are evidently confused as to what constitutes sound nutrition.

In September of 1977, the subcommittee heard from more than 50 witnesses including consumers, health professionals, leading scientists, nutritionists, communications experts, public interest advocates, and community workers. We were told that serious nutrition education gaps exist in our country today.

How can the American consumer make a wise choice in a marketplace offering over 9,000 individual food products backed by an advertising budget of $4 billion? Fundamental to our democracy is the concept of an informed public. Yet how can consumers rationally choose among such a bewildering variety unless they have the knowledge and skill to distinguished foods on their nutritional merits and not their advertised seductiveness? This need for information is especially critical to children who, it is estimated, watch between 8,000 to 13,000 food and beverage commercials a year.

Consumers, assaulted by a barrage of commercial food claims, dire health warnings and conflicting and contradictory advice, are either falling victim to panic or throwing their hands up in utter befuddlement. Turning away from the

loud voices of commercial persuasion, consumers we are told are turning to the Federal Government for reliable, unbiased information about the relation of diet to health.

According to the Comptroller General of the United States, in a report titled "Informing the Public About Nutrition," which I am releasing today, "Clearly efforts of the Federal Government to help inform the American people about nutrition have been insufficient." On the basis of an official survey the Comptroller General found that:

Currently, the Federal Government's efforts to coordinate its nutrition dissemination activities is minimal. There is no formal coordinating or central planning directed at improving the food and nutrition practices of consumers. Each agency and program tends to operate independently and with little cooperation on mutual goals, concepts, and strategies.

Given the profound relation of nutrition to health and the high level of consumer concern and interest in achieving a healthy diet, it is a shocking fact that among USDA efforts the extension food and nutrition program is reaching only 2 percent of its intended audience and the expanded food and nutrition education program only 20 percent. The figures for HEW are equally dismaying. Head Start serves only 15 percent of its audience; the nutrition program for the elderly 23 percent, and the adult education component of the consumer and homemaking program a scant 2 percent.

Clearly our efforts must be guided by a policy at the national level which coordinates responsibilities and activities and which is held accountable to the reach as well as the quality of the services and information it provides.

But what of our nutrition education programs themselves? If one were to judge the materials we produce, the pamphlets we distribute and the way we communicate with the public we might conclude that we are still living in the era of the frontier.

In an age of mass media and instant communication, nutrition education approaches such as a one-on-one and small group instruction are inefficient and misguided. For consumers concerned about cancer, heart attack, and diabetes simplistic pamphlets and lectures on the basic four and advice to eat a balanced meal are of little help. How long can we rely on outdated, unattractive, and incomprehensible pamphlets to be substituted for a coordinated, dynamic and effective national nutrition education effort?

Both HEW and USDA programs rely heavily on the printing and distribution of pamphlets as a major feature of their nutrition education programs. But because of an overall lack of evaluation by the two departments the Comptroller finds that they are "unaware as to who was reached with their information; how well the information was communicated; whether it supported the objectives of the nutrition education programs; if the intended message was being delivered; and whether the language, form and distribution channels used were effective."

To speak of Federal efforts alone, however, is to confine ourselves to a limited approach. We must also be certain that the forces of the marketplace are allied rather than competing with Government. A recent survey of the food industry's role in nutrition education by our subcommittee revealed the same lack of focus, confusion of message and duplication of effort which plagues existing Government programs. Major food companies did not agree on what constitutes nutrition education; for some nutrition education is simply product information, for others, promotional slogans. Industry emphasizes Government responsibility to educate children in the school system. Yet a major area of industry's nutrition education activities is the development of materials for schools. All too often these materials are product promotions under the guise of public service.

Food, diet, and health are not the proprietary business of any one sector of our society. The Congress must view this as a national concern. The old nutrition education of simplistic slogans, useless pamphlets, outmoded strategies, and inefficient and ineffective programs must be replaced with a new nutrition education. To be worthy of its name this new approach to consumer education must be:

First. Diet and health oriented;

Second. Based on the most current and accurate scientific knowledge;

Third. Supported by the efforts of the public and private sectors;

Fourth. Designed to reach all consumers in ways and places that are relevant to their varying lifestyles and needs;

Fifth. Comprehensive enough to enable consumers to make wise choices in a free marketplace.

Having summarized the problem, Mr. Speaker, let me in the remaining portion of my time outline the various sections of the bill which I and my colleagues are introducing to address the needs of the American consumer for accurate and useful information about food, diet, and health.

TITLE OF BILL: NATIONAL CONSUMER NUTRITION INFORMATION ACT OF 1978

PURPOSE OF BILL

To establish a National Nutrition Education Council for the purposes of planning the coordination of nutrition education activities of Federal agencies; to establish certain programs for the purposes of coordinating activities concerning nutrition education and of testing and demonstrating methods of increasing the quality, availability, and effectiveness of nutrition education.

TITLE I. INTER-DEPARTMENT PLANNING AND COORDINATION AND INTRADEPARTMENTAL COORDINATION

Under this title, a National Nutrition Education Council would be established in the Department of Agriculture for the purpose of planning a national nutrition education policy that would coordinate activities and research of the Federal Government in this area. The Council will include representatives from USDA, HEW, FTC, the National Science Foundation, all of which have significant jurisdiction in nutrition education and research, as well as those representing the views of nutrition educators and scientists, consumers, farmers, food processors, food marketers, and voluntary groups. At the end of 2 years, the Council shall report its findings to Congress.

The Secretary of Agriculture with the assistance of a task force of the Department shall establish a departmental policy with respect to nutrition education and report to Congress on any reorganization that it undertakes or legislative authority it needs to achieve a better coordinated and a more effective nutrition education program.

TITLE II. RESEARCH AND DEMONSTRATION PROJECTS ON THE DISSEMINATION OF NUTRITION INFORMATION TO CONSUMERS AT THE COMMUNITY LEVEL

Under this title, the Secretary of Agriculture shall conduct at least six pilot projects in standard metropolitan statistical areas and two in rural areas which demonstrate methods of delivering information concerning the relationship between diet and health and methods of achieving a healthy diet.

Three types of entities may undertake these projects with at least two being assigned to each category: Agencies under the Department; units of local government; and nonprofit organizations.

Among the criteria the Secretary must use in selecting a plan are the extent to which the project reaches a significant portion of the population and the extent to which local resources and services such as voluntary organizations, retail food markets, and local media are involved and coordinated. All projects must contain evaluation components that will assess their effectiveness. At the conclusion of the projects the Secretary must present his own report and evaluation to Congress.

TITLE III. DEMONSTRATION PROGRAM ON GRAPHIC LABELING

The purpose of this title is to evaluate consumer acceptance and use of graphic methods of food labeling. In order not to be in conflict with the "nutrition label panel" that is presently used on packaged or canned commodities and processed foods this title calls for the use of bulk fruits and vegetables as test subjects. Supermarkets and other retail food outlets would be used by mutual and voluntary agreement as test sites.

TITLE IV. TELEVISION DEMONSTRATION PROJECTS

Under this title, the Secretary shall call for competitively produced television public service announcements which will present to the public visual and aural information concerning the relationship between diet and health and the methods of achieving a healthy diet.

These TV "spots" are required to be of the same quality as nationally broadcast TV commercials. After selecting those proposed which are determined to be the most suitable and receiving the finished advertisement, the Secretary shall contract for the performance of demonstration projects to test the cost and effectiveness of, and public receptivity to the different public service announcements, methods, and techniques used in such projects.

TITLE V. GENERAL PROVISIONS AND DEFINITIONS

The subcommittee will hold hearings on this bill on April 12 and markup on April 18.●

THE FIRST PANAMA CANAL TREATY VOTE—NOTHING LOST YET

HON. GEORGE HANSEN

OF IDAHO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 22, 1978

● Mr. HANSEN. Mr. Speaker, the hairbreadth Senate win for the first Panama Canal Treaty took a lot of doing, including unprecedented wheeling and dealing. Many Americans are wondering what some of their Senators sold out for. The Wall Street Journal commented on this very subject on page 1 of their March 17, 1978, edition. The Journal stated that—

Carter strategists hit a surprise snag as they sought to dispense favors to Senators wavering on the Panama Canal treaties. A top White House aide phoned HUD Secretary Harris to see what help her department could give the state of one undecided Senator; she angrily replied that the request had "Nixonian overtones."

The fact remains, though, that America has lost nothing yet. Even though President Carter was successful in gaining approval of the Neutrality Treaty, the treaty that actually relinquishes control of the Panama Canal to the Republic of Panama and costs the American taxpayers untold billions of dollars still remains to be voted upon. Without approval of the Panama Canal Treaty, the neutrality pact means nothing.

Therefore, it is now more important than ever for concerned Americans along with their families and friends to contact their Senators and Congressmen and tell them exactly how they feel about the Panama Canal giveaway. Many pro-treaty Senators are claiming that various regional polls show that the American public actually favors the proposed treaties, yet the recent results of a national poll conducted by the Opinion Research Corp. of Princeton, N.J. indicates that over 72 percent of Americans oppose the treaties. It is time to again clearly express the real views of the American people on this issue and the best indicator of public opposition or support of an issue remains the letters and postcards received from constituents.

Many Senators and Congressmen may claim that the people elected them for their judgment and not to reflect the views of the majority, but this is absolutely not true. An elected representative is chosen by the majority of the people and the views of his constituents should continue to be important after the polls close. Personal judgment should certainly be a factor, but not in direct defiance of the people when there is enough time to get a good educated consensus of opinion from the public. No one can claim that they did not have enough time to check back home on the Panama Canal issue.

I have spoken out on many occasions to urge the House to assert its legitimate role with respect to the disposition of U.S. property and territory in the Canal Zone and the appropriations necessary for conveyance. It is unconstitutional and inappropriate for the multibillion dollar investment of the United States in the Canal Zone to be transferred to the Republic of Panama by treaty alone.

Article IV, section 3, clause 2 of the Constitution gives the Congress the exclusive power to dispose of U.S. property and territory. And article I, section 9, clause 7 states appropriations can only be made by law. Failure to exercise these powers properly in this crucial question involving massive disposal of property and expenditures to transfer the Canal Zone will be a disastrous precedent for the separation of powers in our Government.

Early last fall I introduced House Concurrent Resolution No. 347 which stated that U.S. property in the Canal Zone could be conveyed to Panama only by an act of Congress. This resolution has 235 cosponsors, a clear majority of the Members of Congress. This is a constitutional issue supported heavily by both parties—it is not one of partisan politics. A recent national poll conducted by Opinion Research Corp. found that 70 percent of Americans favor the House of Representatives voting on the disposition of property in the Panama Canal Zone. Only 17 percent said no. The people obviously understand the Constitution and it is our duty as their elected representatives to honor their wishes and protect their interests.

Despite the overwhelming support of House Concurrent Resolution No. 347, the influence of the Carter administration's efforts to restrict treaty action to the Senate has made House action difficult to obtain and predict. Therefore, I have begun a discharge petition (No. 6) to force early consideration and now have well over 100 signatures on the way to the needed 218. Hopefully reason will the influence of the Carter administration circles to make this constitutional confrontation unnecessary.●

BYELORUSSIAN INDEPENDENCE DAY

HON. PETER W. RODINO, JR.

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 22, 1978

● Mr. RODINO. Mr. Speaker, on March 25, Americans of Byelorussian descent will celebrate the 60th anniversary of the Proclamation of Independence of the Byelorussian Democratic Republic. On this day in 1918 the elected representatives of the Byelorussian Congress declared the independence of the Byelorussian Democratic Republic. The newly adopted constitution provided for free elections and guaranteed basic human rights.

The people of Byelorussia fought and died for their belief in independence. Their efforts to prevent domination by an outside country were unsuccessful, but military force could not crush the spirit of freedom that survives today in the hearts and minds of the Byelorussian people. Their bravery and courage stand as a reminder that liberty must always be cherished and preserved.

Mr. Speaker, we all look forward to the time when the Byelorussian struggle for freedom and self-determination will end in success.●

A SALUTE TO GREECE

HON. JAMES J. DELANEY

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 22, 1978

● Mr. DELANEY. Mr. Speaker, Western Civilization has traditionally, and rightfully, looked upon Greece as the birthplace of our democratic form of government and many of our most cherished principles. Over 2,000 years ago the ancestors of the modern Greeks founded their model state and made freedom the law of the land. But by the beginning of the Christian era their country was in turmoil and eventually fell under Roman domination.

Greece was never completely free again until early in the 19th century, and it is the anniversary of the beginning of that struggle for freedom which I would like to call my colleagues' attention to today. This Saturday, March 25, will mark the 127th commemoration of the day in 1821 when Alexander Ypsilanti and Archbishop Germanos of Patros sparked the northwestern revolt which was to lead to Greek independence after centuries of alien domination.

The Greek struggle for freedom stirred the American press, roused American orators, and stimulated neo-classic trends in our art, literature, and architecture. American opinion was unanimous: A people whose tradition was such a source of inspiration to our democracy should be completely free.

When the Congress of the United States assembled in December 1823, President Monroe made the revolution one of the subjects included in his annual message. A resolution by Daniel Webster in the House of Representatives was the first official expression by any government supporting the independence of Hellas.

Mr. Speaker, one of the first statements made by the new Greek Senate in May of 1821 was addressed to the American people:

Friends, Fellow Citizens, and Brothers, they said, Having formed the resolution to live or die for freedom, we are drawn toward you by just sympathy, since it is in your land that liberty has its fixed abode . . . Though separated from us by mighty oceans, your character brings you near us . . . Our interests are of such nature as to cement more and more an alliance founded on freedom and virtue.

On this day of joyous celebration I join all my countrymen in wishing Greece well. I send my greetings to all the Hellenic residents of the New York metropolitan area and extend my thanks for their many invaluable contributions to our history and our culture.●

POLITICIZING U.S. GEOLOGICAL SURVEY

HON. DAN MARRIOTT

OF UTAH

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 22, 1978

● Mr. MARRIOTT. Mr. Speaker, I want to take this occasion to share with my colleagues a very unusual situation.

I recently received a petition signed by some 212 Utah geologists and earth scientists strongly protesting the recent firing of Vincent McKelvey as Director of the U.S. Geological Survey. The petition was circulated by "Utah Geologists Against Politicizing the U.S. Geological Survey" and contains the signatures of many of the most prominent geologists in the State from industry, academia, and State government. The petition states:

This is the first time in the 98-year history of the survey that a U.S.G.S. director has been suspended for political reasons, and we respectfully request that the House Interior Committee thoroughly investigate this matter to determine the reasons behind the firing. If the media are correct in assessing Dr. McKelvey's suspension as being due to his public statement on the energy situation in contrast to the Carter administration's energy "policy," then we demand a satisfactory explanation from Secretary of the Interior Andrus. If a satisfactory explanation is not forthcoming, then we demand the resignation of Mr. Andrus. It is the place of the Geological Survey and its staff of career experts to advise the administration on questions of natural resources and not the other way around.

Of significance is the fact that there are only 270 Utah members of the Utah Geological Association and that the many Utah geologists employed by the Federal Government were not asked to sign the petition, for their own protection. There thus appears to be nearly unanimous condemnation among the geological profession in Utah of this highly unusual political action of the Carter administration.

And I could not agree with them more.●

"SLIP SLIDIN' AWAY" FROM THOSE INVITATIONS

HON. JIM SANTINI

OF NEVADA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 22, 1978

● Mr. SANTINI. Mr. Speaker, I am most impressed with the policy of our colleague, Mr. SIMON, with respect to invitations to dinners and receptions.

Invitations are voluminous, the affairs are time consuming, often little is accomplished, and precious time is taken from work and family.

With the permission of the gentleman from Illinois, I would like to share the column he sends when declining receptions and dinners. I believe he is right on target.

The column follows:

THANKS, BUT NO THANKS

This day's mail is like most others: nine invitations to receptions around Washington. And in this morning's mail I have a letter from a labor union unhappy because I didn't show up at their reception.

When I first came to Washington as a House member, I tried to drop in briefly at quite a few receptions and dinners. But I soon discovered that I couldn't afford the expenditure of time.

I like people as much as anyone does. I enjoy visiting. But it became obvious to me that while it was pleasant visiting, little of a constructive nature was being accomplished.

So I started suggesting to people who invited me to receptions that, rather than my going to their cocktail parties, they drop by my office for a 10-minute chat about whatever interested them. It saves me time each day and gives them a chance to talk about the issues that really concern them.

So don't feel insulted if I don't accept your invitation if you belong to the Lumber Dealers or the Real Estate Association or the Carpenters Union or the Mental Health Society or any one of the thousands (literally) of groups which hold receptions. All of these associations are fine, but I must make a determination of where I can most effectively spend my time, and it's clear to me that I serve the people of my district best, and the people of the Nation best, by digging into the issue papers and mail which accumulate on my desk, rather than digging into some caviar and sipping drinks you pay for.

And let me add a word to the various organizations: My guess is that most other Members of Congress feel as I do about this. They would sooner have you save your money and drop into their offices where more substantial conversation can take place.

It sometimes strikes me that we have a vicious circle going. Organizations feel obligated to put on a costly reception for Members of Congress, and Members of Congress feel an obligation to attend functions where constituents have indicated an interest—but privately most admit that they would sooner be working in their offices or be at home with their families.

So I'm volunteering to break the circle.

That does not mean that I won't go to dinner with a friend, nor am I saying that I will never again go to a reception. But the dinners I attend will be because I want to, and rarely will they be massive, organizational functions. And it will be unusual to find me at a reception.

The cause of all of this is simply too much to do in too little time. The conscientious Member of Congress—and most are that—works a great deal more than 40 hours a week, as do their staffs.

Right now I have a pile of mail on my desk that accumulated during the days when I visited the district. I have information on various subjects that my staff believes I should at least glance through—and it's piled up more than one foot in height.

Should I leave all of that to visit one or two or a half dozen receptions going on tonight?

The right answer, for me at least, is no.●

JIM LINDSEY

HON. OLIN E. TEAGUE

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 22, 1978

● Mr. TEAGUE. Mr. Speaker, one of my longtime newspaper friends in College Station is retiring and several articles have appeared in local papers concerning his career. Jim has done many favors for me over the period of time I have served in the Congress, more than I can ever return. He is a great Texan and a great American and I wish him well in his retirement.

The articles follow:

[From the Battalion, Feb. 2, 1978]

JIM LINDSEY: RICH WITH FRIENDS

Newspaper people spend most of their lives writing about other people. Very seldom does anyone write about them. But this is such a time for one newspaperman.

Jim Lindsey retired Wednesday after 15 years as director of information for Texas A&M University. During those years, Mr. Lindsey has endeared himself to Battalion staffs as a frequent ally, occasional opponent and constant friend. But Texas A&M is only the last stop in his long and varied career.

Mr. Lindsey has crammed several lifetimes of Texas newspaper work, education and politics into the last 40 years. He spent over 20 years on Texas newspapers, including 10 years as managing editor of the Midland Reporter-Telegram after stints as managing editor of the San Angelo Standard-Times and assistant managing editor of the San Antonio Express-News. Mr. Lindsey spent seven years on the board of regents of his alma mater, Texas Tech University.

He resigned from that board in 1962 when he became Texas A&M's director of information.

Gen. Earl Rudder, president of Texas A&M from 1959 to 1970, asked Mr. Lindsey to become the University's information director. Mr. Lindsey had served as information officer under Rudder in the Army Reserve's 90th Division. A lieutenant colonel in the reserve, Mr. Lindsey fought in World War II as an enlisted man.

A life-time observer of Texas politics, Mr. Lindsey was a member of the State Finance Committee from 1969 until then-Governor Preston Smith appointed him to the State Banking Board in 1971. He remained on that state bank-chartering board until 1976. Not devoting all his time to public service, he has served on state committees of the Baptist General Convention of Texas.

But a list of jobs-filled and posts-held can't give you an appreciation of the man. You see, Mr. Lindsey loves people. All people really, but young people especially. He admitted the other day that his greatest regret about leaving Texas A&M will be not spending as much of each day with students as he has in the past.

He often claimed that being around young people has kept him younger than the 63 years he is. In fact more often he's been the one keeping us young. He's saved many a day for beleagured students by walking up, extending a handshake with one hand while holding in the other hand one of the big Cuban cigars he always carries and less often smokes, and offering some sage one-liner.

Mr. Lindsey says he is retiring. But relocating would be a better word—relocating to Austin where he can start another career in education or politics or information or whatever else strikes his fancy.

"Friends are the most valuable possession," Mr. Lindsey has advised many times. If so, you're a rich man, Jim Lindsey.—L.R.L.

[From the Eagle, Feb. 4, 1978]

CIGARS, PEOPLE, NEWS; THAT'S JIM LINDSEY

Every weekday as the pace was winding down and the last of the reporters were finishing up stories, a big cigar entered The Eagle newsroom followed by a genial man.

Jim Lindsey was delivering the daily budget of news from the Texas A&M University news bureau and copies of The Battalion, the student newspaper.

Jim stopped to chat with people along his route through the newspaper building to the newsroom. That was his way. His long association with news media and politics showed—he enjoyed people. To be involved in either the news business or politics one has to enjoy people.

There was always a story or two, other than the ones in his news packet—about the weather, the students, the news business, politics, or about life. Jim was never at a loss for words.

Words were his business. He managed them and told them what to do for more than a quarter of a century in which he was involved with news. He loved newspapers, as

most of us do, and his eyes sparkled when he talked about the days when he was reporting and editing.

Just being in a newspaper office seemed to do something to him.

There also was a twinkle in his eyes when he talked politics. In his career he was involved with many of those whose names have made Texas' political drama national hit. He served on state boards and as a regent of Texas Tech University.

This week the cigar did not show up at the end of the day. Jim Lindsey retired as director of information Wednesday. That is, Jim Lindsey left his position at A&M. He won't retire. He'll be busy wherever he is, and he has said he is going to Austin.

We'll miss Jim Lindsey. Texas A&M will miss him and Bryan-College Station will miss him.●

MALCOM RANDALL CITED FOR SERVICE TO VETERANS

HON. DON FUQUA

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 22, 1978

● Mr. FUQUA. Mr. Speaker, I would like to bring to the attention of the Nation and my colleagues an outstanding honor bestowed upon Mr. Malcom Randall, the director of the Veterans' Administration Hospital in Gainesville, located in the Second Congressional District of Florida which I am privileged to represent.

Mr. Randall has received the distinguished Administrators Award for Executive Leadership. This award was presented to Mr. Randall by Max Cleland, Administrator of Veterans' Affairs, at a recent conference of hospital directors, regional office directors, directors of data processing centers, and directors of national cemeteries.

The award cites Mr. Randall for "overall excellence, professional ability, and extraordinary leadership in supporting and furthering the mission of this agency." As Mr. Cleland pointed out during the presentation, simply stated, this honor is in recognition of Randall's "competent, courteous, and compassionate service to veterans."

Mr. Randall has been extremely active in community affairs in Gainesville and Florida. He has been chairman of the Combined Federal Campaign in the United Way Drive for Alachua County, serves on the State Health Coordinating Council, and was one of the organizers of health planning in our part of the State, currently serving as vice president of the North Central Florida Health Planning Council.

In addition, Mr. Randall is a professor of health and hospital administration in the College of Health Related Professions at the University of Florida and serves as a member of the Health Center Council and the President's Administrative Council.

I am indeed proud to bring this special tribute to the ability and remarkable achievements to Mr. Randall for service to our Nation's veterans to the attention of this House.

Our veterans have served our county well and we as a nation are indebted to them. It is reassuring to know that their medical needs are well attended at the Veterans' Administration Hospital in Gainesville.●

COMMENT ON THE REAUTHORIZATION OF THE OLDER AMERICANS ACT

HON. EDWARD R. ROYBAL

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 22, 1978

● Mr. ROYBAL. Mr. Speaker, as you probably know, the House Select Committee on Aging is in the process of making recommendations for the reauthorization of the Older Americans Act of 1965.

Members of our committee have traveled throughout the Nation conducting field hearings and getting grassroots input concerning possible improvements in the 13-year-old law.

The act, which is currently under consideration by the House Subcommittee on Select Education, has been the primary vehicle to assist older Americans in securing full participation in our democratic society. We want to make it as effective as possible.

This week, my colleague on the Aging Committee, Mr. JIM SANTINI from Nevada, testified before the Subcommittee on Select Education concerning the value and effectiveness of the Older Americans Act.

His testimony reflects many of the findings of the Aging Committee and suggests some of the legislative improvements we should attempt to make in behalf of our senior citizens.

Mr. Speaker, I would like to share Mr. SANTINI's testimony with our colleagues at this juncture:

REAUTHORIZATION OF THE OLDER AMERICANS ACT

It's a pleasure to appear before the Subcommittee on Select Education to endorse the recommendations of the House Select Committee on Aging on the reauthorization of the Older Americans Act. The Aging Committee has expended considerable effort in time, research and travel in preparing these comprehensive recommendations. In fact, the Committee has journeyed to my district—the State of Nevada—to assess the needs and concerns of those at the local level involved in Older Americans Act programs.

Until recently, the television and news media placed old people in stereotyped roles of the forgetful, spinster aunt or the graying, grouchy uncle—the Nevada Congressman excluded. Although we're beginning to see and read about seniors in a diversity of roles, the average old person has not yet achieved national status.

A growing awareness of the unique problems of the elderly resulted in the creation of a Federal agency devoted to improving the quality of life for older Americans: the Administration on Aging. The Older Americans Act provided the legislative vehicle to assist older persons in securing full participation in the benefits of our democratic society.

Much has been accomplished under the Older Americans Act to recognize and alleviate many of the peculiar problems facing this large portion of our population. But, it's also evident that the specific objectives of the Act—adequate income, suitable housing, employment without discrimination, to name a few—have not been met.

There is a clear need for the consolidation and coordination of many existing programs, for the elimination of unnecessary red tape, and for the establishment of priorities.

For example, Nevada—which is experiencing a rapid growth in its elderly population—has a Federally funded senior and handicapped transportation system operating in Las Vegas and Reno. Due to Department of Transportation guidelines, this service meets the needs of a very limited group of individuals. A community may be filled with a myriad of services for its older citizens. But, these various health and social services are of no value if the senior cannot get to the source.

It's clear that the Older Americans Act must address itself toward some kind of consolidation of other Federal programs and resources. To achieve this goal, the Aging Committee recommends that the Older Americans Act be amended to clarify that the coordination authority for AoA extends to all Federal programs.

The needs and concerns of the senior population—nutrition, health, housing, transportation, and limited fixed incomes—are well known. These are wide-ranging topics which vary from one member of the senior population to another. Furthermore, these problems are compounded for those living in rural areas. Although 41 percent of the Nation's elderly live in rural areas, these problems have been largely unaddressed.

It's not uncommon for many of my constituents to travel 60 miles to a doctor or 100 miles to the nearest shopping center—a distance which is uncomprehensible to many of us living in this metropolitan area. The Aging Committee has noted this problem and has recommended that AoA undertake a study of the plight of the rural elderly. This should be a definite priority item.

Title V of the Older Americans Act, which provides for the acquisition, alteration or renovation for multipurpose senior centers, was funded for the first time last year. And, I'm sure that many of you have had the opportunity to take part in the many activities of your district's senior centers.

In essence, a senior center works to build and maintain community support by linking the older population with available services. A center is committed to the many aspects of the older person's well-being by creating an atmosphere that acknowledges the value of human life, individually and collectively. The center affirms the dignity and self-worth of the older adult. The significance of the senior center stems from its total concern for older people and its concern for the total older person.

Members of the Aging Committee have recognized the importance of senior centers and have incorporated some necessary reforms of Title V into this report. These recommendations deserve support so that the senior centers may reach their full potential.

Crime is a problem which sparks concern in all of us. Granted it's not a malady confined to only one segment of society; but, crime and the fear of crime impacts most heavily upon the elderly. The theft of a television set to a younger person with a relatively good income is certainly a misfortune. To an elderly person on a fixed income and living alone, it can be tragedy. A report prepared by the Aging Committee, "In Search of Security: A National Perspective on Elderly Crime Victimization," documented the fact that residential burglary is the most frequent crime against older persons. Therefore, this Committee recommends that the Older Americans Act be amended to provide for broader assistance in order to promote residential security for the elderly.

Another area of concern to all of us is employment. This Congress has devoted considerable attention to the employment problems pervasive in all elements of society. Title IX of the Older Americans Act promotes

part-time work opportunities for low-income persons who are 55 years of age or older and who have poor employment prospects. I've personally noted the success of Title IX and the various older worker programs under ACTION in Nevada. For the senior citizen living on fixed and limited incomes, these programs have been life-savers. The evidence to date dramatically points to a continuing and pressing need for strong older worker programs. The Committee's recommendations with respect to these worthwhile programs deserve consideration.

In conclusion, I'd like to thank this Committee for the opportunity to speak in behalf of our seniors in the Nation and in Nevada. I hope that these recommendations receive serious and favorable consideration. Thank you.●

INCREASED FUNDS FOR OLDER AMERICANS PROGRAMS URGED

HON. MICHAEL T. BLOUIN

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 22, 1978

● Mr. BLOUIN. Mr. Speaker, I would like to call to the attention of my colleagues a resolution I recently offered on February 2, 1978, for consideration to the House Select Committee on Aging. This resolution, which was adopted unanimously by the committee, urges an increase in appropriations for programs that provide greatly needed services to older persons.

Our committee hearings document the overwhelming need for improvements in the level of resources committed to bettering the lives of America's 23 million senior citizens. Knowing of this need, I am appalled by the proposed budget cuts as well as the call for no expansion of major programs serving the elderly. The proposed requests do not reflect inflation or the increasing number of persons over 65 who will need services provided under these programs. Consequently, the budget request means a loss of funds to our senior citizens.

For example, ACTION's retired senior volunteer program (RSVP) would receive a cut of 24 percent—a reduction of $4.7 million to a program which serves communities across our Nation by meeting the basic needs of minorities, the poor, and the isolated. These services take the form of transportation, tutoring, and such essentials that otherwise would be more costly to the taxpayer if they were provided by any other means. According to ACTION's budget statement, RSVP is their least costly volunteer program. ACTION acknowledges that the proposed budget cut will reduce the number of RSVP volunteers from 250,000 to 220,000.

I am hopeful that as these programs come to the attention of the appropriate committees for their consideration, you will lend your support to see adequate funding is provided. I would like to share with my colleagues in the House the resolution as adopted by the House Select Committee on Aging. I insert it in the RECORD in its entirety at this point:

RESOLUTION

Be it resolved, That the Select Committee on Aging

—believes that the current level of appropriations for programs aiding senior citizens is not adequate to meet the existing need for services;

—opposes cuts in major federal programs providing services for older Americans, and stresses that the 1979 appropriation for these programs should, at an absolute minimum, be increased to compensate for inflation;

—concludes that, for several specific programs, substantial increases in the FY 1979 appropriations will be required to help bring these programs closer to the need for assistance they provide;

—calls on the Appropriations and Budget Committee to act on FY 1979 budget resolutions and appropriations bills to provide increased support for programs for senior citizens;

—calls on the Education and Labor Committee to approve authorization levels which would more adequately meet the needs of our elderly population.●

UKASE TO THE UKRAINE

HON. ROBERT K. DORNAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 22, 1978

● Mr. DORNAN. Mr. Speaker, Russian emperors and governments historically impose on their people proclamations with the force of law, or ukases. The Sovietization of the Baltic States has imposed many things on non-Russians through ukaze, including a foreign language. The U.S. Information Agency is conforming to this process, as was pointed out to me recently by a constituent of Ukrainian descent.

Walter J. Lesink of Santa Monica sent me a clipping from the February 15, 1978, New York Times which announced an exhibition of American farm machinery and brochures in the Ukraine. The 57-page brochure prepared for distribution at the Kiev exhibit in April was prepared in Russian by the USIA. I agree with Mr. Lesink that a brochure written in Russian for citizens of the Ukraine is an affront, and I would like to share with you and our distinguished colleagues part of Mr. Lesink's articulate letter:

. . . As an American of Ukrainian descent I'm shocked at the decision of the U.S. Information Agency to print a brochure in Russian for distribution in Kiev, Ukraine. The language of the people of Ukraine is Ukrainian, not Russian.

The USIA decision is a crass bureaucratic blunder. This decision is an affront to the Ukrainian people and to Americans of Ukrainian descent. Our Federal Government has an annual budget of 500 billion dollars. Surely we can afford to employ people who know the difference between the Ukrainian and Russian languages (they are not the same!).

Violations of human rights in Ukraine are common and growing. Ukrainian dissidents are opposing religious persecution, political oppression, and cultural russification by the Soviets. The USIA decision is a blunder and works against human rights.

I can only add my hopes that the present focus of concern on human rights will filter down to those translators for the USIA who are charged with communicating with the culturally autonomous peoples of the Baltic States, as they strive to retain their national identities.●

APPROPRIATENESS REVIEW OF DELIVERY OF HEALTH SERVICES

HON. JOHN D. DINGELL

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 22, 1978

● Mr. DINGELL. Mr. Speaker, one of the most important health related bills to be considered by the 95th Congress will concern the renewal of the National Health Planning and Resource Development Act of 1974. This legislation created a nationwide network of regional and State health planning agencies to oversee efforts to improve the operation of the health care system.

One of the key provisions of the act, Public Law 93-641, is that which provides for appropriateness review. This provision was enacted to enable the health planning agencies to take an in-depth look at whether health services are being delivered appropriately.

With this in mind, I wish to bring to the attention of my colleagues one interpretation of this process which is the result of a contract between HEW and the Orkand Corp., a Maryland-based health consulting firm, to develop the purpose and meaning of the provision. The following is a summary of a paper which was presented last November to the American Public Health Association convention here in Washington.

The paper follows:

APPROPRIATENESS REVIEW UNDER P.L. 93-641

(By Charles Eby and Arthur Janovsky)

INTRODUCTION

One of the major responsibilities assigned to the health planning agencies created by the National Health Planning and Resource Development Act of 1974 (P.L. 93-641) is "review on a periodic basis (of) all institutional health services . . . respecting the appropriateness . . . of such services." This review has the potential to be one of the most powerful tools available to the areawide Health Systems Agencies (HSAs) and State Health Planning and Development Agencies (SHPDAs) for altering the delivery of health services. It is, however, also one of the least clearly understood and most widely debated of all the functions given to these agencies by the Act.

Given the lack of detail in the basic mandate for appropriateness review (AR) and the fact that AR is a new function with which agencies have no experience (unlike the project review and plan development features of P.L. 93-641), a number of basic questions had to be addressed. For example, what kind of procedural mechanism is required to carry out AR? What does the output of the process look like? What kinds of analytic techniques can be applied to AR? What are the data requirements of AR? What is the relationship of AR to other planning and resource development activities? How can AR findings be used by HSAs, SHPDAs and others?

The Orkand Corporation was awarded a contract by the Bureau of Health Planning and Resources Development (BHPRD) within HEW to address these questions and to suggest approaches which may be used by health planning agencies in conducting AR. The approaches suggested were based upon the legislative history of the appropriateness review clause of P.L. 93-641, upon regulations defining the roles of HSAs and SHPDAs, and finally, upon field tests which attempted to simulate performance of appropriateness reviews at two HSAs. During the course of our

project we examined the rationale for appropriateness review, as well as various other issues raised by the process. Our conclusions are the main subject of this presentation. Based on these conclusions we also present some thoughts about the future of appropriateness review in light of recent developments surrounding Congressional cost containment proposals.

RATIONALE FOR APPROPRIATENESS REVIEW

The original idea for review of appropriateness stemmed from the perception of Congress that earlier generations of health planning agencies (created under Section 314 of P.L. 89–749) were unable to implement their planning goals with respect to existing institutional providers who were not proposing construction or modification. Originally, sponsors of the legislation which became P.L. 93–641 proposed that the planning agencies created by the Act would periodically review and recertify the *need* for continued provision of a service.

This wording was altered from "need" to "appropriateness" on the floor of both Houses. Congress thereby accepted the argument of providers that it would be difficult to obtain funds for projects under circumstances where a project could be deemed "needed" at the time of its proposal, but "unneeded" at some later date. Congress still thought it was important, however, for health planning agencies to have some mechanism for review of the existing institutional health care system; the concept of such review would otherwise have been eliminated entirely from the Act.

The most important characteristic of appropriateness review, which distinguishes it from planning and project review functions, is its ability to focus on the current provision of all institutional health services in relation to agency goals, while at the same time indicating specific steps which should be taken to reach those goals. In contrast, project review generally occurs haphazardly, according to an unplanned agenda resulting from the internal plans of various institutional providers.

The interrelationship of appropriateness review, project review and planning requires the coordination of goals, criteria, standards and procedures across various agency activities. The example review process developed by the Orkand Corporation accepts as a guiding principle that appropriateness review can and should build on the experience gained and materials developed in the performance of project review and planning activities.

In summary, appropriateness review is based on a sequence of steps, which may be simplified to the following:

1. Establish criteria and standards.

2. Collect data addressing the established criteria and standards.

3. Compare actual service characteristics (i.e. the collected data) with the criteria and standards.

4. Make judgment regarding appropriateness or inappropriateness.

SUMMARY OF THE SCREENING APPROACH

Our approach is based on the premise that detailed, in-depth review of the appropriateness of all institutional health services and institutions is impractical within a three or five-year period. It is suggested, therefore, that in order to fulfill the requirements for review of all services a health planning agency should employ successively detailed levels of analysis, as follows:

1. Screening of the health system to identify potentially inappropriate services.

2. Areawide review of each service identified to select some institutional providers of the service for further review and to formulate recommendations on areawide provision of the service.

3. In-depth investigation of selected institutional providers of the service, if necessary.

Findings at the service-institution specific level are incorporated into findings for the service as a whole.

CRITERIA AT EACH LEVEL OF REVIEW

The term "appropriateness" as it was refined during our project, refers to the degree to which the institutional provision of the service meets established criteria and standards relating to the broad characteristics of the health care system mentioned in the Planning Act. These are:

1. Availability
2. Accessibility.
3. Cost.
4. Quality.
5. Continuity.
6. Acceptability.

The criteria used at each level of review must be focused at that level. We have developed, as part of our contract, criteria at each of the three levels.

SYSTEM-WIDE SCREENING CRITERIA

In selecting services for further review during the system-wide screening, criteria should be kept as broad as possible and not be tied to specific standards. While reduction of underutilized or unnecessarily utilized capacity should be emphasized, it is clear that other considerations in P.L. 93–641, such as accessibility, quality and cost must also be taken into account. We suggest that the HSA and SHPDA should assess services in terms of their perceived general performance on each of the six characteristics mentioned in the Planning Act. Devotion of excessive attention to selection of services should be avoided, to allow the HSA and SHPDA to proceed with in-depth review of problem services. A criterion at the system-wide level might therefore by "perceived adequate quality", applied without time-consuming statistical interpretation.

AREAWIDE REVIEW CRITERIA

The criteria used at the areawide level are at the core of appropriateness review. The criteria reflect goals for delivery of the service separately for each institution and cumulatively for delivery of the service as a whole in the area and state. The criteria we have developed at this level are sub-components of the six broad characteristic areas. Our criteria are general enough to be useful in review of almost any service; they clearly require adaptation to be useful in evaluation of a specific service.

Examples of areawide criteria are:

For availability: rates of service utilization.

For accessibility: proportion of HSA residents residing within an acceptable travel time of the service.

For cost: total cost per unit of service.

For quality: availability of adequate patient review processes.

For continuity: availability of adequate discharge planning procedures.

For acceptability: provider observation of patient rights.

SERVICE-INSTITUTION SPECIFIC REVIEW CRITERIA

HSAs should approach review of an institution's provision of a service first as a process through with the institution is given the opportunity to explain its failure to meet service-screening standards, and second as a means of working cooperatively to reduce any inappropriateness discovered. We believe that HSAs are more likely to achieve change if attempts to work out voluntary solutions are attempted before a regulatory solution is enforced. In any case, we strongly favor HSA recommendations which contain:

The reasons for current inappropriateness in service delivery.

A brief description of appropriate delivery of the service.

A plan of action to achieve the transformation from the current to the more appropriate method of service delivery.

The plan of action should lay out particular actions to be taken by particular institutional providers in order to achieve more appropriate delivery of the service. The HSA and SHPDA may also recommend actions by regulatory bodies, third-party payors, non-institutional service providers, and the public in order to achieve more appropriate service delivery. We view the absence of any plan of action (in other words, a simple labelling of an institution's provision of the service as "appropriate" or inappropriate") as politically risky. The HSA is on much safer ground if it can point out not simply what things are wrong, but how it is possible to make them better.

ISSUES SURROUNDING APPROPRIATENESS REVIEW

We now turn to some of the more controversial issues surrounding appropriateness review. There are three basic views of the use of appropriateness review. Which view is adopted in a particular state will depend upon the health planning environment of the state.

The first, and most controversial use is for purposes of regulation. Requiring discontinuance or alteration of service delivery on the basis of appropriateness review findings, although not explicitly supported in P.L. 93–641, is certainly permitted by that Act. If a state wishes to enact a recertification of need clause, tied to appropriateness review, there is nothing to prevent it from doing so. To date, only one state, New York, has formally enacted a recertification of need provision. The state has not yet used its powers under this law, and there is some question as to whether it will be able to do so.

An alternative regulatory approach is the attachment of fiscal sanctions to findings of inappropriateness. This approach has succeeded in reducing some excess capacity in New York State, and could be applied in other states which have legal authority to control a high percentage of reimbursement rates.

The second view of appropriateness review may be classified as plan implementation. In this approach, the planning agencies use every means at their disposal to bring about changes in the delivery of the service, short of application of sanctions. Available methods to achieve change include negotiating with institutional providers, publicizing findings of inappropriateness, and advocating action by private third-party payors to encourage institutional cooperation with actions recommended by the planning agency.

Finally, some agencies may feel unable to use appropriateness review as more than an additional planning tool. Comprehensive health planning agencies have in the past produced plans for various services. These plans generally contain no more than a description of an appropriate system for delivery of the service. This approach would be best suited to states where planning activities are in early stages of development.

APPROPRIATENESS REVIEW AND COST CONTAINMENT

Appropriateness review relates to the administration's recent cost containment proposal (H.R. 6575) in two regards.

First, assessment of the appropriateness of costs can be tied to the criteria contained in the cost containment bill. Inappropriate cost can be tied to the penalties provided for by the bill.

Second, the findings of appropriateness review would serve as input to decisions made under the capital expenditures ceiling provided for in Title II of the bill. Closing of inappropriate services or entire facilities can increase the amount of construction permitted under the cap, and the findings of the review can serve to direct expenditures toward improving appropriateness.

It should also be mentioned that the findings of appropriateness review can be used

to guide decisions on when financial incentives to close services or facilities should be provided. Provision of incentives is the key concept in bills which have been introduced as alternatives to the Administration proposal.

CONCLUSION

Appropriateness review can be a function useful to health planning agencies in bringing about beneficial change in the health care system. In order for it to achieve its purposes, the following conditions must prevail:

Planning agencies must integrate its performance into other agency activities, particularly planning and project review.

Institutional providers must be encouraged to participate in the process to gain their commitment to change and to stimulate the development of creative solutions to inappropriate service delivery.

The process we have suggested is sufficiently adaptable to be useful to planning agencies of various levels of sophistication, and to be integrated into various cost containment proposals or enactment of recertification of need.

The ultimate fate of appropriateness review lies, however, in the hands of those who attempt to apply it. Only several years of experience will tell whether review of existing institutional health services, in whatever form it takes, is indeed a worthwhile endeavor.

The second session of the 95th Congress convenes at a time of continuing controversy over national health policy. One of the most important bills to be considered will concern the renewal of the National Health Planning and Resources Development Act of 1974. This legislation created a nationwide network of regional and state health planning agencies to oversee efforts to improve the operation of the health care system. Such improvement is a critical prerequisite for enactment of a federally-sponsored health insurance program.

One of the key provisions of the Act, designed to further its important mission, is "appropriateness review". This provision was enacted to enable the health planning agencies to take an in-depth look at whether health services are being delivered "appropriately".

Recognizing that this wording left much room for interpretation, the Department of Health, Education and Welfare undertook to more fully develop the meaning and purpose of the provision. A contract was awarded in 1975 to The Orkand Corporation, Silver Spring, Maryland, to perform this task. The results of this contract are summarized in a paper presented last November to the American Public Health Association convention here in Washington.

I hereby request that this paper be entered into the Record in the hope that my colleagues will take it into consideration in their deliberations over renewal of the health planning act.●

BYELORUSSIAN INDEPENDENCE

HON. CHARLES W. WHALEN, JR.

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 22, 1978

● Mr. WHALEN. Mr. Speaker, on March 25, Americans of Byelorussian descent will celebrate the 60th anniversary of the Declaration of Independence of the Byelorussian Democratic Republic. Soon after the declaration, a provisional convention adopted a constitution that guaranteed basic human rights and self-determination. In this era of concern for these ideals, it is appropriate that we remember this birth of freedom.

The Byelorussian independence was short-lived. Following World War I the nation was split between Poland and Russia. Later she became what she remains today: the Byelorussian Soviet Socialist Republic, a free nation in name and form only.

But the thirst for independence remains unquenched and that is why Americans of Byelorussian descent celebrate this day. They keep alive the rich folklore of their native land. They seek to keep alive the spirit of freedom. And they wait for their country to again be free of foreign domination. We in Congress commend them for their struggle.●

GOVERNMENT AGENCIES POSE NEW GUN CONTROL THREAT

HON. GEORGE HANSEN

OF IDAHO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 22, 1978

● Mr. HANSEN. Mr. Speaker, frustrated Federal bureaucrats who have had little success in Congress with strong Federal gun control proposals seem to be again moving to the back door approach.

One way or another it looks like the Federal Government is trying to regulate America's hunters and gun owners.

The Department of Treasury's Bureau of Alcohol, Tobacco and Firearms control has proposed new regulations calling for the indexing of all firearms imported or manufactured in the United States.

In addition, the new proposed rules by the Bureau requires each Federal firearms licensee to report to the Bureau any theft, loss, or recovery of a firearm.

All licensed manufacturers will be required to submit a quarterly report of firearms manufactured. The licensed manufacturers, importers, and dealers must also submit to the Bureau a quarterly report of firearms dispositions.

No matter how you word it, it still amounts to gun control. During the last session of Congress, gun control legislation was defeated. Now the administration is trying to make an end run and, in effect, require registration without congressional approval.

I am also gravely concerned over the Occupational Safety and Health Administration's move to cripple sport hunting in the United States.

In a recent Louisiana case OSHA officials ruled that hunters represent a real hazard to timberworkers when they are not controlled.

The implications of control in the position now being taken by OSHA are so far reaching that they stagger the imagination.

If allowed to stand, the agency's ruling could ultimately cause individuals and privately owned corporations everywhere to reconsider allowing sportsmen access to those millions of acres of game-rich timberland that they privately own or control.

In addition, free access to certain public lands such as national forests and refuges, where hunters and workers have traditionally shared the woods, could also be severely curtailed or jeopardized.

Federal regulatory burglars seem to be endlessly finding new ways to rip off the basic rights of American citizens. It may be a well-intended Robin Hood act, but the loss of freedom in the name of do-good programs is still something to be seriously reckoned with. Citizens must respond forcefully and aggressively to these challenges to their freedoms or face losing them.●

HEALTH CARE INFORMATION COLLECTION AND ANALYSIS

HON. PAUL G. ROGERS

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 22, 1978

● Mr. ROGERS. Mr. Speaker, today, I and Representative CARTER, the ranking minority member of the Subcommittee on Health and the Environment, have introduced legislation which would amend the Public Health Service Act to revise and extend the authorities for programs under the National Center for Health Services Research and the National Center for Health Statistics. The proposed legislation is intended to place increased emphasis on the collection and analysis of information respecting the cost of health care delivery and the costs attendant with environmentally related diseases and conditions. It would provide for the establishment of guidelines for the collection, compilation, analysis, publication, and distribution of statistics and information necessary for determining the effects of conditions of employment and indoor and outdoor environmental conditions on the public health.

Under the provisions of the proposed legislation, the National Center for Health Statistics is to serve as a clearinghouse for requests for such statistics and information, every Federal agency is to comply with requests for such statistics and information, and every entity which receives Federal assistance is to provide assurances that they will comply with requests for such statistics and information. It is my view that the availability of this kind of information will be extremely useful to the Congress in our consideration of environmentally related legislation and in our efforts to better assure the health status of the American people.

As the proposed legislation extends the authorities for programs which expire at the end of this fiscal year, I intend to schedule subcommittee hearings early next month with a view toward having legislation reported by the committee and ready for consideration by this body by May 15, 1978.●

HUMPHREY-HAWKINS BILL

HON. JOSEPH L. FISHER

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 22, 1978

● Mr. FISHER. Mr. Speaker, the Humphrey-Hawkins bill, passed by the House last week by a large margin, was a far cry from the original Humphrey-Hawkins bill of more than a year ago and a far cry from what many persons around the country think it is. Essentially the bill, as passed, is a statement of intention to reduce the unemployment rate to 4 percent (3 percent for adults) over a period of several years by advancing a coordinated set of unemployment reducing policies. There is nothing binding or mandatory in the bill; no actions will automatically take place on failure of the unemployment rate to reach the goal. A large number of possible programs are mentioned in the bill from which the Council of Economic Advisers and the President would select those to be recommended, and the Joint Economic Committee and the Congress would have a similarly broad choice for actions it might propose. But the actions themselves, whether by authorization, appropriation, regulation, or whatever, would have to be taken separately from the Humphrey-Hawkins bill by means of the normal kinds of congressional enactment.

The bill sets forth other purposes as well: Targets for employment as well as unemployment, for real income, for productivity, and then numerous others that were added by amendments on the floor of the House. In the end the bill became a whole collection of worthy objectives, including special attention to veterans, the handicapped, capital formation, 100 percent price parity in agriculture, national defense, anti-inflation measures, budget balancing emphasis, and so on and on. The bill is a veritable catalog of good intentions. But even with all of this extra baggage, the central emphasis and purpose remains: To establish a target for unemployment and to require that proposals be brought forward for moving toward that target.

Therefore, I came to the conclusion that the bill as finally voted on continued to have an excellent central purpose but had been overstuffed with all manner of worthy objectives and pious intentions. One of the major difficulties, it seems to me, is that people generally are reacting in terms of much earlier versions of the bill in which achievement of low unemployment was guaranteed, with Federal programs and spending mandated. The bill as passed by the House was not like this at all; the guarantees and mandates had been entirely removed. But large numbers of people do not understand this and are still thinking in terms of earlier symbols.

I would have preferred a much simpler, shorter, more direct bill than the one that finally was adopted in the House. The two essentials of a good bill, in my judgment are: More emphasis on jobs and reducing unemployment, with coordinated programs to move the national economy in this direction; and the addition of reducing inflation as a major purpose of the bill. I would have preferred to eliminate all numerical, quantified statements of goals, both for unemployment and for inflation, not to mention the 100-percent parity for farm prices. But once it seemed that the 4-percent unemployment rate goal was going to be retained in the bill I supported a 3-percent inflation rate goal as well. Preferring neither numerical goal, I was unwilling to see the unemployment rate goal alone without a similar quantitative goal for inflation.

It is too bad that the two central objectives for unemployment and inflation could not have been written into a short, clear amendment to the Employment Act, specifying also that on both the executive and the legislative sides, a strong effort be made to bring forward a coordinated program for advancing the country toward these twin objectives. Along with other Members I found myself thinking, "if only I could have written this bill myself."

In a way the House, and everybody in the country interested in the bill, were spinning wheels in the debate, especially over the quantification of unemployment and inflation targets. Suppose, for example, there is finally enacted a 4-percent unemployment rate goal, what would happen? One President and Congress, let us say very much on the conservative side, would then recommend tax cuts and program cuts to achieve the 4 percent. The opposite kind of President and Congress would recommend perhaps tax cuts and program increases as a way of moving toward the 4 percent. In short, any particular President could recommend from a wide range of taxes and programs what he thought would achieve the objective, and any particular Congress would have an equally wide range of choices of measures to consider. The same could be said of a quantified inflation reduction target. So the quantities, the percentages, actually would bind the Government to very little. As I say, I think we were spinning our wheels in this debate.

On the whole, when the final vote came, despite many misgivings, I came down on the side of approving the bill. Its heart is in the right place. Full employment, tempered by concern for inflation and budget deficits, should be the goal of economic policy in the United States, and I see no reason why this should not be recognized in statute. The importance of stating this, that, or the other percentage targets has been vastly exaggerated. But the importance of making progress toward full employment—a good job for everyone willing, able, and seeking work—cannot be overestimated. And the bill as approved wisely omitted any mention of requiring or mandating Government expenditures.

I hope very much the chaff can be blown out of this bill during Senate consideration and in a joint conference of Senate and House, which surely will have to be appointed to reconcile differences between the two bodies. If, after this process has run its course, there is still too much chaff in the bill, I could in the end vote against the final conference compromise. But at this stage, I will hope for improvement so that the central issue—the pledge of intention on the part of the Government to reduce unemployment—can be made more clearly a national objective. In the end a large majority of my colleagues in the House came to the same conclusion, although perhaps for somewhat different reasons. Also most of the organizations in the country interested in the bill came to its support, with even several of the major business organizations that were opposed to the earlier version reducing or dropping their objections to the bill that was finally passed in the House.●

RETIREMENT OF POLICE CHIEF RUSSELL FISHER OF HILLSBOROUGH, CALIF.

HON. LEO J. RYAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 22, 1978

● Mr. RYAN. Mr. Speaker, Chief Russell Fisher of the Hillsborough, Calif. Police Department is one of those special kinds of persons who had made a lifetime career of quietly effective law enforcement. That career has come to a premature close at the age of 56 with Chief Fisher's disability retirement following a heart attack last fall.

Before joining the Hillsborough Police Department as a captain in 1957, Fisher had served with the Oakland Police Department and the California Highway Patrol. He was appointed chief in 1962.

In his 15 years as Hillsborough's top law enforcement officer, Fisher was instrumental in starting the county's police training academy and was one of its first instructors. He was also one of the forces behind establishment of San Mateo County's narcotics enforcement task force.

It was primarily through Fisher's efforts that the first K–9 unit in the county was created after he had testified at numerous Senate hearings on the subject.

Development of an effective peace officer association was a longstanding project with the chief. He is the past president of the Bay Area Peace Officers Association and is still treasurer of the Peninsula branch. He served 1 year as president of the Police Chiefs Association of San Mateo County.

Fisher, a native of San Pablo, has also been involved with the scholarship committee for police officer candidates at College of San Mateo.

His fraternal affiliation is with the Native Sons of the Golden West. He has held the statewide post of grand trustee and is the past president of the local chapter.

I join his many friends in Hillsborough and throughout San Mateo County in wishing him well in the years ahead, and hoping that they will be full, happy, and rewarding for him.●

CONSIDERATION OF H.R. 11315, FEDERAL ELECTION CAMPAIGN ACT AMENDMENTS

HON. NEWTON I. STEERS, JR.

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 22, 1978

● Mr. STEERS. Mr. Speaker, as we all know, the House defeated the rule governing debate on H.R. 11315, the Federal Election Campaign Act Amendments of 1978. This rule provided for 2 hours of debate with a special provision allowing for the consideration of the nongermane amendment on public financing.

I fully support public financing and testified in support of it.

I nevertheless voted against this rule because this was the first opportunity and perhaps the only opportunity to insure that this country will have a two-party system. I joined with every Republican present to help vote down this rule. The bill that was reported by the House Administration Committee would have slashed the ability of political parties to contribute to their own candidates. It was a blatant attempt to deny to candidates of the Republican Party funds that have already been accumulated by the national party. According to the Washington Post of March 22, 1978, the Republicans have raised $18.5 million and the Democrats have raised $5.6 million for this upcoming election.

Let no one assume that the money raised by the Republican Party was given by "fat cats" and special interest political action committees (PAC's). Undisputed facts recited by our colleague, Congressman VANDER JAGT during yesterday's debate follow:

Any bill, which diminishes the role of the political parties automatically magnifies the role of special interests and fat-cat giving. Of all money contributed to the Democrat Party last year, 66 percent came from special interest pacs and fat cats. That is not going to get into the political process in 1978 because there is no surplus. The funds of our committee, at which this bill is really aimed, 99-plus percent came from small contributors. Ninety-seven percent of all contributions were under $100. Ninety-two percent came from contributors who gave under $50 and 72 percent of the contributors gave under $20. The average contribution of the whole shebang is $18.21. This bill restricts the right of that little giver who has already given to participate in the political process thru the political party of his choice.

As I stated earlier, all of the Republicans present voted against this rule, because of the threat to the two-party system. There are a number of Republicans who support public financing. I have stated that I support the Foley-Conable amendment on public financing that was to be offered to H.R. 11315. It is my understanding that Congressman CONABLE will introduce that amendment as a separate piece of legislation; I am proud to be one of the original cosponsors of that bill.

No doubt, some will attribute opposition to the rule to opposition to public financing. That may be true for some of my colleagues, but speaking for myself, I agree with Mr. Fred Wertheimer, vice president of Common Cause, who stated in the Washington Post of March 22, 1978:

Opponents of public financing could not have had better allies than House Administration Chairman Thompson and Majority Whip John Brademas. Their legislative proposal to drastically cut political party limits completely sabotaged this effort to enact congressional public financing.

It was clear that passage of the rule was dependent on support from minority members who publicly support public financing. If the House Administration Committee bill had not attempted to ruin the two-party system, this is one minority Member who would have gladly supported the rule.

In the end, the only restraint on a majority, in a democracy, is self-restraint. While that self-restraint was lacking in committee, it reemerged on the floor of the House, with the help of the minority party. It is truly regrettable that a potential for good (the possibility of amending the bill to cover public financing) had to be lost, because of the potential for evil (the attack on the two-party system, already incorporated into the bill).●

CALIFANO SMOKES AGAIN

HON. JAMES G. MARTIN

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 22, 1978

● Mr. MARTIN. Mr. Speaker, our Secretary of Health, Education, and Welfare, Joseph Califano, has today announced that the full force of his high office will be used to compel the consolidated University of North Carolina to adopt a policy of racial integration which his own principal subordinate acknowledges to be impossible and not achievable. Nevertheless, Secretary Califano insists on exercising his authority and wisdom by forcing the university administration to adopt goals that cannot be reached.

According to David Tatel, Director of the HEW Office of Civil Rights Compliance, the object of this is to get the university system to publicly adopt and commit to unreachable goals as a psychological device for getting a maximum effort toward greater racial progress. He agrees that in fact the university system is making great progress and that it has no policy of racial discrimination. He and Secretary Califano feel they must prove themselves by exerting greater pressure even, apparently, if it is not needed. Califano disregards the high reputation of the university and its President William Friday, insisting instead that we do it his way.

In taking this arbitrary stance he has offered compelling evidence that the Office of Education needs to be taken out of HEW—or that Secretary Califano needs to be.●

BRITAIN'S FUTURE SUPPORT OF NATO JEOPARDIZED BY EXTREME LEFTIST ELEMENTS IN THE LABOR PARTY

HON. JACK F. KEMP

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 22, 1978

● Mr. KEMP. Mr. Speaker, America's oldest ally, Great Britain is a key member of the NATO alliance whose daily defense activities are closely tied to our own. As a consequence, developments in British politics which may affect the character of her participation in the defense of the West are matters of utmost concern to all Americans. My concern about the evolution of British politics of the next decade or less has been aroused by a compelling analysis of trends in the Labor Party, currently in power, which may have a dramatic effect on British-American defense relations over the next few years.

The analysis to which I refer was published in the London Daily Telegraph on January 10 and 11 of this year. The analysis was prepared by Prof. Douglas Eden, a life-long Labor Party member and distinguished trade unionist. Professor Eden was a member of the Greater London Council, similar to a city council in the United States, as a Labor Party member. As a consequence, his observations have the ring of authority as an inside observer, not as an opposition party critic.

In summary, Professor Eden has laid out an unnerving review of the domination of key organs of the Labor Party by trade union leaders and elected officials who express an unambiguous preference for the Soviet-bloc nations, cultivate "fraternal" ties with Soviet-bloc trade unions which are nothing less than organs of the various intelligence services of the Soviet-bloc states, and participate in Soviet-bloc sponsored functions that are KGB-operated events to accelerate the subversion of the nations of Western Europe. Professor Eden's conclusion is stark:

The Labour movement of this country is being drawn slowly and undramatically into totalitarianism.

When circumstances such as these are observed involving a major institution of the Labor Party such as its National Executive Committee, it is reasonable to inquire as to what the consequences might be for American defense interests (and the other nations of NATO as well) if these trends in the Labor Party persist. I have included the complete text of Professor Eden's essay at the conclusion of my remarks:

[From the Daily Telegraph, Jan. 10, 1978]

LABOUR, TUC AND THEIR COMRADELY LINKS

(By Douglas Eden)

The Labour party's programme of policies, from which, according to the party's rules, its next General Election manifesto must be drawn, would advance Britain further on the road to the total Marxist State than the programme of the Italian Communist party.

This is not the work of Trotskyist lunatics, but of very careful and sober men and women who understand power and who serve as members of or advisers to Labour's National Executive Committee and the leadership of the trade unions.

The programme consists of the two documents, "Labour's Programme for Britain" and "Banking and Finance" adopted at the party's 1976 annual conference, and Jack Jones's resolution to abolish the Lords passed at the 1977 conference. In each case the two-thirds majority required on a card vote to adopt these items as Labour's Programme was easily achieved through the heavily one-sided casting of the trades unions' bloc votes.

This is hardly startling inasmuch as the TUC leadership was closely involved with the NEC and its Home Policy Committee in preparing the documents. As the home policy chairman, Anthony Wedgewood Benn, told Labour's 1976 conference: "Comrades, 'Labour's Programme 1976' contains our joint analysis now and our perspective for the future . . . We are asking this conference to vote for it formally so that . . . it will become the official party programme from which we shall draw our next manifesto." With 90 per cent of the votes at the conference assigned to the trade union bloc the result was hardly in doubt.

It has to be faced that Left-wing strength in the Labour party does not derive from the young Trots of the "Militant" and other ultra-Left tendencies running wild in the constituency parties. It stems from a hard-line core in the trade union establishment, flowers darkly in the TUC General Council and blooms brilliantly on Labour's NEC. In the hierarchy of the Labour movement, there is but one Trotskyist: Mr. Nick Bradley, NEC representative of the "Militant"-controlled Young Socialists.

In the past three years, the NEC has established relations with the Communist parties of Rumania, Yugoslavia, Poland, East Germany and the Soviet Union—never mind the "Eurocommunist" parties in Italy, Spain and France—hardly the sort of activity to commend itself to followers of Trotsky. These arrangements have taken place through the auspices of the NEC's International Committee, which is chaired by the prominent professional consultant on East-West trade, Mr. Ian Mikardo MP. (Self-employed, as he is, it is interesting to speculate on how Mr. Mikardo came a few years ago to be president of ASTMS, Clive Jenkins's union). He led the way three years ago when he attended the Rumanian Communist (Stalinist) party congress on behalf of the NEC.

Mr. Mikardo also chaired the NEC working party on banking and insurance nationalization which was set up in response to a resolution passed at the 1971 annual party conference, placing this matter on Labour's policy agenda for the first time. The resolution was moved by Miss Jo Richardson, since elected MP for Barking, for a long time Mr. Mikardo's personal assistant and still a director of his company and secretary of the Tribune Group. After some social democratic resistance stymied Mr. Mikardo's efforts, a resolution moved by AUEW-TASS (more of them later) at the 1975 conference revived the issue and led to the publication and adoption of "Banking and Finance" in 1976.

The recent exploits of Mr. Alex Kitson in Moscow are only the latest in a continuing series of similar events involving NEC members and union leaders which are at last receiving the attention they deserve from British Press and public. In 1972 Mr. Kitson was accorded the privilege of speaking before a Congress of Soviet "trade unions" in the Kremlin. He said that on behalf of Upper Clyde Shipbuilders he thanked them sincerely and that without their "tremendous financial support" the UCS work-in would not have been able to carry on.

A sponsor of the Moscow "Peace Congress" in 1973. Mr. Kitson was elected to the executive committee of the Communist-dominated Labour Research Department (no relation to the Labour party) in 1975 and perhaps first came to public attention when be conducted Boris Ponomarev on his tour of Britain as a guest of Labour's NEC.

In November, having humiliated the British Labour movement in a live performance in Moscow, Mr. Kitson returned to London leaving behind a seemingly endless string of primed stink-bombs which have been going off every few days on Russian television and radio at the pleasure of his Soviet friends. By a marvelous exercise in "new-speak," the NEC's International Committee exonerated Mr. Kitson of doing anything unseemly, claiming he had been "misreported." (I refer the uncertain to the verbatim reports of the BBC Monitoring Service.)

According to Press reports of the two meetings where the Kitson affair was discussed, the International Committee members who expressed support for Mr. Kitson were Mr. Norman Atkinson, MP, party treasurer; Mr. John Forrester, deputy general secretary of AUEW-TASS; Mr. Sam McCluskie, National Union of Seamen; Mr. Alan Haddon, Boilermakers' Union; Mrs. Judith Hart, MP, Overseas Development Minister; Mr. Frank Allaun, MP, and Mr. Mikardo, Mr. Forrester, a frequent speaker on Communist Morning Star platforms, went so far as to move a resolution endorsing Mr. Kitson's actions which was not put to the vote in deference to the objections of Mr. Michael Foot.

The significance of this list of names is that all of them bar Mr. Allaun and Mr. Mikardo owe their NEC seats to trade union nominations and bloc votes at Labour's annual conference.

Of the 26 NEC members elected by the annual conference, the trade union bloc effectively controls the election of 18. In addition to the above these include such hard-line Marxist luminaries as Miss Joan Maynard, MP, and Mr. Emlyn Williams, secretary of the South Wales miners' union. Hence, the trade union bloc provides about 10 of the 15- to 17-strong Marxist-dominated Left-wing group which controls the National Executive Committee of the Labour party.

Each autumn, the trade union leaders turn up at Labour's annual conference with some 5.7 million votes in their pockets, allegedly representing the views of those of their members who do not opt out of paying the political levy. It is impossible to believe that even one in ten of these members holds anything resembling Marxist-Leninist views, yet some three million of their votes were cast on their behalf for nationalising the banks and insurance companies (the card vote was 3,314,000 to 526,000) and nearly all available votes were cast for "Labour's Programme 1976" (5,883,000 to 122,000).

If these voting figures did not represent the views of the trade union membership, they certainly reflect—as does the mark-up of Labour's NEC—the views of the most important trade union leaders.

The Labour National Executive's rather more powerful counterpart at Congress House, the TUC General Council, also has an International Committee. Its chairman, Ian Mikardo's opposite number, if hardly his mere equal (for in today's Labour movement some brothers are more equal than others), is Mr. Jack Jones, C H. He will hold this high office until the next Trades Union Congress meets in September although he retires as general secretary of the Transport and General Workers' Union in March. He will be succeeded at the TGWU by his protege, Mr. Moss Evans, who was elected to the TUC General Council last September.

For the past five years Mr. Jones has guided the TUC in establishing fraternal relations with the national trade union organisations of the East European dictatorships, presaging the parallel activities of Labour's NEC at a party political level. Mr. Jones and his colleagues have, using the facilities of the International Labour Organisation, organised three conferences in Geneva bringing together TUC representaitves led by Mr. Jones and members of the Soviet régime, the latter attending in their capacity as leading "trade union officials"; which perhaps goes some way toward explaining why the TUC does not share the view of the ILO held by its American counterpart, the AFL-CIO, nor approve of President Carter's recent decision to withdraw the USA from membership.

It is perhaps too much to hope that everyone is aware of the status and methods of Soviet "trade unions." They are of course an arm of the totalitarian Soviet State and not free and voluntary associations of workers as in Britain. (Ours are still voluntary, aren't they?) They administer the direction of labour on behalf of the State and their officials are selected by the Communist party of the Soviet Union and are part of the government apparatus. Therefore, if the British TUC pursues relations with East European trade unions (the Soviet pattern applies in all the satellite States) it is in effect dealing with their Governments and ruling Communist parties, not with voluntary groups of workers.

Jack Jones has led delegations to Poland, Hungary, Czechoslovakia, Bulgaria, East Germany and the Soviet Union. On each occasion meetings were held with "leading political figures and central trade union organisations." In Bulgaria this went so far as to include private discussions with the First Secretary of the Bulgarian Communist party.

Mr. Jones told the 1974 TUC "We have opened the door to discussion and understanding; to putting emphasis on the aims which unite us rather than on the details which divide us."

In Mr. Jones's report to the 1976 TUC of his East German visit it was uncritically stated that "the GDR was a Workers' State and the trade unions were not therefore in opposition . . . the only help (the GDR) had received from outside being from the Soviet Union in preserving the freedom of the country." His report mentioned that his East German hosts "drew attention to . . . the sometimes undersirable impact of West German television and of the exchange of visitors with" West Germany. "Details" like the Berlin Wall were not mentioned.

The apotheosis of Jonesian diplomacy was achieved at the end of March, 1975, when three members of the Soviet Government and the State-appointed secretary of the Soviet TUC visited Britain as guests of the TUC General Council. The delegation was led by the infamous A. N. Shelepin, then a senior member of the CPSU's Politburo and former head of the KGB, and the two other notables were members of the Presidium (the Soviet Cabinet). They were described by Congress House as a "trade union delegation."

In October, 1976, Mr. Jones and Mr. Len Murray organised a reception at Congress House for Boris Ponomarev. The TUC contrived to ignore Alexander Solzhenitsyn and Vladimir Bukovsky when they came to this country.

During his 1976 visit to the Soviet Union, which caused the Prime Minister to cancel urgent talks on the sterling crisis, Mr. Jones was quoted as saying the Russian unions were "doing an exceptionally good job" and that

the people of Soviet-occupied Latvia were "running their own affairs very effectively." While in East Germany he was reported to have declared that he "feels at home" there. Unlike his TGWU colleague, Mr. Kitson, Mr. Jones has never claimed to have been "misreported."

IT IS TIME WE STOOD UP TO THE HARD-LINERS ON THE LEFT

Last February, the Social Democratic Alliance published my brief summary of 40 facts showing that 16 of the TUC General Council's 39 members were actively pursuing associations with Communist organizations. None of the facts has ever been disputed.

The document included a detailed account of how the TUC General Council frustrated the efforts of Frank Chapple's Electricians' union to get the General Council "to consider whether the protests they made about events in other countries (e.g. Spain, Chile, South Africa) were not rendered less effective by their ignoring events in the Communist countries; to give practical support to Congress policy (on human rights) by protesting to the Soviet Government, or, if not, to state the basis of their differentiation between various régimes; and to state whether the political system they favoured was that existing in the Soviet Union." (Now what would Mr. Kitson say to that?)

At one stage, the General Council, to quote from the report of Jack Jones's International Committee, asserted that "trade union freedoms were not at issue in the case of dissidents in the Soviet Union" and, acting as a neutral and disinterested party, referred the EETPU's complaints without comment to the Soviet Ambassador in London for reply. The anodine reply, when received, was simply passed on to the electricians.

At September's TUC an attempt by the Colliery Overmen's Union and the electricians to get adopted a resolution supporting General Council policy on human rights in South Africa but asking for its extension to East Europe was easily defeated after Jack Jones attacked these two unions from the platform.

I would like to ask the two unions who came to the rostrum what they did about the situation in South Africa (*applause*) and I want to say that you really cannot equate suppression of a majority of the nation in South Africa with even the sort of thing that you claim to be happening in Eastern Europe. You can't equate it. And you ought not to justify South Africa because this resolution as written could very well have been written by Ian Smith and the South African Government, and you know it. And if you pass it today you give an excuse to the continued attitude of Ian Smith and the South African Government in trying to suppress the overwhelming majority of their nation. And, having said that, let me say that the motion and its sweeping condemnation of the Soviet Union and the satellites, as though they're all the same and we know they're not, but it asks you to proceed by way of confrontation with our relations with Eastern Europe. That's contrary to the policy which we have consistently adopted year after year.

That policy was most succinctly stated in a resolution moved and seconded at the 1975 TUC by two AUEW delegates who are members of the British Communist party. It called for the establishment of close relations with the World Federation of Trade Unions, the Communist "trade union" front organisation based in Prague and controlled by the Soviet Union. It was easily carried with the support of the General Council.

As Mr. Bob Wright reminded the 1974 TUC, the AUEW has campaigned since 1971 "to encourage fraternal relations" between the free trade unions of the West and the "unions" of the Eastern bloc. Mr. Wright is currently the candidate of the Broad Left (a Left-wing Labour/Communist party alliance) for the presidency of the AUEW in succession to Mr. Hugh Scanlon, who was also a Broad Left candidate and serves on the TUC International Committee. Mr. Scanlon had an interesting anniversary recently: his period of Labour party membership at last exceeded his previous 20 years' membership of the Communist party.

About 10 per cent of the delegates at this year's TUC were open members of the Communist party and one in five were invited to address congress. Important resolutions were actually moved or seconded by 17 Communists. Four of them hold the general secretaryships of their unions: Mr. Ken Gill, AUEW-TASS (John Forrester of the Labour NEC is Mr. Gill's deputy); Mr. George Guy, Sheet Metal Workers; Mr. Ben Rubner, Furniture and Timber Union; and Mr. Stan Broadbridge, Further and Higher Education Teachers (including polytechnic lectures).

Mr. Gill was re-elected to the TUC General Council with over nine million votes and Mr. Guy was elected for the first time with more than eight million. Three other Communist members were put up as candidates. They were unsuccessful but achieved very respectable votes putting them in good positions for future contests. Mr. Broadbridge, standing for the first time, received over four million votes; Mr. Rubner managed more than three million, and Mrs. Christine Page of NALGO attracted nearly four million.

The only major omnibus resolution on economic policy, a baldly Marxist one, considered at last September's TUC was moved by Mr. Gill. It was overwhelmingly carried on a show of hands. It is now TUC policy and thus became more or less binding on the trade union delegations which attended the Labour party's annual conference a month later.

When I arrived at the Metropole Hotel, Brighton, a day before Labour's conference, the first face I saw was Ken Gill's. Not being a member of the Labour party, he could not attend the conference as a delegate; but, like other Marxist-Leninists in the AUEW leadership who do not belong to the Labour party, he was able to attend, speak and vote at the private meetings where his union's delegation considered their position on conference resolutions and candidates for the NEC. At the crucial 1976 Labour conference, Mr. Mick McGahey, vice-president of the National Union of Mineworkers and this year's chairman of the Communist party of Great Britain, presided at the private pre-conference meeting of the NUM delegation.

It would seem the British Communist party's industrial organiser, Mr. Bert Ramelson, was not speaking idly when he said in 1974, "The party can float an idea early in the year and it can become official Labour policy by the autumn." Nor was Leonid Brezhnev improvising when he told the 25th Congress of the CPSU in 1976 "We continued to extend our ties (last year) with progressive non-Communist parties—revolutionary-democratic, and also Left-socialist. Our contacts with the socialist and social-democratic parties of a number of countries, including . . . Britain . . . have noticeably expanded. We appreciate the progress made in this domain, and shall continue to work in the same direction."

It gives a member of the Labour party and trade unionist like myself no pleasure to raise these matters, but unless the non-Left leaders of the Parliamentary party join with the anti-Communist minority in the trade union leadership to overthrow the hard-line Leninist elements which control the TUC and the national Labour party organisation, the Parliamentary party will itself be overwhelmed by an intake of Marxist MPs—elected as Labour—perhaps as early as the next General Election.

The Labour movement of this country is being drawn slowly and undramatically into totalitarianism. At this price, party unity is too dearly bought, but, this near a General Election, social democratic office-holders seem determined to pay it. Whether they can sell it to Labour voters and the British electorate at large remains to be seen.●

WHO SHOULD SERVE IN CONGRESS?

HON. OLIN E. TEAGUE

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 22, 1978

● Mr. TEAGUE. Mr. Speaker, since I am going to retire from Congress this year, after 32 years of service, I thought I should share with you my ideas about who should serve in Congress, and who should not.

I do not intend to draw a congressional model for you. In fact, my aim is to do just the opposite. I intend to suggest qualities and characteristics that are important to possess for such a responsible position. Variety is one of the principal strengths of the House of Representatives and should never be lost or diminished.

To begin, the House is a much more diversified body than the Senate. For example, the House has 17 women Members; the Senate has one. In the House there are 17 black Members; while the Senate has but one. The House more accurately reflects the ethnic, religious and ideological mix of the United States, and that is as it should be. It is in a very real sense a House of Representatives.

The greatest diversity in the House often manifests itself in the educational attainments of its Members. We have Rhodes' Scholars, lawyers, doctors, and clergymen, and we have many Members who are self-made and who have overcome the disadvantages of limited formal education. However, there seems to be little or no correlation between a Member's effectiveness and performance and his or her educational background.

There is no room for intellectual snobbery in the House. Everyone has something to offer, and those who have the most usually stay the longest and travel furthest in the quest for responsibility and leadership.

Neither do I want to suggest that all Congressmen are saints or that everyone presently in the House should be there. We have our share of sinners, just like the rest of the world. But I do think that the American public, under the constant influence of the news media, tends to believe that misconduct and misbehavior on Capitol Hill are far more common than they actually are. After 32 years of experience and service in the Congress, I can say with some authority that the average Representative is a decent, hard-working individual, a credit to his constituents and a credit to his country. Two Texans who served admirably in the House, the late Speaker Sam Rayburn and the late Judge Marvin Jones, who represented the 18th (Pan-

handle) District of Texas with distinction for many years, expressed the opinion that people get the kind of government they deserve. The House of Representatives is the people and in the long run the House will either preserve the Republic or destroy it.

I firmly believe that if the people have a continuing interest in their Government and exercise careful attention in choosing and electing their congressional representatives, then Congress will continue to be the principal preserver of the American way of life as we know it.

Let me now turn to specifics. Who should serve in Congress? At the outset, the ideal candidate for Congress should have a definite philosophy of his or her own and that philosophy should be shared with the constituents represented.

This person should be a leader, not a follower. During my years in the House I have known my share of politicians who have followed the dictates of expediency rather than those of conscience. This kind of person is almost immediately recognized by his colleagues for what he is and is relegated by those colleagues to the lowest degree of respect and attention.

The most effective and respected Member is one who has a definite political philosophy, who lets his constituents know what it is before election, and within reason, maintains that philosophy while he is in office. I say "within reason" because there must be room for intellectual growth and constructive change. Most Congressmen, after a few terms in office, tend to change or modify their ideology from that which they expressed when they first came to Washington. A Congressman who is too rigid or doctrinaire becomes ineffective in a changing world and in a dynamic political institution like the Congress. However, these chages in philosophy should be consistent and come from the heart and the head and not from a frightened glance at the public opinion polls.

I know I have changed in some of my philosophical concepts since I first came to Capitol Hill, but I did try to let my constituents know why I was changing my opinion on certain issues. I found that the citizens of the Sixth District of Texas, by and large, respected my honesty, even if they didn't always agree with my thinking. I believe I have never lost a single voter by being honest, and I hope my successor in the House will follow the same philosophy.

Now let me attempt to talk about the importance of integrity. By integrity I mean personal faithfulness to certain ideals as well as public faithfulness to those ideals. No person should come to Congress with the idea of using his or her position as a means to amass personal wealth. That is basic and immutable. I can say with a wry sense of pride that I shall leave office this year with no accumulated wealth and nothing of importance in my estate except my pension which I consider not only adequate, but generous. However, I must add that I depart with a wealth of experience and an increasing admiration for this Nation, its people and its political system.

Temptations for a Congressman in Washington are numerous. Favors and privileges are offered regularly, but an effective and responsible public servant must always answer to only his conscience and his constituents. In all my years on Capitol Hill. I have not personally been approached by a lobbyist with an improper offer. All the lobbyists I have known have been honorable and knowledgeable people and I have learned a great deal from them, listening to both sides of an issue and then, in private, making up my own mind.

Good lobbyists serve a definite and useful purpose in government. They are specialists in their own areas of reference and since a Congressman cannot even begin to become an expert in everything that comes up before the House, he should learn as much as he can from as many reputable and knowledgeable people as are available. The lobbyists I have known have been educators and advocates. I am grateful to them and I honestly believe I have been a better Congressman because I have used them honestly and intelligently. I realize that others may have had different experiences; I can only speak for myself in this situation.

A dedicated Congressman must be prepared to work long and hard hours. If a Congressman really does his homework he is accepted by his colleagues, no matter what political faith he might be. If a Member tries to get by with short cuts, blarney, or other substitutes for work he will not have earned the credibility among his colleagues to be suggested for positions of leadership or sensitivity. The leaders of Congress have reached their positions through years of hard work and they have no intention of forwarding anyone, no matter how personally attractive, who has not earned the right to promotion.

In summary, I hope my successor as your representative will be a person of irreproachable professional and moral integrity, one whom every voter in the sixth district can be proud. He or she should be a person whom you would be proud to welcome in your own house as well as sponsor to represent you in your Goverment's house.

In my continuing comment about who should serve in Congress, I believe I should discuss the subject of "seniority" at this point. Although this is a term that has fallen from good graces in recent years, seniority in Congress is no different from seniority in any other profession or job. A person must be given the opportunity to gain experience in a position or mature a little in that capacity before he can be of maximum effectiveness and value. This is particularly true for Congressmen. The congressional system is complex and encompasses a myriad of responsibilities. It takes at least one term to observe or "get your feet wet" before being able to affect change. If an electorate sends a capable, well-qualified young person to Congress there is a better chance that this person will have time to mature in office and eventually attain a leadership position where he can serve the Nation, his State and his district best.

As Texans we are going to have a problem next year. Many of our most senior Members are retiring this year and will be replaced by freshmen. I believe that the departing statesmen should be replaced by people of integrity who have a viable political philosophy and who have the youth to enable them to stay in Washington for enough time to gain experience and eligibility for a leadership position.

So far, we have talked about the necessity for integrity and a viable political philosophy for potential candidates to Congress, and the added advantage of being young. I would like to talk now about the importance of fiscal responsibility for all would-be candidates.

By fiscal responsibility I mean both a personal and public financial conscience. A person who is irresponsible in his or her own personal finances can hardly be expected to behave honorably when dealing with the finances of his country. A person is either honest or dishonest. There is no room for borderline judgment here. In public financial matters, it is very easy for a Member of Congress to woo votes from his constituency by recklessly voting to spend the money of the general taxpayers.

There is a wise proverb that says there is always a simple answer to any complex problem—and it is usually the wrong answer. Today, many Members of Congress think that the only political answer to any governmental problem is to spend more and more taxpayers' money. These people—and they are, thankfully, a minority—have always struck me as having an extremely shortsighted and selfish point of view. They either cannot understand or refuse to accept the fact that unlimited spending, now, will create fiscal havoc for Americans in generations to come. They are interested in spending now to appear concerned and conscientious and to get reelected. They are not mindful of what effect today's decision will have on tomorrow.

I have no aversion to spending tax money when that money is well spent and the need is apparent. As chairman of the Veterans' Affairs Committee of the House for over 10 years, I was, at least partially, responsible for the expenditure of a great deal of money, and I do not regret a penny of it. The veterans gave everything they had for their country and deserve in return, everything a grateful Nation can possible afford to do to alleviate their problems at a time when they are in greatest need. Even in veterans' affairs however, reckless or sentimental squandering of tax dollars is not the answer to the problems. The spending must be controlled, selective and constructive, or else it does far more harm than good.

During my years on the Space Committee (now known as the Committee on Science and Technology), both as chairman of a subcommittee and then as chairman of the full committee, I oversaw the expenditure of billions of dollars.

Such expenditures were criticized by many who could not see that those dollars were being spent in this country, not on the moon, and that they not only

created hundreds of thousands of new jobs here, thus helping to keep the economy healthy, but also made an essential contribution to the security and international status of the Nation. The space program reaffirmed America's world scientific leadership at a time when the Soviet Union's scientific expertise was threatening to eclipse ours in the judgment of many people around the world.

The point is that the spending of money by Congress in itself is not bad, but the reckless spending of money for political advantage is always bad. The opposite is also true, however. Over the years there have been some Members of Congress, for reasons I think were just as political as those of the big spenders, who in effect, refused to vote for appropriations for anything, no matter how worthy the objective. Such Members gloried in calling themselves "the watchdogs of the Treasury." They were nothing of the sort; they accomplished nothing, and they stood only for blind reaction and the preservation of the status quo.

I have found over the years that the House of Representatives generally pays little attention to the radicals of the far left or right, but listens with respect to the moderates with a reputation for fiscal responsibility. I believe that responsible Members of Congress understand that we cannot spend what we do not have, and we cannot fail to spend, within reason, what is necessary for our national safety and the prosperity of our people.

I believe the major function of a Congressman is to weigh all the evidence on every case (and the evidence is often conflicting) from every segment of the population and then decide what action, if any, should be taken.

Thus a Congressman must feel what his people feel. He must have compassion for their needs, sympathy for their goals. At the same time, a Congressman cannot be purely provincial in this thinking. He must weigh the desires of his people with the overall welfare of the Nation. For instance, if a Congressman does not understand or care about the terrible effect inflation has on retired people of fixed incomes, he could, by his votes, inflict real harm on those who deserve the best from us.

One facet of a Congressman's job that touches his constituents directly is casework. Through casework a Congressman helps his constituents in their dealings with their Government. This task takes patience as well as compassion. The average citizen is astonishingly ill-informed about the way in which his government operates. He is bewildered by the huge, faceless bureaucracy, the computers and the endless forms. My office has received thousands of letters each year from constituents claiming the Government has mishandled their cases. I have found most of these grievances justified. These problems must be handled with understanding as well as efficiency.

Every 2 years Members of the House go before the people to ask their support. Too many Members forget that the people need—and should have—their support every day of every year. If a person has not the will or the spiritual ability to extend that compassionate support to all of his constituents, then that person has no right to be a Member of the House of Representatives. A person must have the potential for learning and growth, and must have the courage and the will to face up to the real responsibilities, and not seek easy short-term solutions to difficult problems.

I hope my friends and constituents will keep some of these thoughts in mind when the time comes for them to choose their new representative from the Sixth District of Texas.●

HUMPHREY-HAWKINS IS A FIRST STEP—MANY MORE STEPS MUST FOLLOW

HON. EDWARD J. MARKEY

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 22, 1978

● Mr. MARKEY. Mr. Speaker, last week I voted for the revised Full Employment and Balanced Growth Act because I believe in the truth of the ancient proverb that the journey of a thousand miles begins with a single step. But I remain apprehensive that this bill, if enacted into law, may be misread as the solution, completed with the stroke of the Presidential pen, to the misery of massive unemployment in our Nation. This bill is no such thing, and we must be honest enough to say so.

Quite simply, this measure is no longer the ambitious commitment to the achievement of full employment which it did embody in its earlier versions. In its present form, it has become a mandate without a method. As first introduced, the Humphrey-Hawkins bill was based on the sound proposition that no matter how costly it is to put people to work, it is far more costly and wasteful to pay them not to work. It was the recognition that to pay people not to work is a ruinous social policy that America has too long permitted to continue.

A job is a right, a human right. The original Humphrey-Hawkins bill made that right a reality. The revised bill does not. It offers not jobs, but promises. What is missing—crucially missing—are the specific mechanisms committing the Federal Government to take swift action, as needed, to serve as an employer of last resort.

We need to insure that millions of new jobs will continue to be created in the next decade. Most of these jobs will be created in the private sector. It is clear, however, from the record of the past decade that some of the jobs to be created must come in the public sector. When I endorsed the Humphrey-Hawkins bill during my campaign for election to this office, I declared then that "public jobs are necessary to take up the slack in the private sector"—public works jobs, public service jobs, public jobs which are productive jobs, in which the role of the Government is to guarantee that the right to a job at a decent wage is a reality for all Americans.

Rebuilding our cities, cleaning up our rivers and harbors, turning our railbeds into the underpinning of an energy-efficient transportation system, finding labor-intensive solutions to energy conservation, improving day care and education, delivering health services to those who go without—these are the challenges which public employment can meet, on a permanent, antirecessionary basis.

The dimensions of unemployment in America have reached the proportions of a massive human tragedy. The real unemployment rate, many believe, is far higher than the one issued by the Department of Labor. One in four Americans is directly touched by unemployment, either as an individual or within their family. Every unemployed wage earner ready, willing and able to work is a walking, breathing American tragedy—not a cold, gray Government statistic. And yet Herbert Stein, who was Chairman of the Council of Economic Advisers for Nixon, recently suggested: Ignore the high rates of joblessness in our society, and simply declare employment "full."

This would be the most "cruel hoax" of all. It would come at the expense of cities in my district such as Revere, which had a rate of unemployment for 1977 averaging nearly 11 percent, and cities like Everett, with over 10 percent, and Winthrop with nearly 9 percent. Other cities in my district also are hit with intolerably high rates: Chelsea, Stoneham, and Wakefield, with a 1977 rate averaging over 8 percent; Malden, Medford, Woburn, and Saugus, at over 7 percent; Melrose, Winchester, Lynnfield, and Burlington, at over 6 percent; and Reading, at nearly 5½ percent. The average rate of joblessness in my district last year was nearly 8 percent—double the 4-percent goal this bill sets for 5 years hence.

Each unemployed worker costs taxpayers an average of over $18,000 per year in lost taxes, unemployment insurance, and other support programs, according to the 1977 Midyear Review of the Economy of the Joint Economic Committee of Congress. Every time the jobless rate goes up 1 percent, it costs the Federal Government around $14 billion annually in tax revenues it would collect if these people were working. Tax revenues of State and local governments are also reduced, and valuable public services must be sacrificed. Moreover, the same 1-percent of unemployment costs our country $50 billion in lost goods and services annually. Thus, the difference between 4-percent and 7-percent unemployment comes to a staggering sum of $150 billion annually.

Leon Keyserling, chairman of the Council of Economic Advisers under Truman, estimates that failure to maintain full employment cost the United States over $3.5 trillion from 1953 to 1975. According to another recent report, high unemployment could cost the U.S. economy a total of $6 trillion to $15 trillion in our gross national product by the year 2000. With so much to be done in our country, this is a price we cannot afford to pay in lost opportunities.

Other costs of underemployment are

not so readily perceived. But they are nonetheless real. The Social Security Administration, for instance, released a study showing that, if unemployment were reduced only 2 percentage points, Social Security income over the next 4 years would show a surplus of $10 billion instead of the actual projected deficit once feared to total $11 billion. Thus, even a moderate cut in the jobless rate could have averted the sharp boost in social security payroll taxes recently enacted.

It is therefore astonishing to read the statement from the White House in the Budget document for 1979 which defines "high employment" by 1983 as 4.7 percent. This arithmetic should give each of us pause before basking in the glow cast by the promises of the Humphrey-Hawkins bill. Quite simply, the definition of "full" employment has been edging steadily upward since the mid-1950's. In a recent report by the economist Steven Sheffrin and published by the Exploratory Project for Economic Alternatives, a different conclusion is reached. Sheffrin argues convincingly that the Federal Government should not accept a jobless rate higher than 2 to 3 percent. I agree.

To me the value of the Humphrey-Hawkins bill, in its revised form, is that it insures a regular debate on the problems of joblessness and stagnation in our society. There is real value in specific provisions of the bill which make this debate possible and require more coordination in the framing of national economic policy. I salute the sponsors of the bill for their devoted work in the successful effort to pay, by a vote of 257 to 152, this legislation. In its present form, however, the bill is largely of symbolic value. Not one job will be created as a direct result of passing this bill. But symbols can be important in politics, as in the rest of life. For this reason, I decided to vote for the bill. Enactment will be only the first step. We must take many other steps before the journey is done. The millions of people who want to work will settle for nothing less.●

1977 TRUCK DEALER OF THE YEAR

HON. WILLIAM C. WAMPLER

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 22, 1978

● Mr. WAMPLER. Mr. Speaker, I was deeply pleased to join in honoring my good friend and constituent, Frank Goodpasture, Jr., of Bristol, Va., at a luncheon held in his honor on January 19, 1978. Frank was selected as the 1977 Truck Dealer of the Year by the American truck dealers division of the National Automobile Dealers Association and Business Week Magazine. This is an annual award, and Frank was selected from 5 regional winners by judges at Columbia University Graduate School of Business for his record as a quality truck dealer and for his community service in Bristol. He is the president of Goodpasture Motor Co., a GMC truck dealership in Bristol. The fine example he sets for other area businessmen in merchandising, community service, and contributions to the economic growth of his community are recognized by this award.

Our small businessmen are invaluable for their contributions to the communities in which they live, and their positive effect on the local economies and the free enterprise system. Frank has my sincere and hearty congratulations on being named 1977 Truck Dealer of the Year, and is certainly deserving of this recognition.●

EMERGENCY SHELTER LEGISLATION

HON. GEORGE MILLER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 22, 1978

● Mr. MILLER of California. Mr. Speaker, I am introducing today legislation to amend title XX of the Social Security Act in order to permit the expenditure of Federal funds for emergency shelters for adults, including victims of domestic violence. I am especially pleased that the three authors of related pieces of legislation concerning family violence, Congresswomen BOGGS and MIKULSKI, and Congressman STEERS, are joining me as primary cosponsors of this bill.

Last week, I chaired two very informative days of hearings on my colleagues' bills. We heard the testimony of experts who reported that domestic violence, and especially wife beating, is one of the most overlooked crimes in our Nation. A recent study by the Washington Star indicated that one-half of the country's married women are, at some point in their marriages, subjected to physical abuse by their husbands, and that at least 10 percent receive severe injuries as a result.

Domestic abuse does not refer to simply slappings or other minor forms of assault. In California, it has been shown almost one-third of all victims were murdered by their husbands. Nationally, one-fifth of all police killed on duty in 1974 were intervening in domestic disputes at the time of their deaths.

In preparation for these hearings by the Subcommittee on Select Education, I spent several evenings visiting homes for battered women, discussing the programs and the problems with shelter organizers and with victims, too. I also spent an evening riding in a police car with officers experienced in intervening in domestic violence situations. As a result of these experiences, I have learned the value police themselves place in having a shelter available in their communities. Police are generally grateful to have such a facility, because it provides them with a valuable resource to which they can direct victims. Victims of domestic violence have confided in me that, in many cases, they endured years of abuse because they had no alternative living option to turn to on an emergency basis.

Within the last several years, a nationwide network of shelters has appeared, offering havens to thousands of previously victimized women. Often with no resources except those of volunteers and donations from the community, these shelters have been established and maintained for the victims of abuse. No one who has discussed the benefits of these shelters with the women who have come to them, as I have done, could doubt the great benefits they provide and the need for more such facilities.

It seems to me that, when we consider the role of the Federal Government in dealing with the subject of domestic violence, we must be extremely careful not to encumber existing community-based programs with bureaucratic red-tape and regulations which will do far, far more harm than good. We in Government did not discover the problem of domestic violence, and we did not invent the solutions. Our role should be one of aiding the community people who have exposed the epidemic, and who have developed their own shelters in response.

One of the positive actions we can take is to enact legislation to provide greater Federal assistance to people developing or operating shelters. My cosponsors, and others in the Congress, have been working on such legislation for many months, and I am hopeful that we will soon be able to report a bill from the subcommittee.

In addition, we should eliminate those barriers which exist in Federal programs to the funding and support of shelters and related service programs for the victims of domestic violence. Witnesses at our hearings last week testified, for example, that facilities providing emergency shelter for adult victims of domestic violence may not receive title XX funds under the Social Security Act.

The legislation I am introducing today would remove that unreasonable restriction, permitting these shelters to receive such funds. Payments to any one shelter would be limited to $25,000 in any one year. At last week's hearings, we heard that women who flee battering husbands frequently arrive at shelters entirely without resources, even though they technically may come from affluent homes. The family's finances frequently are controlled by the very spouse from whom the shelter resident is seeking refuge. Therefore, it seems reasonable to me to impose no income eligibility test on victims utilizing title XX funded shelters.

I am hopeful that this legislation will be considered quickly, either as a separate piece of legislation, or as an amendment to the Social Security Act during the next markup of a relevant bill. I also invite my colleagues to join me in sponsoring this bill which will make substantial funds available to community people who have taken it upon themselves to meet a serious problem which exists throughout our country in very alarming numbers.

The text of the bill follows:

A bill to amend title XX of the Social Security Act to authorize payments there-

under for the cost of emergency shelter or services furnished to individuals (whether adults or children) because of the danger of abuse or injury

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 2002 (a)(11) of the Social Security Act is amended by striking out "and" at the end of subparagraph (C), by striking out the period at the end of subparagraph (D), and inserting "; and", and by adding at the end thereof the following new subsection:

"(E) any expenditure for the provision of emergency shelter, for not in excess of thirty days in any six month period, provided as a protective service to an adult in danger of physical or mental injury, neglect, maltreatment, or exploitation. Payments made under this section shall not exceed $25,000 to any one shelter or provider of services in any fiscal year. Notwithstanding any other provision of this section, in determining the eligibility of individuals to have payment made under this section with respect to such expenditures, the State shall conclusively treat all individuals who are found to need such shelter or services as meeting (for the purposes of such payment) any income requirements which would otherwise be applicable under this section." ●

INFLATION: AMERICA'S GREATEST DOMESTIC PROBLEM

HON. J. WILLIAM STANTON

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 22, 1978

● Mr. STANTON. Mr. Speaker, I want to make some remarks today about the greatest domestic problem America faces in these critical times: Inflation.

Mr. Speaker, the President of the United States likes to talk about how (quote) lean (unquote) his $500 billion budget for fiscal 1979 is but he says little about his fat $60 billion estimated deficit.

I submit, as do many of my colleagues and also Washington Post financial writer Art Pine, that the estimated Carter deficit of $60 billion is likely to swell as the Carter tax package is picked to pieces by the Congress. In fact, it is in my view and that of many other Members of the House that the fiscal 1979 deficit could balloon to $80 billion or higher.

Through its Economic Stabilization and Domestic Monetary Policy Subcommittees, the House Banking Committee, serves as an inflation watchdog. As ranking Republican on the House Banking Committee, I want to do a bit of howling today about the inflationary dangers that face Americans in the months and years ahead.

When we talk about the causes of inflation, we are concerned with both fiscal and monetary policy. We know that the two are related and that both have an impact on the economy. I will speak of monetary policy a little later but right now I want to discuss the financing of Federal deficits and the effect that has on our economy.

When the Federal budget runs a deficit, the Treasury must sell bills and bonds to cover that shortfall. At the same time, the Federal Reserve Board decides whether to buy some of those bills and bonds. If the Fed does not do so, the monetary base is not expanded and inflation does not result. But then the Treasury Department must compete with private borrowers in the money market and this drives interest rates up if the deficit is huge. The result is that private borrowers are squeezed out of the money market by the Government, and this hampers the business investment that is needed to produce growth and new jobs.

There is always the possibility, of course, that the Fed will buy some of those Treasury bills and bonds and thus increase the monetary base. If this is done on a large scale, the result in the longer term is inflation.

If you accept the premise that the fiscal 1979 deficit may very well mount to at least $80 billion—and I do—then you can readily see that we face either rapidly increasing inflation down the road or a credit crunch that will push up interest rates and hurt industrial investment.

Since the President called in his state of the Union message for the private sector to shoulder the responsibility for generating thousands of new jobs, you might guess that the Fed under its new Chairman may choose increased inflation rather than a credit squeeze.

The role of the Fed is highly important in fighting inflation, but the new Fed Chairman, G. William Miller, recently stated in an appearance before the House Banking Committee that the Fed's inflation-fighting powers are limited. He must have been wondering what the Fed can do to combat inflation at a time when the President is proposing a $60 billion deficit and the Congress itself is legislating inflation.

During that same appearance before the Banking Committee, Miller said inflation is the Nation's No. 1 problem. Prior to his being confirmed as Fed Chairman, Miller told the Senate Banking Committee that Fed policy should be in harmony with that of the administration. It seems to me Miller is going to have a tough time harmonizing Fed policy with that of the administration if he really is setting out to do battle with inflation.

The President announced an anti-inflation program in his state of the Union address—and then just left the rhetoric hanging in midair. It seems the President makes a practice of doing this sort of thing—announcing lofty goals and then doing nothing to achieve them.

Somebody should tell President Carter that the American people want performance—not promises.

Now it is reported that the administration is getting ready to announce another anti-inflation program. If this is true, I hope it succeeds. But I am afraid it may not be any more meaningful than the program announced by the President in January.

It is said that the past is prolog. You have to look at where you have been to see where you were going.

From 1948 to 1961, the inflation rate in our country averaged 2 percent a year while the money stock also grew at only about 2 percent a year.

Shockingly enough, inflation averaged 7 percent a year from 1971 to 1977, a time when the money supply grew at a 6-percent average for the narrowly defined base.

Experience has shown us that when the money supply is increased and a new higher growth rate is maintained, output and employment increase over a period of 2 to 4 years. But when that effect wears off, we are left with a higher rate of inflation.

What we must do to achieve stable prices is to carefully, gradually return the money supply growth rate to a low level—as former Fed Chairman Arthur Burns sought to do. He could not do the job alone. Struggle as he did against inflation Dr. Burns was faced with a flood of Treasury financing of one huge Federal deficit after another. The odds against him were insurmountable.

There is no question that at present the trend of inflation is up, and that the Carter fiscal 1979 deficit—which I see swelling in the hands of the Democratic-controlled Congress—will have an adverse impact on the economy. We will either head toward a repeat of double digit inflation or we will experience a severe shortage of investment capital and possibly a housing depression.

In 1978 we will see an accelerated rise in prices and also higher interest rates as the economy finishes digesting the 1977 surges in money supply. My fear is that these trends will continue at an even more rapid pace in 1979 as the economy feels the impact of the Carter budget and Carter's and the majority party's horrendous deficit.

Even if inflation simply continued at what the administration calls "an underlying rate" of 6-percent inflation, the end-result would be disaster.

The straight mathematics of a 6-percent annual rise in prices means that prices double in 12 years. Six-percent inflation continued for another 12 years would mean that prices again would double. In other words, 6-percent inflation continuing for 24 years would produce a price level four times the level of the starting period. Among 12 years of 6-percent inflation would give us a price level eight times that of the starting period. In 48 years—by 2026—the price level would be 16 times the starting level.

In less than 50 years of continued 6-percent-per-year inflation, the present 50-cent loaf of bread would cost $8, the $2 roast would cost $32 a pound, and a 7-cent egg would cost $1.12.

A worker earning $10,000 today would have to receive $160,000 a year in the year 2026 just to stay even with 6-percent annual inflation.

Our country cannot survive continued 6-percent annual inflation. That is the grim truth of the matter.

Consumer prices rose 6.8 percent in 1977. In 1978 the Consumer Price Index is certain to rise at a brisker clip. The trend will be up, and the annual rate of inflation likely will hit 7½ to 8 percent by the end of the year. From there, I fear, the thrust of Carter and majority party fiscal 1979 spending will shove consumer prices upward and onward toward double digit inflation.

Do we need more evidence that double-digit inflation may be on the way?

Then we need only look at the wholesale finished-goods index for February, which rose to 13.2 percent on an annualized basis from a 7.2 percent annualized rate in January. The February rise is all the more alarming when you consider that the finished-goods index remained relatively stable during the 3-month period prior to February. Shockingly, the finished-goods index figure for last month was the highest in 3 years.

Short-term interest rates increased from 4.7 to 6.7 percent in 1977. But with more rapid inflation in 1978, short-term rates will reach 9 percent by year's end and may climb higher in 1979.

Long-term interest rates were stable in 1977. In 1978 mortgage rates probably will rise to 10 percent by year's end, provided the Federal Reserve Board does not expand the money supply aggressively. But if the Fed does juice up the money supply, the market will interpret this as a major concession to inflationary forces and long-term rates will rise even higher.

The economic state of the Union currently is dismal, in my view, particularly for young people hoping to buy their first home and for Americans on relatively fixed incomes.

How are our people going to make ends meet? They will welcome the proposed tax cut, of course. But President Carter has conceded that scheduled social security tax increases and inflation that bumps taxpayers up into higher tax brackets will pretty much eat up the proposed income tax reductions. And what about that young couple trying to buy a house? Take a married pair with both partners working and their incomes subject to social security tax. At what point do the Carter tax cuts offset their social security tax increases?

I submit that the Carter administration and the Democratic-controlled Congress have been legislating inflation and are continuing to do so.

Of course we had to deal with the social security funding crisis. But why did we find the social security system in such critical shape? Because the Democratic-controlled Congress for years dispensed bigger and better benefits without having the guts to keep the system sound and solvent.

So what we have experienced, particularly in the past year, is the enactment by Congress of a series of measures that are boosting business and consumer costs. This Congress has been legislating inflation. And the administration has also pumped new inflationary pressures into the economy.

Let me tick it all off for you: In addition to the social security tax increases, we have had the minimum wage increases, the steps to raise sugar prices, the increase in the support price of milk, the cutbacks in exports of low-priced shoes to this country from South Korea and Taiwan, the Coal Mine Safety Act provisions raising coal costs, the hold down in national forest timber cutting which would ease lumber and housing prices.

Certainly there are arguments in favor of all these actions, but my point is that it all adds to business costs and drives up consumer prices. In a word, it all adds up to inflation.

What has President Carter done to combat inflation? Nothing. What has the Democratic-controlled Congress done to fight inflation? Nothing.

I believe with former Fed Chairman William McChesney Martin that "inflation is still the biggest problem of the free world." Said Martin in a recent interview, "Inflation is the enemy of growth, and you can't have high levels of employment unless you control inflation." Martin, by the way, is a Democrat.

And Dr. Burns said in a speech a couple of months ago:

> I cannot overstate the importance of unwinding the inflation that is continuing to plague our economy. There is a paramount need for avoiding new cost-raising measures by government, of which the recently legislated increase in the minimum wage is only the most recent very troublesome example. We simply dare not take steps that would result in any appreciable enlargement of our already swollen budget deficit.

I think investors are calling for a drastic change in the policies of an administration which is redistributing the wealth in virtually every major action it takes.

The money and securities markets simply are not convinced that President Carter can solve America's problems. Investors and businessmen know that productivity is down. It increased only 1.8 percent last year. Wage demands are up. Hourly earnings rose 7.8 percent last year. Fringe benefits are up. Dollar value is down. And the budget deficit is huge.

Businessmen see very little concern in the Carter administration over the gigantic Federal deficit and no concrete moves to combat inflation. Small wonder there is great hesitancy on their part to invest in new plant and equipment.

And as Dr. Burns commented in a recent speech:

> Inadequacy of investment in plant and equipment—and also in human capital—is the most important reason why the ongoing economic recovery has been somewhat disappointing; it also is a factor in explaining why so little headway is now being recorded in lowering the basic inflation rate.

He continued:

> Indiscriminate injections of purchasing power into the economy would do little to end business reluctance to invest in major projects. To achieve a substantial lift in capital formation, specific attention to the shortcomings of the business environment is needed—particularly, to uncertainty about governmental policy concerning taxes, inflation, energy, and environmental controls.

As Albert H. Cox Jr., president of Merrill Lynch Economics, Inc., put it: Carter's $60 billion budget deficit amounts to "disastrous fiscal policy carrying ominous implications for inflation and interest rates."

The clear message of the Carter budget is that Carter's huge deficit, which Congress no doubt will fatten, will reduce the flow of capital for private enterprise and increase inflationary pressures.

President Carter has talked about zero-based budgeting. If he had, indeed, employed zero-based budgeting on his fiscal 1979 spending plan, he would probably have saved enough to give us genuine tax relief and to avoid a gigantic deficit.

More than any other factor, the current weakness in business investment is due to inflation. To control inflation, we should gradually reduce the money supply growth and employ a fiscal policy aimed at achieving a balanced budget as the economy enters the fiscal full-employment zone. A balanced budget at full employment would free up more of the economy's savings to create jobs in the private sector.

The tax system is one of the principal tools we have to influence the rate of capital formation and economic growth. But rather than fine-tune the tax system, we might very well gain the greatest benefit for all of our people by straightforward, across-the-board tax cuts for individuals and business.

We all want what is best for the American people. What I am asking you to think about today is that rapid inflation dampens business activity and actually creates unemployment. We must all join in fighting inflation. Inflation means misery for millions of Americans. Think about it.●

TAX CREDIT FOR WORK ON CERTIFIED HISTORIC STRUCTURES

HON. JAMES G. MARTIN

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 22, 1978

● Mr. MARTIN. Mr. Speaker, I am today introducing legislation which would extend to homeowners the tax advantages now enjoyed by businesses and corporations when they perform certified rehabilitation work on certified historic structures. This bill is identical to the bill S. 1158, introduced last year in the other body by Senators THURMOND, HEINZ, HUDDLESTON, and STEVENS.

Presently, structures listed on the National Register of Historic Places, or in specifically designated historic districts, and certain other designated properties can give rise to a desirable tax break (amortization over 5 years of certified renovation expenses) when they are restored. Unfortunately, the benefit is limited to commercial properties.

In many cities across this country, homes of considerable historic significance and architectural merit are being allowed to deteriorate because of the high cost of restoration and preservation. An irreplaceable part of our heritage is giving way to the wrecking ball as homes give way to parking lots, cinder block stores, and steel-and-glass replacement structures.

We need to compare this trend to what is taking place elsewhere. France is a good example, one with which more than a few of our colleagues are familiar. There, the owner of a maisson classe—which would be sort of like a home listed here on the National Register—gets a

tax credit for half or more of what he spends to restore, and maintain, that classic structure. It is no wonder towns over there can keep their historical integrity, tax bases, charm, and tourist dollars.

Under this legislation, those benefiting would have responsibilities. First, they would have the responsibility for seeing that their homes met standards applicable to historic structures and districts. Second, as a quid pro quo they would have to hold their homes open at least 12 days a year to the general public, as many historic structures are already held open for "house and garden tours" and similar events which serve also as a stimulus for preservation and restoration work.

The Treasury Department has estimated the cost of this legislation, had it been enacted last year, at—

Calendar year	*Revenue loss in millions*
1977	$7.6
1978	23.2
1979	40.0
1980	57.0
1981	77.0
1982	90.0

I believe, Mr. Speaker, that legislation such as this will serve well to preserve for the 21st Century the private homes of great architectural merit, not only in such noted areas as Charleston, Philadelphia, Boston, and Washington, but also—and perhaps more importantly—in smaller places and rural areas where the economic forces operating against preservation are less likely to be countered by economic and social forces favoring preservation.●

H.R. 11222

HON. PETER H. KOSTMAYER

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 22, 1978

Mr. KOSTMAYER. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following:

H.R. 11222

Mr. Kostmayer (for himself, Mr. Lundine, Mr. McHugh, and Messrs. Gephardt, Gaydos, Bonior, LaFalce, Corrada, Ottinger, Edgar, Vento, Markey, Ertel, Seiberling, Weaver, Pease, Pattison, Harrington, Patterson, Weiss, Nowak, Rangel, Bedell, Ms. Spellman, and Mrs. Chisholm):

A bill to preserve jobs and stabilize communities by facilitating employee, or employee-community, ownership of concerns that would otherwise close down or move out of the community, and for other purposes

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Voluntary Job Preservation and Community Stabilization Act".

FINDINGS AND DECLARATIONS

SEC. 2. The Congress hereby finds and declares that—

(1) unemployment is a serious problem that causes grave economic loss and social suffering to the individuals affected, their families, neighborhoods, communities, and the Nation,

(2) programs of unemployment insurance alleviate some of the economic loss and social suffering of the unemployed and their families, but such programs are under financial and administrative pressure because unemployment is widespread and the resources of the States and the Nation are greatly taxed in order to provide support for such programs,

(3) unemployment should be prevented whenever possible by strengthening local initiative and responsibility, and by helping individuals and communities to use their own resources to solve this problem,

(4) Federal initiatives to reduce unemployment should be multifaceted, not limited simply to temporary compensation which does not create jobs nor to job training programs where success is often limited, but should include measures designed to prevent the loss of jobs in the first place and thereby reduce excessive pressure on unemployment compensation and job training programs,

(5) shutdowns and outmigration of industrial, manufacturing, business, and agricultural concerns, cause grave social and economic harm to employees, local communities, and the Nation, which even maximum attempts to create new jobs and new concerns can never fully repair,

(6) experience and research demonstrate that in some cases a transfer to employee, or employee-community, ownership, in the case of concerns being shut down, has saved jobs, maintained viable economic enterprises, and strengthened the local economy and the ability of employees and the community to meet their problems, but that numerous obstacles exist that make it difficult to transfer ownership, save jobs, and stabilize communities, and

(7) it is therefore necessary to provide Federal support through loans and technical assistance to avoid shutdowns or the outmigration of such concerns and the resultant loss of jobs in those cases where the successful continued operation of such concerns is feasible.

STATEMENT OF PURPOSES

SEC. 3. (a) It is the purpose of this Act to save jobs and to stabilize communities through a voluntary program that will facilitate employee, or employee-community, purchases of concerns that would otherwise be shut down or moved out of such communities by providing—

(1) information and assistance to employee, or employee-community groups in order that these groups may understand the option encouraged under this Act for voluntarily preventing shutdowns or outmigration,

(2) technical assistance to such groups for the purpose of evaluating the economic and social feasibility of purchasing the concern and running a successful operation,

(3) information and assistance to the current owners of the concern regarding the successful management of a potential voluntary transfer of ownership in order to provide maximum benefit to both the current owners and the employee, or employee-community groups,

(4) technical assistance to the employee, or employee-community, group on financial, engineering, marketing, legal, and organizational aspects of the transfer,

(5) loans to the employee, or employee-community, group to provide funds for technical assistance and startup and operating costs associated with the purchase of the concern, and

(6) loans to individual employees that will enable them to purchase stock in the concern.

(b) It is a further purpose of this Act to support the local tax base by maintaining viable concerns, and to test the value of a government loan and technical assistance pilot program to help employees and local communities purchase concerns being shut down or moved out of the communities as an alternative to unemployment insurance and other methods for dealing with unemployment.

DEFINITIONS

SEC. 4. For purposes of this Act—

(1) the term "Secretary" means the Secretary of Commerce, acting through the administrative unit of the Department of Commerce responsible for economic development programs.

(2) the term "employee", when used with respect to a concern, means all full-time employees at that concern, including managerial employees,

(3) the term "concern" means any industrial, manufacturing, business, agricultural, or service organization, including any division or subsidiary thereof, conducting operations, whether for profit or not for profit, which provide employment at a location or locations within a community.

(4) the term "State" includes, in addition to the several States of the Union, the District of Columbia, the Commonwealth of Puerto Rico, the Trust Territory of the Pacific Islands, Guam, American Samoa, the Virgin Islands, and the Northern Mariana Islands,

(5) the term "resident" means an individual who meets residency requirements for purposes of voting in a community,

(6) the term "community" means the unit of general purpose local government in which a concern is located and any surrounding area designated by the Secretary, as appropriate, in the case of that concern.

(7) the term "organization" means, except for purposes of paragraph (3) of this section, any organization of employees of a concern, or of such employees and/or residents of the community, which meets the requirements of section 5(c)(2), and

(8) the term "form of ownership and control" means a form under which an organization is: (A) owned by the employees, (B) owned jointly by the employees and residents of the community, or (C) any other form of organization approved by the Secretary which is consistent with applicable State law and the purposes of this Act, and under which an opportunity for ownership is provided to all employees of the concern on a nondiscriminatory basis.

FEDERAL ASSISTANCE TO VOLUNTARY JOB PRESERVATION AND COMMUNITY STABILIZATION PROJECTS

SEC. 5. (a) The Secretary shall conduct a continuing investigation throughout the States in order to identify concerns which are in danger of ceasing operation or of outmigration and where, in such event, there will result substantial unemployment and economic dislocation to the community. In conducting this investigation, the Secretary shall seek the voluntary assistance of concerns and of appropriate State and local agencies, including assistance, wherever possible, by means of advance notification to the Secretary regarding potential shutdowns or outmigration of concerns.

(b) For the benefit of concerns identified under subsection (a) and employees and communities associated with those concerns, the Secretary, from funds appropriated under section 10(a), shall disseminate information regarding the option of transferring ownership of concerns to employee, or employee-community, organizations, and regarding the loans and technical assistance available under this Act. Such information shall include, to the extent practicable, a description of various forms of ownership and control of organizations which are possible under the law of the appropriate State.

(c)(1) For the purpose of enabling those organizations to assume ownership and operation of an employee or employee-community concern identified under subsection (a) of this section, the Secretary, from funds ap-

propriated under section 10(a), shall provide loans for technical assistance and startup and operating costs to any organizations that have an application approved under section 6.

(2) In order to be eligible to receive loans and technical assistance under this Act, an organization shall:

(A) Be incorporated in the State in which the concern is located.

(B) Certify to the Secretary that the form of ownership and control (i) has been adopted by members of the organization after full consideration and deliberation of all options relating to the form of ownership and control available under the laws of the State in which the concern is located, (ii) provides guarantees to individual stockholders of the organization that they will be kept informed on a continuous basis of any change in the distribution of shares held in the concern, insofar as is consistent with State law, (iii) allows for the inclusion of new employees in ownership and participation, and (iv) provides, to the extent practicable, a method for the acquisition of stock of those no longer associated with the concern for purposes of making that stock available to all the employees of the concern on a nondiscriminatory basis, insofar as is consistent with State law.

(C) Agree to serve as the administrative agent of the Federal Government, through a system of wage deductions acceptable to the Secretary, for collecting loan and interest repayments from employee members of the organization who receive loans from the Federal Government as provided under subsection (d) to purchase stock in the concern.

(d) For the purpose of enabling employee members of an employee, or employee-community, organization to purchase stock in a concern, the Secretary, from funds appropriated under section 10(a), shall authorize loans to employee members of an organization that has an application approved under section 6 in order to provide additional equity funding for the purchase of the concern: *Provided, however,* That loans authorized shall not be made available to an employee until said employee has made a good faith effort to secure a loan from financial institutions located within the community. Loans under this subsection shall be made to employee members under such terms and conditions, including the rates of interest to be charged, as the Secretary shall establish. The rate of interest charged shall in no case exceed the prevailing rate, as determined by the Secretary, for loans or similar amounts made under similar terms and conditions to other creditworthy borrowers in the community. There shall be no forgiveness of the obligation of the borrower on such loans, and no loan shall be made to said employee members of an organization until the organization has secured a written commitment from each employee member seeking a loan that he or she will allow the organization to serve as the administrative agent of the Federal Government, through a system of wage deductions acceptable to the Secretary, for collecting loan and interest repayments on such loans. No loan shall be for a period longer than ten years, nor in an amount to any individual employee greater than $15,000.

APPLICATIONS

SEC. 6. (a) The Secretary may provide loans for technical assistance and startup and operating costs under subsection (c) to any organization which applies for such assistance, at such times and in such manner as the Secretary shall establish by regulation, if the feasibility study conducted under subsection (b) provides reasonable grounds to expect that the proposed transfer will be successful. The Secretary shall provide appropriate assistance to any organization regarding application procedures, eligibility requirements for application, including advice in obtaining financial support for the purchase from other sources, and the amount of funds currently available for feasibility studies, loans, and technical assistance under section 10.

(b) The Secretary or, at his discretion, any individual, group, or entity designated under contract or agreement with the Secretary, shall conduct a feasibility study of any concern identified under section 5(a) which is associated with an organization, in order to determine those concerns where a transfer of ownership to an organization may reasonably be expected to achieve results in accordance with the purposes of this Act, including successful management of financial operations and maintenance of employment. The Secretary shall consult with the organization before selecting an individual, group, or entity to conduct such a feasibility study and shall insure the appropriate participation of the organization in the feasibility study. Each such study shall be completed within sixty days after the Secretary has authorized a feasibility study to be undertaken, and shall consider, with respect to such concern, whether there are reasonable prospects for—

(1) viable transfer of the long-term ownership of the concern to an employee, or employee-community, organization (either through the creation of a new corporation or through the transfer of ownership within the existing corporation),

(2) cooperation in the transfer by managerial employees and the likelihood of their continued involvement in the concern after a transfer,

(3) technical assistance from other organizations or agencies located in the community,

(4) potential profitability of the concern, based upon available data relating to operations and finances,

(5) prompt cooperation on the part of the existing owners with respect to the proposed transfer of ownership, and

(6) major sources of funding for the transfer of ownership, including contributions from employees, residents of the community, financial institutions, and any other sources.

(c)(1) The Secretary shall provide to any organization whose application under subsection (a) he approves such loans for technical assistance and startup and operating costs as are needed.

(2) Loans under this subsection shall be made to the organization under such terms and conditions, including the rates of interest charged, as the Secretary shall establish. The rate of interest charged shall in no case exceed the prevailing rate, as determined by the Secretary, for loans of similar amounts made under similar terms and conditions to other credit-worthy borrowers in the community. There shall be no forgiveness of the obligation of the borrower on such loans.

(3) Technical assistance under this section shall include—

(A) information with respect to various forms of ownership and control which are possible under State law, and to how similar ventures have effected the transfer of ownership of concerns to employee, or employee-community, groups and have operated such concerns successfully,

(B) information and assistance to the owners of the concern, prior to the transfer, with respect to successful management of the transfer, including assistance relating to disclosure of appropriate information (other than trade secrets or confidential information affecting competition) under an agreement which limits the liability of such owners based on such disclosed information, except for cases of fraud,

(C) financial, engineering, marketing, legal, and organizational advice to the organization with respect to the transfer, and the design of the work environment after the transfer, including worker motivation, productivity, job satisfaction, and the improvement in the quality of working life through increased employee participation in decisionmaking.

(d) The Secretary may provide loans for the purpose of enabling employee members of an employee, or employee-community, organization to purchase stock in a concern to any such employee who applies for such loans, at such times and in such manner as the Secretary shall establish by regulation as provided under section 5(d).

(e) Not more than 10 per centum of the amount of any loan to an organization under this section may be used for necessary consulting services in connection with the operation of such concern after such purchase, including services relating to worker motivation, productivity, job satisfaction, and the improvement of the quality of working life through increased employee participation in decisionmaking.

APPLICATION OF THE SECURITIES ACT OF 1933

SEC. 7. In cases where the Secretary determines that the public interest and the purposes of this Act will be served, the Secretary may notify the Securities and Exchange Commission that the securities issued by an organization receiving assistance under this Act shall be exempt from all the provisions of the Securities Act of 1933, except the provisions of subdivision (2) of section 12, section 17, and section 24 as applied to any willful violation of such section 17.

COOPERATION OF OTHER FEDERAL PROGRAMS

SEC. 8. The head of any Government office or agency, such as the Economic Development Administration, the Small Business Administration, the Department of Housing and Urban Development, and the Farmers Home Administration, which has authority to make loans related to economic development, shall give priority in making such loans to organizations receiving loan assistance under this Act.

REPORT

SEC. 9. The Secretary shall monitor and evaluate the success or failure of transfers of ownership assisted under this Act. The Secretary shall report to the Congress concerning the results of such monitoring and evaluation, and make appropriate recommendations, not later than October 1, 1981, and not later than October 1, 1985.

AUTHORIZATION OF APPROPRIATIONS

SEC. 10. (a)(1) There are hereby authorized to be appropriated to carry out this Act for the fiscal year ending September 30, 1979, and for each of the succeeding six fiscal years, an amount not to exceed the amount calculated under paragraph (2) for that fiscal year.

(2) The amount calculated for purposes of paragraph (1) for the fiscal year ending September 30, 1979, shall be the higher of (A) $100,000,000 or (B) 1 per centum of the amount expended for unemployment compensation during fiscal year 1977 under all State laws of unemployment compensation approved by the Secretary of Labor pursuant to section 3304 of the Internal Revenue Code of 1954 and under any other State or Federal laws of unemployment compensation. For each of the succeeding six fiscal years, the amount calculated for such purposes shall be an amount 10 per centum greater than the amount calculated for the previous year.

(c)(1) Not more than 10 per centum of the total amount of the funds appropriated under subsection (a) may be used for feasibility studies, technical assistance under sections 6(c)(3) (A) and (B), and for administrative costs associated with such studies and assistance.

(2) The funds appropriated under subsection (a) which are not used for feasi-

bility studies, technical assistance, and associated administrative costs as authorized by paragraph (1) of this subsection shall be placed by the Secretary in a fund from which loans to employees under section 5 shall be made, and from which loans to employee or employee-community, organizations for initial startup costs and technical assistance as provided for under section 6(c)(3)(C) shall be made.

AFRICA: THE SOVIET PLAN

HON. ROBERT K. DORNAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 22, 1978

● Mr. DORNAN. Mr. Speaker, events in the Horn of Africa are moving fast and American policy toward that strategic area of the world has not been to say the least, clear. This is partly because America has not, until recently, been actively concerned with events in Ethiopia and Somalia. There can be little doubt, however, that the Russians and their Cuban "gurkhas" have been all too active throughout much of Africa in the past few years.

Two of our parliamentary colleagues from the British House of Commons, Julian Amery, M.P. (a former deputy foreign minister) and Winston Churchill, M.P. (shadow deputy minister of defense) have just returned from a fact-finding visit to that area. Mr. Amery wrote a very timely and informative report on his visit for the London Daily Telegraph (March 3, 1978). While not necessarily endorsing Mr. Amery's point of view, I believe his article will be of interest to my colleagues and others concerned with the interests of the West in Africa.

I ask that it be inserted in the RECORD at this point in my remarks:

[From the Daily Telegraph, Mar. 3, 1978]

AFRICA: THE SOVIET PLAN

(By Julian Amery)

I have just returned from a visit to Somalia accompanied by Winston Churchill, the Opposition spokesman on defence, and Col. Bill Maclean, an acknowledged authority on the Horn of Africa. We had talks in Mogadishu and Hargeisha with President Ziad Barre, his Minister of Defence, and members of the ruling Central Committee.

A few months ago these men were among Moscow's favourite sons. They had given the Red Navy a vital window on the Indian Ocean. In return they were receiving Soviet tanks and fighter aircraft. In lengthy sessions with Brezhnev and other Soviet leaders they were assigned a crucial role in Soviet grand strategy.

The Soviet Grand Design for Africa and the Middle East is no figment of a cold warrior's imagination. The Soviets explained it in detail to the Somali President. Here it is, as he explained it to me.

Somalia was to be the base for a "socialist" take-over of the Horn of Africa. Djibuti was to be overrun as soon as the French had withdrawn their garrison. In Kenya a guerrilla movement was to take over the countryside, driving the aged President and any colleagues loyal to him into the towns and eventually starving them out. In the Sudan, the Communist party—22,000 strong, so Moscow claimed—would overthrow President Numeiry in a coup. Ethiopia would then be surrounded by "socialist" States and its anachronistic regime would soon crumble. Somalia's reward was to be Djibuti, the Ogaden and the Northern Frontier District of Kenya, all predominantly Somali-inhabited areas.

The plan for the Horn of Africa was, so the Soviets said, only part of a still wider strategy. President Nyerere of Tanzania was already committed to Moscow. His occasional neutralist speeches were only designed to placate the West. With his help and that of "socialist" Mozambique and "socialist" Angola, President Kaunda of Zambia would soon be "tipped over" and Zaire "neutralised." The way would then be open for the final takeover of Southern Africa with its vast mineral resources and its command of the southern approaches to the Indian Ocean.

Meanwhile from a parallel base in Aden, the civil war would be resumed in North Yemen to threaten Saudi Arabia's southern border. Guerrilla operations would also start up again against Oman. Those, with Iraqi help from the north, would lead to a take-over of the oil-rich Gulf. At some stage Egypt would be brought to its knees with the help of pressures from Libya and Sudan. "Sadat after all," the Soviets argued, "could only count on the petitbourgeois forces of Egypt."

When the Somalis asked about the danger of world war, the were told that the West had lost their nerve and would not recover it.

As it happened, the "socialist" revolution came first to Ethiopia. There, after a period of chaos and confusion, a pro-Soviet group headed by Col. Mengistu seized power. Mengistu's victory presented the Soviets with a dilemma. They had promised the Ogaden to Somalia. But if they took it away * * * Ethiopians, the shaky Mengistu regime would collapse. The Soviets had already brought in some Cubans to prop up Mengistu. They now called in Fidel Castro to try to reconcile their two client States, Somalia and Ethiopia.

Castro urged the Somalis to be patient. The great thing, he said, was to establish a "socialist" Horn of Africa. Later on, some form of autonomy could be devised to satisfy the different minorities. When Ziad Barre sought to probe his thinking, Castro replied "it is no use arguing, they have already thought the whole problem through in Moscow."

Despite his colourful personality the Somalis soon dismissed Castro as a mouthpiece of the Kremlin. They nick-named him "Fidelnastro" or "tape-recorder." Nor did they appreciate his claim that he had 40,000 to 50,000 men in Angola. It might have been only a boast but it sounded like a new colonialism with a vengence.

Their suspicions of the Soviets were deepened by a curious incident. Soon after Castro's visit, Ziad Barre sent a delegation—one of them spoke fluent Russian—to Moscow with a personal letter to Brezhnev. When eventually granted audience they were shocked by the change in his appearance. They had all met him several times before, but, to their surprise, they heard him turn to one of his aides and say, "Who are these people, are they from Djibuti or Ethiopia?" Brezhnev hardly spoke during the meeting but the tone of his colleagues was unusually harsh.

By mid-summer of last year the Somalis were increasingly concerned that the Soviets might cheat them out of their promised reward of the Ogaden. They determined to put Moscow's intentions to the test and launched an offensive against the Ogaden in support of the West Somali Liberation Movement which, ironically, the Soviets had previously supported against Haile Selassie. They swept into Jigjiga and were soon in the suburbs of Harrar, the provincial capital.

The Mengistu régime was already deeply embroiled with the liberation movements in Eritrea and against the anti-Soviet Ethiopian Democratic Union in the northern frontier provinces. With the opening of a Somali front it faced collapse; and with it the stifling of the pro-Soviet revolution in Ethiopia.

The Soviets reacted swiftly. They pumped in massive supplies of war material by sea and air. Soviet and East German cadres were flown in including senior Soviet officers then serving in Somalia. Units of regular Cuban troops soon followed. It was Angola over again.

What is the military outlook? With the best will in the world the Somalis cannot withstand an offensive spearheaded by 400 Soviet tanks (we have only 500 in Rhine Army) and unlimited Soviet air power. * * *.

Will the Ethiopians stop at the border as their Soviet masters have assured the Americans? The Somali leaders are convinced they will press on in hot pursuit to set up a pro-Soviet puppet régime in Hargeisha and Berbera.

Alternatively they could stop at the border and seek, in the aftermath of a Somali defeat, to engineer a coup against the Ziad Barre régime and re-establish Soviet influence. Either way the Soviets seem determined to teach the Somalis a lesson and make an example of their leaders.

Ziad Barre does not claim that he was given specific American assurances. But certainly individual Americans and Governments in the area friendly to the West encouraged him to believe that, once he had expelled his Soviet advisers, he could count on Western support. The Soviets were duly dismissed.

The West were asked for arms. Our response remains astonishing. First the Somalis were told that this was an African issue for the OAU. This despite the massive extent of Soviet and Cuban intervention. Then they were described as aggressors. Their request for arms was turned down and they were told to withdraw within their own frontiers. No corresponding demand was made for a matching withdrawal of Soviets and Cubans.

No Somali Government could agree to abandon Western Somalia to Mengistu. The population is predominantly Somali. Nearly all have co-operated actively with the Somali Liberation Movement. To abandon them to the Mengistu régime—Idi Amin is a liberal by comparison—would be to condemn them to virtual extermination.

Respect of frontiers is an important international principle and not least where a frontier runs between two independent African States. But Ethiopia is no longer independent. It is a Soviet colony. Mengistu would not last a week without Cuban and Soviet support. The question is: Will the Soviets consolidate their new Empire in Ethiopia and so take over the Horn of Africa as a whole? If they do it will be a catastrophe for the whole area and for the West. By comparison the issue of the border is a technicality.

Western arguments about the border are not genuine reasons. They are excuses for doing nothing. And yet nearly all our friends in the area, Persia, Oman, Saudi Arabia, Jordan, Egypt and the Sudan, have pressed us to help the Somalis. Only Kenya has taken a different view; and Kenya would change its attitude if the West were to guarantee the northern Kenya frontier. A Soviet-dominated Ethiopia is a much greater threat to Kenya's existence than a Somalia returned to the Western sphere.

Sir Winston Churchill once remarked that there are few more undignified spectacles than a statesman on his knees with his ears to the ground. The Governments of the West have ceased to lead public opinion. They only seek to follow it. American opinion is still oppressed by the defeat in Vietnam, Watergate and the devaluation of the dollar. Britain, France and Italy are busy electioneering. No one wants an international confrontation whatever the stakes.

And yet the risk of a confrontation is slight. The lines of communication from the Horn of Africa to the Soviet Union and to Cuba are long and exposed. The West still has naval and air superiority. Most of the surrounding countries are our friends. There are many possibilities of "linkage" not only over SALT but over wheat supplies and credit facilities. In any confrontation the Soviets would have no choice but to climb down and withdraw.

What then should Western policy be? The first priority is to supply the Somalis with modern defense weapons—principally anti-aircraft and anti-tank missiles. They should be helped to stabilise the front and to allow time for negotiation. On the political side the Western objective should be to demand the total withdrawal of Soviet, Cuban and other Soviet bloc forces from Ethiopia. If necessary the Somalis could then be asked to withdraw within their borders on condition that an international force was brought into the Ogaden. Its task would be to safeguard the local population until a settlement of the border problem was negotiated between Somalia and whatever Ethiopian regime might emerge after a Soviet withdrawal and the consequent disappearance of Mengistu.

The Horn of Africa is a far-away region of which most people in the West know very little. Yet it may offer the last opportunity to check Soviet imperialism and stop the drift to a Third World War. We still have a chance to save peace through strength. Will we take it?●

OHIO NEWSPAPERS GIVE CREDIT WHERE CREDIT IS DUE

HON. MORRIS K. UDALL

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 22, 1978

● Mr. UDALL. Mr. Speaker, under the leave to extend my remarks in the RECORD, I include the following:

Congressman JOHN SEIBERLING, as chairman of the Interior Committee's Subcommittee on General Oversight and Alaska Lands, has been involved for more than a year in the drafting and refining of H.R. 39, the "Alaska National Interest Lands Conservation Act." Largely through his efforts, the Interior Committee has reported by a resounding 32 to 13 vote an amended version of H.R. 39 which seeks to place significant areas of Alaska's magnificent wildlands into protected national park, wildlife refuge, wild and scenic river, and wilderness status. The following editorial from the March 19 Akron Beacon-Journal says it all:

ALASKA BILL NEEDS FAST ACTION

Legislation preserving vast areas of Alaska is about to emerge in relatively good shape from the House Interior Committee, thanks to the bird-dogging of Rep. John Seiberling (D-Akron).

The committee informally agreed last week to recommend the measure for approval by the full House. A final committee vote is expected Tuesday.

The bill would put about 95 million acres of Alaskan land into parks, wildlife refuges and scenic river systems. If the bill is enacted by Congress, the land would be the largest addition to the nation's parks and national forest system ever made.

Although there were some concessions to developers interested in tapping the state's vast mineral wealth, the bill contains most of the key features sought by Rep. Seiberling and environmentalists. "We didn't lose any areas we absolutely had to have," said a representative of one conservationist group.

Rep. Seiberling was head of a subcommittee that drafted the final measure. His work to keep much of Alaska in its awesome, natural state should be appreciated by generations of Americans to come, assuming, that is, that the final congressional bill bears a close identity to the House committee version.

With a Dec. 18 deadline for Congress to complete action, the measure should receive a high priority from the Senate.●

DOLPHIN SLAUGHTER MUST STOP

HON. C. W. BILL YOUNG

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 22, 1978

● Mr. YOUNG of Florida. Mr. Speaker, in an effort to show the concern the House of Representatives has regarding the slaughter of dolphins by Japanese fishermen, I have cosponsored House Resolution 1065 which is now pending before the Committee on International Relations. I believe it is imperative for the U.S. Government to express the interest of the American people in this serious matter. Recently, Japanese fishermen clubbed and stabbed to death some 1,000 of these seagoing mammals because they felt the dolphins were eating their fish catch. The killing was approved by the Provincial government and the acts of violence were carried out by capturing the animals in nets or by frightening them to shore where they were killed.

This senseless slaughter is disgusting and we must do what we can to stop it. I urge the appropriate subcommittees, International Organizations and Asian and Pacific Affairs, to schedule hearings and take positive action on this matter as soon as possible. Prompt action is needed before this act of violence has the opportunity to occur again. The outcries of numerous citizens and representatives of various countries will show the Japanese Government that this brutal killing will not be tolerated and that any further killing of this type should be banned in the name of decency and concern for all forms of life.

The Japanese Government must reconsider the consequences of this inhumane act before it decides to approve any future "hunts" of this nature. Our resolution reaffirms the position of concern the American people have regarding the killing of these intelligent and playful mammals. It further urges the Japanese Government to join in discussions to be held by the International Whaling Commission's Small Cetacean Subcommittee in June 1978 regarding methods of eliminating the necessity of killing these dolphins.

I have also written to the International Whaling Commission urging its members to give serious consideration to this important issue during their upcoming meeting and to adopt appropriate measures to prohibit such activities in the future. A copy of this letter follows in the hope that my colleagues in the House and other interested citizens will also contact the Whaling Commission:

CONGRESS OF THE UNITED STATES,
HOUSE OF REPRESENTATIVES,
Washington, D.C. March 20, 1978.

INTERNATIONAL WHALING COMMISSION,
The Red House, Station Road,
Histon, Cambridge,
CB4–4NP, England.

DEAR COMMISSIONERS: This letter is written with regard to a matter of great concern to many people throughout the world. Namely, the recent savage murder of dolphins by Japanese fishermen.

I cannot tell you how strongly I deplore this senseless slaughter of the most intelligent of the world's sea mammals which, according to several press and wire service accounts, were driven ashore on the Japanese island of Iki and then bludgeoned and stabbed to death—an act sanctioned and encouraged by Japanese authorities who paid a bounty of $12 per head for the dead dolphins. This wasteful, bloody destruction of an intelligent creature must not be allowed to continue.

As a Member of the House of Representatives of the United States, I have joined with many of my colleagues in signing a resolution that reaffirms the concern of this body, and thereby the American people, regarding the slaughter of these intelligent and playful mammals. It further urges the Japanese government, with which we share the problem of achieving the delicate balance between basic economic subsistence and ecological considerations, to join in discussions to be held by your Small Cetacean Subcommittee this June, regarding methods of eliminating the necessity of putting these animals to their untimely deaths. I therefore urge you to give serious consideration to this issue during your upcoming meeting and to adopt appropriate measures to prohibit such activities in the future.

With best wishes and personal regards, I am

Very truly yours,
C. W. BILL YOUNG,
Member of Congress.●

THE 60TH ANNIVERSARY OF BYELORUSSIAN PROCLAMATION

HON. DOUGLAS WALGREN

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 22, 1978

● Mr. WALGREN. Mr. Speaker, I would like to join my colleagues in observing the 60th anniversary of the proclamation of the Byelorussian Democratic Republic signed in Minsk on March 25, 1918. The struggle of the Byelorussian people remind us once again of the plight of Eastern European peoples who have lost their right of self-determination.

In spite of Soviet domination, the Byelorussian people have maintained their national character and heritage. In 1973, the Soviet Union threatened the cultural integrity of the Byelorussian people by setting up new administrative partitions irrespective of ethnic groupings. The intent of these new partitions was to absorb the Byelorussians into a unified culture and dissolve their culture. To this day, however, the Byelorussians have persisted in their efforts to maintain and develop their own heritage.

The plight of the Byelorussians, as

well as other Eastern European peoples, demonstrates the continuing need for concerted action in mustering world opinion as an influence in eliminating the denial of basic personal freedoms.

Therefore, I want to pay special tribute to the heroic effort by the Byelorussian people in Eastern Europe and throughout the world. I salute the Byelorussian observance of the proclamation of independence signed in 1918.●

GEN. WILLIAM V. McBRIDE TO RETIRE APRIL 1ST

HON. JIM WRIGHT

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 22, 1978

● Mr. WRIGHT. Mr. Speaker, on April 1 of this year Gen. William V. McBride will step down as Vice Chief of Staff of the U.S. Air Force, culminating a distinguished career of 35 years' service to his country. I want to call the attention of my colleagues to the career of this outstanding military leader.

General McBride was born in the little town of Wampum, Pa., near Beaver Falls, on May 25, 1922. He attended school in Wampum, earning letters in basketball during his years in the senior high school there, and subsequently attended the Garfield Business Institute in nearby Beaver Falls.

When World War II broke out, Bill McBride was one of the first men from Wampum to volunteer for the fledgling Army Air Corps. He enlisted in March of 1942 and a few months later began training as an aviation cadet at the Pan American Airways Navigation School at Coral Gables, Fla. It is typical of his approach to the job that McBride chose to be a navigator at a time when many of his associates' first choice for aviation cadet training was as pilots.

He has often remarked in subsequent years that he wanted to become a navigator because he felt that the navigator's job was a tougher one, perhaps more important to the combat crew than even that of the pilot.

After completing his cadet training in January 1943, he received his silver navigator's wings and was commissioned a second lieutenant. A few months later, after he had also completed bombardier school, he joined the 556th Bomb Squadron, 387th Bomb Group in England, where he served initially as a combat crew navigator and subsequently as a squadron navigator and a group navigator. During this time he helped plan and flew many important missions in support of Allied ground forces, including D-Day operations over Europe in June 1944.

After the war he helped train navigators at the Army Air Corps Navigation School at Ellington Army Airfield in Texas and in March 1946 he was assigned to help plan what is now the Air Force's Basic Military Training Center at Lackland Air Force Base near San Antonio. In July 1947, at the urging of many of his senior officers, he began training as a pilot at Randolph Air Force Base, graduating in July 1948, thus becoming one of the Air Force's first triple-rated officers. At this time General McBride began what was to become a long association with the Military Airlift Command in such diverse missions as weather reconnaissance, air rescue and airlift functions.

During the Korean War he commanded an Air Rescue Group on Okinawa in the Philippines; later he saw service at Air Rescue Headquarters and still later commanded the Military Airlift Wing at Charleston Air Force Base, S.C. In August 1949 he came to Washington for the first time as a student at the National War College, where one of his fellow classmates was David C. Jones, who subsequently became the Air Force Chief of Staff and for whom General McBride has served the past 2 years as Vice Chief of Staff.

Several Pentagon assignments followed the War College schooling and in June of 1964 General McBride was chosen by the then Secretary of the Air Force Eugene M. Zuckert to be his military assistant. He remained in this very important job for 2 years, also serving as Military Assistant to the then Secretary of the Air Force Dr. Harold Brown, present Secretary of Defense.

In August 1966 General McBride returned to Charleston Air Force Base as the Commander of the 437th Military Airlift Wing. Subsequently he held a number of key positions at the Military Airlift Command Headquarters at Scott Air Force Base, serving successively as Deputy Chief of Staff for Materiel, Deputy Chief of Staff for Operations, and Chief of Staff for the worldwide Airlift Command.

General McBride became the Vice Commander in Chief of the U.S. Air Force in Europe in September 1971. A year later he was selected for the very important job as Commander of the Air Training Command at Randolph Air Force Base, Tex.

During the next 2 years General McBride made many significant changes in the organization and activities of the Air Force Training Command. Air Force recruiting was one of the important missions assigned to the Air Training Command, and General McBride helped make the all-volunteer force the success that it is today in the U.S. Air Force.

Following 2 short years in the training command, he was selected by the President for promotion to four-star general and was assigned as Commander of the Air Force Logistics Command at Wright-Patterson Air Force Base, Ohio. One year later General Jones tapped him to become the Vice Chief of Staff. As the Vice Chief, Bill McBride has run the Air Force on a daily basis, coordinating the activities of some 600,000 active duty military personnel, 250,000 civilian employees and 250,000 Air National Guard and Air Reserve personnel. He has been responsible for insuring that over 9,000 aircraft assigned to the Air Force and its reserve components operated safely and efficiently and were kept in a constant state of high readiness.

General McBride has been an outstanding public servant. I am sure my colleagues join me in expressing our appreciation for all he has done for his country and in wishing him well in his retirement.●

A TRIBUTE TO "CHAPPIE" POSILLIPO

HON. RICHARD L. OTTINGER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 22, 1978

● Mr. OTTINGER. Mr. Speaker, on February 19, I was privileged to join with a number of friends and colleagues to pay tribute to the dean of Westchester County's public officials, Anthony J. "Chappie" Posillipo.

Close to 1,000 were on hand that evening to honor their friend and public servant—a man who has consistently placed the needs of others first and who works tirelessly to see that those needs are met.

I would like to take this opportunity to share with my colleagues an article and editorial which appeared in the Port Chester, N.Y., newspaper, the Daily Item, on the day of Chappie's testimonial.

POSILLIPO: A MAN WORTH LISTENING TO

(By Jim Mones)

Friends say he has the habit of keeping his ever-present cigar in his mouth when he doesn't want to say anything. It's his subtle, but effective way to avoid giving an opinion too hastily.

But like E. F. Hutton in the television commercials, when Anthony Posillipo speaks, people listen because he's invariably right.

"I don't volunteer any opinions to just prove I know all the answers. I'm still learning," said the 70-year-old Democrat, sitting behind a desk in his Rye Town supervisor office last week. "I can't go around crying, I've served for 24 years as supervisor. What more is there to learn? Sometimes what you learn yesterday isn't any good today."

However, "Chappie" Posillipo has learned a great deal and has taught residents even more about how much one man can accomplish. In appreciation for his many political, social and athletic contributions, more than 850 people will honor Posillipo at tonight's Silver Jubilee Dinner Dance at the Rye Town Hilton Inn.

Posillipo has already attended more dinner dances as the guest of honor than most others have as paid guests, but there's always more than enough reasons to salute him again.

As supervisor since 1954, he has been responsible for planning the development of Rye Town. When he first took office, the unincorporated area of the town had no comprehensive plan, no zoning, no sewer districts, no town police, no garbage collection and less than 3,000 residents. It now has all of those services, three times as many residents and one of the lowest town tax rates in the county.

Posillipo was instrumental in the development of the Rye Town Hilton Inn and takes pride in helping to land $1.1 million in federal public works money granted last year to the town through the Economic Development Agency.

He's a former Port Chester mayor and trustee and former minority leader of the old Westchester County Board of Supervisors. He's founder and still president of the 28-year-old Port Chester Little League, the oldest organization of its kind in the county

In addition, he is involved in enough charitable organizations to keep him busy around the clock.

Though he's not looked upon as a political boss, Posillipo has dominated the Rye Town Democratic Party and local politics for years with close friends Anthony "Red" Zaccagnino, Rye Town councilman, Town Comptroller Dom Patafio, Accessor Sal Rollo, Felix Fidelibus, town engineer, and Nick Fasolino, town Democratic chairman.

That domination has been livened by Posillipo's dry sense of humor, which has become almost as much a trademark as his big cigars.

Earlier this week, when asked about tonight's big bash in his honor he said, "I'm getting scared as the day nears. Maybe I shouldn't show up."

While talking about his strong ties to the area, he said, "I didn't have any ambition to travel when I was growing up. I didn't even get out of Port Chester for a vacation."

Almost as well-known as his cigars and humor is Posillipo's knack for talking at 70 miles per hour, with gusts up to 80, and answering one-sentence questions with 10-minute dissertations that occasionally leave listeners wary, if not lost.

When discussing his childhood, he begins to talk about neighborhood kids doing imitations of movie stars, then explains how important the "family unit" is and somehow winds up speaking about today's Port Chester Little League.

When talking about the little league, he begins by discussing how good a program it is, then tells of how he helped get Corpus Christi Stadium built and finally recalls his days as a semi-pro baseball manager.

However, when Posillipo eases back in his big leather chair, takes the cigar out of his mouth and talks about his accomplishments, he doesn't list first his 13 consecutive terms as supervisor or his bringing in the Hilton Inn to Rye Town or his nomination for lieutenant governor at the Democratic State convention at Syracuse in 1962 or his overcoming Republican domination to become supervisor.

Instead, he says he's most proud of having helped to keep his family together when he was growing up.

Posillipo had thoughts of becoming a priest, but those plans changed in 1918 when his father, Thomas, died. Though only 11, Posillipo had six sisters and a brother and it soon became necessary for him to help his mother, Ann Rose, keep the family going.

"I had to go to work at an early age to keep the family together," said Posillipo, who looks much younger than 70. "We were faced with the possibility that the family would be split up . . . three or four would go into a home."

He followed in his father's footsteps and became a bricklayer, and a good one at that. By age 18, he was elected corresponding secretary of Bricklayers Local 48, a union with 800 members then, many of them twice and three times Posillipo's age.

He learned to handle men and in 1937 learned to handle other people's money when he was elected as the union's full-time business agent and financial secretary. Posillipo resigned as business agent when first elected Rye Town supervisor in 1953, but he's still financial secretary.

He said, "Coming up with labor, there were plenty of opportunities for me to get rich quick. I feel a great sense of satisfaction never having to fall to that temptation. My goal as a kid never was to make money; I always dreamed of someday having a nice home, car, wife, kids. I never had a desire for money."

His actions seem to bear that out. He lives a simple, quiet life in a modest home at 319 Olivia Street in Port Chester with his wife, Rose. He donates a large chunk of his salary to charities.

"I probably give away more of my pay. . . . Sometimes the government can't believe the money I give away," said Posillipo, a force behind the building of Corpus Christi Church in the '20s. "I believe in being charitable, having a love for (my) fellow man. I've always believed in the old doctrine that if you help people, you don't have to worry about yourself. Eventually it will be provided."

Such an attiude has gained him the respect and confidence of his constituents.

"If they looked at me as a politician, not a friend, they would lose respect, faith in me," said Posillipo, who claims he never gambles or curses. "People believe in me. They look at politicians in the worse sense. Once people start looking at you as a politician, that's the quickest way to get beat."

"But I've always believed that word would get around that Chappie is not a politician; they would stick with me. If they didn't look at me as a friend, I could not have been in public office for so long."

Though an elected official for almost three decades, Posillipo has never ventured into country or state politics.

"The offers were made . . . they were dangled in front of me," said Posillipo, smiling.

But he added, "When my name was mentioned for some job, I couldn't get myself to leave them (area residents)."

He's now the dean of Westchester supervisors and mayors, but Posillipo said he's not thinking of retiring and hasn't slowed down much over the years, pointing out that he still arrives at work early—at 8 or 8:15 in the morning—and often puts in time on Saturdays.

"I could take it a little easier. That's not for me, though," he said.

Posillipo will relax a little tonight when friends honor him for all he has done for the community. But such a tribute, he says, won't alter his attitude about working hard. He won't be in his office the first thing Monday morning, but he would be if he weren't attending a state conference in New York City.

A SALUTE TO "CHAPPIE"

More than 850 people will gather tonight at the Rye Town Hilton Inn to honor one of this area's most popular personalities—Anthony "Chappie" Posillipo. The occasion is his Silver Jubilee—25 years—as supervisor of the Town of Rye.

Posillipo needs no testimonial—although this is the second of several special salutes planned in his honor this year. His testimonial is the legacy he has given his community—first as a trustee and mayor of Port Chester and then as Rye Town supervisor.

His indelible mark can be seen in the orderly and controlled development of the town, which just a generation ago was the province of the sheltered and private estates of a privileged, wealthy few.

The private domains succumbed to the post-World War II pressures that imposed critical choices upon open suburbia forced to cope with the population surge and the economic boom that made maintenance of large estates impossible and their development highly profitable.

It was "Chappie's" guidance that molded the town's future. Developments of homes arose; a few corporations took root; and the hotel where this dinner is being held developed and expanded. That guidance continues today.

Posillipo is also the consummate politician. During his terms on the old County Board of Supervisors—now the County Board of Legislators—Posillipo was one of the leading spokesmen of the Democratic minority. He later became the board's minority leader. His brand of politics, logic, philosophy and cutting humor made him a respected leader and a worthy adversary. What a pity that more of his opposing views were not taken to heart by the Republican majority. His legacy is also the simplicity and efficiency of the Rye Town government. Residents of the town enjoy a comparatively low tax rate and an adequate level of services. Unfortunately, "Chappie" has no control over county and school board levies.

But Posillipo is much more than a politician, an administrator, labor leader or cigar afficionado. He is a friend to all who avail themselves of his acquaintance. A friend who is always willing to help—be it to clear the snow, serve on a committee or help cut the red tape of various levels of government.

No, "Chappie" needs no salute or testimonial. It is the voters of the Town of Rye and the Posillipo family who should be honored. For it has been their support and guidance that have maintained Posillipo and brought his wisdom and leadership to the Rye Town helm for this past quarter of a century.

SIXTIETH ANNIVERSARY OF BYELORUSSIAN DEMOCRATIC REPUBLIC

HON. JOHN W. WYDLER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 22, 1978

● Mr. WYDLER. Mr. Speaker, March 25 marks the 60th anniversary of the proclamation of independence of the Byelorussian Democratic Republic. We must not let this anniversary pass without, first of all, calling to the attention of the American people the current plight of the Byelorussian people, and second, lauding the Byelorussian people for their continuing valiant fight for freedom.

Byelorussia no longer exists as an independent democratic republic. It is now the "Byelorussian Soviet Socialist Republic." In other words, it has been swallowed up by the Government of the U.S.S.R., a government which is dominated by the R.S.F.S.R., the Russian Soviet Federal Socialist Republic. What the Russians began under the czars, the Marxist-Leninists in the Kremlin have continued with ruthlessness, thoroughness, and vigor.

We should not be misled by the name "Byelorussia" into thinking that the people who bear this name are ethnically one with the Russian people themselves. In language, and ethnic and cultural characteristics, the Byelorussian people are distinct from the Russian people. From the 19th century onward, the Byelorussians have sought with increasing fervor to throw off the Russian yoke and pursue their own destiny. They wish to be a free and independent people, and for this millions of them have been slaughtered by the Soviet Russians; they

have been deported to other parts of the U.S.S.R. while Russians have moved into the Byelorussian cities; their language and culture is suppressed, while a vigorous policy of "Russification" is imposed on the country; and the natural resources of Byelorussia and the labor of the Byelorussian people have been exploited by the Soviet Russian Government. It is the same story of tyranny, exploitation, and cultural genocide that is told of other unfortunate peoples of Eastern Europe who have been unable to withstand the military might and dictatorial methods of the Soviet Russian Government.

But, as in the case of other enslaved Eastern European peoples, the Byelorussian people are resisting the Kremlin's domination, and resisting valiantly, and we in the free world applaud the courage of the Byelorussians in their struggle for freedom and maintenance of their ethnic heritage and identity.●

PHILADELPHIA'S HUD SHOULD MEET CITY'S HOUSING NEEDS

HON. JOSHUA EILBERG

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 22, 1978

● Mr. EILBERG. Mr. Speaker, one of the top priorities of the city of Philadelphia leadership is to improve standards in the homes owned by the Philadelphia Housing Authority.

Recently, the city council of Philadelphia, under the leadership of Council President George X. Schwartz, approved a resolution expressing its concern that adequate funds are not available from region III of the Department of Housing and Urban Development to meet the costs of correcting deficiencies at housing projects throughout the city, particularly the Raymond Rosen apartments.

I offer for the RECORD the text of the resolution approved by the city council of Philadelphia, because I share the concern voiced by council that funds be made available to meet the urgent housing needs in Philadelphia:

RESOLUTION

Memorializing Congress of the United States to appropriate and the President of the United States to direct the Secretary of Housing and Urban Development to allocate funds to the Philadelphia Housing Authority sufficient to bring the Housing Authority projects in Philadelphia up to acceptable housing and living standards.

Whereas, Public Housing projects are generally in need of heating, electrical structural repairs and replacements, particularly Raymond Rosen Apartments; and

Whereas, The tenants of Raymond Rosen Apartments in conjunction with other tenants have petitioned, on more than one occasion, for necessary repairs and maintenance of the apartment complexes; and

Whereas, A Resolution has been introduced in the City Council requesting the appointment of a Council investigation committee; and

Whereas, The Philadelphia Housing Authority admits there are deficiencies in the housing accommodations in various projects; and

Whereas, An estimate of the cost to eliminate the deficiencies at Raymond Rosen Apartments alone, is six million five hundred thousand (6,500,000) dollars; and

Whereas, The said Authority does not have sufficient funds to completely correct the existing conditions; and

Whereas, The Area Director of Region III of the Department of Housing and Urban Development stated in a letter that special project funds are necessary for the work; and

Whereas, The said Area Director further stated that such special project funds are not available; therefore

Resolved, By the Council of the City of Philadelphia, That the Council hereby memorializes the Congress of the United States to appropriate and the President of the United States to direct the Secretary of Housing and Urban Development to allocate funds to the Philadelphia Housing Authority sufficient for it to correct the presently existing deficiencies in the housing and living conditions at the Housing Authorities projects, with particular emphasis on Raymond Rosen Apartments.

Further Resolved, That certified copies of this Resolution be sent to the President of the United States, the President pro tempore of the United States Senate, the Speaker of the United States House of Representatives, the Senators from Pennsylvania and the members of the House of Representatives representing Philadelphia.●

FEDERAL SALARY ACT OF 1967 AMENDMENT

HON. MORRIS K. UDALL

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 22, 1978

● Mr. UDALL. Mr. Speaker, today I am introducing a bill to amend the Federal Salary Act of 1967 to require pay rate distinctions for different grades, steps, schedules, and levels under statutory pay systems. As it presently exists, the Federal Salary Act of 1967 establishes a statutory ceiling which places a limit on the maximum amount of money a Federal employee can earn.

A problem arises nearly every year, however, when annual comparability increases are awarded to employees. Many "super" grade employees reach the statutory limit, thus eliminating distinctions between grades and causing compression at the top levels.

I think it is important to maintain some salary distinction between grades. I also think that it is important that a supervisor earn more money than someone who works for him/her. I am introducing a bill which requires the President to make adjustments in rates of pay under each statutory pay system in order to maintain at least some nominal distinctions between grades as well as steps within grades.

I include the text of the bill in the RECORD:

H.R. —

A bill to amend title 5, United States Code, and the Federal Salary Act of 1967 to require pay rate distinctions for different grades, steps, schedules, and levels under statutory pay systems

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, Pay Rate Distinctions in Case of Comparability Adjustments.

SECTION 1. (a) Section 5305 of title 5, United States Code, relating to annual pay reports and adjustments, is amended by adding at the end thereof the following new subsection:

"(s) Subject to the limitation of section 5308 of this title, at the time of any adjustment of any rate of pay under this section, the President shall make such additional adjustments in rates of pay under each statutory pay system as may be necessary to maintain pay distinctions between grades, steps within grades, schedules, and other levels of pay under such system in cases in which pay distinctions would exist but for the operation of section 5308 of this title."

(b) Section 5305(b) of title 5, United States Code, relating to annual pay reports, is amended—

(1) in paragraph (3) thereof, by striking out "and" after the semicolon;

(2) in paragraph (4) thereof, by striking out the period and inserting "; and" in lieu thereof; and

(3) by adding at the end thereof the following new paragraph:

"(5) provide, subject to the limitation of section 5308 of this title for such adjustments in rates of pay under each statutory pay system as may be necessary to maintain pay distinctions between grades, steps within grades, schedules, and other levels of pay under such system in cases in which pay distinctions would exist but for the operation of section 5308 of this title."

PAY RATE DISTINCTIONS IN THE CASE OF QUADRENNIAL ADJUSTMENTS

SEC. 2. Section 225 of the Federal Salary Act of 1967 (2 U.S.C. 351–361), relating to certain executive, legislative, and judicial salaries, is amended by redesignating subsections (j) and (k) as subsections (k) and (l) respectively, and by inserting after subsection (i) the following new subsection:

"(j)(1) Subject to the limitation of section 5308 of title 5, United States Code—

"(A) the review conducted by the Commission under subsection (f) of this section,

"(B) the report by the Commission under subsection (g) of this section, and

"(C) the recommendations of the President under subsection (h) of this section

shall provide for such adjustments of rates of pay under each statutory pay system as may be necessary to maintain pay distinctions between grades, steps within grades, schedules, and other levels of pay under such system in cases in which pay distinctions would exist but for the operation of section 5308 of title 5, United States Code.

"(2) For purposes of this subsection, the term 'statutory pay system' has the meaning given such term by section 5301(c) of title 5, United States Code."

EFFECTIVE DATES

SEC. 3. (a) The amendments made by the first section of this Act shall apply with respect to reports transmitted more than 30 days after the date of the enactment of this Act.

(b) The amendment made by section 2 shall apply with respect to recommendations transmitted more than 30 days after the date of the enactment of this Act.●

EXPORT INCENTIVES ENCOURAGED

HON. MICHAEL T. BLOUIN

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 22, 1978

● Mr. BLOUIN. Mr. Speaker, many months ago I became convinced that with a steadily increasing trade deficit the worst policy this country could adopt would be to eliminate perhaps one of the last meaningful incentives available to encourage the export of U.S. merchandise. I am speaking specifically about the incentives provided through the Domestic International Sales Corporation (DISC).

At this particular time, I will not present my case for retention of DISC, but rather will reserve my comments until next month when I will offer remarks on this matter to the House Ways and Means Committee. Until that time, however, I feel that it is vitally important that the House's attention be given to the thoughtful consideration of this matter and the adverse effects that could occur as a result of its elimination.

To aid the Members of the House in their consideration of this subject, I would like to insert into the RECORD at this time the recent testimony given by Mr. Tom Parks, President of Kwick-Way Industries, Inc., of Cedar Rapids, Iowa.

Mr. Park's years of experience in export matters certainly give him the expertise and authority to address the subject of DISC and his commonsense observations are well worth consideration.

Mr. Park's testimony follows:

I ask your indulgence of two brief remarks intended only to establish a modest amount of personal credibility.

The views I must express are predicated upon 25 years of personal day-to-day working experience in international markets, they are not speculation, conjecture or theory. During that 25 years I have been personally or severally responsible for marketing in five companies which have, in ensuing years, had culmulative sales of manufactured products abroad exceeding $2 billion. A most important point to ponder is that all of these businesses were, when we began exporting, small businesses by definition.

We operate in an economic environment which is generally considered principally agricultural, yet it exports more manufactured goods per capita than any other metropolitan area in the United States. Between 12–15% of our total workforce derives its total income from international sales, we are discussing approximately 7,000 jobs in Cedar Rapids, Iowa alone, a city of only 112,000 people with a workforce approaching 65,000, many of whom commute from adjoining areas. In short Iowa is very much involved in exporting of manufactured products, as well as agricultural commodities. We feel qualified to speak on the subject.

Our time today should not be spent only upon useless rhetoric, repetitions of weary but true arguments. I will simply endorse without qualification those who attest to the intricate inter-relationship between our future in export markets and continuance of DISC tax deferral provisions. I echo those who say that its abrupt termination is a betrayal catching us in the midstream of significant financial commitments; that DISC has been a major enabling factor in building critically needed export business; that elimination of DISC is but one more crippling step in an international competitive posture already seriously eroded; and that contrary to slanted reports, DISC has been a major contributor to our nation's export trade since its inception.

The Special Committee for U.S. Exports maintains that DISC accounted for as much as $9 billion of additional exports since 1971. Such claims may be controversial, but it is unarguably true that in our small manufacturing company, which has been exporting only a few years, little material growth occurred until DISC freed much needed capital from the tax grasp of a marginally productive federal bureaucracy. Since 1971 our export business has grown from $1.1 million annually, or only 6.2% of sales, to $5.6 million in 1976, or 36.2% of sales, 1976 being the last year on which audited figures are available. Translated into jobs, 144 people of approximately 400 people employed in our modest operations are now totally dependent upon export for their employment. 144 people approximates our total employment in pre-DISC days, evidence that an encouraged and properly operated business grows, improving our tax base.

I prefer to temporarily divert your attention from the complexities of international economic policy and concentrate upon the straightforward fundamental economic war which we are losing, at home and abroad, a defeat that will be hastened by moves such as the proposed DISC elimination. That's what we're really discussing today, we are in a terminal war in which the tides are running against us, and we are hiding our heads in the bottomless sands of argument.

Most opposing views on this subject are neither right nor wrong, they simply reflect different minds grappling with frustrating segments of a gigantic problem, a faltering economy. The problem rests not upon labor, policies such as DISC, business practices or tariffs, to name but a few symtomatic ghosts, but upon the diminishing productive capabilities of the United States.

Measures addressing only symptoms, such as high unemployment, balance of payments deficit, or taxation modification, have only temporary merit and are ultimately inadequate procrastination. We must look to the origins or our diminishing superiority and make such fundamental adjustments as necessary. The alternative is accepting relegation to the role of a pathetic staggering second class has-been like England, recent oil finds notwithstanding.

Many cite labor, socialism, ad infinitum, as England's illness and accuse the U.S. of following suit. But the clear truth is that England's economic cancer is a cessation of demand for what it has to offer its domestic and world markets. This terminal illness is the common ground between our economies. we are losing our markets at home and abroad in a landslide of shifting buying which we seem unwilling to acknowledge.

U.S. manufacturers captured many of England's foreign and domestic markets, it was easy! They were outmoded, high priced, difficult to deal with, constantly changing pricing due to inflationary pressures, unreliable due to labor strife, and convinced that governmental band aids on international policy would stem the tide drowning them. I am chagrined to admit that this description now fits a large part of the U.S. economic community, the evidence abounds.

OPEC pressures have been significant, but those who cite this relatively new phenomenon as the underlying cause of our balance of payments illness are ignoring devastating truths. $11 billion of the almost $21 billion deficit increase resulted from reversals in non-petroleum trade, we'd have had a deficit without OPEC impact. I repeat for emphasis that our business house is nearing collapse, and like Nero's proverbial folly, we sit today contemplating adding fuel to our own funeral pyre by eliminating a positive assist to our efforts, DISC. In the midst of an economic war we debate economic disarmament when we should be considering increasing our armaments.

I emphasize this declining situation because it is so critically interrelated with DISC and all efforts intended to stimulate foreign trade. I ask you to recognize who is capturing our foreign and domestic markets and, more importantly, why. One might logically respond with names of industrialized giants such as Japan or Germany, and be generally correct. But I submit that an equally large segment is being lost to the combined efforts of the unrecognized competitors. If you are to truly grasp the profound catastrophic plight of U.S. manufacturers, reflect on the truth that ever increasing percentages of our markets are being captured by Brasilian shoes, Pakistan and Formosan machines, India steel, Polish Fiats and hosts of other previously ignored competitor nations. As we falter, they attack, and it is to their credit that they attack well.

Last week I returned from a marketing trip to 10 Latin American countries, during which my experience duplicated that when visiting the Middle East, Europe and Scandinavia the past nine months. While you argue DISC, and Commerce leans on Japan, we lose the Columbian auto market to Poland, the large gains in Central America fall to Korea's Hyundia automobile, machine tool gains are chalked up to China, Pakistan, India and the Caribbean appliance market is invaded by excellent products manufactured in Trinidad. The economic scene is altering drastically, as Detroit knows only too well, here and abroad. If we fail to act upon these signs, your considerations of DISC tax income implications are futile over the long run.

The free enterprise economy of the United States has shown a world once ravenously hungry for our products that an enterprising economy incomparably fulfills human material needs. While they were buying from our shores, they were vigorously copying us. With U.S. Aid help, providing machinery and equipment plus foods for their masses, while they diverted their economic energies to internal growth, they have risen to challenge us with superior plant and equipment.

Is the answer to stop U.S. Aid, assume a protectionist stance, or end DISC? These are reactions, not answers. The answer rests in addressing a diminishing national productivity of goods and services, produced by an antiquated physical plant requiring incredible investment to become competitive. The answer rests in recognizing that without reversing this trend further trade deficits, greater unemployment and general economic decay, is inevitable.

It is the world economy which we must reach to cure domestic economic ills, we must strive to quietly reacquire world economic dominance. I have not patience for those who wish to trade off my position as an entrepreneur, daily risking everything I possess, in the name of obscure international harmony. I have lived on the international scene more than most, I know this harmony to be unobtainable in this self depreciating manner. My counterparts abroad know this also, they find great humor in our suicidal debates on stifling ourselves, they thank me for making their role easier.

We have armed forces because we need them. I submit that we have an even greater

need for the ability to produce more and better goods and services in a sophisticated manner, to avoid a defeat in the economic war that will render us incapable of raising the taxes for armed defense. U.S. business can roll back some gains made here and abroad by countries we must recognize as competitors. Given help to do so, U.S. business will thus create jobs and generate income currently flowing away from our shores and away from our foreign markets to our competitor nations. If we can recapture our ability to dominate foreign markets we shall automatically be posturing ourselves to provide the goods and services our domestic markets are presently turning abroad to obtain. That equates the best increased employment program we could conceive.

We've the natural resources, technical skills, business acumen, and, most importantly, the most educated general public in the world, with which to win this economic war. No other single economy is so well endowed, at least one of these assets is missing in all other countries. What, therefore, is restraining us?

European aircraft are eroding our markets, here and abroad, while we ponder imagined ills resulting from this critically necessary industry heavy DISC benefits. Is it better that we strangle them? Why is Pakistan becoming Turkey's primary machinery supplier instead of the United States? Our true problem is risk capital formation to promote economic activity which created our past greatness. Risk capital is desperately needed to modernize, expand, to underwrite that art at which we excell, imaginative innovative Research and Development. Given capital, the U.S. economy will prove its abilities.

This is the only single problem which can stand the test of evaluation as a root cause cure for our economic cancer. It is the broad stroke cure of most other much discussed problems. Just as we accepted the need for farm subsidies years ago we must now accept the truth that our nation's plants and equipment are antiquated, they need a massive capital infusion. Most assuredly depriving them of the modest but important DISC benefits is inconsistent with this desperate need and inconsistent with the best interests of the United States.

Foreign producers will not surrender their gains easily, if at all. Nor will they measurably cease their expansive policies to ease our way; they recognize that as simply unintelligent from their point of view. But given a bit more assistance, and less government created obstacles, our U.S. producers can turn the tide. Some will argue that certain corporate giants have surplus capital now, a truth that becomes immaterial when contrasted against the predicament of the vast array of medium sized companies which will provide tomorrow's growth. Others will cite big as sinful, business as onerous, and many other erroneous self-serving presumptions. But they feed the gristmill of our enemies; we are a business economy which will die, along with our political institutions, if such nonsense continues to be heeded. An excellent moment to turn the tide in the right direction is to defeat this proposal to terminate DISC benefits.●

RESULTS OF THE 1978 QUESTIONNAIRE SURVEY OF THE 19TH OHIO DISTRICT

HON. CHARLES J. CARNEY

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 22, 1978

● Mr. CARNEY. Mr. Speaker, in February 1978, I sent out approximately 155,000 questionnaires to the residents of my congressional district, which is made up of all of Mahoning County, part of Trumbull County, and includes such cities as Youngstown, Warren, and Niles. In that questionnaire, I asked my constituents their opinions on some of the major issues facing our country, including campaign financing, national energy policy, national health insurance, "Buy American" policies, and foreign trade. I also asked them to express their opinions on how to solve local economic problems in the Mahoning Valley caused by the shutdown of the Youngstown Sheet and Tube Co.'s Campbell plant.

Approximately 16,500 questionnaires were completed and returned to me, many of them answered by both husband and wife. Mr. Speaker, the results of my questionnaire survey have now been compiled, and they are both interesting and significant. I am inserting those results in the RECORD at this time for the information and consideration of my colleagues in the U.S. Congress, as well as the President of the United States. The results of the questionnaire follow:

RESULTS OF FEBRUARY 1978 OPINION SURVEY OF THE 19TH OHIO CONGRESSIONAL DISTRICT

[In percent]

1. How would you rate the job that President Carter is doing?

(a) Excellent	3
(b) Good	18
(c) Fair	36
(d) Poor	43

2. How would you rate the job that Congress is doing?

(a) Excellent	1
(b) Good	13
(c) Fair	46
(d) Poor	40

3. Do you think that there should be public financing of Congressional election campaigns?

(a) Yes	32
(b) No	68

4. Do you believe that the country needs a national energy policy?

(a) Yes	81
(b) No	19

5. Do you favor a national health insurance program covering most medical and hospital costs for every American?

(a) Yes	54
(b) No	46

6. Should Congress cut Federal income taxes for low- and middle-income individuals, even if it would increase the Federal budget deficit?

(a) Yes	63
(b) No	37

7. Should Congress reduce the Federal tax burden on the business community, even if it would increase the Federal budget deficit?

(a) Yes	29
(b) No	71

8. Should Congress pass a law establishing full employment as a national policy, and guaranteeing a job for every American who is willing and able to work?

(a) Yes	55
(b) No	45

9. Should the Federal Government be required to buy American-made products even though they cost more than foreign-made products, if it would mean jobs for American workers?

(a) Yes	84
(b) No	16

10. Should the Federal Government impose strict import quotas on foreign steel and foreign cars to help the domestic steel and automobile industry, even if it might bring retaliation against American products by foreign countries?

(a) Yes	78
(b) No	22

11. Should environmental standards be lowered and air and water pollution deadlines be extended, if it would help keep industries in the Mahoning Valley?

(a) Yes	84
(b) No	16

12. Who do you think has the *primary* responsibility for economic planning and development in the Mahoning Valley?

(a) Federal Government	16
(b) Ohio State government	15
(c) County and local governments	37
(d) Local business, labor, and civic leaders	31
(e) Other	1

13. If massive economic aid were available to the Mahoning Valley, how should the money be spent?

(a) Reopen Youngstown Sheet & Tube Co.'s Campbell plant	21
(b) Provide incentives to bring new, diversified industries to the area	75
(c) Create public service jobs	3
(d) Other	1

14. What kind of assistance should the Federal Government provide to the steel industry?

(a) Direct cash grants	8
(b) Tax credits	19
(c) Long-term, low-interest loans	53
(d) No Federal assistance	20

15. What suggestions do you have for solving the economic problems which face the Mahoning Valley?

Most of the people responding to this question expressed a desire to see new diversified industries come into the Mahoning Valley. A significant number of people felt that various economic incentives should be provided to encourage industries and businesses to locate or stay in the valley. Some persons suggested import quotas, controls on wages and prices, and relaxed environmental standards, as ways to facilitate continued industrial activity. Many people also expressed a belief that increased management efficiency and labor productivity are needed.●

ELISE BOULDING SPEAKS ABOUT THE "UNDERSIDE OF HISTORY"

HON. TIMOTHY E. WIRTH

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 22, 1978

● Mr. WIRTH. Mr. Speaker, Dr. Elise Boulding of the University of Colorado's Institute for Behavioral Science recently spoke to us as part of the "Dialogues on America's Future," series sponsored by the Congressional Clearinghouse on the Future.

Dr. Boulding urged us to take into account women, children, and older people as we set policy for the land. She calls these groups the "underside of history"—those neglected by the systems analysts, yet those for whom the systems are devised.

I highly recommend her remarks to my colleagues, and the full text of her presentation and our questions to her follows:

DAYDREAMING FOR THE FUTURE

It is a pleasure to be with you tonight. The areas in which I deal are those areas that are teeming with life in our society—women, children, older people—I call it the "underside"—and I am delighted to be on Capitol Hill where life also challenges and where important decisions are made. I believe that much of what is most important in life occurs in parts of our society that we are not aware of, and I am interested in getting these parts into the public arena and helping them become legitimate.

I became a futurist when I looked at the task of social change. I translated Image of the Future by Fred Polak in 1961. This Jewish Dutchman survived WWII by living in a hole, coming out only at night, and as he sat in his hole he began to see that human history was made of images of different futures.

I think there are at least three ways to get at this visionary process. The first is when we are daydreaming. It is never more alive than when we are in this state. But by our teens, daydreaming is wiped out. Children are scolded for daydreaming, yet those are the hours where a disciplined, yet free-floating thought can be the most important part of social dreaming. Our images for our own future mobilize us, and picking alternative futures is an intuitive process. As Members of Congress, you are performing an intuitive role deciding which images are appropriate. We don't have to have a reactive future, and daydreaming is a way to keep the images real.

200-YEAR PRESENT

Another aspect of futures thinking is that we have to get hold of an appropriate time span. The now controls our present thinking. We need to get the feel of a 200-year present. There are people living today who are 100 years old, who were born on March 9, 1878. And there are children born today who will be 100 years old on March 9, 2078. This is our time span; we are organically related to these birthdays. And we need to feel that we are part of this time span. If we don't feel a part, we aren't thinking about the 100-year-olds and the babies. Unless we look at this 200-year present, our priorities will be dominated by the now, and the future will not be psychologically accessible.

A third way to image the future has been developed by Warren Ziegler. I attended a session with him and a group of people, and he put us through the following steps:

First. We had to come up with a common concept of what we would like to see in 1998.

Second. How would we know we had got it?

Third. What happened in 1977 that was the last step to reaching our goal in 1998?

Fourth. What happened in 1996? In 1995? In 1994? And so on. Finally we had worked our way back to where the thing desirable existed. The idea behind this technique is that it is hard for us to look forward, and so we might consider working backward.

And so the 3 kinds of futures thinking are social, daydreaming, understanding our 200-year present, and working backward toward our desired state.

I want to talk a little now about social systems thinking because we are all general systems people today. The policies you make are based on it, and there are so many unmapped areas in the system which cause us to work with faulty information.

WOMEN LEFT OUT OF PLANNING

Women represent a submerged arena in our society. A transition strategy for our time would be to have more women participate in planning. Planning is inappropriate because women's experience is not used.

While doing some work with AID, I looked at the food production in the third world. AID has not been helpful, as a rule, in increasing household consumption or food production. The reason for this, I found, is that up to 80% of farming is done by women but the planning is directed towards male farming. The things that women need—new tools, seeds, credit, storage facilities—have not been developed.

In the U.S., the same situation exists. I have been told that there are too few women farmers in the U.S. to warrant female input at the planning stage. Yet in one county in Texas, 25% of the farmers are women. Our Extension Service is focused on male farmers, and tools are developed in this country for men. The women are making it as they can, but if we want to improve the quality of rural life, we need to help women farmers, too.

Another place we are seeing a breakdown in systems planning is in the growth communities of the Rocky Mountain region where a community may experience 1000% of growth in a year's time. There is no way that the best planner or human relations specialist or psychologist can step into that community and stop the violence—drugs, alcoholism, depression, juvenile delinquency, crime, etc.—that is a result of such rapid displacement. Sometimes I wonder if we decided to throw away a whole generation when I look at the agonies of this kind of boardroom planning.

I have been asking myself for a long time, what has to happen for people to thrive? And one answer I have come up with is that people have to shape their environment. I don't mean coping, either. Coping is staying afloat. Shaping is making your environment, creating it. Children and women die psychologically unless they can shape their environment. I think about the trailer villages and I see a mother inside her trailer home with inadequate space to shape. She is trying to stay sane. Nothing is familiar; she has no shoulder to cry on. Her husband is in a new job and has pressures on him, too. Professionals cannot come into this situation and solve the problem. What is needed is a sense of the social process, which begins with a mother and her child.

In growth impact of communities, we must understand what it is that makes successful copers and shapers. We must consider the capacity of human bonding. Where we are in the human process is based on our coping and shaping of history.

There are too few women in planning and social design. When I was doing research for UN Internat Databook on Women I found out that only 10% of all the women in the world are administrators We need many more in these positions. There is a vast experience world which is relevant to deal with human problems caused by technological society and it is not being reached.

CHILDREN ALSO LEFT OUT

Children are another unmapped group in our systems planning, and they play an important part in our experience world. Most children enter the labor force by age 4, and then are in the work force in some noticeable way for the rest of their lives. In subsistence societies, boys aged 12 have produced as much as has been invested in them. We have no statistics on girls, but the figure is probably about the same if not higher. We must recognize that children are contributing to the production in our society

Our image of people under 21 and over 65 is similar. Yet, by age 16, males and females are in the labor force and begin child bearing. But they cannot vote or participate in many of the decisions that affect their lives until they are 21. Most of the decision making in the public arena occurs between ages 21 and 65. An important thing we must do is to start breaking down this age barrier so that those between 21 and 65 do not have to carry the world on their backs. Many things are started by young students throughout the world Teenagers develop youth networks which cross national boundaries. And the elderly are now creating their own networks and will soon have an effect on the decision making process.

By denying our young and old people a part of our society, we are trying to deal with the 20th century with blindfolds on, plugs in our ears, and our hands tied behind our backs. All of those who experience life are not consulted in the policy making process.

To break the barriers down we can try several things. We were probably wrong about ERA. We should have worked for Equal Rights for Men and worked on developing nurturing capacities in them. We should not have arbitrary role assignments based on age or sex.

CONFLICT RESOLUTION CRUCIAL FOR THE FUTURE

Another approach to breaking apart inadequacies of the systems analysis approach is to develop methods to resolve conflict both at community and international levels. We need to develop early warning indicators of violence to prevent it. If we redefine the role of the soldier to mean a keeper of the peace, and if women enter the military, we would undoubtedly see a change in the way we deal with conflict situations.

We might also give some status to a National Peace Academy and set up a United Nations University which would have an international perception of what it is to be human in our world in the 20th century. These are just some ways that I see that may help us to deal with the future a little more effectively.

QUESTIONS AND ANSWERS

Q. Exclusion of women in planning is a viable concern, but you must also agree that second generation farm sons were forced to go to the university. Should we send professors and students back to farms as is done in China?

A. We need a mental construct of the nature of society and what we do in the now must represent the broader 200-year present in the future construct.

An exercise I do with my students to give them the idea of the complexity of the planet and to harness their intuitions to the complexity of things is to tell them to begin with their bodies and think of it as a total system. Then I tell them to include their families in their bodies, then the city they live in, then the planet. Take all of these things within the boundaries of your body, and you will begin to see them intuitively instead of analytically. If we get so we can't do this, we will have lost our artist's touch, and we must never lose the artist's touch when shaping our future.

Q. Maybe we should make it illegal for students to go to school after age 14. We have set a schedule in industrialized societies of one's life patterns of work and leisure to help solve unemployment problems. Maybe we need to look at this schedule and readjust it in an information society so people can learn and work when they want to.

A. Yes, I agree, and sabbatical leave for

every working person would probably eliminate the unemployment problem.

WOMEN IN 2078

Q. Would you speculate on the role of women in the year 2078?

A. I see two scenarios. I see a continuation of the urban to rural trend begun in 1970 with one group of women going toward more voluntary simplicity. And I see another group moving toward spaceship model cities. I see a labor intensive society, and an androgynous society with no sex separation of labor. I also see no male/female separation in bringing up children, and I see more children caring for children. I see local societies/communities using communications technology to keep in touch with other parts of the world. Small is not beautiful if you can't get away.

Q. Would you focus on being in the Congress for a minute. It is tough to daydream in Congress. We have two-year mentalities. You can help us learn to daydream with 2-year mentality. We need more free time. One week of in-house training on the economy is a help, but it is not enough. We need help if we are to have visions as leaders for our country. What should we do?

A. Well, you are creating a neighborhood by coming to these dinners of the Clearinghouse, and that is the first step. You might want to encourage more rather than less of this sort of gathering. Insist that you have daydreaming time on a regular basis.

Q. What we need is a "you're OK; I'm OK" mentality in Congress.

A. Yes, and a knowledge that it is OK to daydream.●

NATIONAL ZOOLOGICAL FOUNDATION

HON. G. WILLIAM WHITEHURST

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 22, 1978

● Mr. WHITEHURST. Mr. Speaker, on March 3, 1978, I introduced H.R. 11295, a bill to establish a National Zoological Foundation. This Foundation would be empowered, among other things, to: award scholarships and fellowships for the training of professional and paraprofessional staff for zoos and aquariums; initiate and support programs to promote the development of methods to improve the welfare of animals at zoos and aquariums; establish recommended standards of accreditation; make grants for pilot projects to serve as models for zoos or aquariums; make grants for the purpose of establishing "survival centers"; and support new programs to enhance the educational and scientific value of zoos and aquariums.

There is now a precedent for providing such funds for zoos and aquariums, since the newly established Institute of Museum Services, operating within the Department of HEW, has a limited amount of money for this purpose. However, the maximum grant available from the Institute would be $25,000, and it would be for operating expenses only; this is completely inadequate for the kinds of programs that are needed. It seems to me that zoos and aquariums should be funded under a separate program entirely, and this is one of the reasons for my latest bill.

In the 91st Congress, we passed the Animal Welfare Act of 1970, which gives the Department of Agriculture the responsibility for insuring that at least minimum standards of housing, feeding, and care are met by zoos. This is fine as far as it goes. However, zoos and aquariums are, or should be, far more than simply places where animals are housed and fed.

As our society becomes ever more urbanized, zoos and aquariums will provide the only available exposure to the world of nature for increasing numbers of children and their parents. The hundreds of thousands of citizens across the country who visit these facilities each day make it clear that people enjoy being able to see a wide range of animals. However, while one function of zoos and aquariums is to provide visitors with a means of enjoyment and recreation, their major purpose is conservation and education. Thus zoos should be much more than the "prisons of concrete and steel" that some still are; they must attempt to provide facilities that are as similar as possible to the natural habitats of the animals. The sad thing is that while many other cultural and educational facilities are able to obtain considerable Federal assistance in recognition of the service they offer to the people, zoos and aquariums must in large measure continue to struggle to meet their conservation and education responsibilities entirely on their own. This is an uphill battle indeed.

There are many people who feel that zoos should be phased out, that television can somehow replace them, that animals should be set free. In this connection, I would like to call to the attention of my colleagues two fine articles which have appeared in recent years. Space does not permit that they be reprinted here, but copies can be obtained from the Library of Congress for anyone who wishes to read them. One, entitled "Why Zoos?" was written by Emily Hahn and appeared in the February 25, 1975, issue of the New York Times Magazine. The other appeared in the April 17, 1975, Washington Post. Entitled "National Zoo Has a Farm Club," it was written by Robert Barkdoll; it was reprinted in the RECORD on page 10921 in the issue of April 18, 1975. Many of the animals now found in zoos either no longer exist at all in the wild, or will be gone within the next generation, and thus the zoos are their last, and indeed only, refuge. On page 17096 of the May 30, 1974, RECORD, I included a fine article from the Christian Science Monitor by Frederic Hunter which further reinforces my contention that zoos and aquariums must be upgraded.

As what we like to call civilization continues to encroach upon the natural habitats of many animals, more and more will be driven over the brink to extinction. It seems to me that since zoos and aquariums are in effect rapidly becoming today's Arks, it is incumbent upon us to make them the best possible refuges for the few members of these species left, so that future generations may have at least a small sample of magnificent species that we have been able to take for granted. Making this possible with the best possible facilities and care is the purpose of H.R. 11295.

CONGRESSIONAL COMMITTEE TRAVELS

HON. BOB WILSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 22, 1978

● Mr. BOB WILSON. Mr. Speaker, as ranking member of the Armed Services Committee, I can personally vouch for the obvious advantages of travel by members of the committee value to our defense posture, and to the Nation as a whole. Our committee oversees the expenditure of hundreds of billions of dollars, and there is no better way to understand the costs and possible savings than observing our troops, materiel, and weapons in place all over the free world. A recent letter written by our distinguished colleague, Representative WILLIAM DICKINSON, in response to a critical editorial well expresses the point I wish to make. I include the letter as a portion of my remarks:

MARCH 3, 1978.

Mr. RAY JENKINS,
Editorial Page Editor, The Montgomery Advertiser, Montgomery, Ala.

DEAR MR. JENKINS: Your recent editorial and accompanying cartoon relative to my Committee travels completely ignores some facts which in all fairness should be made known to round out the picture. I hope you will print this reply.

Since being honored by the good people of the Second District by being sent to Congress 13 years ago the Department of Defense has submitted budget requests totaling over one trillion dollars—$1,129,573,000 to be more exact. The House Armed Services Committee, on which I serve as the second ranking Republican, has authorized several hundred billions of dollars since I have been a member. The Research and Development Subcommittee on which I am the ranking Republican has jurisdiction over almost a $12½ billion budget this one year alone (FY 79). There are over 30,000 items in the R & D budget—ranging from super-secret planes to clothing. As a member I have to pass judgment on supporting or cancelling all of these projects.

In addition to passing judgment on the spending of these billions of dollars we necessarily have a duty of oversight to see that the funds are spent as directed and to assess how well the projects and programs are progressing. I cannot do this part of my job sitting in my office. Our weapons, military treaties, servicemen and bases are all over the world.

In addition, but not included in the above, are our Foreign Aid Programs, foreign military sales ($6 billion a year to Iran alone) NATO commitments, etc.

What would you and the other critics have us on the Committee do? Under Article I, Section 8 of the Constitution, it is the obligation of the Congress to raise armies, appropriate funds, and carry out other essential responsibilities that relate to the security of our country. Would you have us merely ask the Defense or the State Departments where

the money should be spent and how the programs are being run? Would you advocate a policy that would enable the military to be absolutely autonomous, govern itself, and simply come to the Congress for a blank check? I don't believe that you or anyone else would seriously support such ideas that would lead to an abrogation of the responsibilities of the Congress. Conversely, if not done by the Congress (who has to answer to the people, and who makes the decisions of raising and spending the monies), by whom then? How would you propose it be done—by a panel of newspaper editors, elected by no one and responsible only to the persons that own the newspapers?

Is our Committee worth what it costs? I think so. On our last Committee trip to the Mid-East we were go-betweens for Prime Minister Begin and President Sadat and were instrumental in setting up their first historic meeting. The announcement was made three days after we met with them both. How much is that worth?

A year ago in New Zealand Prime Minister Muldoon went directly from our meeting with him to a press conference to announce a change in their nation's policy and from that day on United States nuclear submarines and warships could use harbor and port facilities in New Zealand. Australia followed suit within two hours!

What dollar tag could you put on that?

As a result of a Committee trip to Germany they have better school and commissary conditions for American children and dependents in Europe. Would that justify a trip there?

The list could go on and on. Every trip at home is approved by the Committee Chairman and every trip overseas is approved by both the Chairman and the Secretary of Defense—in writing.

In closing let me say that my travels and my Committee's travels are not only justified, they are necessary. It comes with the job. What the travel costs the taxpayers is infinitesimal when compared to the millions of dollars saved the taxpayers by our oversight. As long as the people of the Second District let me keep my job (and I am the first to realize this is subject to change), I will continue to do my best and go wherever my job takes me.

Sincerely yours,

WM. L. DICKINSON.●

ALTERNATIVES TO INSTITUTIONALIZATION

HON. CHARLES W. WHALEN, JR.

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 22, 1978

● Mr. WHALEN. Mr. Speaker, I am pleased to sponsor legislation introduced by the gentleman from Minnesota (Mr. FRASER) which would make available a few basic services to assist elderly Americans in retaining their independence and dignity, rather than continue to shunt these important older citizens off to institutions.

The Congressman's home of Minneapolis long has been recognized as leading the Nation in its approach to home care and long-term personalized care for senior citizens.

Over 2 years ago in a series of hearings before the Select Committee on Aging entitled "Innovative Alternatives to Institutionalization," the executive director of the Minneapolis Age and Opportunity Center (MAO), Mrs. Daphne H. Krause, and her staff described a functioning, integrated program offered to their community which included housekeeping services, health, nutrition, carpentry, transportation, and counseling assistance. This testimony dealt not only with humane concerns, but with cost-effectiveness. Under the services provided by the consortium—with important volunteer contributions such as chauffeuring back and forth for medical attention, the differences in costs between helping an older couple to remain together in their own home and in placing them in a hospital or nursing home are simply astronomical. I commend to my colleagues the hundreds of case studies in the MAO files, many of which have been presented at hearings before the select committee.

Today the American taxpayer subsidizes the nursing home industry to the tune of almost $3 billion annually, primarily through medicare and medicaid. With creative, thoughtful attention such as is possible under H.R. 8589, we could offer approximately 40 percent of these citizens desirable alternatives to institutionalization.

This legislation would make possible establishment of community long-term-care centers which would provide, coordinate, and monitor a variety of home services along with counseling. The home services would be offered on a sliding fee basis to insure that senior citizens from all income groups would have access to the program.

Mr. Speaker, this represents an exciting, forward-looking approach. No longer are we prepared to ignore the existence of—or to remove from our sight—the elderly poor, or the elderly who live alone, or those who are not greatly impaired, but who do need an occasional helping hand.

Too, the long-term-care community center concept provides an opportunity for an expansion of meaningful public service positions, and for valuable contributions from such volunteer groups as the Retired Senior Volunteer Corps (RSVP). For too long the trend in our country has been one of alienation, due partly to increased mobility which tended to separate the members of the greater family and also to immigration too large, impersonal cities where people no longer identified with their neighbors. Enactment of H.R. 8589 would represent a turn away from that trend and would fill a serious gap in our current system of care for the elderly. I urge my colleagues to support this approach.●

HOUSE POST OFFICE

HON. JOE MOAKLEY

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 22, 1978

● Mr. MOAKLEY. Mr. Speaker, recently an industry publication, Transgas decided to see what happens when an American follows the age-old adage, "Write your Congressman."

Naturally, their first stop was the House Post Office.

I think this article provides an excellent view of the first-rate work being done for us by the House Post Office. Our distinguished Postmaster, Robert V. Rota does an outstanding job for us and I would like to share this article with my colleagues. I think all my colleagues, on both sides of the aisle, will agree with the magazine's assessment of Bob's performance:

HAVE YOU WRITTEN YET?

"WRITE YOUR CONGRESSMAN"

That advice, put forth by an increasing number of organizations, interest groups and businesses, is apparently being followed by record numbers of citizens these days. Americans are indeed sending their messages to Washington by the millions each month.

While communicating with elected representatives isn't about to unseat spectator sports as the national pastime, it is practiced by an active minority that is willing to take the time to compose the letter to Congressman Billthumper or Senator Snort that most people only talk about writing.

Writing elected officeholders can achieve many things.

It brings individual Americans into the governmental process, giving them a direct link to the nation's legislative nerve center. It allows them to help shape new laws and policies.

It reminds lawmakers that they are accountable to their constituents for each vote they cast in Congress, and that all reasonable viewpoints must be considered before casting a vote.

It also provides a way for voters to let off steam and seek action from a lumbering bureaucracy—to pry loose a balky government loan or reinstate a Social Security benefit lost in some distant computer.

A major newspaper recently pointed out that many taxpayers write to complain about the growth of government, particularly of Congressional staffs, not realizing letters such as their own are a contributing factor in that growth.

It takes a lot of time and a lot of people to sort, open, read, tabulate and respond to all that mail.

Still, in spite of the work and costs involved, most members of Congress encourage the folks back home to express their opinions. The "district mail" keeps them on their toes and often has direct bearing on how they vote on individual issues.

In an effort to find out just what happens to your "Dear Congressman" letter once it reaches Washington, Transgas visited several offices at the Nation's Capital recently.

Busiest of them all, around the clock, is the House Post Office in the Longworth Office Building.

In operation nearly 20 hours per day, 363 days per year, the HPO handles well over 8.4 million pieces of mail in an average month. Constituent mail has more than tripled since 1970 and accounts for more than 3 million pieces per month, according to House Postmaster Robert Rota.

An elected official of the House of Representatives since 1972, Rota hastened to point out that for every piece of constituent mail referred to an agency by a member of Congress, another 2.1 pieces of mail (on the average) are generated from that agency, besides the replies from Congressional offices.

Rota's mail handling crews start work at 2:30 in the morning and X-ray all incoming

pieces before sorting them. Delivery is made to 725 different stops along the maze of corridors that typify Capitol Hill.

There's a good reason for not shutting down the House Post Office except for Christmas and New Year's, Rota explained.

"If we shut down for one day, there's no way we can store all the mail. The trucks are sometimes backed up on the avenue waiting their turn to come in and unload as it is."

However, the House mail room does shut down an extra day every fourth year—for Inauguration Day.

By continually improving the efficiency of his growing operation, Rota has managed to buck the normal trend of burgeoning bureaucracy. He hasn't increased the size of his staff in all the time he's been Postmaster of the House.

That's not the case with representatives and senators' staffs, which are responsible for the host of behind-the-scenes duties that keep Capitol Hill offices humming. The size of staffs varies from office to office, but generally they have grown steadily in recent years to keep pace with an increased legislative workload and the rising tide of constituent mail.

The size and organization of each Congressman's staff reflect the personal preferences and responsibilities of the lawmaker. We talked with staffers from two states in Transco's market area—one on the House side and one on the Senate side—to find out some of the ways correspondence from constituents is handled.

"The sheer volume of mail on certain key issues sometimes prevents a Congressman from reading every letter personally," explained Don Wilson, administrative assistant to Rep. James T. Broyhill of the 10th District of North Carolina.

"We can get five to six hundred letters a week on a single subject."

In Broyhill's office all mail is opened by clerical staff, then sorted according to subject. Wilson gets the next look at all letters dealing with legislation, while "case work" mail—requests for the Congressman's assistance with various problems—is assigned to several other staff members.

Wilson passes letters along to Rep. Broyhill, and when a vote is coming up in the House he sees that all opinions expressed by constituents on the pending issue are tabulated for the Congressman's review.

"This office is different from most," he said, "because we answer all legislative mail from North Carolina, whether it's from our own district or not."

Mail from other states is not always answered, but letters with constructive ideas are often filed for future reference.

Preparing responses to constituents requires the use of modern office techniques, including memory typewriters.

"For many recurring issues we draft a form response, such as to explain the Congressman's proderegulation stance on natural gas," Wilson said.

"Of course, these are updated constantly and are personalized as much as possible."

When asked if he detected any new trends in voter mail, Wilson said that not only is the volume increasing, but he also feels the public has a greater awareness today of what Congress is doing, thanks to improved communications.

He feels both these trends are evident on the energy issue. Before the 1973 Arab embargo, energy was a subject most letter writers never even thought of.

Moving to the Senate side of the Hill, we spoke with Ned Kelly, press aide to Sen. Richard S. Schweiker of Pennsylvania, about how a typical senator's office operates.

"We may not be entirely typical," Kelly warned, "because we try to be very service-oriented.

"For example, we answer all mail, and try to do so within one week after its received."

Since a senator represents an entire state, the volume of mail received is proportionably greater. Sen. Schweiker's office often receives 10,000 pieces in a single week.

"All mail is tabulated weekly according to 'pro' or 'con', with a breakdown of the 10 leading issues," said Kelly.●

NONDISCRIMINATION IN EDUCATION PROGRAMS ON BASIS OF SEX

HON. JOHN N. ERLENBORN

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 22, 1978

● Mr. ERLENBORN. Mr. Speaker, I have today introduced a bill to amend title IX of the Education Amendments of 1972—relating to nondiscrimination in education programs on the basis of sex—to include among those organizations whose membership practices have been specifically exempted from the title certain fraternities and sororities which have social functions but whose principal activities are rendering a variety of services to their campuses and communities. It is my firm belief that the Congress intended to exempt such organizations from the title IX requirements in an amendment to title IX—section 3(b) of Public Law 93-568—in 1974. However, HEW has construed that amendment so as not to include them.

In the 1974 amendment, the Congress exempted the membership practices of the purely social fraternities and sororities and to certain other voluntary youth service organizations, specifically including the Young Men's Christian Association, Young Women's Christian Association, Girl Scouts, Boy Scouts, and Camp Fire Girls. It was clear that in enacting title IX the Congress had never intended to go to such lengths as to include the membership practices of such organizations, thus forcing them to admit both men and women, but that nevertheless was the interpretation of HEW. Unfortunately, by a very narrow construction of the amendment HEW could reach other, similar, organizations. The purpose of my bill is to correct that situation. It amends clause (A) of section 901(a)(6) of title IX to make the terms "social fraternity" and "social sorority" read "social or service fraternity" and "social or service sorority", thus extending the exemption from title IX membership requirements to these additional organizations.

The two service organizations which I have in mind—although there may be others similarly situated which would be included in this category—are the Alpha Phi Omega National Service Fraternity and the Gamma Sigma Sigma National Service Sorority, which were established to carry out the ideals and purposes on college campuses and in campus communities, respectively, of the Boy Scouts and the Girls Scouts of America. While they have some of the aspects of the Greek letter social fraternities and sororities which we exempted from what HEW has interpreted to be the membership requirements of title IX their primary function is that of a service organization.

When we were considering the conference report in 1974 which contained the title IX amendment incorporated in section 901(a)(6)—known as the Bayh amendment—it was noted that the parliamentary situation severely restricted the conferees in their ability to go beyond the amendment and cover organizations similarly affected by the HEW interpretation, and that this was a possible defect in the Bayh amendment. The need to cover service fraternities and sororities such as the two I have mentioned is the only one which has come to my attention. Accordingly, I have introduced this bill to correct that situation.●

ELDERLY IN THE UNITED STATES

HON. C. W. BILL YOUNG

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 22, 1978

● Mr. YOUNG of Florida. Mr. Speaker, today many problems face our Nation's elderly and I would like to discuss some of the positive steps taken thus far in the 95th Congress that would alleviate to some extent the burden these citizens must face. The average person over the age of 65 has less than one-half the national median income—$4,600 compared to $10,600. While many areas remain in which congressional action must be taken, we have at least made some progress to aid this most deserving segment of our society.

An unprecedented $699 million for spending under the Older Americans Act has been approved by this Congress and enacted into law. This figure represents an increase of $140 million from 1976. Amendments to the act will be voted on later this year and I am confident the House will approve additional funding of these valuable programs. The House Select Subcommittee on Education is presently working on this bill and I have submitted testimony to the subcommittee urging expanded funding. At the request of 7,000 constituents who receive program services, I recommended the elimination of the 3-year limitation specified in HEW regulations with regard to funding of title III programs. I would like to insert a copy of my testimony to the subcommittee into the RECORD at this time:

TESTIMONY OF CONGRESSMAN W. C. BILL YOUNG OF FLORIDA BEFORE THE HOUSE SUBCOMMITTEE ON SELECT EDUCATION

Mr. Chairman, I appreciate the opportunity to submit this testimony to the Subcommittee to voice my support of the extension of the Older Americans Act and to urge expanded and continued funding for social service programs under Title III.

Unfortunately, many of our citizens are forgotten and relegated to second-class citizenship once they reach a certain age. The work you as Chairman and the other Mem-

bers of the Subcommittee have accomplished on the Older Americans Act has done a great deal to remind these individuals that they have not been forgotten and has provided them with the means to maintain their personal dignity and independence in the face of fixed incomes, higher prices, failing health, and other hardships. There are 10,200 individual recipients of Title III funded services in Pinellas County, Florida and they need to be assured of the continuation of funds. I urge the Subcommittee to consider what this continuation means to them as well as other Members' constituents.

The Title III programs in the Sixth Congressional District of Florida are a cooperative network to serve older people through a system of comprehensive coordinated services designated to meet their needs. The Administration on Aging regulations and instructions have been designed to give both State and area agencies on aging wide latitude in determining how they should use the Federal dollars made available to them. However, the regulations are causing concern to local officials and service recipients alike because they require that funding be discontinued after three years unless special approval is given by the Commissioner on Aging. This approval will be given for an annual extension of funding only when it can be shown that substantial efforts have been made by the local area agency on aging to attract funding for such social services from other sources, and that the support requested will not be available in the foreseeable future. Some of the Pinellas County programs have already passed the three year limit and others will reach the limit this year. Fortunately, waivers have been granted so far by HEW for some and its approval for continuation of the others will be sought.

The ability to approve the continuation of Title III program funding is supposed to be transferred to the State level soon, but I believe this policy should be scrapped with the three year time limitation being eliminated. This time limitation policy of the Department of Health, Education, and Welfare is not a viable one for the provision of services to the aging. In many areas, the number of citizens eligible for Title III services is increasing yearly and local agencies and organizations will not be able to take on the full funding of the services at any time.

These services for our elderly citizens should become a permanent reality in local communities. I urge the Subcommittee to amend the Act to provide for full and permanent support of Title III projects by public funds as has been done with other projects. The lives of older Americans are too unsure as it is. For those who depend on these programs for needed services, every year is another time of guessing whether the program funding will be continued or whether some far-away bureaucrat will discontinue funding because of this regulation. There will never be sufficient local funding available in areas where there is a high population percentage of elderly citizens. I hope the Older Americans Act will be amended to reflect this reality.

I thank the Subcommittee again for affording me the opportunity to inform you of how thousands of my constituents view this matter. They are so alarmed at the possibility of discontinuation of these funds that nearly 7,000 senior citizens signed a petition urging the elimination of the three year limit. It is on their behalf and that of thousands of other deserving Americans that I recommend this change in the law.

Mr. Speaker, the Social Security Financing Amendments Act of 1977, which has been signed into law, makes several important changes for senior citizens. Limits to be applied now to the wages or salary that social security recipients over 65 can earn on jobs without losing some benefits are far more generous. Their earnings limit under the new law is now $4,000, up from $3,000 in 1977. The limit will increase each year until it reaches $6,000 in 1982. After 1982, no earnings limit will apply to people age 70 or older rather than the original age of 72. Another change made by this law will allow widows and divorced spouses of social security recipients who are over 65 to remarry without a reduction or termination of the benefits due them under their previous spouse's account. Prior to enactment of this new law, many senior citizens were faced with living their lives alone after losing their marriage partner because remarriage would greatly reduce or terminate their benefits. Many of these people live on small, fixed incomes and any type of reduction might well mean financial disaster for them. With this change in the law, they will now be allowed to remarry and decide whether to continue to receive widows benefits or draw benefits under their new spouse's earnings record.

When the House recently considered H.R. 50, the so-called Humphrey-Hawkins Full Employment and Balanced Growth Act, the House unanimously approved an amendment I offered to the bill that would insure that the effect of the outside earned income limitation on the employment status of recipients would be part of the President's Economic Report provided for in the measure. This will insure that proper attention is given to the effect of this unfair limitation on jobs our elderly citizens would like to have, but do not take because they would lose part of their benefits.

Congress gave the Community Services Administration $82.5 million in 1977 to weatherize homes belonging to the poor, elderly and handicapped. Some $2.2 billion has been approved by Congress until 1980 for section 202 housing for the elderly, and $100 million was set aside for the continuation of a loan authority program for housing for the elderly. Under the provisions of another bill, which has now been signed into law, airlines will be allowed to offer the elderly reduced air far on a standby basis.

In the area of health, the Medicare-Medicaid Anti-Fraud and Abuse Act has now become law. We have all heard reports of abuses and frauds in the medicare and medicaid programs. This change in the law will hopefully help to uncover and expose abuses and fraud in the program, and keep those persons already convicted of fraudulent activities from further participation in the program. Also, this new law states that nursing-home or hospital operators may be punished with a $25,000 fine and a jail term of up to 5 years for requiring a "contribution" to their institution as a precondition for admitting a medicaid patient.

The conference report on the Age Discrimination in Employment Act Amendments of 1977 was approved by the House yesterday. When the Senate approves the measure and it is signed by the President, the new law will put an end to forced retirement of Federal Government employees. It will raise the age limit for coverage under the act so that a non-Federal employee presently covered to 65 will be protected against age discrimination until he is 70.

The administration's proposal to cut funding of the retired senior volunteer program (RSVP) disturbs me. There are over 500 volunteers in the Sixth Congressional District of Florida who are depending on this valuable program being funded in the future at least at present levels. I have joined with several colleagues to inform the Director of the Office of Management and Budget of our disapproval of this cutback, and to call his attention to the importance of this program to our senior citizens and their local communities.

Of course, many problems still remain for our senior citizens, and I have introduced legislation to correct some of the inequities that exist under present law. Just a few of these measures are:

H.R. 1385, legislation to insure that veterans' pensions and compensation will not be reduced or discontinued because of increases in their monthly social security benefits.

H.R. 1387 which provides for increases in pensions for the Mexican period and World War I veterans and their dependents. I have also introduced H.R. 1386 to provide these same veterans with a certain priority for hospitalization and medical care. I testified before the House Veterans' Affairs Subcommittee in behalf of these bills. As a result of these hearings, the Veterans' and Survivors Pension Improvement Act of 1978 (H.R. 10173) has been reported to the full committee for consideration. Under the provisions of this bill, veterans' pension benefits would be determined under a new formula, establishing a maximum annual pension payment so that no eligible veteran or widow will be required to live below the poverty level. Another provision contained in the bill would automatically increase veterans' pensions when social security benefits are increased. For too many years, when social security benefits have gone up veterans have found their pensions decreased by the same amount. The goal of my bill, H.R. 1385, has been incorporated into H.R. 10713 in order to correct this unfair situation.

H.R. 1391 would freeze all out-of-pocket costs that must be borne by an individual for hospitalization and nursing home care covered under the medicare program at the 1976 level. The amount of money a person under the medicare program must pay if he is hospitalized or requires nursing home care has been steadily increasing. My bill would lower the money that this individual would have to pay to that set by medicare in 1976.

H.R. 1645 would authorize payment under the medicare program for certain services performed by chiropractors.

H.R. 2240 would allow payment for pre-

scription drugs under medicare part A—the hospital insurance program.

H.R. 5387 would remove all limits on the number of home health visits paid for under both part A and part B of medicare.

H.R. 5391 would establish a home health clearinghouse to provide elderly persons with a single place where they can obtain complete information on Federal health programs available to them.

H.R. 5428 would include dental care, eye care, hearing aids, physical checkups and foot care among the items and services for payment under the supplementary medical insurance program.

The problems facing our senior citizens will continue to receive the active attention of the Congress. In 1974, I offered an amendment which the House overwhelmingly approved that created the Select Committee on Aging. The committee has as its mandate the responsibility to conduct continuing and comprehensive studies of problems which face our senior citizens, especially in the areas of housing, health, income-maintenance, employment and participation in community life. From its studies of these problems, the committee has and will continue to develop recommendations to be acted upon by the appropriate committees of the House. It was a privilege to be instrumental in the establishment of the committee which is doing so much to aid our elderly citizens.

The problems facing our senior citizens today must be given careful consideration and it is my intention to continue working for legislation that will be helpful to them.●

A CRITICAL LOOK AT THE ADMINISTRATION'S PLANS TO REVAMP THE CIVIL SERVICE SYSTEM

HON. WILLIAM F. WALSH

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 22, 1978

● Mr. WALSH. Mr. Speaker, I have many reservations about the administration's recently announced proposals to revamp the Civil Service Commission. Congress must look very carefully at these proposals, especially in light of recent criticism by the chairman of the House Service Subcommittee that the administration's figures on how many Federal workers are fired each year because of incompetence is drastically understated. Backers of this reorganization plan have said only 226 Federal workers were fired in 1977. Yet investigation by the House subcommittee showed that in fiscal year 1976 alone, 17,000 Federal workers were relieved of duty because of poor performance. Surely that number did not decrease so drastically last year.

Because of this discrepancy, we in Congress must look at this plan with a sharp and thorough eye, and with this in mind, I submit the following article as food for thought. It was written by Vincent Connery, president of the National Treasury Employees Union:

(By Vincent Connery)

Old Hickory came to the White House more than 100 years ago and brought with him the "spoils system."

With their coonskin caps and deerhide boots, the supporters of Andy Jackson soon found jobs throughout our still fledgling Government, while the clerks, bookkeepers, and tariff collectors from the opposition party were thrown into the streets.

That was patronage in its rawest, most blatant form. Today, the world is much more sophisticated and so are those who wish to resurrect the spoils sytsem. Nothing simple for them; instead we have an inch-thick report which has been submitted to the President by Dwight Ink and his personnel management project.

Taken together, the 125 recommendations contained in the "Ink Report" would restructure the personnel system from top to bottom, paving the way for absolute presidential domination of the Federal Government and its employees. To accomplish this, the task force proposed sweeping changes in the hiring rules, the job protections accorded employees and managers, compensation practices, and the role of unions in the Federal Government.

With regard to hiring practices, the task force has a fistful of recommendations, each aimed at providing executive branch officials much wider discretion in choosing candidates for Federal jobs. For example, one proposal would eliminate the "rule-of-three" under which agency managers must hire one of the top three individuals on a civil service register. In its place, broad categories would be created and hiring officials would be free to choose anyone in the highest category.

Another proposal requires that 5 percent of all new hires would be selected each year by Federal managers, without having to compete for their jobs under merits selections principles. In addition, under another recommendation, the discretion of Federal managers would be greatly expanded so that they could hire temporary employees, virtually whomever they saw fit, and then convert the "chosen" to career appointments in 2 years.

Just these three proposals by themselves would greatly change the composition of the Federal workforce. It is not difficult to imagine the vast numbers of political jobseekers who would become ensconced throughout the Federal Government if these recommendations were adopted. But that is just the beginning.

To gain true control of the Federal workforce, it is necessary not only to fill the GS–5, GS–7, and GS–9 positions with political loyalists, but top management must also be "the President's men." The Ink Task Force would achieve this by creating an "Executive Service," which would include all GS–16 and above positions. Those in the Executive Service would be cut adrift from the General Schedule, with their pay determined on an individual basis. They would no longer be eligible for step increases and they would be shuttled from agency-to-agency on the basis that any "good manager" can manage without having to know the jobs of those he or she directs.

Most importantly for those in the administration, the members of the Executive Service would lose the job protections which they now have. It would take little effort, and no need for imagination, to remove a recalcitrant GS–17 career manager and replace that individual with someone more willing to follow the party line. Just a quick transfer or a year of unsatisfactory service as determined by the President's appointees, and the GS–17 executive would find himself out the proverbial door.

For lower-level managers, life would not be very much better. In addition to losing their step increases, they could be removed with very limited appeals rights. Once again, those who are not sufficiently loyal, would find themselves in a lot of trouble. They could be transferred, reduced in rank, forced into retirement, or simply fired. And, for all intents and purposes, that will be the end of the matter.

No one would suffer more, however, than rank-and-file employees. Promotions would be few and far between, with vacancies being filled by the party faithful. While they would still be technically eligible for step increases, employees would find them very scarce. Supervisors would be encouraged to deny employees step increases, and these same individuals would be evaluated on the basis of how few they recommended. Of course, the lower the number, the higher the supervisor's evaluation.

In addition, the Ink Task Force urges a series of proposals to reduce the wages and fringe benefits of bargaining unit employees and to eliminate quality step increases. The task force recommendations also make it easier to fire employees by relaxing the standard for dismissal and by forcing them to prove why they should be allowed to keep their jobs. Currently, the burden of proof in an adverse action is on management; under the task force proposals it would be shifted to the employee. Once an employee has been removed from the rolls, there is nothing to prevent filling that position with someone who has proved their loyalty to the administration.

Simply stated, the Ink Task Force report is a clever scheme, cloaked in pious pronouncements, to politicize the entire Federal workforce, while driving down the pay and fringe benefits of the rank-and-file. Campaign supports of the President will find it much easier to be hired, to move quickly through the ranks, and then find their ultimate reward as a manager receiving bonuses for their outstanding loyalty. In the meantime, other Federal workers will face a shrinking paycheck and will be haunted by the constant threat of dismissal to make room for one of the "chosen."

Predictably, the Ink Task Force proposed the creation of a new agency called the Merit Protection Board that is supposed to prevent all of this from happening. However, the members of the Board will be appointed by the President and they will report directly to him. More importantly, with the free reign that the task force gives to Presidential appointees, throughout the Government, the Board members would be powerless to stand against what would be a horde of political roughriders.

Just think, it was only a few months ago that the President's lobbyists were telling Congress that law enforcement officers, as well as those engaged in audits, inspections, and administering grants, should be excluded from Hatch Act reform for fear of overly politicizing the "Federal bureaucracy." Those on the Ink Task Force certainly did not share this concern. Their proposals would not only wipe out any Hatch Act protections, it would reward employees for actively supporting the administration and penalize those who did not.

In order to remove as many obstacles as possible to the politicizing of the Federal workforce, the Ink Task Force report seeks to narrowly restrict the role of Federal employee unions. Matters which are not negotiable would be removed from the bargaining table. For example, under Executive Order 11491, unions can negotiate contract provisions requiring that current employees receive first consideration for higher level vacancies. Under the Ink recommendations, this would be forbidden. The President's people would get the jobs.

This effort to strap Federal unions is not surprising. After all, strong, active unions are an anathema to political control of Federal employees. However, using a smoke

screen to cloak their true intentions, the task force has proposed such things as independent Federal Labor Relations Authority, an agency shop, a consultative board to discuss revisions in the Federal Personnel Manual and binding arbitration of removal actions.

Even here, however, the Ink Task Force is disingenuous. Upon close examination, the independent Labor Relations Authority turns out to be not so independent, with its members reporting to the President, just as they do now, and sharing the same office space with his personnel advisors. With regard to the agency shop, everyone knows that it is a virtual certainty that Congress would refuse to approve the necessary legislation to implement this concept.

At first blush, the expansion of the grievance procedure to include removal actions seems like a big step forward. But, in reality, it is no more than a hollow promise. By lowering the standard for dismissal and by forcing employees to prove their innocence, Federal workers would be denied due process, while arbitrators would be so restricted it would be nearly impossible for them to rule on behalf of employees.

As far as the creation of a union board to review FPM supplements, all I can say is that 7 years of meaningless dialog on the Federal Employees Pay Council clearly demonstrates the futility of any consultative procedure. Sitting on such a board would simply constitute a dubious right to talk at someone who is already locked into a course of action.

Naturally, among the 125 recommendations there are a few proposals that would improve the current system. But make no mistake, the task force report, if adopted, would seriously harm Federal employees. In effect, it would turn the clock back to the days of Old Hickory when job security and fairness were unknown and Federal unions did not exist.

Proposing a grand design to politicize this country's civil service system is abhorrent, but even worse has been the means taken by administration spokesmen to sell this scheme to the American public. To wit, planted news articles about Federal employees who allegedly have nothing to do and cannot be fired.

Their tactic is simple, direct the public's attention to these carefully selected horror stories as the justifications for civil service reform. By so doing, they are seeking to disguise their real motive—political control of the Federal workforce. For them, the "spoils system" is the name of the game.

A wide open road is being paved for massive political chicanery and all in the name of civil service reform. This must leave the spirit of Andrew Jackson chuckling and right proud.●

MEDICAL TREATMENT OF POW'S

HON. C. W. BILL YOUNG

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 22, 1978

● Mr. YOUNG of Florida. Mr. Speaker, our Nation has recently seen the end of a tragic period where many Americans lost their lives in Vietnam, others spent years as prisoners of war, and many are still listed as missing in action. As time goes on some people tend to forget many of the unpleasantries that occur during wars but one of my constituents, Gen. Delmar T. Spivey, USAF, retired, who was himself a POW, having been shot down over Germany in WWII, will not forget the changes that can occur in the lives of those held as prisoners of war.

General Spivey has written to me presenting some very interesting information he had received from Mr. Stanley G. Sommers, director of the National Medical Research Committee for American Ex-Prisoners of War, Inc. It is my feeling that the information contained in the correspondence from General Spivey and Mr. Sommers is very important, and I take this opportunity to present it to my colleagues in the House of Representatives:

LARGO, FLA., *March 3, 1978.*

Hon. C. W. YOUNG,
House of Representatives,
Federal Building,
St. Petersburg, Fla.

DEAR CONGRESSMAN YOUNG: It was my misfortune to be shot down over Germany during World War II and to become a POW of the Germans. It was my good fortune to survive this ordeal in fairly good mental and physical condition. As one of the senior officers in the huge Stalag Luft III Camp for Allied Air Force POW's it was my duty to carefully observe the more than 13,000 men and intercede for them with the Detaining Power, Protecting Power, the International Red Cross and YMCA Thus I was able to observe first hand the health and mental condition of the POW's in this particular camp. My interest has continued to this day.

As my Congressman I wish to convey to you some of the observations I have made and relate to you some facts which have come to my attention concerning these unfortunate men. I do this hoping that you, in your capacity as a Congressman, can use your influence to help those who are now suffering mentally and physically from their traumatic experiences.

Ever since the end of WW II, I have kept in touch with hundreds of former POWs through personal contacts, letters and close affiliation with U.S. and Allied POW organizations. I have been able to encourage many and to intercede directly for others. Our government, especially the Congress, has shown concern and generosity for POWs of WW II, Korea and Viet Nam, yet there are many who have not received proper medical attention nor have they been awarded adequate compensation for their war connected disabilities. It is in their behalf I appeal to you.

Recently I attended a conference of former POWs in St. Petersburg where we were briefed by Stanley G. Sommers, Director of a group of eminently qualified doctors and researchers known as the National Medical Research Committee (Medsearch) for American Ex-Prisoners of War, Inc. I asked Mr. Sommers to give me a synopsis of his findings and observations during the past 10 years while directing "Medsearch". I am enclosing a copy of it for your files.

My concern is for former prisoners of war who have not received adequate medical treatment and compensation for their war connected disabilities. Many of these disabilities are just now being recognized by individuals while others have been affected for years but have not been able to get proper treatment nor compensation from our V.A. Anything you can do for them will be greatly appreciated by all of us who were former POWs.

Sincerely,

Gen. DELMAR T. SPIVEY,
USAF, Retired.

MEMORANDUM

To: Delmar T. Spivey, Maj. Gen. U.S.A.F. Ret.
From: Stanley G. Sommers, Director, National Medical Research Committee for American Ex-Prisoners of War, Inc.

On May 26, 1970, a concerned Congress passed Public Law 91-376 which presumes with respect to former prisoners of war of Japan, Germany, North Korea or North Vietnam (or other countries if the former prisoners of war suffered from dietary deficiencies, forced labor or inhumane treatment), that (1) certain listed diseases suffered at any time after military service, or (2) psychosis which became manifest within two years following service were incurred in or aggravated by such service. This presumption would be rebuttable.

Section 3 of the Committee Bill contains a special provision related to former prisoners of war. Because of the conditions of their captivity and the kinds of long-range harm that may have been caused, it is sometimes difficult for a former prisoner of war to establish, some time after the completion of his military service, that a disability or the aggravation of a previous disability is related to his military service.

The provision of the Committee Bill concerns former prisoners of war who were POWs for six months or more who suffered from dietary deficiencies, forced labor, or inhumane treatment. The Bill considers any veteran who was a prisoner of Japan or Germany during World War II, North Korea and thereafter, or North Vietnam to have suffered from dietary deficiencies, forced labor or inhumane treatment.

Under the Bill, the following diseases would be presumed to be service-connected if suffered by a former prisoner of war who meets the criteria discussed above:

Avitaminosis.
Beriberi (including beriberi heart disease).
Chronic dysentery.
Helminthiasis.
Malnutrition (including optic atrophy associated with malnutrition).
Pellagra.
Any other nutritional deficiency.

Under present law, a psychosis which became manifest within one year of the veterans' separation from military service is presumed to be service-connected. (The period is two years for admission to a V.A. Hospital as a service-connected patient.) The Bill extends this period of presumption of service connection from one to two years in the case of former POWs who suffered from dietary deficiencies, forced labor, or inhumane treatment.

The Committee is highly sympathetic with the problems of former POWs and wishes to stress its desire that the Veterans Administration administer this provision in the most liberal fashion possible.

We have found that many times P.L. 91-376 is not being enforced by the V.A., and that the spirit of the law is interpreted by the V.A. for its benefit and not that of the veterans, in fact, many times we must prove we were prisoners of war. As of now, 33 years later, we must for some reason prove with buddy statements, doctor statements, et cetera that we indeed suffered from the very disease which Congress has already established in P.L. 91-376 that we as ex-POWs are presumed to have suffered from.

Often we hear that these statements are from "remote memory" and not admissable.

We are to receive the "benefit of the doubt". An ex-POW may have as many as four statements from private doctors stating his medical problems are interconnected with his imprisonment, yet, he will be turned down on these disabilities by the V.A. as they were not established within the applicable time limits.

We feel that we are living proof of what the after-effects of malnutrition and stress are. We have never had examples, such as we are, to study, research and learn from before. It is time that the time limit be waived as recommended for former POWs by the International Conference on "Later Effects of Imprisonment and Deportation", the Hague, Nov. 20-25, 1961.

Many times the V.A. doctors will give a

physical examination of a cursory nature and not in keeping with the "thoroughness to discover, if possible, all disabilities common to prisoners of war even where there had been no complaint or prior evidence of such conditions" as promised by three former V.A. Administrators and by the present Administrator.

Concerning the payment of dental work, specifically for outpatient dental treatment. we have received numerous inquiries from former POWs saying they have been denied this authority. Title 38, U.S. Code, paragraph 612 and 6120 states that we are eligible.

The National Medical Research Committee of the American Ex-Prisoners of War, Inc. has been researching the after-effects of incarceration for the past ten years. The following is a brief summary of our findings.

The disabilities that are now affecting many thousands of ex-POWs who suffered extreme war stresses and malnutrition are now increasing due to the fact that we suffer from premature aging.

"NYU's Dr. Haas believes that many symptoms found in former camp prisoners today are either misinterpreted or overlooked in diagnosis. He urges physicians in private practice to acquire more information about the late sequelae of starvation and stress, so that they will be better able to recognize and manage these conditions." (Medical World News, 1965)

"To further complicate matters, the multiplicity of deficiency and other diseases, the duration of captivity and difficulty in assessing after-effects, * * *. Few nutritional disease manuals or other medical text books cover the effects of a combination of nutritional diseases." (D. F. Moore, M.D., C. O. Twining, M.N., England, 1963)

48 doctors, all experts on the after-effects of imprisonment (World Federation Holland, 1961) state that three of the main factors which have made the ex-POW into a constantly ailing person are:

1. Job fatigue does not appear at the beginning of old age, but in adults who are young.
2. Old age is premature.
3. Early death occurs.

The 48 experts also say, "The cardiovascular and nervous systems, although not the only ones to be impaired, are more often those to be affected and this always leads to serious developments."

Let me mention briefly Premature Aging—"While one year in war ages a man as much as two years of peace, a year in a prisoner of war camp puts at least four years on his age." (Ficher & Klotz, 1961)

To quote Dr. A. Hoffer, President of the Huxley Medical Fountain, July, 1977: "I'm writing a book now called "Aging Without Senility", so I'm keenly involved. What happened to you in camp produced a premature aging. It ages you probably 20 years. . . . So many of the symptoms of aging, which are arthritis, crinkly skin, vision, hearing, memory, confusion, fatigue, inability to sleep—these things happened to the POWs, and instead of happening at 70 they happen at 50, and then you go on from there. . . ."

With all the research available concerning premature aging and the ex-POW, there should be no question that all of us do indeed suffer from it and that we are plagued by the diseases and complications of the elderly many years before our time.

We now have the question of early death. The records note a high percentage of deaths for ex-POWs in the first few years after release, then the rate slowed but is increasing with age, but is always higher than the non-POW rate.

The prolonged strain of imprisonment must also be considered. Let us not forget the torture, the forced labor, the inhumane treatment, the death marches, and the prison hell ships and cattle cars that transported us to distant prisons. As POW's we never knew from one day to the next if we would be alive.

Dr. Seyle, one of the world's top authorities on stress, maintains that all diseases stem from stress. That all body organs and tissues are affected. This concept has been confirmed in several studies involving both human and animal reactions to stress.

Many of us suffered from beriberi and beri beri heart disease. In 1960 the V.A.'s Dr. John J. Robinson of Lake City, Florida reported this in the Southern Medical Journal in his excellent paper, 'Degenerative Heart Disease Resembling Beriberi': "Beriberi heart is often confused with and can be masked by arteriosclerotic heart disease and without thorough necropsy studies the chief cause of death would be reported as arteriosclerotic".

As a result of our imprisonment and its after-effects, knowledgeable doctors throughout the world, after much research, came up with the KZ Syndrome which consists of:

1. Failing memory and difficulty in concentration.
2. Nervousness, irritability, restlessness.
3. Fatigue.
4. Traumatic dreams.
5. Headaches.
6. Depression.
7. Moodiness.
8. Loss of initiative.
9. A feeling of insufficiency.
10. Many of us shun large crowds and social activities.

All of us suffered from malnutrition and the fact, in many cases, the effects of such malnutrition would escape detection in ordinary physical examinations because some symptoms are not as detectable as they are in such disorders as beriberi and pellagra. The after-effects of malnutrition vary and, in certain cases, do not show up until long after the POW has been released from confinement.

Ancel Keys writing in Jolliffe's Clinical Nutrition, 1950, had this to say, "When reasonably good diets are re-introduced after severe undernutrition there is evidence that the incidence of diabetes and hypertension increases beyond the normal pre-starvation level."

Gilbert W. Beebe, Ph.D., National Research Council, Washington, D.C., has been researching the ex-POW's for 20 years. In his excellent article, 'Follow-up Studies of World War II and Korean War Prisoners', published in 1975, "It appears morbidity and disability in the period 1946–65 is significantly elevated for ex-POW's, especially for Japanese and Korean POWs in comparison to veterans who were not POWs. In addition, more than one-third of the European POWs studied had experienced painful feet, cramps and intestinal disease. Perhaps the most remarkable difference between ex-POWs and controls is the seemingly longlasting psychiatric disorders common to the POW."

The foregoing are not casual observations but factual studies conducted by outstanding authorities in the field of nutrition and incarceration.

It is surprising that these very interesting and valuable scientific papers are not being used in the treatment of the ex-POWs. If these findings were recognized and used the POWs would be justly compensated without a long extensive nerve racking hassle with the V.A.

In conclusion, let us remember the ex-POWs are proud. When their country was under attack they answered the call. These gallant men while in combat became prisoners of war. Through God and their faith in their country they survived months and years of incarceration.

They returned to their loved ones and started their lives over, determined to be taxpaying and self-sufficient Americans and some even refused assistance by the government because of their pride and love for their country. Many knowingly ignored the disabilities and handicaps of their bodies in their desire to be good citizens. Now years later, the after effects of incarceration continues to take its disabling toll, they need help in their time of need.●

WHY THE CONSUMER BILL WENT DOWN

HON. PETER H. KOSTMAYER

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 22, 1978

● Mr. KOSTMAYER. Mr. Speaker, in the aftermath of the defeat of the bill to create an Office of Consumer Representation there has been much discussion of the reasons for the bill's defeat. I would like to share with my colleagues an article which appeared in the February 25, 1978, issue of the Nation. The author is Mark Green, director of Congress Watch. Mr. Green speaks of the valuable lessons learned by the consumer movement, even though this most important bill did not pass, and I commend this article to my colleagues:

WHY THE CONSUMER BILL WENT DOWN

(By Mark Green)

What can you say about a bill that passed the House or Senate five times in seven years, that was endorsed by President Carter, Speaker O'Neill and 150 consumer, labor, elderly and citizen groups, that the public supported by a 2 to 1 margin in Harris surveys—and yet was defeated 227 to 189 in early February.

In a Washington populated by surrogates and symbols, the vote against legislation to create a consumer advocacy office in Washington was widely heralded as a major defeat for Ralph Nader and President Carter. But surely this misses the more significant point that it was a major defeat for consumers. As the fourteen Democratic and Republican members of the Senate Governmental Affairs Committee unanimously concluded in 1977, "at agency after agency, participation by the regulated industry predominates—often overwhelmingly. . . . For more than half of the proceedings there is no consumer participation whatsoever. In those proceedings where participation by public groups does take place, typically, it is a small fraction of the participation by the regulated industry." The purpose of this consumer advocacy office was to make regulation work better by making the adversary process work better. Its defeat means that the influence of producers' interests on regulation will continue.

In defeat, though, the consumer movement learned valuable, if expensive, lessons. The reasons for the bill's loss illuminate how power is played out in The City of Results. Why did it lose?

BUSINESS LOBBYING

Big business interests—such as the U.S. Chamber of Commerce, the Business Roundtable, the National Association of Manufacturers, Armstrong Cork, Procter & Gamble, Sears—made the bill a litmus-test issue of a Representative's fidelity to their creed. Speaker of the House Tip O'Neill said that he had "never seen such extensive lobbying" in his quarter-century in Congress. A campaign of stimulated mail inundated the desks of undecided members. The Business Round-

table[1] hired Leon Jaworski to lobby against the bill in early 1977, and later hired the North American Precis Syndicate (NAPS) to send around canned editorials and cartoons against the consumer agency to 3,800 newspapers and weeklies. These prepared statements—statements that never acknowledged as their source a business lobby opposed to this bill—appeared approximately 2,000 times, according to NAPS. Identical hostile editorials also appeared in ten newspapers around the country, newspapers not of the same chain. (Oxnard Press-Courier, Calif.; Thomasville Times, N.C.; Mt. Vernon News, Ohio; Middletown Journal, Ohio; Ypsilanti Press, Mich.; Santa Paula Chronicle, Calif.; Greenwood Commonwealth, Miss.; Roseburg News-Review, Ore.; Kentucky New Era.; Murray Ledger and Times, Ky.).

The U.S. Chamber of Commerce conducted a national opinion poll in 1975, which it then repeated several times over the next three years, concluding that "81 percent of Americans are opposed to a new consumer agency." The Library of Congress, however, discredited this survey as biased and unfair because the key question was phrased as follows (italics added): "Those in favor of setting up an *additional* consumer protection agency on top of *all the other agencies*," etc. This phony poll led an outraged Sen. Charles Percy to denounce it from the floor, saying, "The dissemination of useless poll information does nothing to help the image of American business, which is at an all-time low."

THE ANTI-GOVERNMENT MOOD

Business efforts successfully capitalized on a political fad, which one could call "the new anarchism." It holds that all regulation is bad, indeed that all government is bad. From Wallace to Reagan to Ford or even Carter, the sense that government is the problem, not the solution, has spread from the ultra-Right to infect some moderate members of Congress as well. One of them, a ranking Northern Democrat, told Vice President Mondale that he opposed the bill because we have "too much government." (It will be interesting to see how such Congressmen apply this maxim in the future to corporate subsidy programs worth billions.)

The opposition lobby had the money and machinery to propagandize that the issue was "big government"—not consumer fraud, not consumer health and safety, not one-sided regulatory proceedings. Thus, the repeated refrain that the Office of Consumer Representation was just more "OSHA-like" regulation stuck—even though there was no reasonable comparison between a regulatory agency with a $136 million budget and the power to order business to keep fire extinguishers 2 feet off the floor, and a $15 million nonregulatory advocacy office armed only with the power of an advocate.

As the vote neared, many members acknowledged that they supported the bill on its merits, but didn't, as one said, "want to explain 500 times in my district why the consumer office wasn't just more government." Afterward a Southern Democrat who swam against the current and voted affirmatively said, with some bitterness, "If we had voted today on a bill to abolish the U.S. Government, it probably would have passed."

DEFECTIONS AMONG ANXIOUS MODERATES

Anxiety over right-wing opposition exploiting the "big government" slogan provoked defections from the consumer camp. Reps. Tom Foley (D., Wash.) and John Anderson (R., Ill.)—respectively the chairman of the House Agriculture Committee and the chairman of the Republican Conference—had previously supported the legislation. Then in the spring of 1977 these two respected House bellwethers recanted and announced their opposition—Foley three days after an ultra-conservative had won a special Congressional election in nearby Seattle, and Anderson after discovering that his own party's right wing had targeted him for defeat. These defections made respectable subsequent ones by moderates in marginal districts, e.g., Representatives Schroeder, Panetta and Fish: who like Anderson and Foley, were nervous about challenges from the Right. Speaker O'Neill's injunction—"some members say they're worried about the next election; do the right thing and the election will take care of itself"—was not always heeded.

There were, to be sure, some profiles in courage. Rep. Wyche Fowler of Georgia was the only member of his delegation to vote yes; Rep. Jim Mattox of Dallas voted yes; so did Republicans William Cohen of Maine, Carl Pursell of Michigan and Chalmers Wylie of Ohio, despite substantial contrary pressure (a week before the vote one of these members picked up a suit at his cleaners, and found a note opposing the bill pinned to its lapel).

LACK OF DEMOCRATIC PARTY COHESION

The Republicans made the consumer bill a partisan issue, as peer pressure led House Republicans to vote 11 to 1 against. Yet fully 101 Democrats voted no. In the freshman Democratic class of 1975, twenty-five voted yes and twenty-four voted no. Many in the Democratic opposition, of course, were the Dixiecrats and far West Representatives who often join with Republicans to oppose reform measures. But added to these blocs were a couple of dozen moderates (even four Democratic *co-sponsors* of the bill—Representatives Rose, Volkmer, Steed and Neal) who made the margin of difference. Whatever the cause—a devolution of the powers of the Speaker, an antipathy to Rayburn-like arm-twisting or Johnsonian log-rolling, the decline of Democratic Party funds for candidates, the non-coattails of President Carter—this lack of solidarity consternated Tip O'Neill. He had worked intensely and passionately on behalf of the bill. On the House floor just before the vote, he bellowed out his support in tones recalling Norris and Kefauver: "Never mind the commitment that you may have made to a businessman along the line. You have only one commitment, and that commitment is to the public . . . the consumer."

Having thus committed his prestige, the defeat was especially wounding to O'Neill. At a raucous meeting of Democratic Whips the next day, he thundered that Democratic Congressmen couldn't reap the benefits of their party association, and then vote Republican—especially when the Republicans had made this a partisan issue. To do so would lead to collective calamity in November. Others in attendance complained that President Carter's half dozen phone calls the day before the expected vote was an underwhelming effort. There was widespread resentment that they had fought harder for the administration's bill than had the President.

BUSINESS MONEY INSTEAD OF PARTY LOYALTY

Replacing the benefits of party cohesion and Presidential coattails of yesterday is the promise of business contributions today. One of the "reforms" of recent years permitted corporations to raise money for candidates. Last year, for the first time ever, corporate contributions through "political action committees" (which do not include the millions given by individual executives) exceeded labor contributions $987,000 to $844,000. Many Democrats can now ignore the exhortations of a Speaker or President because they have independent access to the kind of money needed for re-election.

One California Democrat in a meeting with consumer advocates half-joked that he might vote for the consumer bill if their groups could throw him the $100,000 fund-raiser" he might sacrifice by doing so. Two swing House members candidly told labor lobbyists that they had recently and for the first time raised $20,000 to $40,000 from small business groups, who had been instructed by the Chamber to be opposed. One Representative was told by his campaign finance chairman that their major contributors were opposed to the bill—at which point, to his credit, the Congressman fired his finance chairman. One Florida Representative told Ralph Nader that he had no objections to the bill, but added, "I'm afraid that the Chamber will run a candidate against me in the primary."

Large business interests, it must be emphasized, do not crassly announce that money will or won't be forthcoming, depending on how a Representative votes. They don't have to. But this system of corporate funding of campaigns, rather than public funding, results in business interests shaping legislation by the mere weight of their wealth.

REVERSAL BY THE WASHINGTON POST

After endorsing a consumer advocacy office several times in the past, The Washington Post stunned both business and consumer advocates by editorially opposing the bill the day the voting began. The reasons offered were embarrassingly muddled: the editorial talked about how consumer-oriented had been Carter's appointments (as though having a Brandeis on the bench would mean a defense counsel was no longer needed) and it managed to deprecate the need for consumer representation in genuine adversary proceedings as "another pile of briefs on commissioners' desks." But for those Representatives who needed a plausible reason beyond the "big government" slogan to oppose the bill, the respectable Post provided the perfect fig leaf.

Interestingly, the day after the bill's defeat, a front-page Post headline repeated the charge that Ralph Nader had defeated the bill—not the business lobby against it, not the previous supporters who abandoned the bill, not its own editorial. The theory was that Nader's pressure on wavering members had antagonized them into voting no. A few members tried to use Nader as an alibi for their anti-consumer vote, which is a comment on their own independence and integrity. If the U.S. Chamber goes into districts, Nader obviously will do so as well. It is a useful way to give members of Congress a conscience—in H. L. Mencken's definition of conscience as "the inner voice which warns us that someone may be looking." Or as Admiral Hyman Rickover said of some members' criticism of Nader on this bill, "They never complain when business tries to buy them, only when someone stands up for the people."

POOR TIMING

The vote on the consumer agency was originally to have been taken last November, at the very end of the first session of the 95th Congress. But a good-faith disagreement occurred between Esther Peterson, the President's Consumer Adviser, and consumer groups on the one hand, and the House leadership and Frank Moore's White House Lobbying Office on the other. The former thought that if the votes were ever going to

[1] A study of the Roundtable released by Congress Watch shortly before the House vote documented that 58 percent of the 157 members of this group had in the past five years either admitted to an illegal or improper payment, been named in an antitrust case by the Antitrust Division or been named in a Federal Trade Commission complaint.

be there, it would be in November—due to the favorable momentum generated by the nationwide grassroots "nickel campaign" for the bill and by a compromise version that had corralled fourteen new votes. The latter thought the votes weren't there. And, especially, the delay was due to the Speaker's and the President's preoccupation with other matters at the end of a hectic session. The bill was pulled from the House calendar.

Anybody can speculate as to what might have happened in November, but at least this much is known: in the week before the originally scheduled vote, Representatives Rose, Neal, Steed, Volkmer, English, Pressler, Cavanaugh, Cornwell, Fish and Gammage all indicated they would vote for the bill; also Representatives Koch and Badillo were then still in Congress. By February, none of these Congressmen voted in favor. Supporters of the bill allowed business interests three months to build up pressure against wavering members—and they did.

The bill's demise is instructive to the consumer, Congressional and business communities. Consumer groups must reconcile two divergent facts. On the one hand, Louis Harris calls consumerism the most broadly supported movement he has ever studied; his surveys document a 55 to 28 percent public endorsement for the consumer advocacy bill. Yet it lost. The goal for consumer groups, therefore, is to convert broad popular support into legislative punch. The problem is how to organize millions of unwealthy, scattered supporters so that they may prevail against a minority of wealthy, focused interests.

Two obvious approaches include local organizing and public finance reform. "You win or lose in the districts, not in Washington," said freshman Rep. Donald Pease to two supporters of the bill. Consumer organizations will have to organize better at the neighborhood level so that on future votes people will hear from interested indigenous consumer groups and not merely from local Chamber voices. In addition, until some version of public funding of public elections cuts the cord between business giving and members voting, citizen interests will forever compete at a disadvantage in the political marketplace. Nothing succeeds like failure, and if the defeat of H.R. 9718 leads to these two results, it may yet prove an inadvertent blessing.

This case study demonstrates why our elected officials should have the courage and skill to try to educate their districts about the costs and benefits of government programs, rather than merely surrender to purchased prejudice. Congress allows slogans to paralyze its effectiveness when it snaps to attention on hearing the phrase "big government." You know, these bureaucrats aren't people that fell from Mars," commented Hubert Humphrey in a 1975 debate with Ronald Reagan; "they are the sons and daughters of people that we think of rather highly." It should not prove impossible to argue that government can work to improve people's lives—that the Civil Rights Acts give blacks legal equality, and the South hundreds of black officials; that the Auto Safety Act saves an estimated 12,000 lives a year; that the Food and Drug Administration prevented the sale of thalidomide in the early 1960s; that public financing for the past Presidential election succeeded in keeping much tainted money away from our highest office.

Finally, as for the big business groups, this bill may prove that nothing fails like success. When the vote tally pushed beyond 218 on February 8, business lobbyists in the House galleries burst into applause and much backclapping. But one wonders whether big business should cheer when large companies received a 16 percent favor able rating in a recent Harris poll. In a survey conducted for the House Ethics Committee, eleven organizations were rated according to the public's perception of their ethics. Consumer "action groups" rated first and "large companies" tenth.

Big business lobbies have handed candidates an issue for next November. It is, "Who owns your government—the people or big business?" It is, "Why can't the President get energy reform, tax reform, consumer reform? Because big business won't let him." Ultimately, business lobbyists cannot continue to oppose all attempts to reform government and society. "What counts now is not just what we are against," said Adlai Stevenson in 1952, "but what we are for." Since corporate illegality, consumer fraud, and one-sided agency proceedings continue, it is now time for business to do more than veto change. What is their consumer program—for without one they will continue to deserve the obloquy they earn. "Those who want it all," said Jack Brooks, chairman of the House committee that reported out the consumer bill, "will lose it all."●

FLEET RESERVE ASSOCIATION'S WHITE HATS' PAY PANEL

HON. BOB WILSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 22, 1978

● Mr. BOB WILSON. Mr. Speaker, I had the distinct pleasure last summer of participating in the Fleet Reserve Association's White Hats' Pay Panel. This panel held exhaustive all-day hearings around the country, taking testimony from 164 active duty witnesses.

As Congress embarks on a thorough review of military pay, benefits, and retirement, once the report of the President's Commission on Military Compensation is formally submitted, I commend to my colleagues' attention the excellent summation of the findings of the White Hats' Panel, "Sound Off to Congress." I would like to take this opportunity to share with other House Members the observations of one panel member, Mr. John R. Blanford, whom many of you will remember well as Russ, the distinguished former chief counsel of the House Armed Services Committee. Russ' remarks appear in the April issue of Naval Affairs:

COMMENTS OF THE PANELISTS ON THE TESTIMONY RECEIVED

(By John R. Blandford)

As a result of participating in the extensive hearings conducted by the Fleet Reserve Association, I am convinced that many of our enlisted men in the armed forces have lost faith in their leaders. The people who testified before the White Hats' Pay Panel almost unanimously expressed concern for their future prospects, should they remain on active duty. Rightly or wrongly, they feel that many of their benefits have been eliminated, or have been or will be seriously reduced. They point the finger at Congress and the White House.

Surprisingly, there was relatively little complaint about the present pay system, except that nothing irritates a member of the armed services more than to tell him his pay is comparable with his civilian counterpart. The witnesses say you cannot compare a 50-, 60- or 70-hour work week at a naval base or on board ship with a 40-hour week in the civilian community. And, they are right!

There were complaints about long family separations; inadequate housing; and statements by public officials that service pay is quite high—when an estimated value is placed on "tax advantages," commissaries, post exchanges, free medical care, non-contributory retirement, golf courses, swimming pools, nurseries, and even tombstones. This type of pay analysis is not only misleading, but never applies—in its total—to any one service member.

The primary concern of the members of the armed forces, who were interviewed, seems to be "What will they take away from me next?" If the 20-year retirement privilege for enlisted personnel is taken away, a substantial number of our petty officers will not reenlist. That is a foregone conclusion. The loss of leadership will be staggering, and its effect upon our national security could be devastating.

The witnesses expressed grave concern about medical care, particularly since they were assured, when recruited, that they and their dependents would be given medical care while on active duty and after retirement. They know that in some cases medical care is very inadequate and in some cases, especially for retirees, there is no care available.

They recognize and understand that the long waits for appointments are the results of an insufficient number of medical personnel to provide for their needs. And almost all the witnesses said that when they received medical care, it ranged from good to outstanding, but sometimes they were not able to get an appointment or they or their dependents had to spend hours waiting at a dispensary or an outpatient clinic. They had great praise for the Family Practice Plan, but, of course, there are very few of these plans in operation. Some even suggested that military personnel would be better off with an insurance program.

Their reaction to the "Up or Out" promotion system was split almost 50–50. Some liked it—others did not.

Many of the junior enlisted men feel that it is unfair to penalize married men, who are E–3's and below (or E–4's with under two years of service) insofar as moving household effects and dependents is concerned.

The question of equal pay and allowances for married and unmarried personnel was raised by many. The vast majority feel that there should be no advantage to take home pay just because the service member is married.

Sea pay—to most men—is a joke.

Many of our enlisted personnel, like many civilians, simply don't understand the Social Security System.

It is obvious that a far better job must be done in keeping our service people informed. Too many people in uniform form their opinions based upon rumor.

The President's Pay Panel and the Congress would be wise to consider seriously the report of the White Hats' Pay Panel, for it is most certainly representative of the views of a vast majority of the men and women now serving in our armed forces.

If changes are made in the retirement system, they must be prospective and not applicable to those now serving on active duty. It is true that we have an energy problem in this country and many other problems including unemployment and inflation, but all of these problems will fade into insignificance if the President's Pay Panel ever make recommendations that are interpreted by the men and women as inimical to their present status and their future benefits.

Some of the solutions may be costly but this nation faces a possible catastrophe if it is not willing to meet the challenge of providing adequately for people throughout the world who are defending this nation.●

INTERDEPENDENCE AND THE LAW OF THE SEA: CAN WE MAKE A PLANETARY BARGAIN?

HON. DONALD M. FRASER

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 22, 1978

● Mr. FRASER. Mr. Speaker, The seventh session of the third U.N. Conference on the Law of the Sea opens in Geneva on March 28 and a number of us have high hopes that the negotiators can reach agreement on a comprehensive international treaty on the Law of the Sea at this session. If they can, the concerned states of this increasingly interdependent world will have taken a large step in the direction of striking a planetary bargain. On the eve of this session, we would do well to put this session of the conference in context to gain some perspective on the meaning of these negotiations. To this end, I would first like to refer to the recent two-part article by John J. Fialka on the upcoming Geneva session which appeared in the Washington Star. In the first part, "Stakes Are Immense in Talks on Law of the Sea"—March 12—Mr. Fialka contends that sovereign nation states of the world have immense stakes in the minerals of the deep seabed beyond national jurisdiction and in the proposed comprehensive Treaty on the Law of the Sea. He then describes some of the problems that developed and developing states face in negotiating the proposed seabed authority, and contrasts views of the authority expressed by two important representatives, Mr. Paul Engo, of the Cameroons, Chairman of Committee I, and Ambassador Elliot Richardson, Special U.S. Representative to the Conference. In his second article, "U.S. Holds Bad Hand in Sea Resources Poker"—March 13—he outlines the difficulties in translating the principle of the common heritage into practical arrangements acceptable to the Conference. Committee I Chairman Engo, Fialko reports, complains that the United States and other major powers want a veto over any decision the authority might make and that they are in too much of a hurry to explore the minerals of the seabed. In Engo's view, "It is impossible to convince anyone of the merits of a complete veto by one state."

Enactment of domestic legislation on deep seabed mining by the House, thought to be an "ace in the hole" at the bargaining table, has run aground, depriving Richardson of a stronger hand on his way to Geneva where he will encounter Engo who feels that "the concept of the common heritage will eventually bully man into cooperating for the common good."

High stakes, political rhetoric, and knotty problems confront the negotiators on the eve of the seventh session, and temper our expectations for the success of the Geneva session this spring. There is, however, another important perspective on the upcoming negotiations, that we must constantly keep in mind: the place these negotiations have in making a planetary bargain and constructing a viable world order for an increasingly interdependent planet in the last quarter of the 20th century.

There can be little doubt that we live in an increasingly interdependent world in which relations among states and their peoples are inescapably interrelated—technologically, ecologically, economically, and politically.

Interdependence is a fact of our existence on this planet of some 150 sovereign states, 4 billion people, limited resources, and few unexplored frontiers. We Americans as well as a lot of other people in the world find it uncomfortable to live with the facts of interdependence. The Third World states, the so-called group of 77 (actually well over 100 states now) see interdependence as a vehicle by which multinational corporations and rich states seek to enslave them into "dependencia." The United States, after almost 125 years of isolation from European states, still sometimes finds it difficult to comprehend the complex web of relations that involves it with other states, and the fact that it is a member of an international community where no one state calls all of the shots all of the time.

Interdependence manifests itself in several important ways. First, complex transitional relations have helped generate an awareness among concerned states and groups that creative solutions to global problems must be found. The agenda, according to a recent study by the Aspen Institute for Humanistic Studies, "The Third Try at World Order: U.S. Policy in an Interdependent World (1977)" includes: creating a food reserve, assuring energy supplies, depressing fertility rates, stabilizing commodity markets, protecting the global environment, managing the oceans and its seabed, rewriting the rules of trade and investment, reforming the monetary system, mediating disputes, controlling conflict in a world of proliferating weapons, keeping the peace when it is threatened and restoring it when it is broken. Finding solutions to these problems requires that concerned states and their peoples—both developed and developing, haves and have nots, engage continuously in parallel negotiations about strategically related but tactically separable matters. But, there must also be a shared sense that bargains can be made, that, to quote from the Aspen Institute study, a political consensus can be reached "by the widespread realization that peoples of every race and nation are in a dangerous passage together in a world of finite resources, ultimate weapons and unmet requirements. It is the complex of principles, strategies, and institutional changes necessary to get it all together and serve human needs that we call the Planetary Bargain."

Second, solutions to these problems require multilateral consultation. In an increasingly interdependent world, the role of international institutions and multilateral diplomacy thus acquires increased significance. Within the United Nations and its agencies and through the multilateral consultations they facilitate, representatives of states and groups of associations can find ways to harmonize and coordinate their actions to solve problems on the global agenda I just enumerated. Let me emphasize here the important notion, harmonize. The United Nations is not a world government with the power to enforce rules it makes or to tax states and their citizens. It is an organization of sovereign states that have formally agreed to consult with each other and coordinate their actions. Members have authority to recommend collective action but it is up to individual sovereign states to enforce international decisions they collectively agree to.

Despite these limitations, the United Nations has been a major contributor to international law on a range of subjects, including diplomatic privileges and immunities, human rights, and the law of the sea.

And the United Nations has made remarkable progress, I think, even though it has never been insulated from the forces of world politics. The membership crisis in the United Nations in the mid-1950's and the financial crisis of the 1960's both reflected the deeper conflicts between the Soviets and the Americans in the cold war. Today discord between developed North and developing South dominates global politics and permeates the debates of the United Nations and its agencies. This and the forms it takes cannot be wished away; but we can do something about it. We can help create the environment necessary for striking a bargain on those problems that produce this conflict, and seek to reach consensus on their solution. This will take time, a great deal of patience, and extended consultation in many international fora on the full range of problems on the global agenda. The result could be a more durable, liveable, and saner world.

What relevance do these points about interdependence have for the long view on the Law of the Sea Conference? Simply this, I think. The U.N. Law of the Sea Conference reflects the fact and characteristics of interdependence. This, the largest diplomatic conference in the world's history, offers the best hope we have for solving one of the most important problems on the global agenda—the management of 70 percent of the Earth's surface and the multiple uses of ocean space. If we can solve this problem, we will have taken a big step in the direction of promoting the planetary bargain and in creating the atmosphere for subsequent bargaining.

Other characteristics of the interdependent world we live in are reflected in the Conference. The Conference's attention to the protection of the marine environment reflects the importance of our ecological interdependence with the world ocean. The ocean is, after all, a major source of our supply of protein, and the planet's oxygen. Scientific and technological interdependencies among

states have enabled us in cooperation with others to advance knowledge of the world ocean as well as to develop new uses of ocean space. These developments have overtaken the existing law of the sea and made it necessary to rewrite the rules governing ocean space. Political and economic interdependencies have also been apparent during the Conference. The industrial North consumes the lion's share of raw materials produced by the developing nations but must depend upon the group of 77 which represents most of the developing nations at the Conference, to help build consensus on an international agreement. Negotiations have also spawned numerous crisscrossing interests between maritime and nonmaritime states, coastal and geographically disadvantaged, developed, less developed, and the least of the developing states.

It is remarkable that the Conference opened in 1973 not with a draft treaty on the negotiating table, but an outline of issues to be discussed, and that in five subsequent sessions or the equivalent of less than 1 year, representatives of 150 states have been able to harmonize diverging views on over 400 provisions dealing with the details of the breadth of the territorial seas, the legal status of the proposed 200-mile economic resource zone, the rights of transit through international straits, the status of the continental shelf, the conservation of living resources, the freedom of scientific research, the protection of the marine environment and the settlement of disputes. Negotiators are well on their way to reaching consensus; indeed they are 90 percent of the way to the goal of reaching a comprehensive agreement. The knotty problem of resolving several particular issues of the proposed deep seabed authority remains, however. Let us remember that even here the negotiators have come a long way since the Caracas session in 1974 in reducing the ideological conflict between north and south. Last year's session produced an informal composite negotiating text (ICNT) whose provisions on the proposed seabed authority Ambassador Richardson pronounced unacceptable to the United States on procedural and substantive grounds. Since then intersessional meetings on some of the issues of the authority have taken place, and, hopefully, these will contribute to consensus on a comprehensive treaty in Geneva this spring. Meanwhile, rumors of doom and gloom abound, and pessimism is in high fashion. Ambassador Richardson considers that there's a one-in-three chance to obtain agreement on the authority. Others say the odds are one in five. Can the bargain be struck? Can we find a creative solution to this issue and put the keystone of the agreement in place? A lot may depend on it; for instance, the shape of the world to come.

The articles follow:

[From the Washington Star, Mar. 12, 1978]

STAKES ARE IMMENSE IN TALKS ON LAW OF SEA

(By John J. Fialka)

It has been 10 years since an obscure foreign diplomat, a former ambassador to the United Nations from the island of Malta, Dr. Arvid Pardo, introduced a resolution in the U.N. General Assembly advocating that the vast, unknown resources of the world's deep seabeds should be developed as the "common heritage of mankind."

The resolution was passed, but like many thinks that happen at the world body, it was largely ignored. Only recently have the world's industrialized nations, led by the United States, come to realize that what Pardo did was light a time bomb, one with a long fuse, one that could very well explode at the seventh session of the Law of the Sea Conference which starts in two weeks in Geneva.

The stakes in the emerging battle over just what the "common heritage" philosophy means are truly stupendous. They comprise the minerals that lay on or under half the world's surface: the wealth of the ocean floors that are beyond the territorial claims of any country.

Since only about 3 percent of this land mass has ever been explored, we have only a few hints of the value of what is there. The oil reserves alone are estimated in trillions of dollars. Estimates of the value of crystalline deposits of such strategically important metals as manganese, nickel and cobalt go into the hundreds of billions.

Also at stake is a comprehensive treaty that amounts to the first body of law covering the high seas. Although recent Law of the Sea conferences have been criticized as boring talkathons, much work has been done. According to various estimates, there is now agreement on roughly 90 percent of the substantive issues.

There is, as one diplomat put it, "much blood on the text" of the treaty. As it now stands it represents years of give and take, some of it extremely difficult for the United States which has had to fight an increasingly uphill battle against a large group of developing nations, collectively known as the "Group of 77."

The time bomb that could explode all of this is a section, now embedded in the negotiated text, that grew out of Pardo's concept of "common heritage." It is the outline of a new institution, unique in the history of the world, called the "International Seabed Authority."

As it stands, its function would be to bargain with multinational corporations, granting them license to explore, mine or drill on assurances that they will share their technology, reveneus and knowledge of the mineral riches of the ocean floor with the developing countries of the world.

The authority would be controlled by 150 nations, each one of which would have one vote. In practice that means that the real power would be in the hands of the developing nations, the so-called Third World, which has come to dominate the debate of the U.N. General Assembly through sheer weight of numbers.

A U.S. company dealing with the authority would have to pick two ocean sites that it intended to explore. Later the authority would pick one of them for itself. An arm of the authority called "The Enterprise" would acquire technology from the company at a price that the authority will set. The Enterprise will then have the option to exploit the area itself, earmarking the returns for the needs of the developing nations of the world.

The current shape of the authority, its powers and the momentous precedent it will set, is regarded as a problem of awesome proportions by the policy makers who worked to hammer the agreement together over the years. Lee Retiner, a Washington lawyer who was formerly one of the chief U.S. negotiators at Law of the Sea conferences, put it this way:

"You are dealing with one of the great economic policy decisions to be made in this part of the 20th century."

Ambassador Elliot L. Richardson, the current leader of the U.S. Law of the Sea delegation, has called the proposal "fundamentally unacceptable" and has stated that the United States might be prepared to abandon the entire treaty and go it alone unless the powers of the authority are substantially curbed.

Richardson and many of the other industrial nation delegates to the conference are more comfortable with the old concept, "The Law of the High Seas," which meant, in effect, first come, first served. They had hoped for an authority that would be more like a regulatory agency, one that would merely issue licenses and extract a small royalty from enterprising private corporations.

But for the last two years the power at the conference has been running against them, much of it manipulated by one man, a clever London-educated lawyer named Paul Bamala Engo, representative from the United Republic of Cameroon, a tiny nation (pop. 6.5 million) on the west coast of Africa.

While the United States has been sending a new ambassador to the Law of the Sea conferences every other year, Engo, a former judge, has been there since the beginning.

On the surface the conferences are large U.N.-style debates, involving 150 delegates seated in the same room, facing each other behind the nameplate of their nation. Underneath, however, there is a network of secret levers and pulleys which makes things happen: secret meetings by small "informal negotiating groups" which tend to write much of the script for the seemingly spontaneous debates that later occur on the floor.

U.S. ambassadors have become skilled at manipulating this machinery, but none of them has ever quite reached the virtuosity of Engo, who has emerged in recent months as a power to be reckoned with. As the leader of the Group of 77, he is the authority behind the authority.

Engo, who was recently interviewed at the U.N., explained that when the concept of the "common heritage" first came up, "the young countries were frightened because of their lack of knowledge."

Few of them had ever thought seriously about the resources under the sea, but Engo was more than willing to learn. Soon, he explained, "we begin to see there was a lot more to this than meets the eye."

When the Law of the Sea Conference was formed, the major powers decided that an African had to head the so-called "First Committee," which would deal with the seabeds issue. Engo, now 46, was picked because he was a bridge between two hemispheres.

Bearded, with a fondness for wearing bright dashikis, Engo spoke the legal language of the more industrialized Northern Hemisphere. He also assiduously cultivated a power base among African and South American diplomats.

Students of international relations have talked for years about the so-called "North-South split," the growing tensions over distribution of food, energy and other resources between the industrialized nations of the north and the predominantly developing nations of the south.

Engo soon found himself standing in the middle of the split. Some American diplomats have called him a "rabble rouser" because of his eloquent, impassioned defenses of the Third World cause. Others are more cautious in their appraisal of Engo.

"Engo is politically astute in the sensory sense of the word," explained one of them "He has instincts and they are politically sound. What he did to the U.S. during the last conference was very shrewd."

The current dispute over the powers of the authority first took shape in New York during the conference's session in the spring

of 1976. Engo, as chairman of the First Committee, was in charge of preparing the texts to be negotiated and he had already stimulated considerable thought by drawing up plans for an authority and an enterprise that would have total control over ocean mining.

As Engo explains it:

"Then we had a situation where the big boys, the Soviet Union and the U.S., said, 'We have the technology and we don't want to be part of this. . . . We want to feel that we are entitled to go ahead and explore. Exploitation should be done by states, not by new organizations.'

"The debate went backwards and forwards until we began to accept the fact that both states and The Enterprise on behalf of mankind as a whole will exploit. . . . The problem right now is what are the modalities of that?"

For a while during the 1976 conference it appeared that the United States, working behind the scenes, was going to iron out "the modalities" so that there would be an acceptable parallel system. The authority would license private companies as well as operate The Enterprise.

Then the behind-the-scenes system of compromise at the conference suffered a breakdown. An "informal group" of negotiators, which tended to be dominated by the United States and other major industrial powers, had been meeting early in the morning, preparing texts and planning the debates over them that would happen later that day during the formal meeting of the First Committee.

Engo, who worked closely with the group, would later release the texts, as though he had prepared them, and preside over the debates during the formal committee meetings. The breakdown came when former U.S. Secretary of the Treasury William Simon balked at one point of the proposed agreement, a quota arrangement which would limit the amount of ocean minerals produced during the first years of operations.

The result, according to Retiner, who handled negotiations in the informal group for the United States, was "a jam up. No more texts went up to the floor." After weeks of negotiations with Simon, the logjam broke and Engo suddenly released a flood of textual changes.

Developing nations which were not in the informal group, led by Algeria, began to complain that somebody was trying to railroad the treaty through secret maneuvering.

"Everyone sort of knew the secret negotiations" were going on, but they did not like to be told about it," explained Retiner. "You can't rub their nose in it."

The developing nations were angry. They were angry at the United States. They were angry at Engo. They were angry at Henry Kissinger, who began building up pressure for a quick compromise that would produce a breakthrough in the Law of the Sea conference during the summer of 1976, a development that would not have hurt President Gerald R. Ford's campaign for the presidency.

Kissinger arrived at the New York conference and personally offered a series of compromises that have haunted the U.S. delegation ever since. During a round of whirlwind visits with delegates and a press conference, Kissinger promised that the United States would share newly developed ocean mining technology with the authority in order to gain access to the deep ocean beds.

Engo is still not sure what Kissinger promised because Kissinger announced it at a press conference.

"We were not able to get all the details. He said he will guarantee that the authority will be able to get through the first project. We didn't know what he meant by that. Was it financing for The Enterprise, or financing and technology?"

At any rate, Kissinger's "breakthrough" never happened. Many members of the Group of 77 were confused by the events of the 1976 conference. They also realized that there was a good chance that a new American president might be even more friendly to the cause of the Third World.

So they waited until the 1977 session of the conference opened and Richardson, fresh from the departments of State, Defense, Justice, the Court of St. James's and the Department of Commerce, arrived as the next U.S. Law of the Sea ambassador.

Right away he could see there was trouble. The U.S. industries which were joining in four major international consortiums to begin mining for manganese nodules were apoplectic about Kissinger's compromise offer.

Their chief defender in Congress, Rep. John M. Murphy of New York, chairman of the House Merchant Marine and Fisheries Committee, was going around saying that Kissinger had taken an "incredible" position that would "bargain away many vital interests" of the United States in order to complete the treaty.

Meanwhile the developing countries were waiting for further compromises. Engo, smarting from his problems during the last session, was working to rebuild his power base among the Third World diplomats.

Richardson seized the initiative by working out an "informal arrangement" that would replace Engo with Sven Evensen, minister for the law of the sea for Norway, as leader of the "informal negotiating group."

In theory, at least, Evensen then became the controller of the text, and a number of compromises were worked out in "informal discussions" that would have transferred mining technology from multinational mining corporations to The Enterprise through a process over which the industrial nations would retain some control.

In fact, however, Engo had retained his title as chairman of the First Committee and was preparing his own version of the text, as Richardson later complained, "working in secret with advice from a handful of individuals."

As Engo later recalled the events of the 1977 conference: "I am told Mr. Evensen set up his own little think tank. It is possible Ambassador Richardson may have thought that this group was representative and they may have agreed on certain things and thought that that text was an agreed text. Nobody agreed to it except those who were there."

And so the Engo text—with an all-powerful authority in it—emerged two days after the conference ended as the official text of the First Committee.

Two days after that Richardson, in high dudgeon, held a press conference in which he complained that the Engo text "cannot be viewed as a responsible substantive contribution to further negotiation."

Richardson charged that there was a "lack of fair and open processes" at the conference.

Asked about the press conference, Engo states, "I deeply regret that he took it upon himself to attack me personally because there was no procedure that was not approved by the conference."

Still, both men are diplomats and the Law of the Sea Conference, like show business, must go on. Asked whether he bears any personal animosity toward Richardson, Engo smiled and then said:

"He has a wonderful enthusiasm. It is the same enthusiasm that the rest of us had 10 years ago."

U.S. Holds Bad Hand in Sea Resources Poker

On March 28, when the seventh session of the United Nations Conference on Law of the Sea opens in Geneva, a complicated game of poker, played for extremely high stakes, will resume.

The problem is that at the moment one of the principal players in the game, U.S. Ambassador Elliot L. Richardson, is not holding very good cards.

His initial intention was to confront a powerful group of developing nations, the "Group of 77," with the notion that if there is no acceptable international organization to govern the mining of the riches in the world's deep seabeds, the United States has the power, the finances, the technology, and the help from fellow industrialized nations to go it alone, treaty or no treaty.

According to the game plan, Congress was supposed to back him with a bill that would give the U.S. partners in four international mining consortiums the authority to begin exploration and mining operations, providing that they paid a small percentage of their profits into an escrow account for the world's developing nations. The money in the account would be paid to an international seabed development organization if and when the Law of the Sea Conference agrees on a treaty creating it.

Last week, however, efforts to get the bill passed before the Geneva session began blew up as the result of an elaborate series of disagreements between Richardson and four House committees over how the mechanics of the bill should work. According to an aide to Rep. John M. Murphy, chairman of the House Merchant Marine and Fisheries Committee, efforts to pass the bill will now be suspended for one month.

Nearly everyone agreed that the United States must make some gesture to comply with a notion that is running very strong among Law of the Sea delegates, the notion that some of the riches mined from the depths of the sea should be used to aid the world's developing nations.

The idea stems from a U.N. resolution offered 10 years ago by Dr. Arvid Pardo, former Ambassador to the United Nations from the island of Malta. Pardo maintained that the fruits of the development of the deep sea beds, the remaining unclaimed areas that cover 50 percent of the earth's surface, represented the "common heritage of mankind" and should be developed as such.

But just how strong the gesture should be or what form it should take is one of the problems that Congress, Richardson and the U.S. mining industry can't seem to agree upon. Also unsettled is the problem of whether Congress could or should indemnify a U.S. mining company against possible adverse future rulings made by an international body which decides the gesture isn't enough.

The Group of 77, which includes sea powers like India and Indonesia along with most of Africa and South America, have created an institution around the "common heritage" idea. It is called the International Seabed Authority and it would issue licenses to companies interested in ocean mining.

The way the authority is now described in the text that the Geneva session will work from, it will have a policy-making assembly in which each of 150 nations would have one vote. The assembly would have the right to demand that a private mining corporation exchange technology for the right to mine. The assembly would be able to determine royalties and to set the "fair price" for the value of the exchanged technology.

The assembly would also control a separate international entity, the Enterprise, which would mine part of the ocean land prospected by the private company. Enterprise profits would be earmarked as aid for developing nations. After 20 years, there is the possibility that the Seabed Authority would take over all ocean mining projects.

In the concept of the authority, the Group of 77 has pushed the "common heritage"

principle very far—so far, in fact, that even Pardo has disowned the proposal as being "quite simply, not viable."

But that is no help for Richardson now. Through a series of mishaps during the 1976 and 1977 conferences, the proposal for an all-powerful authority has found its way into the official negotiating text.

Meanwhile, the leaders of the four ocean mining consortiums — Kennecott Copper, U.S. Steel, Lockheed and International Nickel Co., the U.S. subsidiary of a Canadian company—have told Richardson and Congress that there is no way that they would even discuss trading their mining technology to an international body for access to the deep sea beds.

"We have just invented technology that nobody has ever seen on the face of the earth and already people want to see us give it away." asserts Lee Retiner, attorney for Kennecott and a former negotiator for the United States at the Law of the Sea conference.

The object of the initial interest in ocean mining are nodules containing deposits of nickel, cobalt, copper and manganese that are found on the ocean floor. They grow there, forming like crystals through a process that is only dimly understood.

They represent vast new deposits of relatively scarce metals which are essential to industrial nations. Cobalt, for example, has strategic importance for the United States because it is used in high temperature alloys and tool steels. At the moment, 98 percent of our supply has to be imported, most of it coming from Zaire.

The nodules are there for the taking, that is if anyone can figure out how to take them from the ocean bottoms where we know they exist, in water between 10,000 and 18,000 feet deep. The depth means the mining processes are going to be very expensive.

According to Retiner, each mining consortium is prepared to put up as much as $700 million in capital to begin prospecting operations by 1983, providing it can convince the banks that ocean mining is a "bankable proposition."

Retiner feels that if a company's rights are left up to the whim of a majority of a group of 150 nations, the risks may be too high. This prospect also bothers Richardson.

As he asserted in a recent speech "The assembly would be founded on what is at best an anomalous principle — one nation, one vote—which bears no rational relationship either to the principles of democracy or to the distribution of power, values and interests. . . .

"To allow resources constituting the common heritage of mankind to be disposed of by a nose-count of nations would be a bad precedent for the international institution-building of the future."

On the other hand, Richardson is convinced that the mining companies will eventually have to retreat some from their position that "the law of the high seas," should govern, meaning that the first person who takes the nodules owns them.

Richardson has been searching for some common ground. "We maintain that the concept of common heritage is not inconsistent with our exercise of the high seas rights to retrieve manganese nodules," he explained to a reporter. "Many countries dispute this. That issue is not important so long as we are jointly pursuing an effort to form an international body."

One way to do it would be to bargain for a "grandfather clause," that would allow Kennecott and the other companies that are preparing to mine to go ahead, without waiting for the licenses that an international regime would impose later.

As one lawyer, a veteran of past Law of the Sea conferences, suggested, "that would be damn hard to get."

Dr. Paul Bamala Engo, ambassador to the Law of the Sea Conference from the United Republic of Camaroon, and the leader of the Group of 77, agrees.

"What is the hurry? The companies won't be able to begin to mine until 1985 anyway. What is the hurry? You think about that one," he told a reporter.

The United States and other major powers, Engo complains, seem to want a "veto" over any decision the Authority might make. "With the U.N. experience, it is becoming impossible to convince anyone of the merits of a complete veto by one state."

After 10 years participating at various Law of the Sea conferences, Engo admits that he is tired and that he would like to go home to his family, but he feels that the concept of the "common heritage" will eventually "bully man into cooperating one with the other for the common good."

Engo feels that what is being offered is an even trade. "You need the nickel? We give you access to the nickel. In return, we get money for my country which needs the finances to build roads."

"I think this is revolutionary," adds Engo. "You've never had a situation in which you are trying to reconcile the interests of all parties, great and small. It is our last chance to pull it all together, the energy, the technology, the human resources.

"One looks out into the ocean and he can see the ocean pointing its finger at him and saying 'I am the last hope for you. Use me for the benefit of all of you, or you will perish in the chaos that you've already created.'" ●

VOICE OF DEMOCRACY SCHOLARSHIP PROGRAM

HON. WILLIAM C. WAMPLER

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 22, 1978

● Mr. WAMPLER. Mr. Speaker, I was very pleased to learn that a student from my district had won the Voice of Democracy Contest for the State of Virginia, Stephen Michael Oliveira, of Dugspur, Va., has captured the essence of democracy and freedom in America.

More than 250,000 secondary school students participated in the contest this year. They were competing for the five national scholarships which are awarded as the top prizes. First prizes is a $10,000 scholarship, second prize is $5,000, third prize is $3,500, fourth prize is $2,500, and the fifth prize is $1,500.

Stephen is 17 years old, and is now a Senior at Carroll County High School. He hopes to attend Emory and Henry College in Emory, Va. and he plans to pursue a career in law.

The following is Stephen's winning entry on the contest theme, "My Responsibility to America":

VOICE OF DEMOCRACY SCHOLARSHIP PROGRAM
VIRGINIA WINNER

(By Stephen Michael Oliveira)

I live in the greatest country in the world. I am free. I may worship as I choose and speak or print whenever and whatever I wish without fear. I live in a country where the citizens cherish their rights to "Life, Liberty and the pursuit of Happiness." This land is blessed with majesty and unparalleled progressive technology. All her people are provided with education and equality in opportunity for success. My country also grants protection from harm to all within her bounds. My country is America. For the life and the freedom that she has given to me, I have a responsibility to her. This is to direct and strengthen her and protect her ideals for all of my life, that her greatness and her freedom shall never perish from the earth.

I, as a responsible citizen, must guide America on a straight course toward betterment. I need to, through my actions as one gear in a massive and great machine, help mold America into more of the ideal our forefathers conceived. This entails a great deal. In the first place, I must choose for governmental positions those with the leadership to strengthen America. Through taking advantage of my privilege to vote, I help elect those candidates I feel would be the hardest working, most honest, and best representative of the people. Secondly, it is my obligation to America to make an expose of corruption and dishonesty, for a nation with corruption stabs a thorn in the flesh of its people and destroys itself Furthermore, I must be well informed and receive the highest and best education within my ability. Through education, I meet my responsibility of dispelling ignorance in America.

I need to always maintain my faith in America in the face of anything from economic struggle to the division of her people. I cannot despair in the light of trouble. I must believe that America will fare every storm to face tomorrow. And, in close connection with this, I shall always support America with my tax dollars and especially with my prayers to God that He might always be with her.

As with helping direct America, I am also responsible to help strengthen and protect her. Through my lifetime, I must see that the ideal of freedom that America stands for never dies. I am responsible for conserving energy and resources, for without these America cannot be strong. I must see that her planes can fly and her ships can sail, that she may have the strength to defend herself and her allies from those who desire power or the destruction of the freedom and equality of men. I must then be prepared and willing to protect my country with my sacred gift of life. America needs the assurance of a safe tomorrow. This truth I cannot deny.

My final and perhaps greatest responsibility to America is to convey to my fellow citizens the sense of pride I have in her. Pride not only for what she is, but more for what she might become. Our democracy was established for growth. The potential for a better America is within her, inherent in her people. What course other Americans shall take I know not, but as for myself, my choice is made. For if I adhere to my responsibility to America, then I can be at peace with myself through whatever course she may take. I alone hold not the total control of the destiny of America, but through being a responsible American, I play a part in it.●

FOOD CRISIS IN LAOS

HON. DANTE B. FASCELL

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 22, 1978

● Mr. FASCELL. Mr. Speaker. I would like to call to the attention of the Members of the House a recent exchange of correspondence with the State Department concerning the agricultural situation in Laos and the impact the projected food shortage there will likely have on refugee needs in the region.

According to the Assistant Secretary

of State for Congressional Relations, starvation or serious food deprivation could occur in certain areas of Laos and more Lao refugees may move into Thailand as a result. As the Congress considers legislation this session to assist Indochinese refugees, I hope it will take into account the additional needs caused by this very unfortunate food crisis in Laos.

The letters follow:

FEBRUARY 17, 1978.

Hon. CYRUS VANCE,
Secretary of State,
Washington, D.C.

DEAR MR. SECRETARY: It has been brought to my attention that many of the Indochinese refugees now residing in Thailand have come from Laotian provinces currently experiencing one of the most serious droughts in Laotian history. Recent reports further indicate that the human misery in Laos may be severe; signs of malnutrition are evident to some observers and there is at least a possibility that there may be loss of human life. According to some judgements, the total estimated Food deficit for 1978 represents roughly 65 per cent of the annual rice needs, at subsistence level, for the people of Laos. The most serious period of food shortage will begin in March of this year.

If these reports are true, the potential famine situation in Laos may have a dramatic impact on United Nations refugees programs funded with United States assistance. More importantly, the human suffering possible poses a very real challenge to traditional American humanitarian concern and the human rights policy of the administration.

To understand more fully what the actual needs in Laos are and how the United States Government can best respond, I respectfully request information from the Department of State in the following areas:

1. What is the extent of Laos anticipated food deficit? When will the most serious effects of food shortages occur?

2. How will these shortages likely affect the population in Laos?

3. What do you anticipate will be the impact on refugee flows into Thailand and the consequent impact on the requirements of the United Nations refugee program?

4. What is the Laotian Government doing?

5. What is the probable response of other potential donors?

6. What should the United States do?

In the past, the United States has received criticism, in some cases deserved, for delay in meeting the challenge of a very real crisis affecting the most basic needs of human beings. To ensure that the United States cannot again be criticized for not taking prompt account of potential human disaster, prompt attention to the situation in Laos seems appropriate at this time.

Your attention to this matter is greatly appreciated.

Sincerely,

DANTE B. FASCELL,

Chairman, Subcommittee on International Operations.

DEPARTMENT OF STATE,
Washington, D.C. March 9, 1978.

Hon. DANTE B. FASCELL,
Chairman, Subcommittee on International Operations, Committee on International Relations, House of Representatives.

DEAR MR. CHAIRMAN: The Secretary has asked me to thank you for your letter of February 17 in which you asked about the present food shortage in Laos and how the United States should respond to this situation.

To answer your specific questions about the food shortage, the Lao Government and the United Nations Development Program office in Vietiane have issued two joint reports on the extent of the food shortage and on a program for emergency drought assistance. The second report, prepared after the 1977 harvest was in, estimated that the Lao would need to import approximately 113,000 tons of food commodities (mainly rice) in 1978 in order to provide a minimal ration of 12 kilograms per person per month to their population.

Although we have no way of verifying independently exact data on production and shortages, all sources reporting from Vientiane, including our own Embassy, have estimated that the Lao will have to import more than 100,000 tons of food staples during 1978. The UNDP/Lao Government estimates are based on surveys of the most-affected Lao provinces and on population and consumption data. Other estimates are based on rough Lao population figures, on observation of the drought, and on data on the amount of foodstuffs Laos needed to import in more normal crop years. The 113,000 tons of foodstuffs which the Lao Government projects it will need to feed its population at a reduced level of consumption represents about ⅙ of the estimated total consumption in 1977.

The Lao Government has stated that it has food stocks from the November, 1977 harvest to last until March, 1978. The next wet season harvest comes in about November so that the imports will be needed to cover shortages from March until November. (Since only some 5 per cent of the rice area is irrigated, rice production depends mainly upon wet season rainfall.

As a result of the food shortages, an increase in malnutrition and disease may be expected among the Lao population. Depending on the success of the Lao Government's appeal for aid and on the outcome of other measures taken to dig irrigation ditches, plant dry season rice, and plant substitute crops (maize, sweet potatoes, etc.), starvation could occur in the most-affected areas of Laos.

You inquired particularly about the effect of a severe food shortage in Laos on refugee flows into Thailand. We have no way of predicting what refugee flows into Thailand will be as they depend on a number of variables. It seems likely, however, that if Lao citizens are faced with starvation or serious food deprivation, more Lao will attempt to cross the border into Thailand.

As noted above, the Lao Government is actively promoting the production of dry season rice and starchy substitute crops. Local administrators are encouraged to organize the population to dig irrigation ditches and do other agricultural labor in addition to their regular work. On the other hand, the social, political and economic upheaval resulting from the Lao Government's efforts to remake their society in the communist mold have also taken their toll of both factory and agricultural production. The Lao have imposed an agricultural tax which apparently operates as a disincentive to surplus production. Nonetheless, it would appear fair to say that, whatever their Government's policies, the Lao would have been faced with a food deficit this year from natural causes.

In response to emergency appeals, the Lao have received commitments of some 50,000 tons of foodstuffs so far. Donors include the World Food Program, UNHCR, UNICEF, the European Economic Community, Sweden, the Netherlands, Australia, Thailand, India, Burma and Caritas and some other voluntary agencies. The USSR and the People's Republic of China may also provide food assistance. (A number of other countries including Japan and West Germany and several communist nations have regular developmental bilateral aid programs with Laos.)

The Lao Government has appealed to a number of countries, including the United States, for emergency food assistance to make up its estimated shortage. The Executive Branch has the Lao request under active consideration. We will, of course, take into account Congressional and public views on this issue. Although we are sympathetic to the Lao request, no decision has yet been reached.

Sincerely,

DOUGLAS J. BENNET, Jr.
Assistant Secretary for Congressional Relations.●

THE DEADLY ANGEL DUST

HON. ROBERT K. DORNAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 22, 1978

● Mr. DORNAN. Mr. Speaker, there is an angel of death descending on the youth of America. It is descending on the young because those who come in contact with it do not live to grow old.

Our children are dying from it at a rate unparalleled since the Vietnam war—and we pay little attention to it. The street drug called phencyclidine (PCP), "Angel Dust," is doing the killing.

I offer the recent Newsweek magazine article on "Angel Dust" for the RECORD and ask the question: When will we stop having meetings in Monterey on this problem and start saving the lives of our children?

The article follows:

THE DEADLY "ANGEL DUST"

A 21-year-old Washington, D.C., man stepped out of his shower, climbed naked down the wall of his second-story apartment and started running to New Jersey. The police stopped him several blocks away.

A young California girl and her fiancé decided to go for a swim. While he was changing, she went into the pool. When her fiancé returned, he found her lying dead at the bottom.

A 17-year-old New Jersey boy and his girlfriend decided to rob a nearby summer home at the seashore. Instead, the youth chose to bludgeon to death the elderly woman who lived in the cottage. He awoke the next morning covered with blood and with no recollection of his brutal act.

These bizarre and tragic events have a common thread: three people were high on the latest—and probably most dangerous—street drug to come along since heroin and LSD. The drug is phencyclidine (PCP), but it is better known to its users by such colorful names as "angel dust," "super weed," "busy bee," "mist," "goon," "crystal," "hog," "tic" and "tac." So pervasive has its use become that the National Institute on Drug Abuse and the Department of Health, Education, and Welfare convened a priority meeting of drug-abuse experts in Monterey, Calif., last week to exchange observations on PCP and decide how to cope with it.

Federal officials estimate that nearly 7 million people, most of them from 12 to 25, have tried PCP. Last year alone, the drug sent at least 4,000 of its users to hospital emergency rooms, took 100 lives and triggered an untold number or strange, suicidal or homicidal acts. "It's the most toxic of all the substances

I've seen since I started working with street drugs in 1965," says Dr. David Smith, founder of San Francisco's Haight-Ashbury Free Medical Clinic. Adding to PCP's special dangers is the fact that the drug is easy to make and can cause severe reactions with a single dose.

PCP was developed by Parke, Davis & Co. as an anesthetic in 1956. It was effective enough, but it also produced postoperative symptoms of agitation, delirium and disorientation and was thus unacceptable for use in humans. PCP is approved, however, as a veterinary anesthetic. During a "summer of love" concert in June 1967, San Francisco's flower children took up the drug and Smith treated 30 cases of toxic reactions. The drug then fell out of use until a sudden re-emergence in the mid-1970s. Aware of its great popularity, the Federal Drug Enforcement Administration last month classified PCP as a "Schedule II" drug, putting it in the same legal category as barbiturates.

'Wired': PCP can be synthesized by anyone with a modicum of laboratory skill from ingredients obtainable at any chemical-supply house. The major illicit labs are centered in Washington, D.C., Detroit, Los Angeles and Philadelphia. But labs have sprouted in basements and garages all over the U.S. Last year, the DEA put 42 such operations out of business.

Users rarely inject liquid PCP. More likely, they spray the liquid or sprinkle crystals of PCP on plants such as marijuana, tobacco, mint and parsley and smoke it. The drug can also be snorted, or pressed into tablets or capsules for oral use. Although it was originally used as a booster or additive to other street drugs, in recent months at least half of the users of PCP have been taking the drug as their sole means of attaining a high.

Reactions to PCP are totally unpredictable. According to San Francisco psychologist Steven Lerner, most users report that their first experience was a pleasant one. "I feel wired," "I feel powerful," "I feel superior," are typical testimonies. But there are plenty of bad trips. Angel dust, says Dr. Beatrice Kresky of New York's Jamaica Hospital, can make "Grimm's fairy-tale characters come to life. Parents, nurses and doctors appear as monsters or witches, and police cars take on the form of dragons."

Psychotic reactions to PCP mimic the symptoms of paranoid schizophrenia with hallucinatory voices and combative or self-destructive impulses. The drug can also give users a distorted sense of their own bodies; people often feel their arms or legs are growing or shriveling. Users may also suffer loss of bowel or bladder control, slurred speech, inability to walk, jerky eye movements and grimmacing. Acute toxic reactions can last up to a week after a single dose, and the mental effects can linger for more than a month, often recurring in sudden episodes while the patient is apparently recovering. Taken in larger doses, PCP can induce seizures, coma and death.

The sudden emergence of PCP as a major drug has caught doctors without sure-fire methods of diagnosing and treating its ill effects. The drug tends to lodge in fat and brain tissue, and some poison-control centers are using large doses of vitamin C to acidify the urine and hasten its excretion from the body. Mental disturbances have been treated with tranquilizers such as Valium, but physicians can't agree yet whether these drugs reduce the effects of PCP or may actually accentuate them.

Until some of these questions have been answered, the experts at Monterey agree that the best course is to try to educate physicians on diagnosis and treatment. To reach consumers, NIDA is distributing a message about PCP to be aired by television stations throughout the country later this month. It is delivered by Robert Blake, star of TV's "Baretta." "Don't go near it," warns Blake. "It's a rattlesnake and it will kill you."—Matt Clark with Susan Agrest.●

SENATE COMMITTEE MEETINGS

Title IV of the Senate Resolution 4, agreed to by the Senate on February 4, 1977, calls for establishment of a system for a computerized schedule of all meetings and hearings of Senate committees, subcommittees, joint committees, and committees of conference. This title requires all such committees to notify the Office of the Senate Daily Digest—designated by the Rules Committee—of the time, place, and purpose of all meetings when scheduled, and any cancellations or changes in meetings as they occur.

As an interim procedure until the computerization of this information becomes operational, the Office of the Senate Daily Digest will prepare this information for printing in the Extensions of Remarks section of the CONGRESSIONAL RECORD on Monday and Wednesday of each week.

Any changes in committees scheduling will be indicated by placement of an asterisk to the left of the name of the unit conducting such meetings.

Meetings scheduled for Thursday, March 23, 1978, may be found in Daily Digest of today's RECORD.

MEETINGS SCHEDULED

MARCH 24

10:00 a.m.
Banking, Housing, and Urban Affairs
To hold oversight hearings on the impact of building codes on housing rehabilitation.
5302 Dirksen Building

MARCH 31

9:00 a.m.
Commerce, Science, and Transportation
Science, Technology, and Space Subcommittee
To hold hearings on a report by the National Research Council on the space shuttle main engine.
235 Russell Building

APRIL 3

9:00 a.m.
*Environment and Public Works
Transportation Subcommittee
To hold hearings on S. 394, proposed Bridge Replacement and Rehabilitation Act.
4200 Dirksen Building

10:00 a.m.
